3783.9 Inclusion of Billing Forms in File.--Except for no-payment bill situations in which the beneficiary is still confined, the reconsideration file should contain all appropriate billing forms. If a completed bill is not available (e.g., the initial determination was based on the admission notice per § 3719.2) the intermediary will prepare a summary data sheet listing the charges for the various services rendered, as well as any applicable deductible and coinsurance amounts. This information can be obtained from a copy of the provider's bill to the beneficiary (if it was attached to the reconsideration request) or, if the approximate length of stay is known, a "not-less-than" statement can be based on the intermediary's knowledge of the provider's charges per day (visit).

If it is not possible to ascertain from the file that the amount in question (i.e., the amount charged the beneficiary for the items and services received less the deductible and coinsurance amounts applicable) comprises at least $100, the intermediary should contact the provider to obtain this information and attach it to page 4 of Form SSA-2649, Request for Reconsideration of Part A Health Insurance Benefits. If the beneficiary subsequently requests a hearing, this will facilitate the administrative law judge's determination as to whether the monetary requirements necessary for a hearing are present (i.e., whether $100 or more is in controversy).

Making the Reconsideration Determination

3784. EVALUATING THE EVIDENCE AND MAKING THE RECONSIDERATION DETERMINATION

3784.1 General.--Once the evidence as discussed in § 3783 has been obtained, the reconsideration reviewer will make a new, independent, and thorough evaluation of the evidence and prior findings. To insure such a review, the reviewer must be free from any bias in favor of the initial denial decision. On reconsideration, the reviewer is not to rely on any screening assumptions, presumptions, or tolerance rules. Rather, the evidence in file must be sufficient to convince the reviewer and support the finding of the fact that the services were or were not covered under the Medicare law. The reconsideration process, therefore, is not a mechanical application of the same screening guides and tolerance rules as were used in arriving at the initial determination, but all the facts pertaining to the claim must be considered as a whole in order to reach the reconsideration decision. Whenever possible, the reviewer should include original evidence of all material since the reconsideration file represents the entire bureau position.

A. Obtaining an Independent Review.--If possible, the intermediary should maintain a separate and distinct unit to process reconsiderations. This processing unit should not have the same supervisor as the unit processing initial claims. If the size of the reconsideration workload does not warrant the establishment of such a separate unit, the intermediary may use experienced claims reviewers who have had no part in the initial adjudication of the particular claim for which the reconsideration request has been filed. The reconsideration reviewer must be given complete independence to revise the initial determination should the review warrant this action.

If the intermediary has more than one physician-consultant involved in the Medicare claims process and the case is one that must be reviewed by a physician under the guidelines in paragraph C below, a different physician-consultant than the one involved at the initial processing level should review the claim. If the intermediary has the services of only one physician-consultant, the case may be referred to him or her again for expert medical opinion evidence, or to a physician from another program administered by the intermediary, or to a peer review panel. This evidence is then evaluated independently by the reconsideration reviewer together with all the other evidence in the case in order to make the reconsideration determination.

B. Consulting-Physician Review.--The following types of medical issue cases are to be sent to the intermediary's consulting physician for expert medical opinion evidence:

1. All hospital inpatient stay cases in which the intermediary's reconsideration reviewer feels that the full denial of the entire hospital stay should be affirmed, and

2. All partial denial hospital cases and all skilled nursing facility cases in which the amount in controversy (see § 3785.1A) is over $1,000, and

3. If the intermediary's reconsideration reviewer, after examining a reconsideration case which is complete according to the instructions above, has a question concerning the medical facts as presented. If necessary, the consulting physician may seek other expert medical opinion, e.g., from a peer review group.

A case falling into category 1 or 2 above need not be reviewed again by a physician-consultant if during the initial adjudication it was reviewed by a physician-consultant, a complete discussion of the medical facts and a convincing rationale is in file, and no additional medical evidence has been obtained. If, however, the attending physician or the provider has submitted new information, the case is to be reviewed again by a physician-consultant where the criteria in 1 through 3 above apply.

Only those denials which require medical judgment should be referred to a consulting physician. Non-judgmental issues are those based on technical or statutory provisions, such as a qualifying hospital stay and extent of available benefits, and those exclusions contained in the Coverage Issues Appendix.

C. Processing Additional Evidence Submitted by the Physician.-- Cases where the beneficiary's attending physician has submitted additional evidence (e.g., a statement giving his medical opinion or additional clinical findings) should be processed in accordance with the following guidelines:

1. Where the attending physician has submitted evidence other than the provider's medical record supporting a covered level of care, and this information is consistent with the body of evidence obtained from the provider and any other sources, the initial denial should be reversed;

2. If the physician's statement that care was "covered" or was "skilled nursing care" is not supported by the medical facts described in the rest of the evidence obtained, and that evidence established that the services were not covered under the health insurance program, the initial denial decision is to be affirmed;

3. Where the physician submits evidence which is consistent with the preponderance of the evidence obtained from the provider, although there may be some isolated facts, which in the absence of the remaining evidence would support a denial decision (e.g., the nurses' notes indicate that the patient was able to sit up, the doctor's orders show: "may soon be ready for discharge," etc.), the physician's evidence should be given sufficient weight to overcome the reviewer's doubts regarding the reimbursement for the services;

4. If the attending physician has submitted a statement but in light of the other evidence a conflict exists so that the reconsideration reviewer is unable to draw a conclusion regarding the coverage of the services, the attending physician should be requested to clarify the matter. If the physician does not respond, the provider may be able to furnish clarifying information.

D. Documentation Resulting from Physician's Review.-- Upon completion of the intermediary's consulting physician's review, each case should contain the following documentation; (a) a summary of the pertinent facts obtained from the medical record (this may be written by the nonmedical reconsideration reviewer, a nurse or other medical reviewer or the consulting physician); (b) a statement of the medical significance of these facts; and most important (c) a convincing rationale in which the reasons for the physician's conclusion are explained. (These items may be prepared by a nonmedical person in consultation with the physician but the rationale must be signed by the latter.) A mere statement of the consulting physician's conclusion pertaining to the coverage issue adds very little to the evidence in the case.

No reconsideration case should be affirmed or reversed where an unresolved conflict of evidence exists (except as outlined in C3 above) and where evidence essential to adjudication is available but has not been submitted. Furthermore, in cases in which, after careful and reasonably complete documentation, the question of coverage is still in doubt, the doubt should be resolved in favor of the beneficiary.

NOTE: In review of claims no comments, underlinings, or marks of any kind should be placed on evidence since the documents in file may ultimately become exhibits before an administrative law judge or a part of the record in court. (See § 3783.7.)

3784.2 Evaluating the Evidence.-- As indicated above, the reconsideration reviewer will examine the evidence with an open mind. How much weight the reviewer gives to one piece of evidence as compared to another depends on its factual content relative to the primary issue. (For example, the treating physician's opinion that the beneficiary needed a covered level of care, while given considerable weight, is not conclusive in the face of the other evidence to the contrary, e.g., nurses' notes showing that the beneficiary only needed assistance in meeting the activities of daily living.) What the reviewer must look for is evidence and rationale that is clear and convincing. Therefore, there should be no reason to doubt the truth of a fact or set of facts.

If the reviewer is not convinced, or if he believes that additional evidence is needed to establish the facts, the additional evidence is to be requested. Such evidence might be obtained by soliciting the attending physician to answer specific questions in writing. Although reasonable inferences can be drawn in the review of the case, the inference should not extend to the point where presumptions and speculations are used for the basis of the decision rather than documentary evidence. The reviewer, therefore, should not affirm an initial denial decision where an unresolved conflict of evidence exists or where any evidence essential to adjudication has not been submitted or secured. Where, after careful and reasonably complete documentation, the question of coverage is still in doubt, the doubt should be resolved in favor of the beneficiary.

A. Consultation With HCFA.—In those reconsideration cases in which a question of law or policy arises which is not provided for in current instructions, the intermediary may request advice from HCFA. Direct such requests to the appropriate RO. In very complex cases, forward the reconsideration file with the intermediary inquiry to facilitate study of the situation.

B. Correctness of Initial Determination Is Questioned.—On occasion, an independent review of an initially denied portion of a stay may raise questions in the mind of the intermediary's reconsideration examiner as to the correctness of the initial payment decision. It was not intended that the appeals procedure be used as a vehicle to audit favorable initial determinations to the detriment of the party which is appealing the denied portion of the claim. Also, since the beneficiary and the provider would have initially been notified that part of the stay and services were covered under the Medicare program, a subsequent reversal of the initial favorable action could generate serious problems affecting not only the beneficiary and the provider, but the intermediary and HCFA as well.

A reconsideration determination more adverse to the party than the initial determination might cause the party to feel that he has been penalized for requesting that the claim be reconsidered. Very sensitive questions could be raised as to why such corrections are made only at the time the party is appealing the denied part of the claim. In addition, negative conclusions regarding the integrity of the initial adjudicative process might also be drawn. In light of these possibilities, every effort must be undertaken to dispel such impressions.

3784.3 Review Prior to Reversal of Initial Payment Determination.-- To assure that the closest professional attention is given to reconsideration cases which apppear to warrant a reversal of the initial payment decision, the following multi-level review procedure is to be made a part of the intermediary claim processing operation before the reconsideration determination is completed.

- o Review the file carefully to determine whether there was any evidence that supported the decision with respect to the prior allowed services. The intermediary's reconsideration reviewer should use the adjudication principles which existed at the time the initial decision was made.

- o If the reviewer cannot justify the initial payment decision in whole or in part and if the question at issue is a medical one, refer it to the intermediary's consulting physician for his expert opinion on whether the initially approved stay was, in fact, covered.

- o If the physician also finds that the initial payment decision should be reversed, refer it to the Medicare Coordinator for his review and written evaluation.

- o When the reviewer is questioning cases involving nonmedical issues and believes that there is no basis for the initial payment, refer the case to the Medicare Coordinator as in the preceding case.

- o Where a case has been reviewed as indicated above, and despite careful documentation the question of coverage is still in doubt, the doubt should be resolved in favor of the original payment decision.

3784.4 Preparing the Reconsideration Determination.-- The determination is to be written using guide determination outlines and standard paragraphs furnished by HCFA whenever possible. Individual case circumstances may warrant certain adaptations in the standard material and you may exercise judgment in such cases.

A. Contents of the Determination.-- The determination should basically include:

- o A statement of the jurisdictional factors--dates on which both provider and intermediary notices relating to the initial determination were provided the beneficiary or his representative (see Exhibit 5 for an illustration), reason for the denial, date of the request for reconsideration;
- o Basis for the reconsideration request;
- o The issue involved;

- A brief nontechnical statement of the applicable provisions of the law and regulations. (If an attorney or other professional person is acting on the party's behalf, include specific references to the Act as indicated in the parenthetical phrases in the guide language.);

- A statement of the facts and evidence as presented (place specific emphasis on the pertinent medical evidence in file which is to be related in chronological order);

- The rationale (see subsection B.);

- Conclusions based on findings of fact and applicable law and regulations;

- In cases involving a full or partial denial on the basis of not medically necessary care or custodial care, a brief nontechnical explanation of the waiver of liability provision and its applicability to the case (see exhibit 5 for an illustration of this);

- Liability determination. In making the required determinations on the extent and assignment of the liability of both the beneficiary and provider at the reconsideration level, it may be necessary to review and utilize the initial denial notice preparation procedures including those on indemnification actions described in § 3443, where assignments of liability were not made initially or are being modified or revised; and

- Where applicable, consider the intermediary's determination whether a provider is without fault with respect to an overpayment. (See §3708.)

B. Rationale.-- Explain, based on the law, regulations, guidelines, and the facts of the case, the reasons for the decision reached. Describe the weight attributed to those items in the medical evidence determined to be significant in arriving at the decision. Reconcile any significant inconsistency or conflict. Be fully responsive to the beneficiary's and, if applicable, the attending physician's allegations.

C. Sensitive Issues and Use of Lay Terminology.-- Omit any information that may be disturbing or embarrassing to the beneficiary or to the source of the medical information, as well as any references that might interfere with medical management or impair the doctor-patient relationship. For example, if the evidence shows that the beneficiary has a malignancy, and there is no indication that the beneficiary is aware of his affliction, do not make specific reference to it.

Also, the diagnosis and other medical information included in the reconsideration determination should be written in lay terms, e.g., concussion, broken hip, arthritis, heart condition. Do not use diagnoses such as hypochloremia with alkalosis, focal atelectosis in both lungs. A reconsideration determination addressed to the beneficiary's attorney or other professional representative (as distinguished from a familial representative) can be more explicit as far as the diagnosis is concerned.

3784.5 Completing the Reconsideration Determination.--

NOTE: A reconsideration decision that noncovered care will be totally or partially paid for under the waiver of liability provision requires a full determination and cover letter since the coverage decision remains unfavorable.

A. Signature.-- The reconsideration determination should bear the signature of the supervisor of the person writing it (use exhibit 5) while the cover letter and the statutory exclusion determinations should bear the signature of the Medicare Coordinator (or the equivalent). (See exhibit 10.) The appropriate title is to be shown under the person's name.

B. Copies.-- Prepare at least three copies of the determination. (If prepared by a reconsideration intermediary for a resident intermediary, send one of the copies to the latter.) Send the original to the party which initiated the reconsideration request, place one in the case file, and keep one copy. Additional copies are required if there is another party involved.

C. The Reconsideration Determination Cover Letter.-- Prepare the reconsideration determination cover letter on standard Medicare letterhead. The name of the resident intermediary appears at the upper right-hand corner of the letter. (See exhibit 10.) Address the letter to the party which initiated the request. Send a copy of the cover letter and determination to any other party or the authorized representative. The cover letter should bear the signature of the resident intermediary's Medicare Coordinator (or the equivalent). All cover letters should include a statement referring post determination questions and beneficiary correspondence to the resident intermediary. (See exhibits 4 and 10.)

Prepare at least three copies of the cover letter (four if prepared by the reconsideration intermediary). The file copy of the letter must be identical to the original sent to the party including the date shown on the upper right-hand side. Attach the cover letter to the reconsideration determination and distribute as shown in subsection B. In partial reversal cases, modify the language in the cover letter accordingly.

3784.6 Full Reversal Determinations.-- In cases where the resident intermediary or the reconsideration intermediary determines that the initial determination should be completely reversed, that is, from a fully or partially unfavorable determination to a fully favorable one, the reconsideration determination and cover letter may be combined in one document. It need only give a brief statement of the facts, the applicable legal provisions, and the rationale used in making the determination (see exhibit 4).

Should you find a long form reconsideration determination necessary and appropriate in fully reversing the initial decisions of coverage and liability in an individual case, use a cover transmittal letter similar to exhibit 4. Instead of including facts and rationale as indicated for a single short form document, the cover letter should include the opening and closing paragraphs as shown in exhibit 4 with an inserted statement similar to "The revised determination is enclosed."

3784.7 Notice of Further Appeal Rights.—

A. Beneficiary.—The cover letter to the reconsideration determination (exhibit 10) notifies the beneficiary that if he believes that the determination is not correct and the amount of benefits in question is $100 or more, he has a right to a hearing. If a hearing is desired, it must be requested within 60 days of the date of receipt of the reconsideration notice. If you receive any post reconsideration determination correspondence requiring a reply, the reply must include a statement informing the beneficiary of his right to a hearing, the date of the original reconsideration determination notice, and an appropriate explanation where the time limit has expired or is nearing expiration. (See § 3781.9.)

B. Provider in Waiver of Liability Cases.—A provider dissatisfied with the reconsideration determination made pursuant to its request, or to which it is a party, has the same right to a hearing as the beneficiary.

If the provider is a party to the reconsideration (i.e., the beneficiary has filed for reconsideration) and the reconsideration determination provides that Medicare payment will be made for the entire stay under the waiver of liability provision, the provider has the right to further appeal.

3784.8 Instructions for Completing Form HCFA-352 Part A Reconsideration Input Record (see exhibit 1).—The following instructions pertain to the preparation of this form. The information supplied will be processed by computer and is used by HCFA for statistical purposes. Since it is imperative that the coded information be as accurate as possible, no single document should be used solely without cross verification of data. Upon completion of a reconsideration determination or revised reconsideration determination, complete this form, the reconsideration intermediary makes a copy for the claim file and mails the original immediately to :

Health Care Financing Administration
Reconsideration Evaluation Branch, BPO
P.O. Box 770
Baltimore, MD 21203

NOTE: The preparation of the HCFA-352 supersedes the completion of page 4 of the HCFA-2649. A future revision to the HCFA-2649 will reduce it to a 2-part form with the elimination of pages 3 and 4.

Complete the following data elements. They are left justified, and do not use embedded blanks or special characters unless specifically stated. Also, code all alphabetical letters as CAPITAL letters.

1. INITIAL OR REVISION RECORD.—Check the appropriate block.

2. RECORD IDENTIFIER.—This field is pre-printed and constant.

3. HEALTH INSURANCE CLAIM NUMBER.—These positions are alpha-numeric and contain a maximum of 12 (including the suffix) positions. Once this number is entered into the system it cannot be changed by submitting a revision form. Examples of HI Claim Numbers are:

218401964A
WD234565983
218401987W7
MA123456

NOTE: In situations involving another reconsideration determination with the same HI Claim Number and Admission/HHA Date, an override "A" must be placed in the 12th position of the HI Claim Number field to allow acceptance into the system. Any subsequent reconsideration determinations must consecutively show the override letters "B" through "I".

4. ADMISSION/HOME HEALTH AGENCY DATE.—These positions are numeric and contain a 6-position valid date—MMDDYY. On Home Health Agency (HHA) cases enter the first day of the period in question. The Admission/HHA Date must be earlier than the current date. Once this date is entered into the system, it cannot be changed by submitting a revision form.

5. SURNAME.—Enter the last name of the beneficiary (up to 12 characters) who received the services.

6. GIVEN NAME.—Enter the first name of the beneficiary (up to 5 characters) who received the services.

7. AMOUNT IN CONTROVERSY.—This field consists of one numeric character. Code it based on the amount in controversy following the reconsideration dertermination, since its purpose is to show whether further appeal is possible.

8. PROVIDER NUMBER.—Enter the providers assigned 6-position number. If the case coded involves a provider which does not participate in the Medicare program, show 990999 (hospital), 995999 Skilled Nursing Facility (SNF), and 997999 (HHA). However, the identification numbers assigned to Federal and emergency-only facilities consist of 6-position alpha-numeric numbers, e.g., 21521F or 21001E. The 3rd numeric position always determines the type of facility:

0, 1, 2, 3, 4 = Hospital
5, 6 = (SNF)
7 = (HHA)

9. REQUESTED BY.—This field is blank or contains a one numeric character based on who filed the request for hearing.

10. RECONSIDERATION FILED.—These positions are numeric and contain a 6-position valid date—MMDDYY. Code the date the claim is received by the Social Security office. If a Social Security office date stamp is not available, or if not filed at a Social Security office use the date received by the intermediary. This date MUST be later than the Admission/HHA date.

11. RESIDENT INTERMEDIARY.—This field is completed by the reconsideration intermediary in cases where they are servicing a resident plan. Otherwise, it is blank.

12. RESIDENT INTERMEDIARY RECEIPT DATE.—This field is only completed when the resident intermediary number is present and it contains a 6-position valid date—MMDDYY. It can either be equal to or greater than the reconsideration filed date.

13. RECONSIDERATION INTERMEDIARY.—This field contains the 5-position number assigned to the plan responsible for processing the Reconsideration Determination.

14. RECONSIDERATION INTERMEDIARY RECEIPT DATE.—Complete this field always with a date that is equal to or later than the Reconsideration Filed Date and the Resident Intermediary Receipt Date (if present).

15. RECONSIDERATION COMPLETED DATE.—These positions are numeric and contain a 6-position valid date—MMDDYY. Enter the date you completed your final action and mailed the reconsideration determination. This date MUST be equal or later than the reconsideration intermdiary receipt date.

16. RECONSIDERATION DECISION.—This item consists of one numeric character which describes the determination made on the reconsideration.

NOTE: A waiver of liability determination (section 1879 of the Act), either favorable or unfavorable, is made by the intermediary at the initial processing level for those cases involving custodial services or services not medically necessary or reasonable. If the initial determination was unfavorable but on reconsideration a favorable decision is made permitting payment under the waiver of liability provision, the case should be considered a reversal or partial reversal (depending on number of days reversed). It is considered a reversal or partial reversal notwithstanding the fact that the initial coverage denial is reaffirmed. In those cases where only the beneficiary's liability is waived (i.e., the provider is still found liable) and no program payment can be made under the waiver of liability provision, the case is still counted as a reversal or partial reversal.

17. ISSUE.—This item consists of one numeric character which reflects the primary issue involved. Often, more than one issue is in question on the same period of services or provider stay. However, enter only the primary issue.

18 GOOD CAUSE.—Enter a 1 in this position if as a result of the reconsideration determination the facts show that "good cause" was developed and allowed. Leave this position blank if there is no indication that "good cause" is an issue.

19. PSRO INVOLVEMENT.—Enter a 1 in this position if the initial determination reflects PSRO involvement. Otherwise, this position is blank.

20. WAIVER OF LIABILITY.—Enter a 1 in this position if the file indicates the intermediary has approved and is making payment for services under the waiver of liability provision at the reconsideration processing level. Leave this position blank if there is no indication that waiver of liability was involved in the reconsideration decision.

21. CONGRESSIONAL INTEREST.—Enter a 1 in this position if there is any evidence of Congressional interest or involvement in the claim at the reconsideration level. Otherwise, this position is blank.

FORM HCFA - 352 (2-82) (FORMERLY HCFA - 4530)

3784.9 Preventing Duplicate Payment in Reversal Cases.—Prior to making payment to a provider of services in full or partial reversal cases, ascertain in each case whether the provider has been reimbursed for the previously denied services from another source and, if so, withhold the Medicare reimbursement until the provider has assured, in writing, that the prior payment has been refunded. (See § 3401.)

3784.10 Reconsideration Follow-Ups.—A beneficiary or his representative may contact a Social Security office for the status of a reconsideration request. When 90 days or more have elapsed since the date the reconsideration action request was filed, that office prepares a Form HCFA-2442, Part A Reconsideration Status, and forwards it to the intermediary making the initial determination. (See exhibit 9.) Enter the expected completion date for processing the reconsideration. If it is not possible to furnish the date, give an explanation for the delay. When a resident intermediary receives a request for the determination status and the reconsideration case file has been forwarded to the reconsideration intermediary for processing and adjudication, call the reconsideration intermediary for status. The resident intermediary completes the form HCFA-2442 and returns it to the Social Security office. Where the reconsideration has been completed and the case file has been sent to the reconsideration intermediary, show this on the form HCFA-2442. Include the date the file was sent and return the form HCFA-2442.

3784.11 Correspondence Received Concerning a Reconsideration Request.—

A. Inquiry Received While Reconsideration Is Pending.—Prepare a reply and include the original incoming correspondence and a copy of the reply in the reconsideration folder. Ordinarily reconsideration intermediaries do not receive correspondence on a case being processed for a resident intermediary. However, if they do, prepare a reply on behalf of the resident intermediary, and include the original incoming correspondence and a copy of the reply in the case folder. Send copies to the resident intermediary.

B. Inquiry Received After the Reconsideration Case Has Been Completed.—If an inquiry is received and the reconsideration case has been completed, route the original inquiry to the intermediary which processed the reconsideration request.

3784.12 Effect of a Reconsideration Determination and Effectuation.—A reconsideration determination is a final and binding determination of the Secretary unless it is reopened and revised, or unless a hearing is requested by a party entitled to do so. Where a reconsideration determination revises an initial determination, effectuate the determination at the earliest possible moment. Do not delay the effectuation because a hearing has been requested.

3784.15 STANDARD RECONSIDERATION DETERMINATION GUIDE LANGUAGE.—The section contains standard Reconsideration Determination guide language similar in many respects to the standard initial denial language except for the listing of statutory citations. Additionally, it contains an outline of the proper paragraphs and sequence for use, determination letters for use in technical denials, cover letters, and a Reconsideration status form.

It is recognized that the material, as guide language and model cover letters, are subject to some modification by the respective intermediaries without HCFA approval, if necessary to properly address specific issues and/or special circumstances which may arise with respect to individual case determinations.

(STANDARD PARAGRAPHS TO BE USED IN SEQUENCE)

EXHIBIT II

STANDARD PARAGRAPHS FOR RECONSIDERATION DETERMINATIONS

STANDARD PARAGRAPH 1

A. USE IF NO PROGRAM PAYMENT - WAIVER OF LIABILITY (SECTION 1879) APPLIES (PROVIDER IS LIABLE FOR ALL OF STAY). On (date) the (name of intermediary) notified you/M________ that no hospital insurance benefits could be allowed for your/his/her stay at (name of provider) (from date through date). The notice also stated that the provider must bear the cost for these services.

B. USE IF NO PROGRAM PAYMENT - WAIVER OF LIABILITY (SECTION 1879) APPLIES (PROVIDER IS LIABLE FOR PART OF THE STAY AND THE PATIENT IS LIABLE FOR THE REMAINDER OF THE STAY). On (date) the (name of intermediary) notified you/M________ that no hospital insurance benefits could be allowed for your/his/her stay at (name of provider) from (date through date). The notice also stated that the provider must bear the cost of these services from (date through date) and that you/he/she are responsible for the remainder of your/his/her inpatient stay.

C. USE IF PARTIAL PROGRAM PAYMENT (PART OF THE STAY WAS PAID FOR UNDER THE WAIVER AND PROVIDER IS LIABLE FOR PART OF THE STAY AND THE PATIENT IS LIABLE FOR THE REMAINDER OF THE STAY). On (date) the (name of intermediary) notified you/M________ that Medicare would pay for the services provided at (name of provider) from (date through date) but the cost of services provided from (date through date) would be the provider's responsibility.

D. USE IF PARTIAL PROGRAM PAYMENT (SOME OF THE SERVICES WERE NONCOVERED AND THE PATIENT IS LIABLE). On (date) the (name of provider) notified you/M________ that Medicare benefits would be paid for the services you received from (date through date), but the services you/he/she received after that date were not covered and you/he/she were responsible for the charges. On (date), the (name of intermediary) also notified you/him/her of this decision.

E. USE IF PARTIAL PROGRAM PAYMENT (SOME OF THE SERVICES WERE NONCOVERED AND THE PROVIDER IS LIABLE). On (date) the (name of intermediary) notified you/M________ that Medicare would pay for the services provided at (name of provider) from (date through date) but the services you/he/she received after that date were not covered. The notice also stated that the cost of these services was the provider's responsibility.

F. USE IF NO PROGRAM PAYMENT (PATIENT IS LIABLE FOR ALL OF STAY). On (date) the (name of provider) notified you/M________ that the services you/he/she received from (date through date) were not covered by Medicare. On (date) the (name of intermediary) advised you/him/her that it agreed with that decision.

G. USE IF NO PROGRAM PAYMENT (WAIVER DOES NOT APPLY). On (date the (name of intermediary) notified you/M________ that hospital insurance benefits could not be paid for your/his/her stay at (provider) beginning (date).

STANDARD PARAGRAPH 2

A. BENEFICIARY FILED. On (date) you/M________ requested reconsideration of your/his/her claim for hospital insurance benefits, including the determination as to the party liable for the services. (On (date) the (name of provider) was notified that the request had been filed and that it would be considered a party to the reconsideration determination.)

B. PROVIDER FILED. On (date) the (name of provider) requested reconsideration of your/his/her claim for hospital insurance benefits including the determination as to the party liable for the services. On (date) you/he/she were notified the request had been filed and that you/he/she are considered as a party to the determination.

STANDARD PARAGRAPH 3

There are two issues that must be considered in this determination. The first issue to be determined is whether the level of inpatient hospital care the beneficiary received is covered by Medicare. Inpatient hospital care furnished a patient is covered under Medicare, but only if such care is reasonable and necessary for the treatment or diagnosis of the patient's illness or injury and is of a type that can only be provided on an inpatient hospital basis. Inpatient hospital care is not considered reasonable and necessary if it can be safely and adequately provided in a skilled nursing or less costly type of facility or on an outpatient basis. The second issue, if the case is found to be noncovered, is whether (M_______) (name of provider) knew or could reasonably be expected to know that the services (he/she/you) received for the period in question were not covered by the Medicare program.

STANDARD PARAGRAPH 4

There are two issues that must be considered in this determination. The first issue to be determined is whether the inpatient tuberculosis hospital care the beneficiary received is covered under section 1814(a)(2)(B) of title XVIII of the Social Security Act. Inpatient tuberculosis hospital care is covered if it must be provided on an inpatient basis, by or under the supervision of a physician, for the treatment of tuberculosis, during periods when the care can reasonably be expected to improve the condition or render it noncommunicable. The second issue, if the case is found to be noncovered, is whether (M_______) (name of provider) knew or could reasonably have been expected to know that the services (he/she/you) received for the period in question were not covered by the Medicare program.

STANDARD PARAGRAPH 5

There are two issues that must be considered in this determination. The first issue to be determined is whether the inpatient psychiatric hospital care the beneficiary received is covered by section 1814(a)(2)(A) of title XVIII of the Social Security Act. Inpatient care in a psychiatric hospital is covered by Medicare only if it constitutes "active treatment". "Active treatment" means that the patient received physician-supervised and evaluated services under an individual treatment or diagnostic plan which are expected to improve the patient's condition.

The second issue, if the case is found to be noncovered, is whether (M_______) (name of provider) knew or could reasonably be expected to know that the services (he/she/you) received for the period in question were not covered by the Medicare program.

STANDARD PARAGRAPH 5A

There are two issues that must be considered in this determination. The first issue to be determined is whether the inpatient psychiatric hospital care the beneficiary received is covered under section 1814(a)(2)(A) of title XVIII of the Social Security Act. Inpatient care in a psychiatric hospital for a patient needing nonpsychiatric medical or surgical care is covered by Medicare if a hospital level of care is required, the hospitalization in a psychiatric rather than a general hospital is required due to the patient's mental condition, and a physician certifies that these condition are met. The second issue, if the case is found to be noncovered, is whether (M_______) (name of provider) knew or could reasonably be expected to know that the services (he/she/you) received for the period in question were not covered by the Medicare program.

Standard Paragraph 5B

There are two issues that must be considered in this determination. The first issue to be determined is whether payment can be made under section 1812(b)(3) of the Social Security Act for inpatient psychiatric hospital care the beneficiary received after (date of beneficiary's 190th psychiatric hospital day). Medicare will make payment for up to 190 days of covered care in a participating psychiatric hospital during a beneficiary's lifetime. The second issue, if the case is found to be noncovered, is whether (M_______) (name of provider) knew or could reasonably be expected to know that the services (you/he/she) received for the period in question were not covered by the Medicare program.

Standard Paragraph 6

The issue to be determined is whether the beneficiary's use of a private room was medically necessary. When Medicare makes payment under the provisions of section 1861(v)(2)(A) of title XVIII of the Social Security Act to a hospital or skilled nursing facility for care provided in a private room, the provider may charge the beneficiary an additional amount for private accommodations requested by the beneficiary unless ordered by a physician for reasons of medical necessity. Medical reasons exist where semiprivate accommodations:

1. Would endanger the beneficiary's health or recovery,
2. Would endanger another patient's health or recovery,
3. Would be inappropriate because the beneficiary suffers from a communicable disease; or
4. Are not available and the beneficiary requires immediate inpatient care.

Standard Paragraph 7

The issue to be determined is whether the inpatient care the beneficiary received is covered by Medicare, or is excluded under section 1862(a)(10) of title XVIII of the Social Security Act as services provided in connection with the care, treatment, filling, removal or replacement of teeth or structure directly supporting teeth. Inpatient hospital services in connection with noncovered dental care are covered by Medicare only when a beneficiary requires active inpatient hospital treatment of an underlying medical condition.

Standard Paragraph 8

The issue to be determined is whether the level of inpatient hospital care the beneficiary received is covered under section 1862(a)(1) of title XVIII of the Social Security Act. Inpatient hospital care furnished a patient is covered by Medicare only if such care is reasonable and necessary for the treatment or diagnosis of the patient's illness or injury and can only be provided on an inpatient hospital basis. Inpatient hospital service in connection with a diagnostic study would be considered reasonable and necessary only if the patient's condition or the nature of the diagnostic procedures requires the constant availability of physicians as well as the use of complex medical equipment and the type of care generally associated with inpatient hospitalization.

Standard Paragraph 9

The issue to be determined is whether the inpatient hospital services the beneficiary received are covered by Medicare or excluded by a provision of the law (section 1862(a)(10) of title XVIII of the Social Security Act) which prohibits payment for services received in connection with cosmetic surgery not required for the prompt repair of an accidental injury or for improvement of the functioning of a malformed body member.

Standard Paragraph 10A - (Applicable to SNF Stays Begun Prior to December 5, 1980)

There are two issues that must be considered in this determination. The first issue to be determined is whether the care the beneficiary received is covered by Medicare. Skilled nursing benefits are covered under section 1814(a)(2)(C) of title XVIII of the Social Security Act for individuals, who, following hospitalization, need on a daily basis for a condition treated in the hospital, skilled nursing services or skilled rehabilitation services which as a practical matter can only be provided in a skilled nursing facility on an inpatient basis. Skilled services must be furnished by or under the general supervision of professional medical personnel to assure the safety of the patient and to achieve the medically desired result. When individuals do not require such skilled services on a daily basis following hospitalization (or within 14 days following the last of a covered period of extended care services) or when, as a practical matter, the provision of such services does not require that they be admitted as inpatients to a skilled nursing facility, their care in such a facility is not covered by Medicare. The second issue, if the case is found to be noncovered, is whether (M _____) (name of provider) knew or could reasonably be expected to know that the services (you/he/she) received for the period in question were not covered by the Medicare program.

Standard Paragraph 10B - (Applicable to SNF Stays Begun December 5, 1980 and later)

There are two issues that must be considered in this determination. The first issue to be determined is whether the care the beneficiary received is covered by Medicare. Skilled nursing benefits are covered under section 1814(a)(2)(C) of title XVIII of the Social Security Act for individuals, who, following hospitalization, need on a daily basis for a condition treated in the hospital, skilled nursing services or skilled rehabilitation services which as a practical matter can only be provided in a skilled nursing facility on an inpatient basis. Skilled services must be furnished by or under the general supervision of a professsional medical personnel to assure the safety of the patient and to achieve the medically desired result. When individuals do not require such skilled services on a daily basis following hospitalization (or within 30 days following the last day of a covered period of extended care services) or when, as a practical matter, the provision of such services does not require that they be admitted as inpatients to a skilled nursing facility, their care in such a facility is not covered by Medicare. The second issue, if the case is found to be noncovered, is whether (M ____) (name of provider) knew or could reasonably be expected to know that the services (you/he/she) received for the period in question were not covered by the Medicare program.

Standard Paragraph 11

There are two issues that must be considered in this determination. The first issue is whether the home health services the beneficiary received are covered under § 1861(n) of Title XVIII of the Social Security Act.

A-1 (Applicable to services rendered prior to July 1, 1981) Prior to July 1, 1981, an individual was eligible for home health benefits only if he required intermittent skilled nursing care or physical or speech therapy. Skilled nursing care is that type of service which must be performed by or under the direct supervision of a licensed nurse to assure the safety of the patient and to achieve the medically desired results. Services which can be rendered safely and effectively by a nonmedical person may not be considered skilled nursing services, regardless of who actually performs or supervises them.

A-2 (Applicable to services rendered July 1, 1981 and later) An individual is eligible for home health benefits only if he requires intermittent skilled nursing care or physical, speech or occupational therapy. Skilled nursing care is that type of service which must be performed by or under the direct supervision of a licensed nurse to assure the safety of the patient and to achieve the medically desired results. Services which can be rendered safely and effectively by a nonmedical person may not be considered skilled nursing services, regardless of who actually performs or supervises them.

B-1 (Applicable to services rendered prior to July 1, 1981) Prior to July 1, 1981, an individual was eligible for home health benefits only if he required skilled nursing care on an intermittent basis or physical or speech therapy. "Intermittent" is defined as the need for a medically predictable skilled nursing service at least once every 60 days. Where a condition exists which would clearly establish that the recurring need for skilled nursing services is medically predictable less frequently than once every 60 days such services would not be covered by Medicare.

B-2 (Applicable to services rendered July 1, 1981 and later) An individual is eligible for home health benefits only if he requires skilled nursing care on an intermittent basis or physical, speech or occupational therapy. "Intermittent" is defined as the need for a medically predictable skilled nursing service at least once every 60 days. Where a condition exists which would clearly establish that the recurring need for skilled nursing services is medically predictable less frequently than once every 60 days such services would not be covered by Medicare.

C-1 (Applicable to services rendered prior to July 1, 1981) Prior to July 1, 1981, an individual was eligible for home health benefits only if he required skilled nursing care on an intermittent basis, or physical or speech therapy. Physical therapy is defined as those services prescribed by a physician which require the skills of a qualified physical therapist and are peformed by or under the supervision of such a therapist.

C-2 (Applicable to services rendered July 1, 1981 and later) An individual is eligible for home health benefits only if he requires skilled nursing care on an intermittent basis, or physical, speech, or occupational therapy. Physical therapy is defined as those services prescribed by a physician which require the skills of a qualified physical therapist and are performed by or under the supervison of such a therapist.

D. (Applicable to services rendered prior to July 1, 1981) Prior to July 1, 1981, home health services are covered by the hospital insurance part of Medicare only if the person has previously had a medically necessary inpatient stay in a qualified hospital. The inpatient stay must have been for a period of at least 3 consecutive days. The day of discharge from the hospital is not counted as a hospital inpatient day.

E. Applicable to services rendered prior to July 1, 1981) Prior to July 1, 1981, home health services are covered by the hospital insurance part of Medicare only if a physician has established a plan of treatment within 14 days after the patient's discharge from a medically necessary 3 day qualifying hospital stay, or if later, within 14 days after a covered stay of any duration in a skilled nursing facility; the day of discharge from the hospital or skilled nursing facility is not counted as an inpatient day.

F. For home health benefits to be covered by Medicare, a beneficiary must be confined to his home. Generally, a beneficiary will be considered to be confined to his home if he has a condition due to an illness or injury which restricts his ability to leave his home except with the aid of supportive devices such as crutches, cane, wheelchair, walker, the assistance of another person, or the use of special transportation.

G. To be covered by Medicare, home health services must be furnished in a place of residence used as the beneficiary's home. A beneficiary's home may include an apartment, a relative's home or a home for the aged. A hospital or skilled nursing facility, whether participating in Medicare or not, may not be considered a place of residence.

H-1 (Applicable to services rendered prior to July 1, 1981) Prior to July 1, 1981, home health services are covered under Medicare only if a person needs intermittent skilled nursing care or physical or speech therapy services for a condition for which he was treated when he was an inpatient in a hospital or skilled nursing facility.

H-2 (Applicable to services rendered July 1, 1981 and later) Home health services are covered under Medicare only if a person needs intermittent skilled nursing care or physical, speech, or occupational therapy services.

I-1 (Applicable to services rendered prior to July 1, 1981) Prior to July 1, 1981, home health benefits are covered by Medicare only if an individual requires skilled nursing care on an intermittent basis or physical or speech therapy. The giving of intramuscular injections of medication is considered skilled nursing care. However, for the services of the nurse to be covered under Medicare, the injection must be a reasonable and necessary treatment for the condition for which it is given. Vitamin B-12 injections are considered an effective treatment for only certain medical conditions such as certain anemias, gastrointestinal disorders or neuropathies. If vitamin B-12 injections are not given to treat one of these conditions, the injections are not considered to be reasonable and necessary. The second issue, if the case is found to be noncovered, is whether (M ____) (name of provider) knew or could reasonably be expected to know that the services (you/he/she) received for the period in question were not covered by the Medicare program.

I-2 (Applicable to services rendered July 1, 1981 and later) Home health benefits are covered by Medicare only if any individual requires skilled nursing care on an intermittent basis or physical, speech, or occupational therapy. The giving of intramuscular injections of medication is considered skilled nursing care. However, for the services of the nurse to be covered under Medicare, the injection must be a reasonable and necessary treatment for the condition for which it is given. Vitamin B-12 injections are considered an effective treatment for only certain medical conditions such a certain anemias, gastrointestinal disorders or neuropathies. If vitamin B-12 injections are not given to treat one of these conditions, the injections are not considered to be reasonable and necessary. The second issue, if the case is found to be noncovered, is whether (M ____) (name of provider) knew or could reasonably be expected to know that the services (you/he/she) received for the period in question were not covered by the Medicare program.

Standard Paragraph 12A (Applicable to SNF Stays Begun Prior to December 5, 1980)

The issue to be determined is whether the admission of the beneficiary to the skilled nursing facility after discharge from the qualifying hospital or earlier SNF stay was a timely admission as defined in section 1861(i) of title XVIII of the Social Security Act. Skilled nursing services are covered by Medicare only if admission to the skilled nursing facility and the receipt of a covered level of skilled nursing care occur within a specified period of time. Admission and receipt of covered care must occur:

1. within 14 days after discharge from a 3-day qualifying hospital stay; or

2. within 28 days after discharge from a 3-day qualifying hospital stay if appropriate skilled nursing facility accommodations were not available within 14 days in the area in which the patient resides, provided covered care was required within 14 days of such a discharge and continued to be required through the time of admission; or

3. within such time as it would be medically appropriate to begin an active course of treatment where the patient's condition is such that skilled nursing facility care would not be medically appropriate within 14 days after discharge from a qualifying hospital stay.

Standard Paragraph 12B (Applicable to SNF Stays Begun December 5, 1980 and Later)

The issue to be determined is whether the admission of the beneficiary to the skilled nursing facility after discharge from the qualifying hospital or earlier SNF stay was a timely admission as defined in section 1861(i) of title XVIII of the Social Security Act. Skilled nursing services are covered by Medicare only if admission to the skilled nursing facility and the receipt of a covered level of skilled nursing care occur within a specified period of time. Admission and receipt of covered care must occur:

1. within 30 days after discharge from a 3-day qualifying hospital stay; or

2. within such time as it would be medically appropriate to begin an active course of treatment where the patient's condition is such that skilled nursing facility care would not be medically appropriate within 30 days after discharge from a qualifying hospital stay.

Standard Paragraph 13

The issue to be determined is whether the care the beneficiary received is covered under ¢ 1814(a)(2)(C) of Title XVIII of the Social Security Act, for the period in question. Medicare does not cover skilled nursing care unless it is required for the continued treatment of a condition for which the patient received covered inpatient hospital care prior to transfer to the SNF or unless it is care for the treatment of a condition which arose while the patient was receiving covered care in a skilled nursing facility.

Standard Paragraph 14

Following a stay at ___________ Hospital from _______ through _____ M _______ was admitted to the skilled nursing facility on ____ with the diagnosis/diagnoses of _______

Standard Paragraph 15

Following a stay at ___________ Hospital/Skilled Nursing Facility form through _____ M ______ began receiving home health services on ____.

Standard Paragraph 16

The medical evidence in M ___________ file shows. (CONTINUE WITH RECITATION OF PERTINENT MEDICAL EVIDENCE WITH APPROPRIATE PARAGRAPHING).

Standard Paragraph 17

The medical evidence in M __________ file shows that M ______ was admitted to the ____________ Hospital on ______________ with the diagnosis/diagnoses of ________. (CONTINUE WITH RECITATION OF PERTINENT MEDICAL EVIDENCE WITH APPROPRIATE PARAGRAPHING).

Standard Paragraph 18

A review of the medical records shows ______________________ (CONTINUE WITH THE RATIONALE AND/OR APPLICABLE GUIDE LANGUAGE WITH APPROPRIATE PARAGRAPHING).

Standard Paragraph 19

Based on the above medical evidence, it is found that the services rendered M _____ from (date) through (date) (beginning date), do not constitute covered care under the Medicare program.

In conclusion, it is determined that:

(Discuss specifics) ____________________________________.

Standard Paragraph 20

Because certain care has been found to be (not reasonable and necessary/custodial), a determination must be made in accordance with section 1879 of title XVIII of the Social Security Act, with respect to the issue of whether the beneficiary and/or the provider knew or could reasonably have been expected to know that the services would not be covered under Medicare. It has been determined that (discuss specifics). Consequently, liability for the noncovered services provided from (date) through (date) (or beginning date) rests with (provider, beneficiary or Medicare).

Standard Paragraph 21

In conclusion, it is determined that:
(Discuss specifics) ____________________________________.

Exhibit III

OPTIONAL GUIDE LANGUAGE PARAGRAPHS TO BE USED IF APPROPRIATE IN PART A RECONSIDERATION DETERMINATIONS

1. SKILLED NURSING CARE AND OTHER SKILLED REHABILITATION SERVICES. Although (M______________) (you) received skilled nursing care and/or other skilled rehabilitation services consisting of (discuss name of drugs, if intramuscular and other skilled services rendered with specific reference to frequency given) ___________, these procedures were not required or furnished on a daily basis as required by law to permit payment.

2. VITAMIN B-12 INJECTIONS (FOR HHA SERVICES ONLY). Although (M______) (you received vitamin B-12 injections, there is no indication that those injections were given for any specific medical condition for which vitamin B-12 injections are recognized as specific and effective treatment such as in treating certain anemias, gastrointestinal disorders or neuropathies. Therefore, no program payment can be made for skilled nursing care as this service was not considered medically necessary in this case.

3. CATARACT CONVALESCENT. During (M__________) (your) period of normal, uncomplicated convalescence following (your/his/her) hospital stay for cataract surgery, the only care required consisted of the administration of eye drops and application of protective dressings and loca ointments. Since this type of care can be safely and effectively provided by the average nonmedical person, such care would not be considered skilled nursing care.

4. ORAL MEDICATIONS WITHOUT OBSERVATION. Services in connection with the administration of routine oral medications that can be self-administered are not considered skilled nursing services since the act of providing the medication does not require special professional health training.

5. PERSONAL SERVICES. (M______) (You) received personal services including (_______), which were primarily designed to assist (you/him/her) in meeting the activities of daily living. Since these services can be performed by the average nonmedical person and do not require the continuing attention of trained medical personnel, they would not constitute skilled care. Such services are instead considered to be supportive in nature and as such constitute custodial care which is specifically excluded from coverage under the Medicare program.

6a. SNF-MORE THAN 14 DAYS NONCOVERED CARE. (Applicable to SNF Stays Begun Prior to December 5, 1980) The above medical evidence established that skilled nursing and other skilled rehabilitative services were not required on a daily basis within the prescribed 14-day period following (discharge from the (hospital), (the last covered day in the skilled nursing facility).

6b. SNF-MORE THAN 30 DAYS NONCOVERED CARE. (Applicable to SNF Stays Begun December 5, 1980 and later) The above medical evidence established that skilled nursing and other skilled rehabilitative services were not required on a daily basis within the prescribed 30-day period following (discharge from the (hospital), (the last covered day in the skilled nursing facility).

7. PAYMENT OF CONTINUED HOSPITAL STAY - SNF LEVEL OF CARE REQUIRED. However, when a bed is not available in a participating skilled nursing facility located in the area (i.e., a facility participating in the Medicare program) payment of a continued inpatient hospital stay is permitted for a patient who no longer requires a hospital level of care but who does require covered skilled nursing facility care. A patient in need of covered skilled nursing facility care is one who requires, on a daily basis, skilled nursing care or skilled rehabilitation services that, as a practical matter, can only be provided on an inpatient basis in a skilled nursing facility. Payment may be made, within the limit of the number of hospital benefits days available to the patient for which program payment may be made, for so long as the patient needs this type of care and a skilled nursing facility bed continues to be unavailable. Accordingly, payment can be made for services provided from ________ through ________.

NOTE: WHERE PARAGRAPH IS APPROPRIATE, DETERMINATION MUST BE SUPPORTED BY ALL AVAILABLE DOCUMENTATION (URC RECORDS, PHYSICIAN COMMENTS, RECORDS OF SOCIAL SERVICES PLACEMENT EFFORTS, ETC.).

8. ATTENDING PHYSICIAN STATEMENT SUBMITTED FOR PROTEST/REVIEW PURPOSES. In his letter of __________ Dr. __________ addressed himself to the beneficiary's need for continued (inpatient care) (home health) services. He indicated that such services were needed because __________.

NOTE: USE AS SEPARATE PARAGRAPH IMMEDIATELY FOLLOWING RATIONALE SECTION OF DETERMINATION.

9. UTILIZATION REVIEW COMMITTEE DECISION. The provider's Utilization Review Committee or Professional Standards Review Organization on (show all dates of decision) ____________ found that the beneficiary's stay was medically necessary.

NOTE: USE AS A SEPARATE PARAGRAPH WHEN APPLICABLE, IMMEDIATELY FOLLOWING RECITATION OF MEDICAL EVIDENCE.

Although the Utilization Review Committee or the Professional Standards Review Organization found (M_______'s) (your) stay to be medically necessary, it is the responsibility of the intermediary to determine whether the services received by the beneficiary were in fact covered under the Health Insurance Program. The evidence cited above does not support a finding that these services are covered under the Medicare law because ________________.

NOTE: USE AS A SEPARATE PARAGRAPH IMMEDIATELY FOLLOWING RATIONALE SECTION OF DETERMINATION.

RECONSIDERATION DETERMINATION: 1

PRIVATE DUTY NURSING CHARGES/SERVICES

____
____
____

Dear ________________:

RE:____________________H.I.Claim Number ________________________________

In response to your request for reconsideration of (your) (M____________'s) claim for payment of private duty nursing charges at ____________________ (beginning ______,) (from ________ through _______,) a complete review of all the facts and evidence has been completed. It has been determined that these charges are not covered by Medicare.

Although hospital insurance will help pay for inpatient nursing services for up to (90)(100) days during any benefit period, these nursing services are defined as the services usually given by the (hospital)(skilled nursing facility) for the care and treatment of the patients. The Medicare law section 1861(b)(5) of title XVIII of the Social Security Act specifically excludes private duty nursing services from the health insurance program. The law permits no exception to this exclusion. Therefore, the claim cannot be approved even though you state (basis for request).

If you believe this reconsideration determination is not correct and the amount of benefits in question is $100 or more, you may request a hearing. Please read the enclosed pamphlet for a full explanation of your right to appeal. If you want a hearing, you must request it within 60 days of the date you receive this notice. You should make your request through any social security office. If you visit the office, please take this letter with you.

Any questions regarding this determination should be referred to:

3-DAY HOSPITAL STAY

____
____
____

Dear ____________:

Re:________________________H.I. Claim Number________________________

In response to your request for reconsideration of (your)(M__________'s) claim for payment of extended care benefits, a complete review of all the facts and evidence has been completed.

It has been determined that the charges for the stay at (Name of Facility) (beginning ______,) (from ______ to ______,) are not covered by Medicare. Under the Medicare law (section 1861(i) of title XVIII of the Social Security Act) there are specific conditions that must be met before the services given in a skilled nursing facility may be covered. One of the conditions is that the patient must have had a medically necessary inpatient hospital stay of at least 3 consecutive days in a qualified hospital before his/her/your day of discharge and transfer to a skilled nursing facility. The law permits no exception to these provisions. Therefore, the claim cannot be approved even though (Basis of Request) .

If you believe this reconsideration determination is not correct and the amount of benefits in question is $100 or more, you may request a hearing. Please read the enclosed pamphlet for a full explanation of your right to appeal. If you want a hearing you must request it within 60 days of the date you receive this notice. You should make your request through any social security office. If you visit the office, please take this letter with you.

____
____
____

Dear _____________:

Re:___________________H.I. Claim Number ____________________

In response to your request for reconsideration of (your)(M__________'s) claim for payment of extended care benefits, a complete review of all the facts and evidence has been completed.

It has been determined that the charges for the stay at (Name of Facility) (beginning __________,) (from __________ to __________,) are not covered by Medicare. Under the law, (section 226 of title II of the Social Security Act) there are specific conditions that must be met before the services given in a skilled nursing facility may be covered. One of the conditions is that the discharge from the qualifying hospital stay must have occurred on or after the first day of the month on which the beneficiary became entitled to hospital insurance under Medicare.

If you believe this reconsideration determination is not correct and the amount of benefits in question is $100 or more, you may request a hearing. Please read the enclosed pamphlet for a full explanation of your right to appeal. If you want a hearing, you must request it within 60 days of the date you receive this notice. You should make your request through any social security office. If you visit the office, please take this letter with you.

Any questions regarding this determination should be referred to:

EXCLUSIONS--RECONSIDERATION DETERMINATION: 4

LATE TRANSFER TO SNF FROM HOSPITAL (AVAILABILITY ISSUE)

(Applicable to SNF Stays Begun Prior to
December 5, 1980)

____
____
____

Dear ____________:

Re: ____________________ H.I. Claim Number ________________

In response to your request for reconsideration of (your) (M_________'s) claim for payment of extended care benefits, a complete review of all the facts and evidence has been completed.

It has been determined that the charges for the stay at (name of facility) (beginning ________,) (from ____________ to ___________,) are not covered by Medicare. Under the Medicare law (section 1861(i) of title XVIII of the Social Security Act) there are specific conditions that must be met before the services provided in a skilled nursing facility may be covered.

One of the conditions is that the patient must have entered the skilled nursing facility generally within 14 days after discharge from a medically necessary qualifying hospital stay. However, an extension of up to 14 additional days is permissible when it is determined that appropriate skilled nursing facility bed space was not available within the general geographic area in which the patient lives.

Our records show that (you were) (M_________ was) discharged from the facility on __________ and entered the skilled nursing facility on __________. The evidence does not show that appropriate skilled nursing facility bed space in facilities which ordinarily would be utilized in (your) (M_________________'s) general georgraphic area was unavailable. Therefore, (your/his/her) claim cannot be approved even though you state (basis for request).

If you believe this reconsideration determination is not correct and the amount of benefits in questions is $100 or more, you may request a hearing before an administrative law judge of the Bureau of Hearings and Appeals. Please read the enclosed pamphlet for a full explanation of your right to appeal. If you want a hearing, you must request it within 60 days of the day you receive this notice. You should make your request through any social security office. If you visit the office, please take this letter with you.

Any questions regarding this determination should be referred to:

(Name and address of Resident Intermediary)

Dear ____________:

In response to your request for reconsideration of (your) (M____________'s) claim for payment of extended care benefits for services furnished at (name of facility) (beginning ____________,) (from ____________ to ____________), a complete review of all the facts and evidence has been completed.

It has been determined that the charges for the stay at (name of facility) are not covered by Medicare. Under the law (section 1861(i) of title XVIII of the Social Security Act), there are specific conditions that must be met before the services in a skilled nursing facility may be covered. One of the conditions is that admission to a skilled nursing facility must generally take place within 14 days after the date of a patient's discharge from a hospital where the patient had a stay that included at least 3 consecutive days of medically necessary inpatient hospital care or after discharge from an earlier skilled nursing facility confinement. Therefore, the claim cannot be approved even though you state (basis of request).

If you believe this reconsideration determination is not correct and the amount of benefits in question is $100 or more, you may request a hearing before an administrative law judge of the Bureau of Hearings and Appeals. Please read the enclosed pamphlet for a full explanation of your right to appeal. If you want a hearing, your must request it within 60 days of the date you receive this notice. You should make your request through any social security office. If you visit the office, please take this letter with you.

Any questions regarding this determination should be referred to:

(Name and Address of Resident Intermediary)

Sincerely yours,

Medicare Coodinator
(or equivalent)

Re: ________________, H.I. Claim Number __________________

In response to your request for reconsideration of (your) (M_____________'s) claim for payment of benefits for services furnished by ____________, a complete review of all the facts and evidence has been completed.

It has been determined that the charges for services provided at the (name of facility) (beginning ___________,) (from ___________ to _____________,) are not covered under the hospital insurance provisions of the Medicare program. The Medicare law (section 1814(a) of title XVIII of the Social Security Act) limits payment for services furnished Medicare beneficiaries to those providers of services who are eligible participants in the Health Insurance Program. The law (section 1866) also specifies the necessary requirements that a provider must meet in order to participate in the program. (There is an exception which allows nonparticipating hospitals furnishing emergency services to receive payment from the program, providing certain conditions are met. This exception does not apply to facilities other than hospitals.)

(Our records show that the (facility) is not participating in the Medicare program.) (Our records show that the (hospital) is not participating in the Medicare program, and there is no reference that emergency services were rendered.) Therefore, the claim cannot be approved even though you state (basis for request).

If you believe the reconsideration determination is not correct and the amount of benefits in question is $100 or more, you may request a hearing before an administrative law judge of the Bureau of Hearings and Appeals. Please read the enclosed pamphlet for a full explanation of your right to appeal. If you want a hearing, you must request it within 60 days of the date you receive this notice. EXHAUSTION OF INPATIENT HOSPITAL BENEFITS-CONTINUOUS STAY (LIFETIME RESERVE DAYS EXPLANATION IF APPROPRIATE)

____
____
____

Dear ________________:

Re:__________________H. I. Claim Number______________________________

In response to your request for reconsideration of (your) (M_____________'s) claim for payment of hospital insurance benefits, a complete review of all the facts and evidence has been completed.

It has been determined that reimbursement for (your)(M__________'s) stay at ____________ after ______________ cannot be made under the Medicare law.

The Medicare law (section 1812(a)(2) of title XVIII of the Social Security Act) provides payments for covered inpatient hospital services for up to 90 days during any one benefit period. A benefit period begins when a beneficiary is admitted to a qualified hospital or skilled nursing facility and it ends at the close of the first period of 60 consecutive days during which a beneficiary has not been an inpatient of either a hospital or a facility primarily engaged in providing skilled nursing or rehabilitation services. (A 60-day reserve is also provided, but these days may be used only once during a beneficiary's lifetime and are reduced accordingly. Our records show (you have) (the beneficiary has) utilized all of these "lifetime reserve" days).

(Your)(M_________'s) benefit period began _________ and (90) or (150) days were exhausted on _________. Since (your/his/her) benefit period had not ended, (and all "lifetime reserve" days were used) no further days were reimbursable. The law permits no exception to these provisions. Therefore, (your/his/her) claim cannot be approved even though you state (basis for request).

If you believe this reconsideration determination is not correct and the amount of benefits in question is $100 or more, you may request a hearing. Please read the enclosed pamphlet for a full explanation of your right to appeal. If you want a hearing, you must request it within

60 days of the date you receive this notice. You should make your request through any social security office. If you visit the office, please take this letter with you.

EXHAUSTION OF HOME HEALTH VISITS
(Applicable only to services rendered prior to July 1, 1981)

____
____
____

Dear ________:

Re: ____________, H. I. Claim Number ____________

In response to your request for reconsideration of (your) (M _____'s) claim for Home Health Service Benefits under the Hospital Insurance Program, a complete review of all the facts and evidence has been completed.

It has been determined that reimbursement for the services provided by (Name of HHA) (after ____,) (beginning _____,) cannot be made under the hospital insurance benefits provisions of Medicare.

The law (§ 1812(a)(3) of Title XVIII of the Social Security Act) limits coverage under Medicare to payment for 100 home health service visits after the beginning of one benefit period and before the beginning of the next. These visits must be furnished an individual within 1 year after (your/his/her) most recent discharge from a hospital where (you/he/she) was an inpatient for not less than 3 consecutive days or (if later) within 1 year after (your/his/her) most recent discharge from a skilled nursing facility where (you/he/she) was an inpatient entitled to Medicare payment for posthospital skilled nursing care services. A benefit period (section 1861) begins when a beneficiary is admitted to a qualified hospital or skilled nursing facility and it ends at the close of a period of 60 consecutive days during which time a beneficiary has not been an inpatient of either a hospital or a facility primarily engaged in providing skilled nursing or rehabilitation services.

(Your) (M _____'s) benefit period began (date entered facility) when (you/he/she) entered (name of facility). (Your) (M ___'s) first home health visit occurred on _______ and (your/his/her) 100th visit on _________. Since no new benefit period began, no further home health benefits were payable under the Hospital Insurance Program. The law permits no exception to these provisions. Therefore, (your/his/her) claim cannot be approved even though you state (basis for request).

If you believe this reconsideration determination is not correct and the amount of benefits in question is $100 or more, you may request a hearing. Please read the enclosed pamphlet for a full explanation of your right to appeal. If you want a hearing, you must request it within 60 days of the date you receive this notice. Dear M______________:

Re:__________________H. I. Claim Number ______________Admission (Date)

In response to your request for reconsideration of the claim for hospital insurance benefits, a complete review of all evidence on the claim has been made. As a result of this review, we have determined that the services (you/beneficiary) received are covered under the Medicare program. Accordingly, the original decision denying coverage of services has been completely reversed. The provider of services will make whatever refund is necessary in the event direct payment was made by (you/the beneficiary) for all or part of the previously denied services.

(Include here a brief statement of the facts of the case, and include a brief statement of the rationale used in making your determination.)

If you believe that this reconsideration determination is not correct and the amount in controversy is $100 or more, you may request a hearing. Please read the enclosed pamphlet for a full explanation of your right to appeal. If you want a hearing, you must request it within 60 days of the date of receipt of this letter. Dear Administrator:

Re:____________________________, H. I. Claim Number ______________________

A request for reconsideration was filed on behalf of the Medicare beneficiary named above. As a result of our reconsideration review, we determined that the claimant's (hospital stay, SNF stay, HHA care, etc. __________________________), from (give dates of service, __________________________) is reimbursable under the Medicare program.

In order that the proper adjustment can be made, it is essential that you forward an adjusted bill based on the above stated determination in the enclosed self-addressed stamped envelope.

With the adjusted bill, please enclose a statement that either:

(a) You have not been paid by the beneficiary or anyone else acting on the beneficiary's behalf for the services other than the applicable deductible and coinsurance embraced by the adjusted bill, or

(b) You have refunded payment other than the applicable deductible and coinsurance received from the beneficiary or anyone else acting on the beneficiary's behalf, for the services embraced by the adjusted bill.

Such a statement is necessary as a safeguard against any future offsets due you from the Medicare program.

Sincerely yours,

Medicare Coordinator

USE: Reconsideration of Overpayment
(Except when provider liable or a waiver request received)

Date

Beneficiary's (Representative's)
Name and Address

Dear M__________________:

Re: ______________________________, H. I. Claim Number______________

This is in reply to your request for reconsideration of the determination that a Medicare overpayment was made on your behalf to (Name of Provider). On _______________ we notified you that an overpayment had been made. A complete review of the overpayment determination has been made to determine whether the original decision was correct. This reconsideration was an independent and thorough reexamination of all of the evidence of record concerning the overpayment. It was made by a specially trained staff, different from the staff that made the original decision.

Upon reconsideration it has been determined that (use 1, 2, or 3)

1. The prior decision was correct and an overpayment of $__________ has been made on your behalf. Please read about your rights and responsibilities below.

2. The prior decision was only partially correct, the actual overpayment made on your behalf totals $____________. Please read about your rights and responsibilities below.

3. The prior decision was incorrect and no overpayment exists. You may disregard our previous letter.

(Whenever 1 or 2 is used a clear and complete explanation concerning the overpayment must be inserted here in a manner similar to that set forth in Part A I.M. 3711.5 ff. In every letter the following standard paragraphs are to be used in situations 1 and 2. If 3 is used, include only an appropriate explanation of the decision, hearing paragraph, and final assistance paragraph.)

Under the Medicare law, the beneficiary is responsible for overpayments made on his behalf if the provider of services was not at fault in causing the overpayment. In this case, (Name of Provider), was not at fault. Therefore you are liable for the amount incorrectly paid to this provider for the services you received there. Please send us a check or money order for $________ within 30 days. The check or money order should be made out to (Name of Intermediary) and may be mailed in the enclosed self-addressed envelope. If you do not repay this amount, this overpayment will be referred to the Social Security Administration (or Railroad Retirement Board) for further recovery action which, among other actions, may result in the overpayment being deducted from any monthly social security (or railroad retirement) benefits to which you may be entitled.

The law requires that you must repay an overpayment of Medicare benefits unless both the following conditions are met:

1. You were without fault in causing the overpayment in that the information you furnished in connection with the claim was correct and complete to the best of your knowledge, and

2. Paying back the overpayment would keep you from meeting your ordinary and necessary living expenses or would be unfair. If you claim that repayment will cause you serious financial hardship, it will be necessary at a later date to submit a statement to the Social Security Administration regarding your income, assets, and expenses.

If you believe that both of the above conditions are met, you may request that recovery of this overpayment be waived by contacting any social security office or by writing to us, giving a brief statement of your reasons. If you go to a social security office, please take this letter with you.

If you carry private health insurance to supplement your Medicare benefits, you may be able to recover the amount of this overpayment by claiming benefits from the other plan, or (Name of Provider) may be able to submit such a claim on your behalf. If you have supplemental insurance and plan to file a claim for benefits to use the proceeds to refund the overpayment, please let us know. (Note: This paragraph is not to be used where the intermediary has determined that the other insurer will not pay for the services.)

If you are unable to refund this amount in one payment, you may do so in regular installments. If you prefer this method of payment please notify us promptly how much you are able to pay.

If you believe that this determination is not correct, you have the right to request a hearing within 60 days of the receipt of this letter if the amount of benefits in question is $100 or more. You may make such a request by writing us or through any social security office. The people there will be glad to assist you or answer any questions you may have about this determination. If you go to a social security office, please take this letter with you.

Sincerely yours,

Medicare Coordinator

____
____
____

Dear (Administrator):

A request for reconsideration has been filed by ______________________ (on behalf of ______________________), HI claim number ______________________, with regard to the services rendered by (name of provider) from (dates of service). The initial determination that these services were not covered was made on the basis that they were custodial care (not reasonable and necessary). It was also determined that liability for these services could not be waived for (beneficiary). (Change this sentence in accordance with the facts in the case.)

Since (name of provider) was a party to the initial determination, you are also considered a party to the reconsideration determination. We will review all the evidence and findings upon which the initial determination was based and any additional evidence submitted. Thus, you have the right to submit any additional information in this case prior to the determination.

Please submit any such information to this office no later than (15 days). If there will be a delay in submitting material, please advise us. If we do not hear from you by (15 days), we will go ahead with the reconsideration. A copy of the reconsideration determination will be sent to you. (Modify this language if additional medical information is being requested in order to conduct the reconsideration.)

MODEL LETTER TO PROVIDER WHO IS A PARTY TO A RECONSIDERATION REQUEST FILED BY THE BENEFICIARY

____
____
____

Dear (Administrator):

A request for reconsideration has been filed by ____________________ (on behalf of ____________________), HI claim number ____________________, with regard to the services rendered by (name of provider) from (dates of service). The initial determination that these services were not covered was made on the basis that they were custodial care (not reasonable and necessary). It was also determined that liability for these services could not be waived for (beneficiary). (Change this sentence in accordance with the facts in the case.)

Since (name of provider) was a party to the initial determination, you are also considered to be a party to the reconsideration determination. This will be a complete review of all the evidence and findings upon which the initial determination was based and any additional evidence submitted. Thus, you have the right to submit any additional information in this case prior to the determination.

Please submit any such information to this office no later than (15 days). If there will be a delay in submitting material, please advise us. If we do not hear from you by (15 days), we will conduct the reconsideration. A copy of the reconsideration determination will be sent to you. (Modify this language if additional medical information is being requested in order to conduct the reconsideration.)

SAMPLE LETTER TO BENEFICIARY
(REVERSAL)

February 28, 1974

Mr. John Jones
737 Fifth Avenue
Rutledge, New Jersey 07580

Dear Mr. Jones:

Re: HI Claim Number 000-00-0000A

In response to your request for reconsideration of your (or Mr. Blank's) claim for Part A Medicare benefits, we performed a complete review of all evidence on the claim and have determined that the initial determination was not correct. The (insert name of provider of services) will make whatever refund is necessary in the event it was paid for all or part of the previously denied services.

> (Include here a brief statement of the facts of the case; the applicable provisions of the Social Security Law; and include a brief statement of the rationale used in making your determination.)

If you believe that this reconsideration determination is not correct and the amount of benefits in question is $100 or more, you may request a hearing before an administrative law judge of the Bureau of Hearings and Appeals. If you want a hearing, you must request it within 60 days of the date you receive this letter. You should make any such request through your social security office.

Any questions regarding the enclosed determination should be referred to:

RECONSIDERATION DETERMINATION

TYPE OF CLAIM Hospital Insurance Benefits	DISTRICT OFFICE ————
NAME OF CLAIMANT Ella Messon	HEALTH INSURANCE CLAIM NUMBER 977-43-1000B

DETERMINATION

Mrs. Ella Messon was an inpatient in the Meadow Heights Community Hospital from August 13 through September 13, 1973. On August 26, 1973, Mrs. Messon was notified in writing by the hospital administrator that she would no longer be receiving covered care after August 26. On October 26, 1973 (the intermediary) sent Mrs. Messon a written notice that Medicare benefit payments could be made for the period August 13, 1973 through August 26, 1973. The basis for this decision was that the services furnished from August 13 through August 26 were medically indicated and that her condition required that the care be furnished in a hospital. Beginning August 27, 1973 through September 13, 1973, the determination was made that Mrs. Messon's condition did not require that she be in an acute general hospital.

On January 8, 1974, Mrs. Messon requested reconsideration on the basis that she had been so ill that she had to be cared for in a hospital until her discharge September 13, 1973.

There are two issues that must be considered in this determination. The first issue is whether the services rendered from August 27, 1973 through September 13, 1973, constitute a covered level of care under Title XVIII of the Social Security Act. The second issue, if the case is found to be noncovered, is whether Mrs. Messon knew or could reasonably be expected to have known that the services she received for the period in question were not covered by the Medicare program.

The Social Security Act provides for payment of inpatient hospital services when they are required on an inpatient basis for an individual's medical treatment or for a medically necessary diagnostic study. Two criteria must be met to qualify for the hospital level of care: the services the patient received in the hospital must be medically indicated, and it must have been reasonable to provide the needed care in a hospital rather than in a less costly facility or on an outpatient basis.

Mrs. Messon was admitted to the Meadow Heights Community Hospital on August 13, 1973, with the diagnosis of ulcerations of the left leg secondary to vascular impairment.

The medical evidence in Mrs. Messon's file shows that she was admitted to the hospital because of indolent ulcerations of the left leg which had not responded to home treatment. Her treatment in the hospital included bed rest, an antibiotic ointment, maintenance dose digitalis, antihypertensives, antibiotics, an intramuscular pain medication, and skin care measures. The physician's orders allowed her to be up in a chair as tolerated by August 15, 1973, and to walk by August 17, 1973. The physician's orders during the period from August 15 through August 17, 1973, concerned periodic renewals of the pain medication, FORM SSA-2371a (2-71) **RECONSIDERATION DETERMINATION** Page 2

NAME OF CLAIMANT	HEALTH INSURANCE CLAIM NUMBER
Ella Nesson	977-43-1000B

the encouragement of ambulation, an authorization for a daily tub bath, and care to prevent bed sores. Progress notes by the physician indicate improvement by August 17, 1973, and discontinuation on August 20, 1973, of an antibiotic. Subsequent progress notes indicate that her condition had stabilized. A nurses' note of August 22, 1973, relates that the patient was ambulatory in her room, and that she was up in a chair for much of the day. The subsequent nurses' notes indicate that she ate well, rested comfortably and had few complaints.

In his letter of August 14, 1973, Dr. Marcus W. Miller addressed himself to the beneficiary's need for continued inpatient care. He indicated that observation and daily treatment by skilled nursing personnel was needed.

A review of the medical records shows that by August 23, 1973, Mrs. Nesson was able to be up and about in her room. There were no subsequent changes in her medications. The medications she received did not require an acute hospital setting for their administration. She continued to need medical care including observation of the ulcerated leg and the application of topical medications, but the medical evidence after August 22, 1973, does not indicate that such care could not have been provided in a facility of a different type, such as a skilled nursing facility. The progress notes indicate that her condition was slowly improving and that she was stable.

Based on these facts, it is found that the services rendered Mrs. Nesson from August 27, 1973 through September 13, 1973, do not constitute covered care because the care provided did not necessitate the setting of an acute general hospital.

Whenever it is determined that services are not covered for the reasons stated above, the Social Security Act (section 1879) provides that the individual will not have to pay the hospital for the cost of the noncovered services if he or she did not know nor could reasonably be expected to know that Medicare would not pay for the services. The evidence in this case shows that Mrs. Nesson was notified in writing by the administrator of the Meadows Heights Community Hospital on August 26, 1973, that after that date she would no longer be receiving a level of care which would be covered by the Medicare program in a hospital setting. This written notice to Mrs. Nesson gave her knowledge that the Medicare program would not pay for her care. Therefore, it is found that Mrs. Nesson is liable for the cost of the noncovered services.

FORM SSA-2371e (2-71) **RECONSIDERATION DETERMINATION** Page 3

NAME OF CLAIMANT Ella Masson	HEALTH INSURANCE CLAIM NUMBER 977-43-1000B

In conclusion, it is determined upon reconsideration that: (1) the services furnished Mrs. Masson by the Meadow Heights Community Hospital were covered by the Medicare program from August 13 through August 26, 1973, and that the services rendered from August 27 through September 13 are not reimbursable under the Medicare program; and (2) Mrs. Masson is liable for the cost of the noncovered services.

SAMPLE LETTER TO PROVIDER (Reversal Notification)

March 21, 1974

Mercy Hospital
777 Anywhere Street
Patterson, New York 01873

RE: John Jones, HI Claim No.: 000-00-0000A

Dear Administrator:

A request for reconsideration has been filed by the Medicare beneficiary named above. As a result of our reconsideration review, it was determined that the claim submitted to Medicare for payment of the beneficiary's claim from (give dates of service) is reimbursable under the Medicare program.

You will be reimbursed the amount due from the Medicare program as soon as we receive written assurance (as per section 405.620(a) of Regulations No. 5), that you have not already been reimbursed for these services by the beneficiary or any third party; or if you have been reimbursed, that the incorrect payment has been refunded.

Bella Smith
Medicare Coordinator

LETTER TO PROVIDER WHICH IS PARTY TO RECONSIDERATION AND MEDICARE PAYMENT IS BEING MADE UNDER WAIVER OF LIABILITY PROVISION

____
____
____

Dear (Administrator):

Upon reconsideration of (beneficiary's name) claim to which you were made a party, it has been affirmed that the services rendered were noncovered under the Medicare law.

You will, however, receive reimbursement for these noncovered services from the Medicare program as a result of the waiver of liability provision (section 1879) of the Social Security Act. This payment is being made to you because it was determined upon reconsideration that neither the beneficiary nor your organization knew or could reasonably be expected to know that the services rendered during the period in question were noncovered (see the reconsideration determination enclosed). (Guide language to be modified if only partial payment is made.)

You will be reimbursed the amount due from the Medicare program as soon as we receive written assurance (as per section 405.620(a) of Regulations No. 5), that you have not already been reimbursed for these services by the beneficiary or any third party; or if you have been reimbursed, that the incorrect payment has been refunded.

If you believe the reconsideration determination is not correct and the amount of benefits in question is $100 or more, you may request a hearing before an administrative law judge of the Bureau of Hearings and Appeals. If you want a hearing, you must request it within 60 days of the date you receive this letter. You may make such a request through any social security office.

LETTER TO ACCOMPANY RECONSIDERATION DETERMINATION

MEDICARE

FISCAL INTERMEDIARY FOR
DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
SOCIAL SECURITY ADMINISTRATION

February 23, 1974

Mrs. Ella Nesson
32 First Street
St. Joseph, Iowa 50010

Dear Mrs. Nesson:

Re: HI Claim Number 977-43-1000B

As the result of your request for reconsideration, a complete review of the claim for health insurance benefits has been made to determine whether the original decision was correct under the law and regulations. This reconsideration was an independent and thorough reexamination of all the evidence of record concerning this claim. It was made by a specially trained staff, different from the staff that made the original decision.

Upon review, it has been determined that the original decision is correct. The enclosed reconsideration determination fully explains the decision.

If you believe the reconsideration determination is not correct and the amount of benefits in question is $100 or more, you may request a hearing before an administrative law judge of the Bureau of Hearings and Appeals. If you want a hearing, you must request it within 60 days of the date you receive this letter. You may make such a request through any social security office. If you visit the office, please take this letter with you.

Any questions regarding the enclosed determination should be referred to:

INTERMEDIARY

3785. REQUEST FOR HEARING UNDER PART A.—
Under the law a beneficiary has a right to a hearing if he is dissatisfied with the reconsideration determination and the amount in controversy after the reconsideration action is $100 or more. (See § 3781.1.)

3785.1 Determining The Amount In Controversy.—Hearings are conducted by the Office of Hearings and Appeals of the Social Security Administration. The Administrative Law Judge (ALJ) decides whether the amount of benefits is $100 or more. The following principles are applied by the ALJ in determining the amount in controversy.

A. The amount in controversy is equal to the charges for items or services found not to be covered, less the applicable deductible and coinsurance amounts. Any payment made under Section 1879 of the Act (waiver of liability) is included in the amount in controversy.

B. If direct payment was made to the beneficiary for covered emergency services in a hospital that did not elect to bill the program, the amount in controversy is computed as 60% and 80% respectively of the reasonable charges for routine and ancillary services furnished after the deductible and coinsurance amounts have been applied.

C. Where the issue relates to provider services, all items or services in dispute arising from a single, continuous period of treatment are considered regardless of the provider's billing practices.

D. A service of posthospital home health visits is considered collectively.

E. Appeals from determinations pertaining to inpatient hospital services, extended care services, or home health services are not additive for determining the amount in controversy except when:

1. The denial of payment for inpatient hospital services prevents the individual from meeting a requirement for payment of extended care or home health services; or

2. The same factor is at issue in more than one claim for benefits by the individual. (For example, an individual is hospitalized twice in June. In each case his claim is denied on the grounds that the hospitalization occurred in the same benefit period which began before June and in which the beneficiary had used all available benefit days. The individual appeals, claiming he was in a new spell of illness and had the full number of benefit days available.)

F. Where services or items proposed to be provided have been disapproved by the Professional Standards Review Organization (PSRO), the amount in controversy is determined upon the basis of reasonable estimates of the amounts which would be charged the individual if such services or items were provided.

3785.2 Request Filed With Social Security Office.—After the Social Security office takes a request for hearing (Request for Hearing Part A Health Insurance Benefits—HA-5011-U6), or if the hearing request is sent to them by mail, the copies of the HA-5011-U6 are distributed immediately as follows:

a.	Claim File (White)	To the fiscal intermediary, PSRO or HMO . If a copy of the reconsideration is available, it is attached.
b.	Hearing Office (Pink)	To appropriate ALJ according to geographical location of the District Office.
c.	District Office (Yellow)	Retained in D/O; or mailed to resident D/O if hearing request was filed in nonresident office.
d.	Intermediary, PSRO or HMO (Blue)	Mailed to fiscal intermediary, PSRO or HMO.
e.	Regional Office (White)	To appropriate Regional Office according to geographical location of the fiscal intermediary.
f.	Claimant's/Representative's (White)	Given or mailed to claimant/representative

NOTE: The HA-5011-U6 is currently under revision. The above copy and distribution breakdown reflects the changes which will be incorporated in the revised form. Until such time as the new form is available, the Claimant's Copy should be utilized as the Regional Office Copy, and the Representative's Copy as the Claimant's/Representative's Copy.

3785.3 Request For Hearing Filed With Resident Or Reconsideration Intermediary.—A request for hearing must be in writing and signed by the beneficiary or his respresentative and indicate the reason(s) for disagreement.

When correspondence is received from a beneficiary, determine whether he wants a further explanation of the notice or if he is requesting a hearing. If the correspondence is treated as a request for information or clarification of a notice, explain the determination to the beneficiary in greater detail. Resolve any doubt as to whether the beneficiary's correspondence is an implied hearing request, by treating it as a hearing request. If the beneficiary contacts the intermediary in person and states he wishes to file for a hearing, take a written request to that effect.

When a beneficiary contacts the intermediary by telephone to request a hearing, refer to the Social Security office.

3785.4 Request For Hearings Received By The Intermediary Pertaining To PSRO or HMO.—Transmit all hearing requests pertaining to PSRO or HMO received to the appropriate PSRO or HMO. They will develop the request and forward the claim file to the Reconsideration Evaluation Branch for processing.

3785.5 Resident Intermediary Action On Incoming Requests.—Forward hearing requests received by the resident intermediary immediately to the reconsideration intermediary for processing along with any additional information not forwarded with the reconsideration claim file.

3785.6 Reconsideration Intermediary Action On Incoming Requests.—Upon receiving a request for hearing as described in SS 3785.3 & 3785.5, the reconsideration intermediary screens the incoming material and insures that the request for hearing is applicable to a Part A inpatient file maintained by them. When processing a hearing request (Form HA 5011-U6) received from the resident intermediary or completed by the reconsideration intermediary, the copies are not distributed as described in S 3785.2. Include the form, in its entirety in the claim file, with the exception of the (blue) Intermediary, PSRO or HMO copy which is retained by the intermediary for record purposes.

3785.7 Request For Claim File (Sent By Hearing Office).—Hearing request material referred by the hearing office will be: (1) sent to the reconsideration intermediary when received by the resident intermediary and (2) reviewed by the reconsideration intermediary to establish whether the hearing request is premature, does in fact relate to a Part A Hospital Insurance benefit claim, or may relate to other benefits. This usually requires coordination with the hearing office to determine what information may be available about the claim at issue. After all facts have been developed to establish that the hearing request is valid or invalid, premature, pertains to other benefits, or is not within the intermediary's jurisdiction, return the request to the hearing office according to the disposition of the action taken.

3785.8 Reconsideration Intermediary Prescreening And Documentation Of Hearing Request.—To insure that hearing offices receive claim files within a reasonable period of time (15 calendar days) after the receipt of a hearing request in amount in controversy cases, it is necessary that the reconsideration intermediary establish proper control procedures during the prescreening of cases.

3785.9 Assembling The Hearing Claim File.—All hearing requests when received by the reconsideration intermediary are sent to the hearing office in a folder. Each folder reflects the beneficiary's HI Claim Number on one line followed directly by the surname, first name and middle initial, (if shown). All claims material pertaining to the services in question, including the envelope in which the request for hearing was received are prongfiled in this folder in chronological order by type of evidence. The file includes, to the extent possible, only the original documents and no duplicate material.

3785.10 Examination Of Claim File.—Carefuly examine the files before they reach the hearing offices in order to assure that they contain all the pertinent documents which may be available. Complete the Health Insurance Case Summary (HCFA-383), (see S3785.17, Exhibit 2), on hearings being forwarded to the hearing office. This form reflects the pertinent facts concerning the beneficiary, the history of the claim, the evidence and the dates thereof, the services and medications prescribed, and any other relevant information. Include a copy of this form in the file and retain a copy for record purposes.

A. Documentation Not Needed.—If you determine that the file contains all pertinent documents and that further documentation is not needed, mail the claim folder to the appropriate hearing office. (See § 3785.14.)

B. Documentation Needed.—When further documentation is needed, prepare a development letter which describes the information desired and request the resident intermediary or provider of services to expedite and return the requested material as soon as possible. When requesting documentation to complete the file, furnish at least 35 days of records beyond the last covered day on all SNF cases and records to the extent of the review on all HOSPITAL and HHA cases.

C. Additional Evidence Requested From Hearing Office.—The hearing office, after receiving a claim folder, may wish additional evidence or records, even though the required documentation is in the file. They may do so by requesting the information from the regional office which in turn contacts the reconsideration intermediary. When the material is recieved, immediately forward the evidence to the hearing office.

D. Amount In Controversy Less Than $100.—Where the amount in controversy after reconsideration is less than $100 (see § 3785.1), route the file to the hearing office (see § 3785.14) for appropriate dismissal action.

E. Request for Hearing Not Timely Filed.--When a request for hearing is not timely filed and no further documentation is needed, forward the folder to the hearing office. (See § 3785.14.) If a late filed hearing request is received for processing and is accompanied by proper documentation explaining the delay, develop the claim file before forwarding it to the hearing office and follow the procedures previously described. (See § 3785.14.)

F. Part B Hearing Request.—Where the hearing request material (usually the blue claim file copy) and/or attachments and development clearly indicate that a Part B Claim or appeal and reimbursable is involved, send the original material to the Social Security office according to the geographical location of the beneficiary/representative for completion of proper appeal forms and routing action. This action results in forwarding copies of the material development to the hearing office for appropriate dismissal action. Where the hearing request is intact, and it is established that Part B is involved, do not send it to the hearing office since no further action is necessary. Return all material to the Social Security office for corrective action and proper routing.

G. Hearing Request Prematurely Filed.—When a hearing request is prematurely filed, make and use photocopies of the material as an implied request for reconsideration and process a reconsideration on the claim involved. Place the original material in a folder and route it to the hearing office. (See § 3785.14.)

H. Reconsideration in Process Not Completed By The Intermediary.—When a hearing request is received and a reconsideration is in process which cannot be completed within 5 working days after receipt of a hearing request, route the request to the hearing office. (See § 3785.14.) If the reconsideration can be completed within the time frame, follow the procedure in § 3785.10(G).

I. No Valid Request For Reconsideration Received By The Intermediary.—When a hearing request is received and it is determined that there was no valid request for reconsideration and/or the time frame to request same has expired, dismiss the appeal. Route the claim file to the hearing office. (See § 3785.14.)

J. Other Jurisdictional Problems.—In any situation or set of circumstances where existing procedures are not adequate to deal with the handling of a particular claim or hearing request material, use your best judgement as to the proper disposition of material at hand.

3785.11 Prehearing Case Review.—The reconsideration intermediary, when it receives all outstanding evidence and believes the claim file is complete, screens the case for possible action which would be fully favorable to the beneficiary before forwarding the case for hearing. Where the review discloses a situation in which such fully favorable action is indicated, prepare a covering memorandum detailing recommended revision and rationale, and forward the claim file with the memorandum to the regional office for review. There are three criteria by which to judge whether a determination will be reviewed:

A. Additional evidence is submitted with the request for hearing;

B. There is an allegation or indication that additional evidence is available; or

C. There are other indications that a revision may be in order, e.g., an error has been noted in the file or there has been a change in the law or regulations pertinent to the claim.

3785.12 Regional Office Action On Receipt Of Recommended Revision.—The regional office reviews the case and the reconsideration intermediary's recommendation and takes one of two actions:

A. If it disagrees entirely with the recommendation and believes that no revision of the determination is in order, it prepares a rebuttal and returns it, along with the claim file to the reconsideration intermediary for necessary action.

B. If it does agree, wholly or in part, with the recommendation, it prepares a rationale to that effect and sends it, along with the claim file for necessary action.

3785.13 Reconsideration Intermediary Action On Hearing Request After Recommended Revision From The Regional Office.—

A. If the regional office returns the claim file without having revised the reconsideration determination, remove and retain the recommendation, the rebuttal, and any other intermediary or regional office generated documents added to the file subsequent to the date of the request for hearing (e.g., physician opinions on which the recommendation or rebuttal was based). Route the claim file to the appropriate hearing office. (See S3785.14.)

B. When the regional office has revised the reconsideration determination, and decided that payment should be allowed in full on the bases of covered care, send a revised reconsideration determination, using Model Letter. (See S 3785.17, Exhibit 6.) Send copies of the revised determination to all parties of the reconsideration together with appropriate cover letters including appeals language. Use exhibit 6 letter only when the entire claim is to be fully covered. In such a case, the revised reconsideration determination may be made a part of the letter. Include a brief summary of the facts and a rationale for the amended decision. Prepare a Transmittal Notice -Hearing Case (HCFA-636) (See S 3785.17, Exhibit 3) dismissing the hearing request since there will be no amount in controversy. Forward this along with the revised reconsideration determination to the hearing office. Retain the claim as any other reconsideration file.

C. If the regional office has partially revised the determination, but there remains an issue or an amount in controversy, send a revised determination using Model Letter (See S 3785.17, Exhibit 7) to all parties of the reconsideration. (Use this letter in all revisions, even if liability is waived on behalf of all parties, as long as some item or service remains noncovered). After assuring that all documents pertinent to the revised reconsideration determination are in file, route the file to the appropriate hearing office. (See S 3785.14.)

3785.14 Routing The Hearing Claim File To The Hearing Office.—

A. When forwarding the claim file to the hearing office, place the claim file copy of the request for hearing, (HA-5011-U6) (see S 3785.17, Exhibit 1) on the top of the material in the folder. Complete the form HCFA-636, (see S 3785.17, Exhibit 3) checking the appropriate block according to the facts involved. Distribute copies of the HCFA-636 as follows:

1. Place the original copy in the file on top of the HA-5011-U6.
2. Retain the other copy for record purposes.

B. Prepare and duplicate an acknowledgement letter. (See S3785.17, Exhibit 4.) Send the original to the beneficiary/representative and place the other copy in the folder.

C. Attach to the front of the folder the Health Insurance Appeal Case Form (HCFA-3509). (See S 3785.17, Exhibit 8.) This form represents the routing instructions for the hearing offices after they complete their action on the request. It is very important to place this form in ALL folders sent to the hearing offices and to check the correct return address block.

D. Prepare a Part A Pre-Hearing Input Record (HCFA-353) (see §3785.17, Exhibit 5) on all hearing cases forwarded to the hearing offices. See § 3785.16 for completion of this form. Mail the claim file to the appropriate hearing office.

3785.15 Inquiries Or Status Requests Received By The Reconsideration Evaluation Branch.—When the Reconsideration Evaluation Branch receives inquiries pertaining to hearings (other than PSRO's) they direct these inquiries or status requests to the appropriate intermediary for response.

3785.16 Instructions For Completing Form HCFA-353 Part A Pre-Hearing Input Record (See § 3785.17, Exhibit 5).—The following instructions pertain to the preparation of this form. The information supplied is processed by computer and is used by the Reconsideration Evaluation Branch for statistical purposes. Since it is imperative that the coded information be as accurate as possible, no single document should be used solely without cross verification of data. Upon completion, a copy of the form should be made for the claim file and the original mailed immediately to:

Health Care Financing Administration
Reconsideration Evaluation Branch, BPO
P.O. Box 770
Baltimore, MD 21203

Complete the following data elements. They are left justified, and use no embedded blanks or special characters unless specifically stated. Also, code all alphabetical letters as CAPITAL letters.

1. INITIAL OR REVISION RECORD.—Check the appropriate block.

2. RECORD IDENTIFIER.—This item is pre-printed and constant.

3. HEALTH INSURANCE CLAIM NUMBER.—These positions are alpha-numeric and contain a maximum of 12 (including the suffix) positions. Once thi number is entered into the system it cannot be changed by submitting a revision form. Examples of HI Claim Numbers are:

218401964A
WD234567893
218401967W7
MA123456

NOTE: It is imperative that the HI Claim Number information (including suffix and any override letter) and the Admission/HHA Date be completed exactly as shown on the HCFA-352.

4. ADMISSION/HHA DATE.—These positions are numeric and contain a 6-position valid date—MMDDYY. On Home Health Agency (HHA) cases enter the first day of the period in question. The Admission/HHA Date must be earlier than the currrent date. Once the number is entered into the system it cannot be changed by submitting a revision form.

5. SURNAME.—Enter the last name of the beneficiary (up to 12 characters) who received the services.

6. Given Name.—Enter the first name of the beneficiary (up to 5 characters) who received the services.

7. Amount in Controversy.—This item consists of one numeric character. Code it based on the amount in controversy following the latest reconsideration determination, since its purpose is to show whether further appeal is possible.

8. Provider Number.—Enter the providers assigned 6-position number. If the case involves a provider which does not participate in the Medicare program, show 990999 (hospital) 995999 (SNF), and 997999(HHA). However, the identification numbers assigned to federal and emergency-only facilities consist of a 6-position alpha-numeric numbers e.g., 21521F or 21001E. The 3rd numeric position always determines the type of facility:

0, 1, 2, 3, 4 = Hospital
5, 6 = (SNF)
7 = (HHA)

9. REQUESTED BY.—This field is blank or contains a one numeric character based on who filed the request for hearing.

10. HEARING FILED.—These positions are numeric and contain a 6-position valid date—MMDDYY. Enter the date shown on the HA-5011-U6 under acknowledging request for hearing. If this date is not present, use the postmark on the envelope. When neither of these two dates is available, use the date the beneficiary/representative filed the request for hearing. When requests are received on anything other than Form HA-5011-U6, use the date on the correspondence. However, if the correspondence is undated, use the postmark on the envelope. This date must be later than the Admission/HHA Date.

11. INTERMEDIARY NUMBER.—This field contains the 5-position number assigned to the intermediary which processed the initial denial decision.

12. HA-5011-U6 RECEIPT DATE.—These positions are numeric and contain a 6-position valid date—MMDDYY. If the request was originally received by the resident intermediary, enter its receipt date. Otherwise, show the date received by the reconsideration intermediary. This date must be later than the Date Hearing Filed.

13. FOLDER ASSIGNED TO.—These positions can be blank or contain 6 alpha-numeric characters. If this field is present, it indicates the person responsible for the prehearing review.

14. ASSIGNMENT DATE.—These positions can be blank or contain a 6-position numeric valid date—MMDDYY. If the Folder Assigned To field is present, this date must also be present. This date must be equal to or later than the HA-5011-U6 Receipt Date.

15. DEVELOPMENT REQUESTED DATE.—Enter the 6-position numeric valid date—MMDDYY if additional evidence was requested. Otherwise, this field is blank. This date must be equal to or later than the HA-5011-U6 Receipt Date as well as the Assignment Date.

16. DATE REFERRED TO REGIONAL OFFICE.—These positions are numeric and contain a 6-position VALID DATE—MMDDYY. This date is present if the file is sent to the regional office. (See § 3785.11 Prehearing Case Review.) Otherwise, this field should is blank. If this date is present, it must be later than or equal to the HA-5011-U6 Receipt Date, the Assignment Date and the Development Requested Date.

17. DATE RETURNED TO INTERMEDIARY.—These positions can be blank or contain a 6-position numeric, valid date—MMDDYY. If this date is present, the Date Referred To Regional Office must also be present. The Date Returned to Intermediary must be later than the Date Referred to Regional Office.

18. DECISION MODIFIED.—This field is blank or contains a one numeric character based on the recommendation received from the regional office. (See § 3785.13 (B) (C). If this field is present, the Date Returned to Intermediary must also be present.

19. DATE HEARING SENT TO OHA.—These positions are numeric and contain a 6-position valid date—MMDDYY. This field is present when the file is sent to the Office of Hearing and Appeals (OHA). This date must be equal to or later than the HA-5011-U6 Receipt Date, Assignment Date (if present), Development Requested Date (if present), and the Date Returned to Intermediary (if present). This date cannot be later than the current date.

20. HEARING OFFICE.—These positions are alpha-numeric and when present indicates the hearing office to which the case was sent. If the Date Hearing Sent to OHA is present, this field must also be present.

3785.17 Standard Exhibits Referred To In §§ 3785- 3785.16.—The following exhibits are examples of the various forms used in the pre-hearing review function. Complete the required entries on these forms using current information available.

Exhibit No. 1	Form HA-5011-U6 - Request for Hearing Hospital Insurance Benefits Payable Under Part A of Title XVIII
Exhibit No. 2	Form HCFA-383 Health Insurance Case Summary

Type of Claim

Date of Reconsideration Notice

Date of Hearing Request

This File Has Been Examined And We Find That:

(Check Appropriate Block/s)

- ☐ 1. The documentation is adequate.
- ☐ 2. The documentation is not adequate to render a hearing decision. The necessary material has been requested and will be forwarded to you when received.
- ☐ 3. The sole issue appears to be whether your office has jurisdiction in this matter. Pursuant to section 1869 (b) of the Social Security Act, the beneficiary has no right to a hearing as the amount in controversy is apparently less than $100.
- ☐ 4. Although the documentation is adequate, the request for hearing appears to be not filed timely. It should be first decided whether "good cause" for late filing exists.
- ☐ 5. A dismissal action is necessary since the appeal request pertains to a Part B medical insurance claim. The original request has been returned to the Social Security Office for proper filing and routing.
- ☐ 6. A dismissal action is necessary since the beneficiary has no right to a hearing before a reconsideration determination has been rendered. We are initiating a reconsideration review of the Part A claim for which the hearing was prematurely filed.
- ☐ 7. The reconsideration claim is currently being processed. Therefore, the appeal should be dismissed since the beneficiary has no right to a hearing before a reconsideration determination has been rendered.
- ☐ 8. A dismissal action is necessary since the fiscal intermediary has determined that there was no valid request for reconsideration and/or the time frame to request same has expired.
- ☐ 9. Other (Give Reason)

Exhibit No. 6: SAMPLE LETTER — FULL PAYMENT, REVISED RECONSIDERATION DETERMINATION AFTER REQUEST FOR HEARING HAS BEEN FILED

Date__________

Name of Beneficiary/Representative

Dear__________

Re:

H.I. Claim Number

Following receipt of your request for hearing, the Bureau of Program Operations requested that we again review your claim before the heairng. We have now determined that the prior determination can be revised. (Brief summary of the facts and rationale may be inserted here if the intermediary prefers not to prepare a separate reconsideration determination .)

Accordingly, payment will be made to the provider (name of provider) for the entire cost of the services you received, less any applicable deductible or coinsurance, as soon as we receive verification from the provider that it has refunded to you any moneys paid by you or on our behalf in excess of such applicable deductible or coinsurance amounts. If you have paid (name of provider) for the services you received, you can expect a refund.

Because this determination leaves no amount or issue in controversy, the administrative law judge (ALJ) assigned to hear your case will dismiss your request for hearing unless you request in writing, within 30 days, that it not be dismissed.

You may request a hearing on this revised reconsideration determination before an ALJ of the Office of Hearings and Appeals within 60 days of the date you receive this letter if you believe that the amount of benefits in controversy is $100 or more. (Social Security regulations require that an explanation of appeal rights accompany every determination even if, as in this case, a fully favorable decision has been made.)

Any questions or requests regarding your claim or this determination may be referred to your social security office or:

Name and Address of Intermediary

Sincerely yours,

Medicare Coordinator
(or Equivalent)

Enclosure (No enclosure if the revision is included in the text of this letter.)

Name of Beneficiary/Representative Address

Dear__________

Re: H.I. Claim Number

Following receipt of your request for hearing, the Bureau of Program Operations requested that we again review your claim before the hearing. We have now determined that the prior determination can be partially revised. The enclosed determination explains the revised determination we have made on your claim.

(Additional payment will be made to the provider (name of provider) for the previously denied services now found to be payable as soon as we receive verification from the provider that it has refunded to you any payment made by you or on your behalf for such services.)/(It has been found that your liability is not as extensive as was previously determined. The name of provider) will be responsible for the cost of the services you received from ______ to ______.) If you have paid for the care you received, you may expect a refund from (name of provider) for any amount over the charges for any applicable deductible and coinsurance or services still not covered or waived.

Your claim will be scheduled for a hearing by an administrative law judge of the Office of Hearings and Appeals in the near future unless you and all other parties to the reconsideration determination state in writing that you no longer wish to have such a hearing.

Any questions regarding this determination may be referred to your social security office or to:

Name and Address
of Intermediary

Sincerely yours,

Medicare Coordinator

FORM HCFA-3509(12/82) PREVIOUS EDITION OBSOLETE

3786. SCOPE AND EFFECT OF OHA, SSA ADMINISTRATIVE LAW JUDGE DECISIONS UNDER PART A

A. Authority of Office of Hearings and Appeals.—The Office of Hearings and Appeals is one of the major components of the Social Security Administration. The Office is administratively responsible to the Commissioner of Social Security. By direct delegation from the Secretary of Health and Human Services derives and has final authority relating to the holding of hearings, the rendition of decisions, and the review of decisions in connection with administrative appeals from determinations made under Titles II and XVIII (Part A) of the Social Security Act as amended. The Appeals Council, is composed of 10 members, including the Director and Deputy Director of the Office of Hearings and Appeals, who serve as the Chairman and Deputy Chairman, respectively.

The Appeals Council, its members, and the administrative law judge (ALJ) have the authority delegated directly from the Secretary of Health and Human Services to exercise all duties, powers, and functions pertaining to holding of hearings, rendition of decisions, and reviews of decisions under provisions of Title II of the Act, and under provisions of Title XVIII of the act which relate to administrative appeals from determinations affecting rights of individuals to benefits or to the amount of benefits.

B. Responsibility of the Administrative Law Judge.—When a request for hearing is filed, jurisdiction of the case passes to the ALJ.

The responsibilities of the ALJ in the Office of Hearings and Appeals are different in one significant aspect from those of hearing examiners in regulatory agencies. In the usual hearing process of the regulatory agency the presence of counsel for the agency and for the respondent presumptively assures an adequate development of the record in order to present the facts and law from the point of each party. Through briefs or otherwise, the attention of the hearing examiner in a regulatory agency is invited by opposing counsel to pertinent statutory and regulatory provisions and relevant court decisions. In appeals by individuals under Title XVIII and Title II, the Department is never represented in the hearing and the individual claimant may or may not be represented by counsel.

The HCFA position (as well as the intermediary position) is reflected by the case file which includes the initial and reconsideration determination and the evidence upon which the determination actions were based. (This underscores the necessity and importance of a well documented file at the reconsideration level.) Since there is no appearance on behalf of HCFA, it receives no notice as to the time and place of the hearing. As described in § 3785.10, when the intermediary receives a hearing request, the claim file is reviewed to determine if additional documentation is required pursuant to the rules of evidence applicable to administrative proceedings. The intermediary requests such evidence as necessary and transmits the claim file promptly to the appropriate hearing office.

The ALJ in reaching his decision, considers the case file presented by HCFA, any additional documentation, and any evidence presented at the hearing by the claimant and his witnesses.

C. Effect of Administrative Law Judge's Decision.—The ALJ renders the decision, notifies the claimant in writing, and places a copy of the decision in the case file. The Office of Hearings and Appeals retains the case file on all ALJ decisions pending further action. In those cases where the ALJ reversed, in whole or in part, the intermediary's reconsideration determination, the case file is forwarded to the appropriate HCFA regional office. The HCFA regional office reviews all ALJ reversal decisions (See § 3786 D). All other files are retained by OHA until the expiration of the time allowed for a party to the determination to file an appeal. Upon completion of the Appeals Council's review or the expiration of the time limit to appeal, OHA forwards the case file to the HCFA regional office which notifies the appropriate intermediary to effectuate the ALJ decision or where applicable the Appeals Council decision.

Do not initiate any communication about a particular ALJ decision with the provider involved pending receipt of the notice to effectuate the decision. However, if a provider requests the status of the case, advise the provider of the ALJ decision, but not to take further action until the intermediary is notified by the HCFA regional office to effectuate the decision.

A decision of an ALJ of OHA is not a precendent opinion. In any case where the HCFA regional office requests an intermediary to effectuate an ALJ decision, it is effectuated only with respect to the case in which the decision was issued. ALJ decisions which are significant may be published by HCFA in the Health Care Financing Administration rulings and other pertinent publications. The rulings contain precedential case decisions, statements of policy and interpretations of the law and regulations and are to be followed by intermediaries. A ruling is not applicable to other cases where the facts are not substantially the same as those in the ruling. In applying the rulings, consider the effect of subsequent legislation, regulations, court decisions, and rulings. The rulings as published may be modified or superseded by subsequent rulings.

D. Appeals Council Review of Administrative Law Judge's Decisions.—A claimant dissatisfied with an ALJ's decision can request the Appeals Council of OHA, to review the decision. While HCFA does not have a similar right to appeal an adverse determination, each adverse decision is reviewed closely by HCFA to determine whether it is in conformity with the law and regulations.

The Appeals Council may, within 60 days from the date of the notice of an ALJ's decision, review such decision on its own motion. This action by the Appeals Council is discretionary, and no claimant or party dissatisfied with the action of the ALJ can rely on the Appeals Council taking such action. He must file his request for review within 60 days if he is dissatisfied.

Generally, the Appeals Council reviews a case on its own motion when it notes the ALJ's decision is not in accord with the law, regulations, or published precedent decisions, or the record indicates that the findings are not supported by substantial evidence, or in an appropriate case, for the same reason for which it would grant a request for review.

A claimant, dissatisfied with the Appeals Council's decision, may institute action in a Federal district court if the amount in controversy is $1,000 or more.

E. Effectuating Reversal Decisions.—In those cases where the ALJ, the Appeals Council, or a Federal Court reverses a reconsideration determination, take the following actions on being expressly advised by the HCFA RO to effectuate the decision. (However, see § 3787 for effectuation of reversal decisions, including reconsiderations, where there is subsequent utilization in the same benefit period.)

Notify the beneficiary and the provider (or a non-participating, billing, emergency hospital) in writing, based on the decision of the ALJ, Appeals Council, or a Federal Court that the provider will be reimbursed, exclusive of the deductible and coinsurance amounts for the services for which payment had been denied, or that the provider has been found liable under section 1879 of the Act (waiver of liability).

Prior to making payment to a provider of services in fully or partially reversed hearing decision cases, ascertain whether the provider has been reimbursed for the previously denied services from another source and, if so, withhold the Medicare reimbursement until the provider has assured in writing that the incorrect collection has been refunded or otherwise disposed of in accordance with § 3401. Advise the beneficiary that he should expect refund from the provider if payment in excess of the deductible and coinsurance amounts had been made to the provider for the services for which Medicare will pay or for which the provider has been found to be liable. In beneficiary-filed emergency service claims, send an explanatory notice to the claimant with any payment due as a result of the ALJ's, or Appeals Council's decision.

Since, effective April 4, 1983, intermediaries are housing their own reconsideration claim files, as soon as a corrected bill is received and processed prepare a duplicate and place it in the claim file. It is no longer necessary to forward copies to HCFA in Baltimore, MD.

F. Intermediary Questions About the Appeals Process.—Direct to the HCFA RO any questions regarding the proper response to an ALJ's request for information or evidence or with respect to effectuation of the decision of an ALJ, the Appeals Council or a Federal Court or questions relating to judicial review of a title XVIII Part A case.

3787. EFFECTUATION OF REVERSAL OF DECISION BY INTERMEDIARY, OHA OR FEDERAL COURT WHERE THERE IS SUBSEQUENT UTILIZATION OF BENEFITS IN THE SAME BENEFIT PERIOD

Where an intermediary, ALJ, Appeals Council, or Federal Court reverses a denial and there is subsequent utilization of benefits in the same benefit period which would otherwise prevent the decision from being fully effectuated, apply the following policies:

Make reimbursement as though the claim had been approved initially, i.e., pay the days of service as full days, coinsurance days, or lifetime reserve days, depending upon the benefits which were available at the time the services were rendered. This may result in the creation of an overpayment for the subsequent stay, e.g., where subsequent services which had been reimbursed in full become coinsurance days because an earlier denied stay is allowed. (See § 3816D.) Such overpayments are not recovered from any party. (See § 3709.3D.) Therefore, the notice to the beneficiary of the reversal decision contains no reference to the subsequent services or the resulting overpayment.

Although reimbursement is made for the subsequently allowed stay as if it had been allowed initially, the bill is only for the benefit days available at the time of effectuation. It will, therefore, be necessary to maintain a separate record of amounts paid in such cases so that a proper adjustment may be made in the departmental charges for the provider's final cost settlement.

EXAMPLE: Mr. D. was a patient at Valley Hospital from July 6, 1982 to August 31, 1982, a total of 56 days. Initially the program paid for 20 days (from July 6 through July 25) but denied benefits from July 26, 1982 through August 31, 1982, on the basis that the latter services constituted custodial care. On September 25, 1982, Mr. D. was admitted to State Hospital. State Hospital was paid for 63 covered days (40 days in full and 23 coinsurance days). Subsequently, an ALJ ruled that the services furnished by Valley Hospital from July 26, 1982 through August 31, 1982, were covered.

The ALJ decision should be effectuated as follows: Valley Hospital receives full reimbursement for the entire 56-day stay there (20 days initially approved and 36 days approved as a result of the ALJ decision). However, the bill should be for 7 coinsurance days and 29 lifetime reserve days (based on the amount of benefits shown as available on HCFA's records at the time of effectuation). To assure, however, that Valley Hospital receives proper credit in the final cost report, the intermediary must keep a record of the amounts paid so that a proper adjustment may be made to the provider's final cost report. State Hospital is relieved of liability for the resulting overpayment because it was without fault in billing for and accepting the overpayment. The overpayment is not recovered from the beneficiary.

3788. EFFECT OF COURT DECISIONS

A decision by the Supreme Court of the United States is unqualifiedly binding and is a precedent for all similar cases. A decision of a lower Federal Court is binding only for that case. Although other courts within the territorial jurisdiction of the court rendering the decision may use it as a precedent in similar cases, each case must be filed and an individual court decision made. The Secretary determines whether, and to what extent, the ruling is to be followed in other similar cases.

Where HCFA requests an intermediary to effectuate a court decision, whether of the Supreme Court or a lower court, the decision will be effectuated only with respect to that case. HCFA issues any necessary revisions or modifications of policies for application to other cases. Until received, continue to follow existing instructions.

C. Beneficiary Representation by Provider.—To be represented by a provider, the beneficiary must execute a form SSA-1696-U4, Appointment of Representative, which must contain the signed acceptance of an authorized official of the provider being appointed. Once a valid Appointment of Representative form is executed by the beneficiary and accepted by the provider, the provider may then file any appeal request on behalf of the beneficiary, if the beneficiary has not already done so.

When the denial involves either services that constitute custodial care or are not reasonable and necessary, or the denial involves a failure to meet homebound or intermittent skilled nursing care requirements and thus the application of the limitation of liability provisions under §1879 of the Act (see §3430ff.), the provider representative (attorney or non-attorney) must waive in writing any right to payment from the beneficiary for these services. You must obtain the written waiver even when the claim is initially paid under the limitation of liability provision, i.e., when you find that neither the provider nor the beneficiary is liable. This waiver requirement is intended to insure against conflict of interest.

A provider representative (including an attorney) cannot charge the beneficiary a fee in connection with such representation.

The costs incurred by a provider in representing a beneficiary in an unsuccessful appeal are not allowed as reasonable costs in determining the provider's Medicare reimbursement.

(This provision applies only to title XVIII appeals. Providers are precluded from representing beneficiaries in the appeal of PRO determinations under title XI.)

3789.1 Beneficiary Incapable of Pursuing His Own Appeal.—The file may indicate that the mental or physical ability of the beneficiary is so impaired that there is a prima facie showing of mental incompetency or physical inability to pursue his appeal rights. Consider the request for reconsideration filed on behalf of such beneficiary valid if it is signed by an individual who would qualify to execute a request for payment on behalf of the beneficiary as shown in §3302.5 except for the provider. In these cases, if the file is properly documented, form SSA-1696-U4 is not necessary.

3789.2 Beneficiary Deceased.—If the beneficiary is deceased, the request for reconsideration, hearing, or Appeals Council review may be filed by the legal representative of the estate. In the absence of a legal representative, it may be filed by any person who has assumed responsibility for settling the decedent's estate. In such instance, document the file to show the basis for that person's filing the appeal. If the explanation has not been forwarded to you, obtain it through the SSO by means of form SSA-1980. The SSO undertakes the necessary development to ascertain whether the person has in fact assumed responsibility for the liabilities and assets of the estate.

3789. BENEFICIARY'S RIGHT TO REPRESENTATION UNDER PART A

Any individual may appoint a qualified individual to act as his representative in pursuing a claim or a request for a reconsideration, hearing, or Appeals Council review. In addition, if a beneficiary has a representative payee appointed to receive his monthly social security checks, or has a legal guardian or conservator, a request from such a person is treated as a request by the beneficiary himself. Such a representative is authorized to act for, or in the place of, the beneficiary and all contacts are to be made with or through him.

Honor a request for reconsideration by someone other than the beneficiary or his duly appointed representative if it clearly shows it originated with the beneficiary (i.e., was made with his knowledge). The beneficiary's knowledge may be inferred from previous actions taken by the person on behalf of the beneficiary or from indications that the writer is aware of the facts involved. For example, correspondence received from a Congressman or an attorney which indicates that he is writing on behalf of his constituent or client is sufficient indication that the writer is representing the beneficiary. This also applies to a request for reconsideration from a relative or friend who arranged for the admission or services. When such requests are received, a formal Appointment of Representative, Form SSA-1696-U4 is not required. (See § 3789.1 for cases in which the beneficiary is incapable of pursuing his own appeal.)

A. Completing Form SSA-1696-U4 Appointment of Representative.--(See § 3789.3, Exhibit 1.) In all cases other than those described above, the beneficiary must execute form SSA-1696-U4 in addition to Form HCFA-2649, Request for Reconsideration, Form HA-5011-U6, Request for Hearing Part A Health Insurance Benefits; or Form HA-520, Request for Review of Hearing Examiner's Action. The SSA-1696-U4 must be signed by both the beneficiary and the person appointed. One SSA-1696-U4 suffices for all administrative appeals when the same representative is involved. The form SSA-1969-U4 is completed by the Social Security office. If the form is not in file, use Form SSA-1980, Carrier or Intermediary Request for SSA Assistance to obtain it. (See § 3706.)

B. Physician Inquiries.--A physician who writes regarding a denial of Part A benefits may merely be voicing his disagreement with the determination. Even when the physician explicitly requests a reconsideration, it does not necessarily mean that he is willing to become the beneficiary's representative and act in pursuing the beneficiary's appeal rights. If the physician does not indicate that he is acting as the representative, furnish him a complete explanation of the action. Include a reference that, if the beneficiary wishes to file a reconsideration request, he may do so by contacting a Social Security office. If in the course of your reply action, it is discovered that the initial determination can be reopened because the services (or some additional services) were covered, reopen the determination.

On the other hand, if a physician writes and indicates that his patient disagrees with the initial determination and wishes to have a reconsideration, a reexamination, or words to that effect, acknowledge the letter and refer it to the Social Security office. That office will undertake the necessary development to have a proper request for reconsideration filed if the beneficiary or his representative desires. If the physician is willing to act in behalf of the beneficiary, an SSA-1696-U4 must be obtained.

3789.3 *Fees Charged for Services Rendered by a Representative.*--Section 206(a) of the Social Security Act requires that fees for services performed in connection with a proceeding before the Secretary by the representative (attorney or other qualified person) of a beneficiary be regulated by SSA. Services performed before State or Federal courts, however, are not considered to be proceedings "before the Secretary." Similarly, matters pertaining to Part B, except for considerations dealing with entitlement and enrollment application, are not proceedings "before the Secretary." All other fees charged for representing a beneficiary in any proceeding dealing with an asserted right under title XVIII of the Act calling for an initial or reconsidered determination, or for a decision by a hearing examiner or the Appeals Council, are subject to this provision of the Act.

The regulation of fees applies even though a duly appointed representative who rendered services to the beneficiary in a title XVIII matter does not actually contact the intermediary or SSA. When the intermediary becomes aware that a representative is involved, it should assure that forms or documents pertaining to the appointment of the representative reports dealing with actions taken by the representative, and requests for fees for services are sent to the BHI Reconsideration Branch with the reconsideration file. If the reconsideration file is no longer in the intermediary's office, any material received should be forwarded to the Reconsideration Branch immediately. Forms which should be part of the claim file if the beneficiary has a representative are the SSA-1696, if this form is required per the above instruction, and SSA-1560, Petition to Obtain Approval of a Fee for Representing a Social Security Claimant, if the representative has concluded his services and is requesting a fee. (See Exhibit 2.) Where these forms are required but are not in file, the intermediary should request them using the form SSA-1980.

If the intermediary has made a full reversal of the initial denial after its review, and a petition for fee approval is received, the intermediary will also send the entire file to the Reconsideration Branch. Upon receipt of a fee petition, the Reconsideration Branch acknowledges the receipt of the petition, completes its reconsideration action, and forwards the entire file to the Bureau of Health Insurance, Division of Technical Policy. This office reviews the fee petition and recommends to the Division of Benefit Continuity, Bureau of Retirement and Survivors Insurance, the amount of the fee that should be approved. That office notifies the attorney.

In the event that a potential representative contacts the intermediary directly on behalf of a beneficiary, he should be informed of the above requirements and advised that he should contact the social security office in order to complete the necessary forms if he has not already done so. The social security office personnel have manual instructions pertaining to the completion of these forms.

If the beneficiary or the representative volunteers the information that the representative's services were performed on a gratuitous basis, a report is to be placed in file by the interviewer showing that there will be no fee involved.

PSRO Appeals Process

3790. RECONSIDERATIONS, HEARINGS, AND APPEALS WHERE A PSRO HAS REVIEW RESPONSIBILITY

A. General.--The Social Security Amendments of 1972 provide for the establishment of Professional Standards Review Organizations (PSRO's) throughout the country "in order to promote the effective, efficient, and economical delivery of health care services of proper quality," and to assure that payment under the Social Security Act for such services will be made only when they are medically necessary as determined in the exercise of reasonable limits of professional discretion, of acceptable quality, and, in the case of inpatient services, when they could not be provided on an outpatient basis or more economically in a different type of health care facility. More specifically, where and to the extent that a PSRO has assumed review responsibility, the responsibility lies with the PSRO, both at the initial and reconsideration level, for coverage determinations with respect to questions of the medical necessity of services, the necessity for their provision on an inpatient basis, or the appropriateness of the type of inpatient facility where the services are provided. Intermediaries will continue to make these medical necessity decisions only until such time as a PSRO assumes the function.

Except as otherwise noted hereafter, references to PSRO also apply to provider review committees designated by a PSRO to make binding medical necessity determinations.

3790.1 Appeals.--The legislation creating the PSRO program includes a provision for a new appeals process for decisions by PSRO's relating to the medical necessity of services and the appropriate type of facility in which such services are rendered. The PSRO appeals provision replaces the Medicare appeals process for such cases. However, all other issues relating to whether payment may be made on a claim will continue to be subject to appeal through the Medicare process (see §§ 3780ff.).

3790.2 Reconsiderations.--There may be a dual system of appeals at the reconsideration stage, depending upon the issue. That is, a claim may be denied by both the PSRO and the intermediary on different issues and be subject to reconsideration by each entity to the extent of its responsibility. A reconsideration requested by a party entitled to do so must be processed to completion in accordance with applicable instructions no matter what the other entity may determine in the areas of its responsibility, except that an Administrative Law Judge (ALJ) may halt an intermediary reconsideration and decide the issue in controversy if a request for hearing has been filed on a completed PSRO reconsideration determination.

A. PSRO Reconsiderations.--A determination by a PSRO that care is not medically necessary or should be provided in a different type of facility or on an outpatient basis may be reconsidered only by the PSRO at the request of the patient, provider, or attending physician. If a statewide PSR Council exists, adverse PSRO reconsideration determinations when the amount in controversy is $100 or more will be subject to review by that body. The results of all reconsideration determinations made by PSRO's or reviews by statewide PSR Councils where they exist will be provided the patient, the provider, and the attending physician, and the patient will be notified of his right to request a hearing before an Administrative Law Judge of the Bureau of Hearings and Appeals (BHA). PSRO reconsiderations are required to be in writing and filed in the office of the PSRO. The complete PSRO reconsideration file should be maintained by the PSRO until and unless it is requested as evidence in a hearing.

Where a PSRO or a statewide PSR Council reverses a prior determination, that result will be communicated to the intermediary immediately. Where appropriate, the intermediary will inform the provider to submit the necessary bill to be paid.

For more specific information about PSRO appeals, see Chapter XIX of the PSRO Program Manual.

B. Intermediary Reconsiderations.--Continue to make determinations and to perform reconsiderations on all issues for which you have previously been responsible except for determinations with respect to medical necessity and whether care could have been provided on an outpatient basis or in a lesser facility. For example, a patient's care might be determined to be medically necessary by the PSRO but fall under one of the exclusions (other than section 1862(a)(1) or (a)(9)) in section 1862 of the act (e.g., cosmetic surgery, routine foot care, etc.) or may not be payable because no benefits are available. Thus, you will be required to maintain a medical review capability for both initial claims and reconsideration activity. The intermediary makes such determinations at the appropriate times and notifies patients of such decisions and of their appeal rights. It may not make determinations or reconsidered determinations based on medical necessity, level of care, or appropriateness of type of facility on claims which have been ruled on by PSRO's.

In one respect, the intermediary reconsideration process will be affected on occasion by the fact that PSRO's are involved in the appeals process. When an Administrative Law Judge of the Bureau of Hearings and Appeals notifies you that a hearing has been requested on a PSRO determination and that he is taking jurisdiction of the entire claim, immediately cease all actions leading to a reconsidered determination, collect all of the information in your possession with respect to the claim and forward all such data as directed by the ALJ. (Such notification may come through the Reconsideration Branch and when this is the case, the instructions apply.)

C. Intermediary Reconsideration Notices.--When an intermediary performs a reconsideration, it must notify all parties to the determination of the results. Whether the reconsideration determination consists of a letter or a cover letter with a separate determination, the letter or cover letter must contain the following language where a PSRO is responsible for the medical necessity or appropriateness of care issue:

> This determination relates only to issues for which the fiscal intermediary is responsible. Because a Professional Standards Review Organization has responsibility for the (medical necessity/appropriateness of care) decision on this claim, you will receive notification with respect to any denial on that issue (those issues) from the Professional Standards Review Organization.

The letter must also describe the beneficiary's appeal rights and comply with all other requirements governing Part A beneficiary reconsiderations.

D. Misfiled Reconsideration Requests.--

1. When you receive a request for reconsideration or review relating to a PSRO determination or reconsidered determination, immediately forward such request to the appropriate PSRO. If the request for reconsideration has been filed on form SSA-2649, forward the original (page 1 and any attachments) to the PSRO with a brief explanation and a copy of

the letter acknowledging receipt and advising the filer that the request is being transferred to the proper adjudicating office.

Detach page 4 of the SSA-2649. Annotate Item 10 "PSRO RECON--FORM SSA-2649 TRANSFER." In Item 17, check the "DISMISSAL" box. Prong-file a photocopy of page 1, page 4, a copy of the acknowledgment letter, and any other related material in a properly labeled case folder, as with any completed case file, and route the folder immediately to the Reconsideration Branch (use the address in § 3782.3), to cancel the control.

2. When a PSRO receives a request for reconsideration relating to a determination for which an intermediary was responsible, it should forward it to that intermediary immediately.

3. Social security offices will be directed to forward requests for reconsideration to the appropriate entity, but you should nevertheless scan all requests for reconsideration received from such an office upon receipt to identify those which should have been directed to a PSRO.

3790.3 Hearings--General.--The PSRO legislation provides any beneficiary or recipient who is entitled to benefits under title XVIII or XIX of the Social Security Act with the right to a hearing by the Secretary if he is dissatisfied with the reconsideration determination by the PSRO, and the statewide PSRO Council where one exists, and the amount in controversy is $100 or more. The responsibility for holding such hearings has been delegated to the Bureau of Hearings and Appeals of the Social Security Administration. BHA Administrative Law Judges (ALJ's) will conduct the hearings. As in the past, any hearings requested on Medicare claims where the initial and reconsidered determinations have been made by an intermediary will continue to come under the jurisdiction of BHA (see §§ 3785ff.). Any claim involving both Medicare and Medicaid benefits on which a hearing is requested will be heard as one case and the decision will resolve the claim for both programs.

A. Time and Place of Filing the Request for Hearing.--A hearing request must be signed and filed in writing within 60 days of receipt of the reconsideration determination or, where a Statewide Council exists, within 60 days of receipt of notice of its review of the PSRO's reconsideration determination.

A request for hearing may be filed with the PSRO responsible for the initial and reconsidered determination; or, where one exists, with the Statewide Council; or with an Administrative Law Judge; or, in the case of a social security beneficiary, at any office of the Social Security Administration; or in the case of a Railroad Retirement Board annuitant, at any RRB office, or, in the case of a Medicaid recipient, at any office of the State agency responsible for his benefits. Any request for hearing received by an intermediary should be routed to an office designated to receive requests for hearings.

The time limitation may be extended by an ALJ for good cause.

B. What Constitutes a Request for Hearing.--Any written, signed expression of dissatisfaction with the results of a reconsideration, or request for "another look," "review," "reconsideration," or similar term is to be considered a request for a hearing unless the writer is clearly requesting only a clarification or explanation of some point in the reconsideration determination. Any question as to the intent of the writer should be resolved in favor of considering the document as a request for hearing. Since a determination as to what constitutes "good cause" for late filing is within the purview of the ALJ, neither the PSRO, the provider nor the intermediary is to delay or cease action on a request, whether specific or implied, because it does not appear to be timely filed.

C. Routing Requests for Hearing.--Requests for hearings on PSRO determinations involving Medicare beneficiaries will be handled in a different way than has been customary. The request for hearing will be forwarded to the PSRO which will compile the claim folder and forward it to Reconsideration Branch (BHI). The Reconsideration Branch will check its records to determine whether any appeal action on an intermediary action with respect to the claim is pending or has been completed. The Reconsideration Branch should then obtain from its files or from the intermediary all pertinent data with respect to the beneficiary's eligibility and availability of benefits and all data bearing on any completed reconsiderations by the intermediary with respect to the claim. All such evidence should then be compiled and forwarded with the PSRO file to the appropriate hearing office. If an intermediary reconsideration is pending or a request for hearing is pending on an issue which comes under the jurisdiction of the Medicare Bureau, the hearing office should be so notified in the letter transmitting the evidence.

The intermediary will continue any activity required of it on the claim unless and until it is specifically requested to cease its action and forward its records to the Reconsideration Branch or an ALJ. Make every effort to complete actions on claims as soon as you become aware that a hearing on the PSRO determination has been requested.

3790.4 Professional Consultation.--As required by law, the Secretary may render a final decision after a hearing on an appeal of a PSRO determination only after appropriate professional consultation on the matter. This consultation will be obtained by the ALJ hearing the claim.

Appeals under Part B

3791. PROTESTS, REVIEW, AND "FAIR HEARING"--MEDICAL INSURANCE

Since intermediaries administering the hospital insurance program also make payment for medical insurance items and services furnished by and under arrangements with providers, the intermediary must be prepared to handle protests and furnish the review and hearings necessary under the medical insurance program.

An individual in his own right (or his authorized representative, see § 3797) and a physician or nonparticipating provider as his assignee is to be provided with a review or hearing by the intermediary when he is dissatisfied with the intermediary's determination denying a request for payment, or with the amount of the intermediary payment under Part B, or when he believes that the request for payment is not being acted upon with reasonable promptness. "Acted upon" means that the intermediary made a determination paying or denying payment of a claim. It will be deemed unreasonable if the request for payment has not been acted upon within a period of 60 days after receipt by the intermediary of the request for payment. (The carrier which makes payment of physicians' bills will provide the fair hearing for beneficiaries whose protests concern payment for the services of physicians and suppliers. This carrier will also conduct the fair hearing on complaints of assignee physicians and suppliers.) The law does not provide an appeal to the Social Security Administration from an intermediary's decision, or judicial review of the "fair hearing" decision.

The following governing principles should be used as guidelines for establishing a review or fair hearing. These guidelines permit the intermediary to operate with a great deal of latitude, yet assure that the methods and procedures employed are, in fact, consistent with the governing principles established by SSA.

3792. REVIEW

A dissatisfied party to an initial determination may request that the intermediary review such determination. A request for review should be made in writing and filed with the intermediary which made the initial determination or a social security office.

A period of not less than 6 months after the date of the notice of the initial determination is to be allowed within which a review may be requested. The intermediary at its discretion may, upon request by the party affected, extend the period for requesting the review.

The review is to be a completely new, independent, and critical reexamination of the entire claim. Since the review is a review of a file without the presence of oral testimony of the claimant or other party, it is a less costly and a more expeditious device for handling complaints than a formal hearing and is particularly appropriate for handling benefit determination complaints arising under Part B since relatively small amounts of money will be involved in most cases.

A review is a prerequisite to a fair hearing.

3792.1 What Constitutes a Request for Review - Handling Beneficiary Inquiries.--Many beneficiaries will raise questions about initial claims determinations whenever a denial or partial denial of a claim is involved, and they feel the explanation given on the EOMB is not satisfactory.

In order to respond properly to such inquiries, intermediaries should keep in mind the requirements which are applicable to the various aspects of the appeal process in Part B. Following is a discussion of the methods for handling various types of contacts with beneficiaries.

A. Telephone Inquiries.--When an intermediary receives a telephone call, the basis for the denial or reduction should first be explained to the beneficiary. It may be necessary to refer to records on the claim in order to do this. Regardless of whether the beneficiary is or is not satisfied by the explanation given, the telephone conversation can never be considered to be a review and should not be reported as such on performance reports.

If the beneficiary appears satisfied, no further action is necessary. However, if the beneficiary does not appear to be satisfied, the intermediary should inform him that he may file for a review within 6 months (or whatever longer time period the intermediary has established) of the date of the notice he received. The beneficiary should be told that the intermediary will send him the request form and that he may file his request with either the intermediary or SSO.

If the time for filing a request for review has elapsed, the intermediary should inform the beneficiary that it will consider whether there is "good cause" for the late filing and should solicit all available facts that could assist in such consideration. (In the event that the intermediary is unable to find "good cause" for late filing, it may still consider the possibility of reopening and revising its initial determination. See § 3796.)

If the intermediary employee determines that there may be some basis for the complaint of the beneficiary, he should encourage the beneficiary to file for a review. He should not tell the beneficiary that the determination will be changed, but he should explain that a complete review will be made when the request is filed. The beneficiary should be informed that he will be furnished a copy of the review determination whether it affirms or reverses the initial determination.

A record should be made of the telephone contact and of any action taken by the intermediary based on such contact. This record serves to establish an earlier filing date for a beneficiary who later files a written request for review and documents subsequent actions in the case by the intermediary.

B. Personal Inquiries.--These should be handled according to the instructions for telephone calls. If a beneficiary wishes to file a request for review, the intermediary should supply the SSA-1964 and offer its assistance.

C. Written Inquiries.--In many cases, a beneficiary will write to the intermediary protesting the determination made on his claim instead of filing a Form SSA-1964. These letters can be handled in any one of several ways, depending on their content.

If the letter is clearly limited to a request for an explanation of the determination, the intermediary may so limit its reply (either by phone or letter) and need not consider the letter as a request for review.

All requests for information should receive a reply. This may be done by phone in order to save time. If a beneficiary asks for review during the call, the request form should be mailed to him. When a beneficiary asks only for a second copy of a notice, the intermediary employee may send the copy without including an additional written response to the letter.

A request for review, to be treated as such does not require completion of an official form SSA-1964. A letter will serve as an acceptable request for review when it asks the intermediary either explicitly or implicitly to take further action on the claim, or when it indicates dissatisfaction with the intermediary's decision. Common examples of the phrasing of such letter requests are:

1. "Please reconsider my claim."

2. "Will you review this bill to see if more payment can be made."

3. "I am not satisfied with the amount paid--please look at it again."

4. "Your decision is illogical."

5. "My neighbor got paid for the same kind of claim. My claim ought to be paid too."

Letters which contain such statements should be logged in, controlled, and acted upon as valid review requests. Where the intermediary is not certain whether a beneficiary is asking for a review or for information only, the letter should be treated as a request for review.

All written inquiries should be retained in the claims file after the necessary action is taken, since such a letter could be used as documenta evidence later. There should also be a notation as to what action was taken and when for possible subsequent evidentiary and administrative purposes.

3792.2 Elements of a Review.-- Refer the claimant to an SSO for assistance in writing out his complaint of the unfavorable decision. The SSO staff will give the claimant general program information and, if he wishes to request a review of the decision, will help him complete a form SSA-1964. (See §3795.)

When the claimant is dissatisfied and requests a review of the initial decision, the following guideline is provided as the essential elements you should consider in conducting an adequate review of the claim.

A. The purpose of the review is to provide a new, independent and critical reexamination of the claim. Therefore, reexamine all aspects of the claim, not only the point at issue.

To reduce unnecessary costs, the review will not provide for personal appearance and testimony by the claimant.

B. The employee who made the initial determination should not be the one to review the case.

C. Instruct the claimant to submit any material evidence and statements in writing by mail or through any SSO. Request additional evidence from the claimant and/or the physician, provider or other supplier of services if necessary for proper adjudication.

D. If the initial decision is not reversed, prepare a written determination and mail it to the claimant (and any other involved party). Write the determination at a 6th to 7th grade reading level so that the claimant can understand the reason why any of the Part B services are not covered or cannot be fully reimbursed and what action can be taken if he or she disagrees with the review determination. To ascertain the reading level of the letter, use the following formula which is a currently accepted procedure for measuring readability. The formula measures two factors—the average sentence length and a hard-word factor (words of three syllables or more).

Follow the steps below to establish the reading level.

1. Count the total number of words in the letter. Divide this total number by the number of sentences in the letter. The result is the average sentence length. (Generally, a sentence should not have more than 12-15 words.)

2. Count the number of words which include three syllables or more. There are exceptions—do not count words that are (a) capitalized, (b) combinations of short, easy words, or (3) verb forms which result in three syllables by adding 'ed or 'es. Take the number of hard words and divide by the total number of words in the letter to determine the percentage of hard words.

3. Total the above two factors (average sentence length and percentage (e.g., 5.0) of hard words) and multiply by .4. The resulting figure will be the reading level. It should be no higher than a 7 which would be comparable to the 7th grade reading level. For further reference, Technique of Clear Writing by Robert Gunning, McGraw-Hill, New York, Publisher (1952), or other similar text may be consulted.

The review determination letter must also advise the claimant about his/her right to request a hearing if he/she is not satisfied with the review determination and the amount in controversy is $100 or more. The notice must inform the claimant that claims may be combined with other claims that have been reviewed or reopened (see S 3799.14 regarding reopenings) within 6 months of the date of the hearing request to meet the $100 minimum requirement. Include the following appeal paragraphs in the review determination letter:

> "You may request a hearing if you do not agree with this decision. You must request the hearing within 6 months of the date of this letter. The amount of benefits in question must be $100 or more in order to have a hearing. To meet the $100 you may combine the amounts for any claims on which we made a determination within the past 6 months based on (1) a request for review or (2) a reopening of an initial or review determination.
>
> "Write to us or contact any Social Security Office if you want a hearing. You may attend the hearing in person. You may also take or send someone to represent you. This person may be a lawyer or anyone you choose. Please note on your request who will attend the hearing. You do not have to appear in person. You may ask that a decision be made based on the facts in the file. A copy of the decision will be sent to you."

E. The review determination is the final determination unless a hearing is requested or it is revised in accordance with S 3799.

F. Include in the claimant's file all evidence or findings you have considered in the review of the claim. This includes material such as all memoranda of conversations with medical consultants, papers, requests, reports, etc. arising out of the claims review process. This file will be forwarded to a hearing officer if a hearing is requested by the claimant.

3794. THE HEARING.

The fundamental purpose of the hearing process is to give an individual, dissatisfied with what he considered to be an adverse decision on his claim for payment, an opportunity to present in person the reasons for his grievance and to afford him an impartial review based on the substance of his claim. Therefore, the notice of an adverse review decision must give the individual notice of the right to a hearing, the place and manner of requesting the hearing, the time limit for requesting it, and the requirement that at least $100 must be in controversy. (See S 3794.1(A) for the manner of determining the amount in controversy.)

The principles set out in the following sections are to be applied by the intermediary in setting up the hearing to handle complaints by individuals dissatisfied with the review determination. The hearing officer, in exercising the authority to conduct a hearing, must comply with all the provisions of title XVIII of the Act and related regulations as well as with policy statements, instructions and other guides issued by HCFA in accordance with the Secretary's agreement with the intermediary.

3794.1 Request for Hearing.-- Individuals who are dissatisfied with a review determination and who meet the requirements outlined in A below can request a hearing in accordance with the procedures in C below.

A. Eligibility for a Hearing.-- A party to an intermediary's review determination shall be entitled to a hearing if he files a written request and if the amount in controversy at the time the request is filed is $100 or more. A review is a prerequisite to a hearing. Any person other than the parties to the review determination may be made a party to a hearing if his rights with respect to supplementary medical insurance benefits may be prejudiced by the decision, or if the hearing officer notifies him to appear at the hearing or to present such evidence and contention of law or fact as he may desire in support of his interests.

In order to have a hearing regarding benefits under Part B, the dollar amount in controversy must be $100 or more. There may be cases in which the amount in controversy at the initial determination is reduced to less than $100 as a result of a review or a revision. In such cases, the claimant would not be entitled to a hearing. However, if after the beneficiary filed a request for a hearing in which the $100 requirement was met, the intermediary revised its action and reduced the amount in controversy to less than $100, the beneficiary would still be entitled to a hearing.

B. Determination of Amount in Controversy.—The amount in controversy is determined by the hearing officer. When the intermediary receives a request for hearing on one or more claims from a beneficiary or from a provider in the case of claims involving the waiver of liability issue under section 1879 of the Act, the intermediary provides the hearing officer with all information in its files relating to the claim(s). The hearing officer determines the amount in controversy at that time.

The amount in controversy is determined by a two-step process as follows:

1. Determines the difference between the amount(s) charged the beneficiary and the amount(s) allowed by the intermediary.

2. Less the applicable coinsurance and any unmet deductible remaining at the time the hearing officer makes the determination.

This result is the amount in controversy.

In effect, the amount in controversy is the amount of the payment that would be made if the denial(s) were fully reversed at the time the hearing officer makes the determination.

A Part B hearing may be conducted on more than one claim at a time; i.e., the beneficiary or provider may have a hearing on several claims involving different services. The hearing officer will determine the total amount in controversy for all claims on which the beneficiary or provider has requested the hearing. It is not necessary that there be $100 in controversy for each claim. To combine claims to meet the $100 limitation, the following requirements must be met:

1. the claims must all belong to the same beneficiary or to the same provider; and

2. the claims must all have been through the review process; and

3. the 6-month time limit must be met for all the requests involved; and

4. the hearing request must identify the claims.

It should be noted that all the claims combined by a beneficiary do not have to involve the same provider. Likewise a provider may combine claims for purposes of a hearing that involve various beneficiaries.

At the time the hearing officer determines the amount in controversy, it may not be clear whether the deductible has been met subsequent to the time of the initial determination. If this factor is pertinent to the determination of the amount in controversy, the hearing officer will request the intermediary to ascertain the beneficiary's current deductible status.

The hearing officer determines whether the amount in controversy amounts to $100 or more at the time he considers the hearing request. He will dismiss the hearing request and not rule on the substantive issues of the protest if he determines that the $100 requirement is not met. The dismissal notice should state that although the $100 qualification amount has not been met, the claim(s) can be added to a subsequent claim(s) with which the claimant is dissatisfied, as long as the 6-month time limit from the date of the review notice(s) for requesting a hearing is met, in order to satisfy the $100 requirement in a future hearing request.

NOTE: Any party to an initial determination who received a notice of review dated prior to October 31, 1972, will not be subject to the $100 limitation and will be granted a hearing by the hearing officer regardless of the amount in controversy if the request for hearing was filed timely.

C. Manner of Requesting a Hearing .--A request for a hearing may be either any clear written expression of dissatisfaction with the intermediary review determination, or a filing of Form SSA-1965 (Request for Hearing--Part B Medicare Claim). (See § 3795.) An SSA-1965 will always be completed when a claimant personally requests a hearing in the intermediary's office or in a social security office. If a writing is received from the claimant that does not clearly indicate a request for a hearing, the intermediary may request the claimant to complete an SSA-1965. Such a request for a hearing must be filed with the intermediary or a social security office. A period of 6 months after the date of the notice of the review determination is to be allowed within which a party to the review determination may request a hearing. The hearing officer, at his discretion, may upon request by the party affected, extend the period for filing the request for hearing.

D. Examples Determining Amount in Controversy.—Since determining the amount in controversy can be complex when more than one claim is involved, the following examples are provided. Hearing officers will use the following formula in determining the amount in controversy:

Step 1. Total amount charged for claims in dispute
- Total amount allowed for claims in dispute
Difference

Step 2. Difference of amount charged and allowed
- Unmet deductible
Balance remaining X 80% = amount in controversy

NOTE: Any amounts subject to 100% reimbursement (physician radiology and pathology services) should not be reduced for deductible and coinsurance.

EXAMPLE 1: The beneficiary has met $20 of the deductible in January. A claim for $65 is denied in March. The denial is reaffirmed on review and a hearing is requested in April. The hearing officer ascertains from the intermediary that only $20 of the deductible has been met. The following determination is made:

Step 1. $65 charged
- 0 allowed
$65 difference

Step 2. $65 difference
- 40 unmet deductible
$25 X 80% = $20 in controversy

No hearing may be held since the $100 limitation is not met.

EXAMPLE 2: The beneficiary met $20 of the deductible in January. The beneficiary's second claim that year is for $65. The claim is totally denied on review in March. The beneficiary's third claim that year is for $80. The claim is totally denied on review in April. The beneficiary requests a hearing on both denied claims in May. The hearing officer ascertains from the intermediary that only $20 of the deductible is met. The following determination is made:

Step 1: $145 charged ($65 + $80)
- 0 allowed
$145 difference

Step 2: $145 difference
- 40 unmet deductible
$105 X 80% = $84 amount in controversy

No hearing may be held since the $100 limitation is not met.

EXAMPLE 3: If all the facts in Example 2 were the same except that the hearing officer ascertains from the intermediary that the beneficiary had another claim for services in April that was allowed by another intermediary or carrier which satisfied the deductible, the following determination is made:

Step 1: $145 charged ($65 + $80)
- 0 allowed
$145 difference

Step 2: $145 difference
- 0 unmet deductible
$145 X 80% = $116 amount in controversy

A hearing would be held on the denied claims for $65 and $80.

EXAMPLE 4: The beneficiary met the $60 deductible in January. The beneficiary's second claim that year for $80 is denied in February. A review determination reaffirming the denial is made in March. The beneficiary's third claim that year for $90 is denied in September. A review determination is made in October. The beneficiary requests a hearing on both claims in November. The hearing officer would determine that the 6-month time limitation for requesting a hearing had expired for the $80 claim, in the absence of good cause for late filing. The $100 limitation is not met by the claim for $90. No hearing may be held.

EXAMPLE 5: The beneficiary met $20 of the deductible in March. The beneficiary's second claim that year for $80 is submitted in July and denied. The review determination which affirms the denial is made in November. The beneficiary had no other claims that year.

The beneficiary's first claim for the following year is for $95 and is totally denied in January. The review determination is made in February and affirms the denial.

The beneficiary requests a hearing on both claims in March. The following determination is made after the hearing officer ascertains that the deductible status for the first year is $30 unmet and for the second year is 0 met.

	First year	Second year
Step 1:	$80 charged - 0 allowed $80 difference	$95 charged - 0 allowed $95 difference
Step 2:	$80 difference - 30 unmet deductible $50	$95 difference - 60 unmet deductible $35

Amount in controversy: $50 + $35 = $85 X 80% = $68. No hearing may be held. In this case it was necessary to calculate the unmet deductible in two different years.

3794.2 Notice of Time and Place of Hearing.-- A claimant who requests a fair hearing is to be given adequate written notice of the time and place set for the hearing, information as to the specific issues to be determined, and the matters on which findings will be made and conclusions will be reached. Give the notice as promptly as possible after receipt of the request for a hearing. Where the hearing was requested by a person on behalf of the claimant, give notice also to that person. Give notice to any other person whose rights with respect to supplementary medical insurance benefits may be prejudiced or affected by the decision.

Schedule the hearing for a time and a place convenient to the claimant and/or his representative. Give the notice of the hearing sufficiently in advance of the date set and include sufficient information about the hearing procedure (including the claimant's right to representation) for effective preparation for the hearing. See § 3794.9 for cases where the claimant has moved out of your service area.

A request for a hearing may be withdrawn only by written notice by the claimant or his authorized representative. A request for a hearing may be considered abandoned if neither the claimant nor his representative appears at the time and place set for the hearing and no reply is received within a reasonable time (10 days) to a notice of inquiry mailed to the claimant and/or his representative.

The hearing officer may, for a good and sufficient reason, fix a new time and/or place for the hearing or adjourn the hearing on his own motion upon reasonable notification to the parties.

3794.3 Hearing Officer.-- The hearing is to be conducted by a competent, qualified and impartial individual designated by the appropriate official of the intermediary or carrier. The hearing officer is to be an individual who has not been involved in any way with the determination in question and has neither advised nor given consultation on the claimant's request for payment which is the basis for the hearing. The hearing officer should be an attorney or other qualified individual with ability to conduct formal hearings and with some understanding of medical matters and terminology, and a thorough knowledge of the program and the regulations issued together.

3794.4 Disqualification of Hearing Officer.-- A hearing officer is not to conduct a hearing in any case in which he is prejudiced or partial with respect to any party, or if he has any interest in the matter before him. He is to consider any objection and shall, at his discretion, withdraw. If he does withdraw, designate another hearing officer to conduct the hearing. If he does not withdraw, the objecting party may present his objections to you for your consideration at any time prior to the issuance of a decision, review the request and take appropriate action. The fact that a hearing officer is an employee of the intermediary does not create prima facie cause for disqualification.

3794.5 Hearing Procedures.-- The hearing procedure is to provide an opportunity for the claimant to appear in person and, if he desires, to be represented by legal counsel or by any other qualified individual. (See § 3797.) However, the claimant may forego the opportunity to appear personally or through a representative. A claimant and/or his representative is to have the opportunity to offer oral and written evidence, to examine and reply to evidence relied upon as the basis of your action, and to present and examine witnesses. The rules of evidence established for the hearing procedure must offer sufficient latitude so that all relevant and material evidence can be accepted and considered without regard to whether it would be admissible under the rules of evidence applicable to court procedures.

If all interested parties waive their right to appear before the hearing officer, it shall not be necessary for him to give notice of or conduct a formal hearing. However, the hearing officer will make a decision in accordance with the evidence at hand in the usual manner. A waiver of the right to appear must be in writing and filed at any time prior to the mailing of notice of the decision. Even though all parties have filed a waiver, the hearing officer may, nevertheless, give notice and conduct a hearing if he believes that the personal appearance and testimony would assist him to ascertain the facts. However, failure of the parties to appear shall not be cause for a finding of abandonment and the hearing officer shall still make his decision on the basis of the evidence adduced.

Make a complete record of the proceedings at the hearing. Transcribe the testimony and copies of the transcription and other documentary evidence are to be reproduced when directed by the hearing officer, the intermediary, or the Administration. Furnish a copy of the transcribed testimony to the beneficiary or his representative upon request, provided he bears the cost. However, the charge to the claimant or his representative may be waived if the cost of providing a copy of the transcribed testimony is $5 or less and you feel that a charge is not warranted in view of billing and bookkeeping expenses.

With the approval or upon action of the hearing officer, a request for a hearing may be withdrawn or dismissed at any time prior to the mailing of the notice of the decision; (1) upon the claimant's written application to you or the hearing officer; (2) by the claimant's oral request at the hearing; (3) upon failure of the claimant or his representative to appear at the hearing without giving proper notice within 10 days after the mailing of the notice of the time and place of the hearing to show good cause why he cannot appear; (4) where the claimant is not a proper party or is otherwise not entitled to a hearing; or (5) where the claimant dies and there is no information before the hearing officer showing that anyone may be prejudiced by your determination.

A hearing office may, on request of a party and for good and sufficient cause shown, vacate any dismissal of a request for a hearing at any time within 6 months from the date of the mailing of the notice of the dismissal to the party requesting the hearing at his last known address.

3794.6 Issues for Determination at a Part B Hearing.-- The "hearing" procedures are utilized only to settle issues arising from certain determinations by you involving Part B benefits. These include issues as to the deductible, covered services, the number of home health visits used, the timely execution and filing of a request for payment, waiver of beneficiary or provider liability, whether a claimant is entitled to have payment made under Part A instead of Part B, whether a physician's certification has been properly obtained and the medical necessity of the services. The hearing officer may not make determinations with respect to any issue or factor for which SSA has sole responsibility (for example, whether or not an individual is entitled to coverage under the supplementary medical insurance plan; whether an institution furnishing services meets the conditions for participation or coverage of services; or whether an overpayment should be waived) or which relates to hospital insurance benefits under Part A or non-provider services under Part B. In the latter case the carrier's hearing officer has jurisdiction for the hearing.

Institute procedures to assure that appropriate disposition is made of all protests and complaints. If you receive a protest from a claimant concerning an issue which is outside your area of responsibility, forward it to HCFA without delay and advise the claimant of the referral. If the case pertains to non-provider services under Part B, forward the hearing request to the appropriate carrier. Where a complaint is received which encompasses more than one issue, some of which are outside your area of responsibility, refer the complaint to HCFA for consideration of those aspects of the protest over which you have no jurisdiction. However, proceed with the review of that portion of the protest which falls within the confines of your adjudicative duties, provided that a decision on such portion of the complaint is not dependent on HCFA's determination on the other issues. Where such dependency exists, defer review pending HCFA's decision.

3794.7 Hearing Decision.-- As soon as practicable after the close of a hearing, the hearing officer is to make a decision in the case based upon the documents, requests, papers, or other written evidence included in the hearing record. The decision is in writing and contains a statement of the issues, a statement of the evidence with reference to exhibits where appropriate, a statement of the applicable law with appropriate citations, a statement of rationale, specific findings of fact, and a conclusion. The hearing officer's decision must comply with the provisions of title XVIII of the act and related regulations as well as with general instructions (e.g., policy statements, instructions and other guides). The hearing officer's authority is definitively restricted by these parameters. Mail a copy of the decision to each party to the hearing at his last known address. The hearing officer's decision is final and binding upon all parties to the hearing unless it is revised in accordance with § 3799. The law does not provide for an appeal from the hearing officer's decision or for judicial review by State or Federal courts.

3794.8 HCFA Regional Office Examination of Hearing Records.—To help assure uniform application of due process principles in the hearing process and to assist in identifying areas in which the expansion or revision of guidelines is necessary, HCFA's ROs examine records of hearings conducted by hearing officers. The following instructions set forth the procedures the ROs utilize in their review of hearing files.

A. The RO contacts the carriers in its region and works out arrangements for review of Part B hearing files.

B. Over the course of a fiscal or calendar year, the RO reviews a sample of hearing officers' decisions. The sample is based on the last digit of a claimant's Social Security number, which the RO selects at random.

C. The RO reviews 16 hearing files for each hearing officer who has decided, dismissed or accepted withdrawal of a hearing request in the year under review. If a hearing officer handled fewer than 16 hearings during the year, the RO reviews all hearing records.

D. Where the claimant receives an in-person or telephone hearing, the RO has the option of reviewing either a typed transcript of the hearing record or a taped recording.

E. The RO examines the following items in its due process review:

1. Is an EOMB in file?
2. Is a review request signed by proper party (§3792.1)?
3. Is a review determination in file?
*4. Does the review determination explain why, in specific terms, the decision was not fully favorable (§3792.2F)?
5. Was a review request timely (§3792.1A)?
6. If not timely, was a good cause determination made (§3792.1A)?
*7. Is an appeal paragraph included (§3792.2F)?
*8. Is waiver of liability (§§3400ff.) applicable, and, if so, considered?

9. Is hearing request signed by proper party (S3794.1C)?
10. Is hearing request timely (S3794.1C)?
11. If not, was good cause determination made (S3794.1C)?
12. Was request acknowledged timely (S3794.2)?
*13. Is amount in controversy computed correctly? (See S3794.1D for proper formula.)
*14. If amount is less than $100, or withdrawal is accepted, was dismissal sent as described in S3794.1B?
*15. Was hearing notice properly sent? (See S3794.2.)
*16. Was second review conducted?
17. Did Hearing Officer review before hearing?
18. Was opening statement given?
*19. Was claimant apprised of his rights?
*20. Did Hearing Officer facilitate claimant/witness testimony?
*21. Was hearing officer's decision more adverse to the claimant than the review determination?
*22. Was S3794.7 met?
*23. Was complete record kept/transcript available per S3794.5?
24. Was hearing decision rendered within 120 days after the hearing request was received?
25. Are files complete? Is all evidence on which review and hearing decision based in file?

*Due process is not met when the items marked by an asterisk are not followed.

3794.9 Request for Hearing--Impractical for Servicing Intermediary's Hearing Officer to Hold Hearing.-- A Part B hearing is usually held by the servicing intermediary at a time and place convenient to the claimant. However, instances may arise when it will be impractical for the servicing intermediary to conduct a hearing with its own hearing officer because of the distance, time, and expense involved in holding the hearing at a location which would be convenient for the claimant (usually near his residence).

Normally, the most economical and expeditious alternative available for handling this type of situation is to have an intermediary or carrier located nearer the claimant's residence provide the servicing intermediary with a hearing officer. Whether or not this procedure should be followed depends upon the facts in each individual case. A servicing intermediary should conduct a hearing with its own hearing officer where there would be no savings in time or travel by utilizing the hearing officer supplied by an intermediary or carrier nearer the claimant's residence or where there are factors present which make this the more appropriate course of action to assure a fair and just decision at the hearing.

Intermediaries should feel free to discuss with the HCFA regional office the best method for providing a hearing where it appears impractical for the hearing to be held by the servicing intermediary. If it is decided that the best course of action is to have another intermediary or carrier nearer the claimant's residence furnish a hearing officer, the regional office will make the necessary arrangements, including coordination with another regional office if the claimant does not reside in the region.

EXAMPLE: A beneficiary from New York, while on vacation in Florida, incurred expenses for medical services. His claim was denied on the basis that the services were not covered under Medicare. The beneficiary, some time after the review determination affirmed the initial denial, returned to New York City, and requested a hearing on his claim. Since he was not returning to Florida and wanted an opportunity to appear personally before a hearing officer, he asked that the hearing be held in New York. The servicing intermediary, after consulting with the Atlanta RO, felt that the proper disposition of the hearing did not require that its hearing officer hold the hearing. The request for hearing, along with copies of all the pertinent information and documents, was forwarded to the RO in Atlanta, Georgia. The Atlanta RO contacted the New York RO for assistance in obtaining a hearing officer and forwarded the request and materials to the HIRO in New York. The New York RO then made arrangements with an intermediary or carrier in New York for the selection of a hearing officer.

The hearing officer selected to hold a hearing for another intermediary under this procedure acts as that intermediary's hearing officer and all communications with the claimant, including the decision, will reflect this.

Where the hearing officer supplied by an intermediary or carrier nearer the claimant's residence requires any additional development, information or documents for handling the case, the request should be forwarded to the HI regional representative in accord with his intermediary's usual practices. The HIRO will then forward the request to the servicing intermediary, or if it is an out-of-region intermediary or carrier, to the appropriate HIRO for transmittal to the servicing intermediary.

The servicing intermediary is bound by the decision of the hearing officer selected to hold the hearing, but only relative to that particular case. In accordance with the general rule, the decision of the hearing officer does not create a precedent which the intermediary is bound to follow in subsequent cases.

Only the servicing intermediary should record a transferred hearing case in its statistical reports. When the hearing file containing the transcript of the hearing and the final decision of the selected hearing officer is returned via the BHIRO to the servicing intermediary, the case should then be cleared from its pending hearings record. The servicing intermediary (not the hearing officer) should forward a copy of the hearing file to BHI in accordance with § 3794.8.

Any problems encountered in implementing these procedures should be brought to the attention of the HI regional office immediately.

3795. FILING PART B APPEAL REQUESTS ON SSA-1964 AND SSA-1965

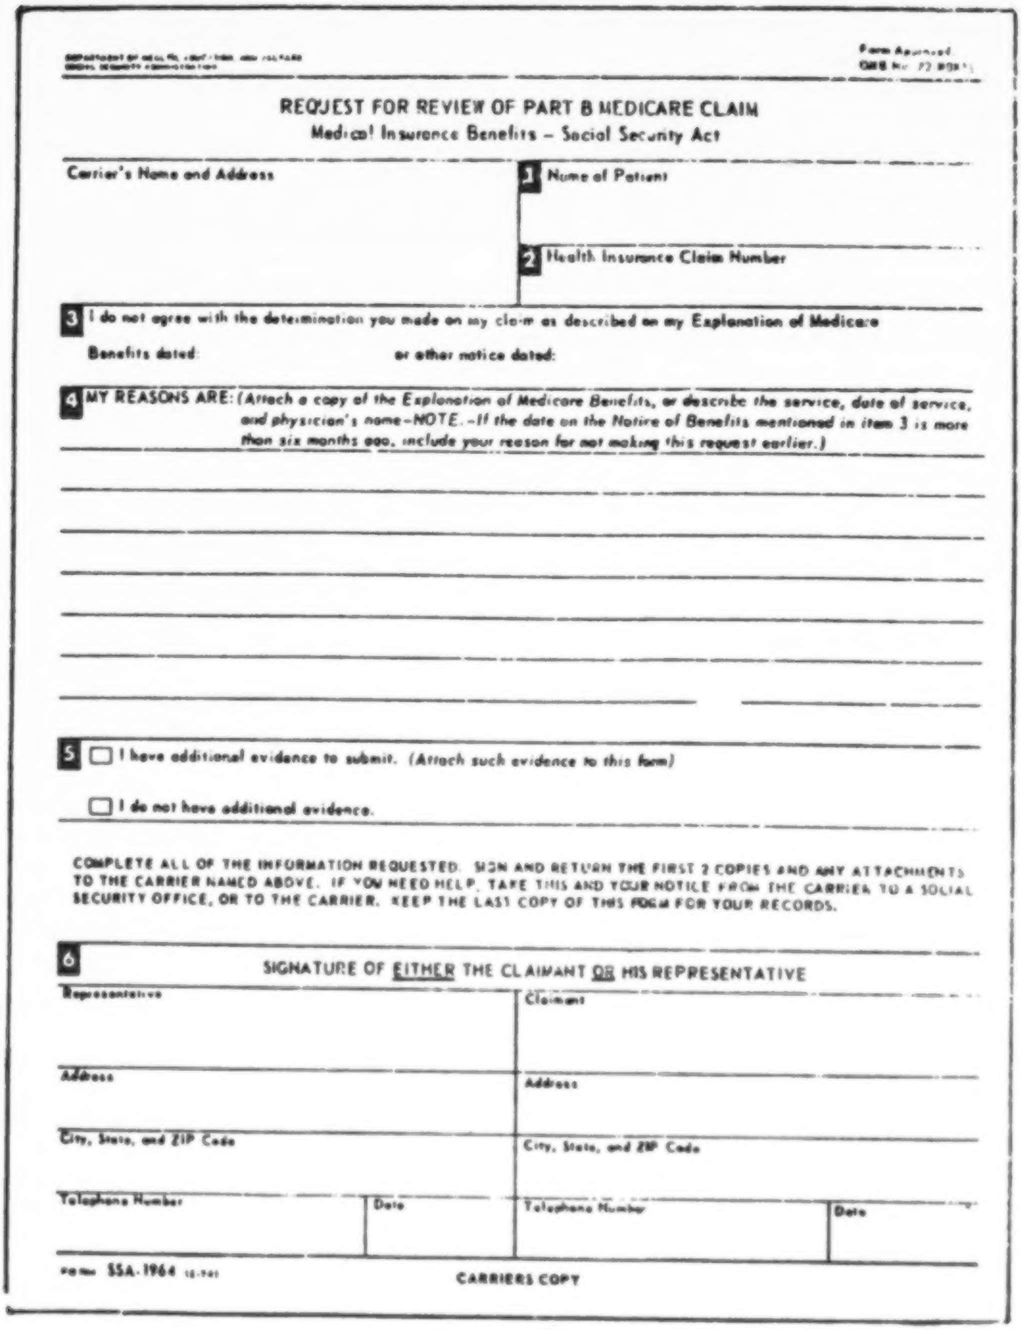
When a claimant wishes to appeal the initial determination or the intermediary's review determination of his claim and he has not submitted a written statement of his intent, he will file a form SSA-1964 (Request for Review of Part B Medicare Claim) or an SSA-1965 (Request for Hearing--Part B Medicare Claim).

The claimant may also appoint any qualified individual to act as his representative in prosecuting his request for a review or hearing. If the individual appointed is not an attorney or a member of Congress, the claimant must execute an SSA-1696 (Appointment of Representative), in addition to the SSA-1964 or SSA-1965. The SSA-1696 must also contain the signed acceptance of the person appointed. Where the individual is an attorney or a member of Congress, completion of the SSA-1696 is not necessary. A request for an appeal by a representative on behalf of a beneficiary shall be treated as a request by the beneficiary himself. (See § 3789, Exhibit 1.)

The intermediary may mail the forms directly to the claimant for completion or may request the social security office to obtain an appropriate form when the claimant appears to need assistance. These cases must be controlled in the intermediary's office in the same way as when other claims forms or information is requested.

When the forms (SSA-1964, SSA-1965, SSA-1696) are filed through the social security office, that office distributes each copy to the appropriate parties. Prior to distribution, each copy of the SSA-1964 is date stamped. In the case of the SSA-1965, the social security office completes the acknowledgment portion. The file copy of the SSA-1696 is forwarded with the intermediary's copy of the appeal form to the intermediary for inclusion in the claims file.

When the form SSA-1964 is filed with the intermediary, destroy the SSA copy, if any. In hearing cases, upon return of the claimant copy of form SSA-1965 to the claimant, the SSA copy of the form (if any) should be destroyed.



REQUEST FOR REVIEW OF PART B MEDICARE CLAIM

Medical Insurance Benefits – Social Security Act

Carrier's Name and Address

1 Name of Patient

2 Health Insurance Claim Number

3 I do not agree with the determination you made on my claim as described on my Explanation of Medicare Benefits dated: or other notice dated:

4 MY REASONS ARE: *(Attach a copy of the Explanation of Medicare Benefits, or describe the service, date of service, and physician's name–NOTE.–If the date on the Notice of Benefits mentioned in item 3 is more than six months ago, include your reason for not making this request earlier.)*

5 ☐ I have additional evidence to submit. *(Attach such evidence to this form)*

☐ I do not have additional evidence.

COMPLETE ALL OF THE INFORMATION REQUESTED. SIGN AND RETURN THE FIRST 2 COPIES AND ANY ATTACHMENTS TO THE CARRIER NAMED ABOVE. IF YOU NEED HELP, TAKE THIS AND YOUR NOTICE FROM THE CARRIER TO A SOCIAL SECURITY OFFICE, OR TO THE CARRIER. KEEP THE LAST COPY OF THIS FORM FOR YOUR RECORDS.

REQUEST FOR HEARING - PART B MEDICARE CLAIM
Medical Insurance Benefits - Social Security Act

Carrier's Name and Address

1 Name of patient

2 Health insurance claim number

3 I disagree with the review determination on my claim, and request a hearing before a hearing officer of the insurance carrier named above.

MY REASONS ARE: *(Attach a copy of the Review Notice. NOTE.—If the review decision was made more than 6 months ago include your reason for not making this request earlier)*

4 ☐ I have additional evidence to submit. (attach such evidence to this form or forward it to the carrier within 10 days.)
☐ I do not have additional evidence.

5 EITHER THE CLAIMANT OR HIS REPRESENTATIVE SHOULD SIGN IN THE APPROPRIATE SPACE BELOW:

Signature or Name of Claimant's Representative		Claimant's Signature	
Address		Address	
City, State, and Zip Code		City, State, and Zip Code	
Telephone Number	Date	Telephone Number	Date

(Claimant should not write below this line)

ACKNOWLEDGMENT OF REQUEST FOR HEARING

Your request for a hearing was received on ______________. You will be notified of the time and place of the hearing at least 10 days before the date of the hearing.

Signed	Date

FORM SSA-1965 (10-72)

CARRIERS COPY

3797. AUTHORIZED REPRESENTATIVE-PART B.

A party to an initial determination, review, or hearing may appoint any individual as his representative unless that person is disqualified or suspended from acting as a representative in proceedings before the Social Security Administration or unless otherwise prohibited by law. The file may also reflect that a party's mental or physical ability is so impaired that there is a prima facie showing of mental incompetency, or physical inability to pursue his rights. In these cases, the request for review or hearing on behalf of such individual should be considered valid if it is signed by an individual who would qualify to execute a request for payment on behalf of the claimant. (See § 3303.) Where the representative is an attorney or a Member of Congress, in the absence of information to the contrary, his representation that he has such authority shall be accepted.

A representative may make or give, on behalf of the party he represents, any request or notice relative to any proceeding before the intermediary including review and hearing. A representative shall be entitled to present evidence and allegations as to facts and law in any proceeding affecting the party he represents and to obtain information with respect to the claim of the party to the same extent as the party. Notice to any party of any action, determination, or decision, or request to any party for the production of evidence, is to be sent to the representative of such party.

Hospital Appeals Under the Medicare Prospective Payment System (PPS)

3798 APPEALS BY HOSPITALS OF DIAGNOSIS-RELATED GROUP (DRG) ASSIGNMENTS UNDER PPS

A. Intermediary Review of Initial DRG Assignments.—Under PPS, the amount of payment to hospitals for inpatient hospital services is determined prospectively on a per-case basis. A single payment amount is paid for each type of case identified by the DRG into which each is classified. In accordance with §3637.12, a DRG is assigned to each hospital discharge by use of a computer software program, the DRG grouper, from data elements reported by the hospital.

The hospital has 60 days after the date of the initial DRG assignment to request review.

If the hospital disagrees with the DRG assigned to a case, it may resubmit additional billing data for that case. (See §3637.13.) Review the resubmitted data and adjust the DRG, if necessary.

The beneficiary is not entitled to a review of the initial DRG assignment since the DRG assignment does not constitute a denial of benefits. Beneficiary liability is limited to deductibles and/or coinsurance and payment for services not covered by Medicare. Of course, the beneficiary retains the full range of appeal rights specified in §3781.1 for cases involving denial of benefits.

B. Intermediary's Role as Medical Review Entity—Review of Revised DRG Assignments.—Hospitals receiving payment under PPS are required to enter into contracts with Peer Review Organizations (PROs) by September 30, 1984. Until a PRO contract is awarded in the area, the medical review function will be performed by Professional Standards Review Organizations (PSROs) or fiscal intermediaries (absent a federally funded PSRO in the area).

If the intermediary performs the medical review in the absence of a PRO or PSRO, one of its functions is to ascertain that the diagnostic and procedural information supplied by the hospital that led to the DRG assignment is substantiated by the medical records. (See §3690.4.) If it is determined that an error has occurred in the coding and/or sequencing of the diagnostic and/or procedural information in the medical record or on the bill, assign a revised DRG, notify the hospital and adjust its reimbursement accordingly.

If the hospital disagrees with the revised DRG, it may request the intermediary to review the determination within 60 days after the date of notice of the revised DRG assignment.

As in the case when the initial DRG is assigned, the beneficiary is not entitled to a review of the revised DRG assignment since he/she is not denied any benefits and thus is not adversely affected.

Reopenings and Revisions

3799. REOPENING AND REVISION OF DETERMINATIONS AND DECISIONS ON CLAIMS--GENERAL.

When a determination on a bill for services furnished a beneficiary is made, he (and the provider) should be able to rely on the determination with respect to the coverage of the services and the amount of payment. There are, however, instances in which strong equities exist for the parties to the determination and for the Government, in favor of reopening a potentially incorrect initial, revised, reviewed, or reconsidered determination, or hearing officer's, ALJ's or AC's decision.

The regulations do not permit unrestricted reopening of determinations and decisions. They do set specific circumstances under which determinations may be reopened. The following sections outline these policies and procedures. (See §§2633ff. for guidelines regarding reopening determinations or decisions on provider's costs and the amount of reimbursement.)

The authority to reopen decisions of an ALJ or the Appeals Council rests solely with the ALJ or AC. These instructions are not applicable to such reopenings, even though the basic rules applied by ALJ and the AC are the same. Therefore, references to "decisions" in the following sections are to those of a hearing officer.

3799.1 How Issues May Arise.--A party whose right to reconsideration, review, or hearing has expired (§§3781.2, 3792, and 3794.1) may express dissatisfaction with a denial or the amount of the payment, or supply additional information pertinent to a determination. If dissatisfaction is expressed after the right to reconsideration, review, or hearing has expired and no extension of time (see §§3781.3, 3792, and 3794.1C) has been granted, or if HCFA, you, or a hearing officer determines that a determination or decision may be erroneous and should be reopened, apply the rules in §§3799.2-3799.16. (If a decision is reopened as a result of a beneficiary's request and a less favorable determination is suggested, follow §3783.2.)

3799.2 Summary of Conditions under Which a Determination or Decision May be Reopened.--Your initial, revised, reconsidered, or reviewed determination or a decision by a hearing officer may be reopened under the following conditions: (See §3799.5 for actions necessary to permit reopening.)

- Within 12 months after the date of the determination or decision, it may be reopened for any reason other than to add diagnosis or procedures to the DRG. (See §3799.11 for an exception.);

- After such 12-month period, but within 4 years after the date of the initial determination, it may be reopened for good cause. (See §3799.6.);

- At any time, if the determination or decision is unfavorable to the party or parties, in whole or part, but only for the purpose of correcting a clerical error or error on the face of the evidence; or the determination or decision was procured by fraud or similar fault of the party or parties. (See §3799.12.)

A revised determination or decision need not be made within the above time limits. However, make it as expeditiously as possible. Where the grounds for reopening involve clerical error, or error on the face of the evidence, the revised determination or decision is generally made at the same time the reopening occurs. Hospital omission of diagnoses or procedures is not considered an error that permits reopening. Where it is necessary to develop additional evidence, notify the party or parties to the determination of the reopening. Develop as expeditiously as possible.

3799.3 Date of Initial, Revised, Reconsidered, or Reviewed Determination, or Hearing Officer's Decision.--To establish the date of the initial, revised, reconsidered, or reviewed determination, or a hearing officer's decision, for purposes of §3799.2, the following rules will apply:

A. Date of Initial Determination.—The date of an initial determination is the date you mailed the denial notice or the date you paid an amount being questioned.

B. Date of Revised or Reviewed Determination or Hearing Officer's Decision.--The date of the notice of the revised, reconsidered, or reviewed determination, or the hearing officer's decision is the date of such determination or decision.

3799.4 Who May Reopen an Initial, Revised, Reconsidered, or Reviewed Determination, or Hearing Officer's Decision.--

A. Part A Claims.--HCFA or you may reopen a Part A initial, revised, or reconsidered determination. However, you may reopen only if you took the last action on the determination (i.e., a determination has not been made by an AJL, AC or a court).

B. Part B Claims.--Only you may reopen a Part B initial, revised, or reviewed determination. A decision by a hearing officer may be reopened only by the hearing officer. If he is unavailable for reasons of death, termination of employment, or leave of absence it may be reopened by another hearing officer you select.

3799.5 Actions Necessary to Permit Reopening Within the 1 or 4-Year Period.--To reopen a determination or decision under either the 1 or 4-year rule, it is necessary that:

- A written request be filed by a party to the determination or decision, within the applicable time limit; or

- HCFA, you, or (for Part B claims) a hearing officer takes some action documented within the applicable time limit questioning the correctness of the determination or decision.

The decision to conduct a sample study of a provider's claims constitutes a reopening of all determinations but only when such a decision is documented and is clearly intended to question their correctness. Send a notice to the provider as soon as possible explaining: the reason for the study (e.g., possible overutilization of services); the period to which the results will apply; the sampling procedure, including the method used to select the sample and a statement that the sample findings will be projected to the entire population of claims. However, do not send a notice if the study is performed because fraud is suspected.

3799.6 Good Cause for Reopening.—"Good cause for reopening" exists where:

- New and material evidence is furnished. (See §3799.7.);
- You made a clerical error in the statement of the initial determination. (See §3799.8.);
- There is an error on the face of the evidence; i.e., on the basis of all the evidence on file at the time the decision was made, it is clear that the decision was incorrect. (See §3799.9.)

An omission in the hospitals' coding of diagnosis or procedure is not a "good cause."

3799.7 "New and Material Evidence".—Good cause exists for reopening a determination or decision within the 4-year period on the basis of new and material evidence even though the determination or decision, when made, was reasonable based upon the evidence then in file. It includes any evidence which was not considered when the determination or decision was made and which shows facts that may result in a different conclusion.

It is possible that the evidence may justify or require that further development be undertaken before a revised determination or decision is made.

3799.8 "Clerical Error".—"Clerical error," for purposes of reopening a determination or decision within the appropriate periods includes such human and mechanical errors as mathematical or computational mistakes, inaccurate coding, card punching, and computer errors.

3799.9 "Error on the Face of the Evidence".—An "error on the face of the evidence" exists where it is clear that the determination or decision was incorrect based on evidence:

- In the file used to make the determination or decision, or
- Of record anywhere in your files or those of HCFA at the time the determination or decision was made.

A. Reopening Within 4-Years Only.--

- Payment of a bill without reducing the amount payable on account of a deductible or coinsurance requirement;
- A duplicate payment for the same item;
- Payment to a person who did not bill for, and was not entitled to, the benefit;
- Payment for a service which the evidence in file clearly shows is not covered (e.g., payment for services paid for by a governmental entity, or payment for items shown in the file to be covered by WC).

B. Reopening at Any Time.--Claims can be reopended if there is an excessive application of a deductible or coinsurance amount or failure to pay for a service or item which the evidence shows to be covered.

3799.10 "Unfavorable Determination".—A determination or decision is considered "unfavorable" where a request for payment is denied or where payment is made for less than the requested amount.

3799.11 "Change of Position".—A determination or decision may be reopened and revised on the basis of a change in position within 1 year. A "change of position" occurs when there is a shift in the weighting of the evidence, or a different inference is drawn from the evidence. A policy, legal interpretation, or administrative ruling which was previously followed in deciding claims is changed, is also considered a change of position, except that a determination or decision favorable to the beneficiary will not be reopened and revised on this basis.

3799.12 Unrestricted Reopening - Fraud or Similar Fault.—A determination or decision may be reopened at any time if it was procured by beneficiary, provider, physician, or any other person.

"Fraud or Similar Fault" means:

- Intentional deception by a person who knows that the deception may result in an unauthorized benefit to some one.
- An act which approximates fraud, i.e., the furnishing of information which the individual knew was incorrect or incomplete, or the deliberate concealment of information, without a judicial finding of fraud;

- A pattern of program abuse resulting from practices that are inconsistent with accepted sound fiscal, business, or medical practice, such as:

- The furnishing of services in excess of the individual's needs or of a quality that does not meet professionally recognized standards of health care; or

The submittal of incorrect, incomplete or misleading information that results in payment for:

- Services that were not furnished;

- Services more expensive than those furnished;

- Services that were not furnished under the conditions indicated on the bill.

- The submittal of, or causing the submittal of bills, or requests for payment containing charges in excess of the amounts the provider customarily charges.

- An act or pattern of program abuse involving collusion between the provider or supplier and the recipient that results in higher costs or charges to the program;

- Any act that constitutes fraud under Federal or State law.

A determination that "fraud or similar fault" is present depends upon the facts. For example, where the evidence establishes a pattern of billing by a provider for inpatient hospital services which, under established standards of good medical practice could adequately have been supplied in an ICF, a finding of "fraud or similar fault" should be made and the claims reopened more than 4 years after the payment was approved.

3799.13 Elements Where Initial Determinations are Reopened.—Where an initial determination is reopened at the request of a party, reexamine the case in accordance with the instructions applicable to a reconsideration. (See SS3784ff.) In addition, consider waiver of liability. (See SS3430ff.)

3799.14 Results of Reopening.--When a determination or decision is reopened and revised, mail a notice of the revision, including an explanation of the reasons for the revision and an explanation of the individual's appeal rights, except as in S3799.15. However, if a determination or decision is reopened, but not revised (see S3799.17 for definition of revised determination or decision), do not include an appeal paragraph. Send it only if the reopening was at the request of a party or a notice of reopening had been previously sent.

When a determination is reopened and revised at the request of a party, include in the notice:

> "If you believe this determination is not correct, you may request a hearing within 60 days of the date you receive this notice ("6 months from the date of this notice" for Part B claims) if the amount of benefits in question is $100 or more. You may make the request by writing to us or through any social security office. The people there will be glad to assist you or answer any questions you may have about this determination. If you go in person, please take this notice with you."

When a determination is reopened and revised on the motion of HCFA or you, include in notice one of the following paragraphs:

A. Initial Determination.—"If you believe this determination is not correct, you may request a reconsideration ("review," if Part B items or services are involved) if the amount of benefits in question is less than $100, or a hearing if the amount is $100 or more. If you wish to file an appeal, request it within 60 days of the date you receive this notice (minimal "6 months from the date of this notice" for Part B claims). You may make the request by writing to us or through any social security office. The people there will be glad to assist you. If you go in person, please take this notice with you."

B. Reconsidered or Reviewed Determination.—"If you believe this determination is not correct, you may request a hearing if the amount in question is $100 or more. If you wish to file such an appeal, you must request it within 60 days of the date you receive this notice (minimal "6 months from the date of the notice" for Part B claims). You may make the request by writing to us or through any social security office. The people there will be glad to assist you or answer any questions you may have about this determination. If you go in person, please take this notice with you."

3799.15 Exception to Sending Notice of Revision to Parties--Cases Involving Limitation on Recovery from Beneficiary.—Waive recovery of overpayments from a beneficiary who was without fault where the determination or decision that the services were noncovered was made in the fourth calendar year after the year in which you approved payment. Where a revised determination or decision results in an overpayment for which the beneficiary would be liable (per §3708.4), but it appears that the conditions for automatic consideration of waiver are met, do not send a notice of the revision to any party. Instead, refer the overpayment to HCFA for consideration of the waiver issue. In referring such cases, follow §3709.2D.

3799.16 Refusal to Reopen Is not an "Initial Determination.—A finding that a prior determination or decision may not be reopened is not an "initial determination or decision." No right of appeal from such a finding exists. Accordingly, do not include a statement concerning the right to an appeal.

3799.17 Revised Determination or Decision.—A revised determination or decision is one in which: The end result is changed (for example, a service found to be covered is now found not to be covered or the amount of reimbursement allowed is determined to be incorrect). The end result is not changed, but a party might be disadvantaged by the revision (e.g., a disallowed claim because the services were custodial in nature, and therefore subject to the waiver of liability provisions, is disallowed on a basis that precludes consideration of waiver of liability).

Documentation

IM3783. DOCUMENTING PART A RECONSIDERATION REQUESTS

Following denial of a Part A claim, the claimant is entitled to a reconsideration if a request is made in writing within 60 days following the receipt of the initial determination. Section 4032 of the Omnibus Budget Reconciliation Act of 1987 requires, effective October 1, 1988, that you complete 66 percent of the reconsiderations within 60 days. Effective October 1, 1989, the percentage to be complete within 60 days increases to 75.

The reconsideration is based upon information in your possession when the initial determination was made; statements or information submitted by the party or parties; and the medical and other records acquired during the reconsideration. If the evidence is not clear and convincing, obtain a statement discussing the issues from the provider.

IM3783.1 Documentation Sources.—Contact the provider to obtain any clarifying information needed if the beneficiary's allegation raises an issue which has not been fully documented.

A reconsideration constitutes your final review of your earlier determination. It is in the interests of all that all relevant information be available to you. Urge the provider to submit documentation timely.

Contact with the provider and/or the beneficiary may be necessary to obtain information. In most cases, these contacts can be by letter. You may use your own representative to secure information. The Social Security Office (SSO) may be utilized to obtain additional information. Since the provider prepares and submits the claim, it generally submits the medical documentation.

Charge all activities directly related to reconsiderations, including the written request, to appeals (Line 2) on the Administrative Budget and Cost Report; i.e., medical development, whether or not the actions result in an adjustment.

However, do not charge to appeals any oral requests for reconsideration or for further information. Charge them to initial claims processing (Line 1).

IM3783.2 Assembling the Reconsideration File.—Place all reconsideration requests (formal or informal) in manila folders as soon as possible. Enter the beneficiary's HICN on the top line of the folder tab in the upper right-hand corner. Enter the beneficiary's last name, first name, and middle initial, if any, beneath the number. Example:

HICN 300-00-7777A
Doe, Mary A.

IM3783.3 Development of Reconsiderations.--The provider is responsible for providing the information needed to support the reconsideration request. Develop information which is in your, HCFA's, or SSA's files. If the claimant is the beneficiary, develop the supporting documentation.

Inform providers of the statutory processing time limits which go into effect on October 1, 1988 and why it benefits all concerned parties if supporting documentation is submitted timely. If the claimant is unsuccessful in securing the information from another provider, assist the claimant. If necessary, remind the uncooperative provider of its responsibilities under the Provider Agreement, as enunciated in 1866 of the Act and Federal regulations at 42 CFR Part 489.

If providers request assistance, help them. However, do not assume responsibility for gathering the information. Your primary role is to assist providers in gathering information from other providers.

Include Attachment A with your denial notices or with your appeal request acknowledgements, whichever is easier in your specific system. It contains a listing of information sources for you to modify as your experience dictates.

Prong-file in chronological order, by type of evidence, all material pertaining to the services in question, including the envelope in which the request for reconsideration was received if the postmark is germane. Include only original documents whenever possible. Do not include duplicates.

Stamp the date of receipt on each document or category of documents received at the reconsideration level. Unless the format of a particular document or your claim processing system dictates otherwise, stamp the receipt date in the upper right-hand corner.

Build the file by placing the oldest of a particular category on the bottom and the most recent on the top.

The eight major categories, listed in order (category 1 appears on the bottom of all other documents), are:

1. All billing forms or summaries (see § 3783.9)
2. Report of Eligibility
3. Doctor's orders
4. Progress notes

5. Nurses' notes
6. Medication charts
7. Laboratory reports and other studies
8. Therapy treatment plan and treatment record

IM 3792.2. Elements of Review.—To implement §9341 of OBRA, a claimant dissatisfied with a Part B review determination is entitled to (1) a contractor fair hearing if the amount in dispute is at least $100 and (2) an Administrative Law Judge (ALJ) hearing following the contractor fair hearing if at least $500 is in dispute. This provision is effective for items and services furnished on or after January 1, 1987. (The new hearing provisions are discussed in §IM 3794.)

Apply the rules in §3794.1B to determine the amount in controversy remaining following the review determination. Insert in the review determination letter (§3792.2D.3) one of the following appeals paragraphs, depending on the amount in controversy:

A. Amount in Controversy Less Than $100.—"On the basis of this claim, we have determined that there is only $________ in question. The amount of benefits in question must be at least $100 in order to have a hearing. Therefore, you do not have a right to appeal this decision.

"You may be able to meet the $100 level for a hearing by combining claims as follows: Combine the amounts for any claims on which Medicare made a determination within the past 6 months based on (1) a request for review or (2) a reopening of an initial or review determination.

"If, as described above, you are able to combine claims to meet the $100 level, write to us or contact any Social Security Office if you want a hearing."

B. Amount in Controversy At Least $100.—"On the basis of this claim, we have determined that there is $_______ in question. Therefore, you may request a hearing if you do not agree with this decision. You must request the hearing within 6 months of the date of this letter. One of our hearing officers will conduct the hearing.

"Write to us or contact any social security office if you want a hearing. You may attend the hearing in person. You may also take or send someone to represent you. This person may be a lawyer or anyone you choose. Please note on your request who will attend the hearing. You do not have to appear in person. You may ask that a decision be made based on the facts in the file. A copy of the decision will be sent to you."

C. Amount in Controversy At Least $500.—"On the basis of this claim, we have determined that there is $_______ in question. Therefore, you may request a hearing if you do not agree with this decision. You must request the hearing within 6 months of the date of this letter. One of our hearing officers will conduct the hearing. Since your claim involves at least $500, you have a right to a hearing by an Administrative Law Judge in the event that you are dissatisfied with our hearing officer's decision, and at least $500 remains in dispute.

"Write to us or contact any social security office if you want a hearing. You may attend the hearing in person. You may also take or send someone to represent you. This person may be a lawyer or anyone you choose. Please note on your request who will attend the hearing. You do not have to appear in person. You may ask that a decision be made based on the facts in the file. A copy of the decision will be sent to you."

IM 3794. HEARING

A. General.—Section 9341 of the Omnibus Budget Reconciliation Act of 1986 (OBRA) (Public Law 99-509) provides for Administrative Law Judge (ALJ) hearings and judicial review for Part B claims denials, subject to minimum amounts in controversy. Section 9313(b) reaffirms the right of beneficiaries to appeal both Part A and Part B technical denials of home health benefits, e.g., denials for failure to meet the homebound or intermittent nursing care requirements.

B. Contractor Fair Hearing.—The contractor fair hearing is a prerequisite for an ALJ hearing. If less than $500 is in controversy following the contractor hearing officer's decision, no further appeals are available.

C. ALJ Hearings and Judicial Review for Part B Denials.—A person (including a provider or physician entitled to a hearing under §1879 of the Act) who is dissatisfied with the contractor hearing officer's decision on a Part B claim in which the amount remaining in controversy is at least $500, is entitled to a hearing before an ALJ. If at least $1,000 remains in controversy following the ALJ's decision, the claimant is entitled to judicial review before a Federal district court judge. This provision applies to items and services furnished on or after January 1, 1987.

D. Determining Amount in Controversy.—Section 9341 provides that in determining the amount in controversy, the Secretary, under regulations, shall allow two or more claims to be aggregated if they involve:

1. The delivery of similar or related services to the same individual, or

2. Common issues of law and fact arising from services furnished to two or more individuals.

Until new regulations are promulgated, follow the current rules for aggregating Part A and Part B claims. These rules are found in the regulations, for Part A, at 42 CFR §405.740 (see §3794.1B.) and, for Part B, at 42 CFR §405.820(b). The interim application of the pre-existing rules will not prejudice the rights of any claimant since the pre-existing rules respecting aggregation are less restrictive than the aggregation requirements of §9341.

E. Time Periods for Filing for Hearings.—Where Part B benefits are denied, the claimant has the right to a contractor hearing if at least $100 is in controversy and following that, an ALJ hearing, if at least $500 remains in controversy. (See B. and C. above.)

A contractor fair hearing (amount in dispute at least $100) must by regulation be requested within 6 months of the date of the review determination. An ALJ hearing (amount remaining in dispute after the contractor hearing at least $500) must by law be requested within 60 days of the date of receipt of the contractor hearing officer's decision.

F. Methods of Requesting Hearing.—The request for contractor fair hearing must be in writing and filed with the intermediary or a SSO. It may be any written expression of dissatisfaction with the intermediary review determination or a filing of Form HCFA-1965 — "Request for Hearing — Part B Medicare Claim." The SSO forwards the request for hearing to the appropriate intermediary.

G. Action by Intermediary Upon Receipt of Request for Hearing.—When a request for contractor hearing is filed, notify the claimant or representative that the contractor hearing officer will be contacting him about the request. Then forward the case file to a hearing officer who will take one of two actions:

1. Dismiss the hearing request if the hearing officer believes there is under $100 in controversy; or

2. Process the hearing request in accordance with §3794ff. if the hearing officer believes that the amount in controversy is at least $100.

H. Hearing Decision.—The hearing officer's decision should contain the following appeals right language depending on the amount of benefits in controversy:

1. Amount Remaining in Controversy Is At Least $500.—"On the basis of this decision, I have determined that there is $_______ in question. Therefore, you may request a hearing by an Administrative Law Judge (ALJ) if you do not agree with this decision. You must request the hearing within 60 days of the date of receipt of this letter.

"Write to me or contact any social security office if you want a hearing. Your request will be sent to the ALJ. The ALJ will then advise you what you have to do to prepare for the hearing."

2. Amount in Controversy Below $500.—"On the basis of this decision, I have determined that there is $_____ in question. Therefore, there are no other levels of appeal available to you. However, if you think I have made a mistake you may ask me to open the case again. To do this you must write me as soon as possible. Include with your letter any additional information you may have which you feel may result in a more favorable decision."

I. Hearing Officer Action Upon Receipt of Request for ALJ Hearing.—When the contractor hearing officer, following his decision, receives a request for an ALJ hearing in which the amount remaining in controversy is at least $500, the hearing officer will take the following action:

1. New Evidence.—If any new evidence is submitted with the hearing request, review the case file to determine if the claim(s) may be reversed fully in favor of the claimant. If a full reversal is in order, prepare a decision containing the following elements:

- A clear statement of the issues,

- An explanation describing the reasons why a fully favorable decision is possible, with reference to the facts and evidence in the case,

- A statement of the statutory or regulatory basis for the decision,

- The decision, i.e., what the claimant can expect, and

- Signature of the HO.

Forward the full reversal decision to the claimant; then, forward the case file to the intermediary for effectuation of the decision. (A full reversal decision is actually a reopening and revision of the hearing officer's decision.)

2. Case File to ALJ.—Unless the claim(s) warrants a full reversal, forward the file to the ALJ. Prior to forwarding the file, review carefully to ensure that all available evidence is included. Also, review to ensure that the decision contains all of the items described in §3794.7. If any element in §3794.7 is not included in the hearing decision, prepare for the ALJ, as an attachment to the decision, a brief written description of the omitted element. If a partial reversal appears possible, based on any new evidence submitted, include that in an explanation to the ALJ.

J. Limitation on Authority of ALJs and Courts.—Section 9341 of OBRA stipulates the following limitations on the authority of ALJs and the Courts to rule on appealed Medicare claims:

1. ALJs have no authority to overturn national coverage determinations made by HCFA under §1862(a)(1) of the Act, i.e., determinations that a particular category of items or services is not reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member. However, the ALJ will determine whether the "limitation of liability" rules in 42 CFR 405.332 (§§3430ff.) were applied correctly, i.e., whether the beneficiary or provider (or both) knew or could reasonably have been expected to know that the items or services were not covered. Although the substantive national coverage determination may not be overturned by an ALJ, it is subject to judicial review, as limited as provided in paragraph 2.

2. In judicial review of the ALJs' decisions, Courts have no authority to overturn a national coverage determination made under §1862(a)(1) of the Act solely on the grounds that the coverage rule relied upon in making the determination was not issued in accordance with the notice and comment procedures of the Administrative Procedure Act. In any case in which a court determines that the record is incomplete or otherwise lacks adequate information to support the validity of the determination, it must remand the matter to the Secretary for additional proceedings to supplement the record. The court may not determine that an item or service is covered except upon review of the supplemented record.

3. Regulations and policy instructions initially issued prior to January 1, 1981 which concern a method for determining the amount of payment under Part B are not subject to judicial review.

Reopenings and Revisions

IM3799. REOPENING AND REVISION OF DETERMINATIONS AND DECISIONS ON CLAIMS

When a determination is made for services furnished, the beneficiary (and the provider) should be able to rely on an accurate determination with respect to the coverage of the services and the amount of payment. However, there are instances in which strong equities exist for claimants and the Government in favor of reopening an incorrect initial or reconsidered determination, or an Administrative Law Judge's (ALJ), or Appeals Council's (AC) decision.

Regulations do not permit unrestricted reopenings. They set specific circumstances under which determinations may be reopened. The following sections outline these policies and procedures. (See Part 2, §§2633ff. for guidelines regarding reopening determinations or decisions on provider's costs and the amount of reimbursement.) The authority to reopen an ALJ's or an AC's decision rests solely with the ALJ or AC.

In legal terms, a case is open until the last determination becomes final by the losing party's failure to appeal or the exhaustion of appeal rights. Only if the case is closed and the new material is significant or discloses errors on the face of the materials, or fraud is involved, can the case be reopened. However, neither the statute nor the regulations entitle claimants to a reopening.

A reopening, as contained in Federal regulations, is not an appeal right. It is a discretionary action you take with or without a request of the claimant, where good cause exists. Claimants have no appeal right regarding your decision to refuse a reopening. A reopening is an action which you may take on your own volition when refusal to reopen would either inflate costs to the Government without a commensurate benefit to the claimant or deprive the claimant of rightful payment.

Do not conduct reopenings routinely. Do not grant them in the absence of additional, relevant, and significant information, or discovery of an error. Do not grant a reopening based on an oral request. Consider granting a reopening in response to a written request if the criteria in §§12100 ff. are met. Charge reopenings to line 1 of the Administrative Budget and Cost Report.

Some intermediaries have developed informal procedures under the general heading of "reopenings". Providers have come to view these actions as appeal rights. These non-technical reopenings are not part of the appeals process. They are not a claimant's right. They are not additional levels of appeal, nor are they intended to provide an appeal for a determination for which a formal appeal is not available; e.g., for providers paid under waiver of liability.

We want this practice ended, but we do not want you to immediately terminate it if you have been granting such informal reopenings. Rather, when the provider makes such a request, discuss the appropriate appeals route. Act on the reopening request, but indicate that future requests must be within the process provided by Medicare, i.e., the reconsideration, and, if necessary and the case involves at least $100.00 in controversy, the hearing.

A special notice, explaining the policy on reopenings and appeal rights, and the policy that appellant providers are responsible for providing the information needed to support the appeal, is attached (Attachment C). Also attached (Attachment D), is a HCFA policy statement on reopenings to help you respond to requests for reopening prior to the expiration of appeal rights.

A reopening of an initial denial can take place only after the time for appeal has expired. Do not reopen, for example, a denial if the provider has been paid under the waiver of liability. By regulation 42 CFR 405.704 (c) such determinations are not subject to appeal. Although a technical reopening in this situation is theoretically possible; e.g., fraud investigations and court orders, it is extremely rare. In any event, do not conduct reopenings routinely at the request of providers. In waiver cases, if the provider is paid, its only access to reconsideration is as the beneficiary's representative.

Once a case has been forwarded to the reconsideration intermediary and the "medical review" staff is involved, do not consider a non-technical reopening. Treat the reopening request as a request for reconsideration and acknowledge the appeal. Explain to the claimant that there is no entitlement to a reopening and that you are treating the request as a request for reconsideration (Model paragraphs are attached (Attachment B)). Furnish the claimant the documentation listing if you have not already done so.

Charge reconsiderations and all directly related activities to line 2 of the Administrative Budget and Cost Report. If you elect to do a non-technical reopening, it does not affect the filing deadline for reconsideration. Charge a non-technical reopening, before reconsideration, to line 1.

Following reconsideration, and pending a requested ALJ review, you may receive additional information that might affect payment. Review it. Whether or not it enables you to fully reverse the reconsideration decision, count and charge the activity as ALJ case preparation on line 2 of the Administrative Budget and Cost Report.

Forward the information for incorporation into the hearing file, but first review your copy to ensure that the file sent to the ALJ is complete. A test is whether or not someone not involved in the reconsideration process can understand what you did, why you did it, and the basis for your decision. Although ALJs are not required to defer to your rationale, they may if they understand why you decided what you did. Be mindful that after the request for an ALJ hearing is filed, the ALJ has jurisdiction.

3799.1 Budgetary Allocation and Workload Reporting—Charge activities as follows:

Administrative Budget and Cost Report	Line
(Initial Claims Processing)	1
o Adjustments following inquiry	1
o Corrections of processing errors	1
o Technical and non-technical reopenings	1
o Medical Review	4
o Oral request for reconsideration	1
o Written request for reconsideration	2
(Reconsideration)	2
o Technical reopening (appeals exhausted)	1
o Non-technical reopening	2
o Medical Review	2
o Case preparation (ALJ)	2
o Other activities directly related to reconsideration	2

For workload reporting purposes, count technical and non-technical reopenings as reopenings.

ATTACHMENT A

MODEL NOTICE TO PROVIDER

If you decide to appeal this decision, please make sure that you submit all documentation necessary to support the appeal. Forwarding this information with your request for appeal will facilitate processing and payment, if appropriate.

Only you can decide on the documentation that best supports your claim. Nevertheless, you may want to consider the following, depending on the nature of the claim:

- Discharge summary or cause of death, if applicable
- Special studies and reports (blood, pathology, etc.)
- Consultation reports
- Operative and anesthetic report
- Social service notes
- Therapy treatment plan and treatment record
- Referrals, transfer forms
- Billing forms
- Copies of communications between you and beneficiary.

If you have a problem in obtaining certain information, let us know. We will assist to the extent we can.

ATTACHMENT B

RECOMMENDED RESPONSES TO REQUESTS FOR REOPENINGS

MODEL PARAGRAPHS

Waiver of Liability (Provider only)

Because you were paid under Waiver of Liability, there is no appeal available. You may request a reopening if you can show an error on the record or you can furnish new and significant information showing that the determination of record is erroneous.

Additional Information - Non-Technical Reopening

Because the additional information you submitted enables payment, we have decided to informally reopen the claim. Generally, we can make better decisions on claims if you submit all relevant information at the time the claim is filed. Please bear that in mind when you file claims.

Additional Information - Refusal to Reopen - Appeals Process Available

We are not granting your request for a reopening since there are administrative appeals available to you. We are considering your letter a request for (reconsideration, hearing).

Additional Information - Refusal to Reopen

We understand that you are still dissatisfied with the final decision in your case and that you have exhausted your appeal rights. Medicare policy, however, is to reopen final decisions only to correct clear errors in those decisions. These include:

- Factual errors which are found when new and material evidence, which was not available when the final decision was made, is presented.
- Clerical or computational errors.
- Errors on the face of the evidence.
- Errors caused by fraud or similar fault.

Since your request for reopening does not include evidence to indicate that any of these errors were made, we are not reopening the case. However, if you have such evidence, please submit it to us, and we will again consider your request for reopening.

ATTACHMENT C

SPECIAL NOTICE TO PART A PROVIDERS AND PART B SUPPLIERS AND OTHER INDEPENDENT PRACTITIONERS

The purpose of this notice is to inform you of certain procedural revisions recently received from the Health Care Financing Administration, and to remind you of your appeal rights under Part A and Part B of the Medicare Program.

Appeals

Law and regulations provide specific redress for claimants who are dissatisfied with Medicare determinations. Through these appeals, the Government seeks to ensure that the correct payment is made, or a clear and adequate explanation is given as to why payment is not made.

Part A Intermediary Appeals

Part A providers may appeal claim decisions on individual claims under the following circumstances:

- o On its own behalf if the claim is denied under the limitation of liability provisions and the beneficiary is not going to appeal (in which case, you may appeal both the denial of waiver of liability, and the underlying denial of coverage for the specific services); or
- o On the beneficiary's behalf if the provider is the duly authorized representative of the beneficiary.

If you are dissatisfied with the initial determination, the determination is subject to appeal, and one of the above conditions is met, you may request a reconsideration. The request must be filed, in writing, within 60 days of the receipt of the notice.

If you are still dissatisfied following reconsideration and the amount in controversy is at least $100, you have a right to a hearing before an administrative law judge (ALJ) of the Social Security Administration (SSA). The request for this hearing must be in writing, and filed within 60 days following the date you receive the reconsideration notice.

If you are still dissatisfied, you may appeal to the Appeals Council. The request must be in writing and filed within 60 days after the date of the hearing decision notice. If you are still dissatisfied and the amount in controversy is at least $1000, you are entitled to judicial review.

Part B Carrier Appeals

As a physician or supplier providing items and services to Medicare beneficiaries payable under Part B, you may appeal an initial determination if you:

- o Accepted assignment;
- o Did not accept assignment and we denied the claim as not reasonable and necessary, and the beneficiary did not know and could not have been expected to know that the service would not be covered, requiring you to return any money you had collected for these services; or
- o You are the duly authorized representative of the beneficiary.

If you are dissatisfied with the carrier's initial determination and the determination is subject to appeal, you may request a review. The request must be in writing, signed, and filed within 6 months after the date of the initial determination.

If you remain dissatisfied after the review determination, and the amount in controversy is at least $100, you may request a fair hearing. Requests for fair hearings must be filed, in writing, within 6 months following the date of the review determination. You may request a hearing in-person, by telephone, or on-the-record. If you request an in-person or telephone hearing, it will be scheduled, but in the interim an on-the-record hearing will be conducted based on the information in file and any additional information you submit.

If you are still dissatisfied following the on-the-record hearing, you will receive the hearing previously scheduled. Moreover, a different hearing officer will be assigned to preclude any possibility of prejudice.

If you are still dissatisfied with the determination made by the hearing officer, and the amount in controversy is at least $500, you may request a hearing before an Administrative Law Judge of the Social Security Administration. The request must be in writing and filed within 60 days of the date of the fair hearing decision of record. If you are still dissatisfied, you may appeal to the Appeals Council. Finally, if you are still dissatisfied, and the amount in controversy is at least $1000 you may seek judicial review.

Development of Appeals

For individual claims submitted by providers, physicians, and others who furnish items and services to Medicare beneficiaries, the responsibility for gathering and submitting documentation that supports claims and appeals rests with the provider. We will offer guidance and assistance as necessary, but the responsibility for identifying what is needed and where it is located is your responsibility. If you have tried to secure essential documentation, but have been unsuccessful, we will try to assist you. Attached is a list of documentation sources which have proven useful. If you have any questions on other kinds of information which may be necessary, let us know.

Reopenings

Reopenings are not, in a legal sense, appeals. They are actions taken after a claim is closed to correct an error, in response to suspected fraud, or in response to the receipt of information not available or known to exist at the time the claim was initially processed. Reopenings should be done rarely, on individual cases, or on a group of cases adversely affected by a systems error.

Unfortunately, among some providers, reopenings have become equated with appeals. A reopening is requested when a review (Part B) is appropriate, or a hearing (Part A) is the correct choice.

Some intermediaries and carriers have developed a variety of informal procedures under the general heading of "reopenings". These informal actions can extend the appeals process by subjecting claims to unnecessary and superfluous levels of review which delay access to the formal levels of appeal, with their respective procedural safeguards.

Usually, these reopenings occur because claimants fail to timely submit supporting documentation. The timely submittal of documentation not only negates the perceived need for "reopenings", but helps to ensure timely payment.

You will not be affected by our decision to eliminate informal reopenings, as you may appeal using the regular appeals process. Reopenings are not appeals. They are discretionary actions that we may initiate after appeal rights are exhausted.

REOPENINGS POLICY: PART A AND PART B

This paper outlines the legal and policy bases for our position on reopenings, and for the restriction on quasi-appeals of claims submitted by providers who have been paid under waiver.

The regulations grant providers the right to appeal decisions concerning individual payments only in specific, and limited, circumstances. These restrictions are consistent with the structure of the Medicare program, in which payments are made to, or on behalf of, beneficiaries, and the right to appeal disputes over payments is granted to beneficiaries, but not to institutional providers under Part A or physicians or others who furnish items and services under Part B. See, for example, § 1869 of the Social Security Act (the Act) which grants appeal rights to beneficiaries (or physicians or suppliers on a beneficiary's behalf if the physician or supplier accepts assignment on certain types of payments) and to physicians that did not accept assignment and we denied the claim as not reasonable and necessary, and the beneficiary did not know and could not have been expected to know that the services would not be covered, requiring the physician to return any money collected for the services, and § 1879 granting appeal rights to providers on the beneficiary's behalf on the issue of waiver of liability, but on narrowly prescribed grounds discussed in more detail below.

A provider obtains the right to appeal if the claim is denied under waiver and the beneficiary is not going to appeal. There is no right to appeal if the waiver is granted. See 42 CFR 405.704(b) and (c), outlining, respectively, the types of determinations which constitute "initial determinations" for beneficiaries and providers under Part A. Under § 405.710, a party may appeal only initial determinations.

The only other circumstances in which a provider may appeal is as the beneficiary's fully-authorized representative. This is contemplated in § 1869(b) of the Act, which provides the following safeguards against abuse of beneficiaries and frivolous appeals:

> "Any person that furnishes services or items to an individual may not represent an individual under this subsection with respect to the issue described in § 1879(a)(2) (waiver of beneficiary liability) unless the person has waived any rights for payment from the beneficiary with respect to the services or items involved in the appeal. If a person furnishes services or items to an individual and represents the individual under this subsection, the person may not impose any financial liability on such individual in connection with such representation."

However, although the provider has the right to request a reopening, the case law makes it clear that a reopening is not a matter of right, but is a decision left to the discretion of the Secretary. The Supreme Court has held that the Secretary's decision not to reopen a case is entirely a matter of the Secretary's discretion, and is not an appealable determination. Califano v. Sanders, 430 U.S. 99, 97 S. Ct. 980 (1977); Lopez v. Heckler, 469 U.S. 1082, 105 S. Ct. 583 (1984). (Although the regulations specifically authorize the Secretary to reopen decisions within one year for any reason, the Supreme Court has held that the Secretary's decision not to reopen a case, unless challenged on constitutional grounds, is entirely a matter of the Secretary's discretion, not reviewable by the courts.) Califano v. Sanders, supra.

Thus the Secretary can be held only to his own criteria for reopening, as set forth at 42 CFR 405.750(b) and 42 CFR 405.841, and the good cause provision in 20 CFR 404.989.

42 CFR 405.750(b) and 42 CFR 841 provide that a determination may be reopened if it is final under 20 CFR 404.955 or 404.981, and 42 CFR 405.708, 405.717, 405.832, or 405.835. In other words, a provider may request reopening only after a final determination has been made, i.e., at the close of the appeals process by the beneficiary.

A reopening is conducted at the discretion of the Secretary or the Secretary's agents (Intermediaries, Carriers, Hearing Officers, Administrative Law Judges, and the Appeals Council).

42 CFR 405.750(b) permits the intermediary to reopen:

1 Within 12 months of the date of the initial or reconsidered determination for any reason acceptable to it.

2 After 12 months, but before 4 years of the date of notice of the initial determination, for good cause, which is defined at 20 CFR 404.989 as:

   a. New and material evidence;

   b. Clerical or computational error; or

   c. The evidence that was considered clearly shows on its face that an error was made.

3 At any time when:

   a. When a decision is unfavorable, to correct a clerical error or error on the face of the evidence;

   b. For fraud or similar fault; or

   c. In response to a court order.

Transmittal to HCFA

3801. REPORTING BILLS TO HCFA

Effective May 1, 1977, all bills should be reported to HCFA on magnetic tape. The format of the tape must be as specified in sections 3865 - 3890. The tape must meet all edit specifications contained in the above referenced document. All billing data must be submitted to HCFA on PAT-BILL tapes.

Effective October 1, 1978, hardcopy bills will not be accepted by HCFA. Any hardcopy bills received after that date will be returned to the intermediary for resubmission on magnetic tape.

3803. BATCHING BILLS

Your compliance with proper submission and batching procedures facilitates the submission and subsequent processing of bills. Below are listed the categories of bills to be batched. Bills should be separated by type of bill and service, except that all types of rejected bills which are to be voided may be batched together. No batch shall exceed 90 in the number. Different categories may be recorded on the same reel and they may be sequenced in any order (see 3884).

The categories of bills are as follows:

1. Inpatient Hospital and Extended Care Admission and Billing, Form HCFA-1453. Includes all types of services billed by a provider on this form and corrections and adjustments to this type of bill.

2. Provider Billing for Medical and Other Health Services, Form HCFA-1483. Includes all types of services billed by a provider on this form and corrections and adjustments to this type of bill.

3. Home Health Agency Report and Billing, Form HCFA-1487. Includes both Part A and B billing data as well as corrections and adjustments to this type of bill.

4. Inpatient Admission and Billing--Christian Science Sanatorium, Form HCFA-1486. Includes all services billed by providers on this form and corrections and adjustments to this type of bill.

5. Noncovered Bills.--This category includes bills for services for which no payments can be made because:

   a. benefits are exhausted;

   b. workers' compensation paid, or can be expected to pay, the entire bill;

c. a National Institutes of Health grant paid, or will pay, the entire bill;

d. services rendered are not covered by the health insurance program;

e. a utilization review finding precludes payment of the entire bill.

All types of bills falling in this category, e.g., HCFA-1453 and HCFA-1487 may be forwarded in the same batch. See § 3610 for completion of no payment bills.

Note: This category must never contain interim bills, unmet deductible bills, or bills for which there is no cost reimbursement even though the deductible is met. Such bills should be included in the batches provided for other bills of the same type for which payment is made. Also, individual bills for both covered and noncovered services should not be included in this batch.

6. Void Bills.--All types of voided bills may be included in a voided batch (see § 3804.2).

3804. CONTROL OF REJECTED BILLS

HCFAcontrols all bills which are returned to intermediaries for correction, except adjustment bills, void bills (4444), duplicate bills (error code 5600), and read errors (3333). Bills that fail the consistency or utilization edits are entered on a suspense file and controlled by a Returned to Intermediary (RTI) number. Part A bills that fail certain utilization edits and which are automatically corrected by HCFAare not controlled by this suspense file. However, establish internal controls to make certain all necessary refunds for overcollected Part A cash and blood deductibles and overcollected Part A coinsurance as well as recoupment for undercollected Part A blood deductibles and undercollected Part A coinsurance are made. HCFA assigns this 10-digit number which remains with the rejected bill until it is removed from this suspense file.

The RTI number consists of the original 4-digit batch number, the 3-digit Julian date batched preceded by the last digit of the year; e.g., January 10, 1975, is listed as 5010 (both taken from the batch control record), and a 2-digit sequence number assigned by HCFA to each bill in a batch (shown on the interim for final batch clearance detail record). The RTI number is shown on the exception record provided on the HCSSACL Tape.

The RTI Control Number is provided with the exception data for rejected adjustment bills for purpose of consistency; however, rejected adjustment bills are not controlled by HCFA and should not be returned in a void batch.

3804.1 Resubmitting Rejected Bills.--Resubmit all rejected bills (RTI bills) to HCFA, except adjustment bills and duplicate bills. Bills should be returned as either corrections or voids (see § 3833).

Resubmitted bills which are rejected again, except for rejected adjustment bills, are controlled under the original RTI Control Number. This number will not change. The most recent batch number is shown on the interim and final batch clearance record. However, the first four digits of the RTI Control Number represent the initial batch number. For example, a bill is originally rejected for a consistency edit and is assigned RTI Control Number 1234936501. The bill is resubmitted but is rejected again. The RTI number remains 1234936501.

EXCEPTION: If a controlled rejected bill is resubmitted to HCFA without an RTI number and that bill is rejected again, a new RTI number will be assigned by HCFA. The new number consists of the most recent batch number-date and sequence number. In this situation, the original item can be removed from the RTI Control only by referring the problem to:

Health Care Financing Administration
Records Requirements and Analysis Section,
Room 596, East Building
Baltimore, Maryland 21235

The minimum information required when corresponding about such a problem is the original RTI control number, the most recent RTI control number, the beneficiary's claim number, and the last batch number used to resubmit the billing data.

If a resubmitted bill contains an incorrect RTI number and is again rejected, the new control will be under the incorrect RTI number. In this situation, the original item should be removed from the RTI control file as a result of HCFA reinstatement action. In all cases, when the re-rejected bill is resubmitted, it should contain the RTI number shown on the latest reject listing. Since the RTI control number electronically shown on a HCFA reject listing is the one used for control purposes, never change it.

3804.2 Batching Resubmitted Bills.--Corrected bills must be batched separately from voided bills (i.e., rejected bills which should be voided). Except for this distinction, returned bills will be placed in the same batches as initial bills by category, that is, they must be of the same type as the initial bill. Batch numbers should be assigned in the same manner as initial batch numbers. Corrected bills (bills which have been returned to the intermediary for consistency or utilization errors) must be batched within type, e.g., all corrected hospital and SNF billings. (PIP correction bills must be itemized in the manner indicated in §§ 3620 and 3651 after October 1, 1974, before resubmitting, although the charges on the bills may not have been itemized initially.) All types of voided bills may be submitted in the same batch up to a maximum of 90 items per batch.

Corrected and voided bills should be batched and submitted daily if warranted. However, if the volume is relatively low, the bills may be accumulated and returned weekly. It is preferable to submit small batches of returned bills often rather than accumulate bills for a long period of time. See §§ 3801ff. for complete batching instructions.

Resubmitted corrected bills must have the RTI control number entered in the proper locations on the appropriate bill-type data record (see § 3880) and must be batched according to bill type (see § 3803).

Voided bills of all types should be submitted in the batch category reserved for such bills (90 bill maximum per batch). The RTI control number must be entered in the appropriate field of the format for resubmitting RTI bills for VOID processing. See § 3880.7.

3804.3 Followup/Control Notices for Rejected Bills.—To assure that each rejected bill is resubmitted and cleared from the RTI suspense file, a quarterly report titled "Pending Returned Bill Notice" is sent via a magnetic tape. All rejected bills which have not been cleared from the HCFA RTI suspense file as of the date of the report are identified. They are listed in sequence by the beneficiary's HICN. The type of bill can be identified by the "Type of Bill" indicator.

All re-rejected bills continue to appear on the report regardless of the number of times rejected. The pending age continues to accrete until the bill is accepted.

The data elements on the report are:

1. Title

   Pending Returned Bill Notice.

2. Date of Notice

   Six numeric positions which show the last date of the month covered by the report.

3. Source Code

   Identifies incoming bill format as: U = UNIBILL or P = PATBILL.

4. HICN

   The number as shown on HCFA's records. If the HICN on the report differs from that shown on your records, use the HICN on the report unless the bill was rejected because of an identification error. If rejected for an identification error, determine the correct HICN/name of the individual and resubmit the bill showing the proper HICN and/or name of the individual to clear the RTI.

5. Name

   Up to 6-positions of the beneficiary's surname and 2 initials.

6. Provider Number

   Up to 6 alpha-numeric positions as shown on your bill.

7. Reimbursement Amount

   Up to 8-numeric positions taken from your bill.

8. From Date

Up to 6-numeric positions as shown on your bill.

9. Error Code

A 4-position alpha-numeric code representing the reason for the bill rejection. (See §§3828.1 and T3882.)

10. RTI Date

A 6-position numeric date which shows when the bill was rejected.

11. RTI Control Number

A 10-position alpha-numeric control number HCFA assigns which remains with the rejected bill until it is removed from the suspense file. (See §3804.)

12. Batch Number

A 4-position alpha-numeric used for control of the bills. It represents the most recent batch number and 4-position Julian date you assigned. (See §§3875.2.)

13. Sequence

A 2-position alpha-numeric count assigned by HCFA to each bill in a batch.

NOTE: The batch number and sequence number are the same as the RTI control number, unless the bill rejects more than once. If the bill was returned, resubmitted, and rejected again, the batch number and sequence number is the most recent batch and sequence number, but the original RTI control number remains the same.

14. Master Block

A 5-position alpha-numeric control utilized by HCFA. The first digit represents the year the bill was received and the next three, the Julian day. The fifth digit identifies the type of bill.

L = Inpatient hospital or SNF
N = Christian Science
P = Outpatient
Q = Home health A or B
R = Final noncovered billing

15. Months Pending

A 2-position alpha-numeric assigned by HCFA to show the number of months pending. For example, a bill which has been pending 6 months as of the date of the report is numbered 06. A bill pending less than a month is shown as 00.

16. Resubmittal Code

An asterisk identifies resubmitted bills.

17. Intermediary Number

The 5-position numeric identifying number of the intermediary that submitted the billing.

If the bill on the report has not been corrected and returned, correct and return it. Enter the RTI number in the appropriate location for the bill-type data record. Assign priority to bills that have been pending 6 months or longer.

If:

- The bill should not have been submitted initially. Void the bill in accordance with §3833.
- The bill was sent within 30 days of the date on the report. Take no action, since HCFA may have received the bill in the interim.
- Your Batch Status Report shows that a batch clearance record was released and 60 days have elapsed since the report first showed its release. Request a special batch clearance record in accordance with §3842.1 to determine its status.

RTIs are removed automatically when a correction bill is properly submitted. Enter the RTI control number for each resubmitted bill. If you fail to enter an RTI control number or enter it incorrectly, HCFA may not be able to identify and remove the RTI.

RTIs that are not removed by the usual automatic means continue to appear on the Pending Returned Bill Notice. If you know that you corrected and resubmitted the bill, use a locally prepared copy of the RTI Removal Notice or the "VOID" bill procedure to remove the RTI. The "VOID" option is preferrable, since it does not require clerical intervention.

Description of Pending Returned Bill Notice Record Tape File

The tape characteristics are:

- 1600 BPI Recording Mode
- Standard label
- Record length is 110 characters

- Block size equals 2200 (110X20).
- HCRTIPEN is the acronym for the file name.
- The file is sequenced first by intermediary number and secondly, by HICN.

Blanks have been entered between the data fields to make it easier to use a straight print program to list the items. An example is included. The Source codes "U" and "P" may be used for electronic matching of bills on the tape with your internal records.

HCFA's INTERNAL USE *Data above (requested) must always be shown. The data must be entered exactly as it appears on the Pending Returned Bill Notice.	**Data requested should always be shown. The data must be entered exactly as it appears on the most recent interim or final batch record.				HCFA's INTERNAL USE	***Data should always be shown by the intermediary. The data should be entered exactly as it appears on the Pending Returned Bill Notice and/or the most recent interim or final batch record.

3804.4 Bill Received and Returned Report.—This is a computer generated report sent monthly to each intermediary and HCFA Regional Office. The report represents the national, regional, and each intermediary's statistics broken down by inpatient hospital, SNF, hospice, home health, outpatient, Christian Science, and void bills. The report's primary purpose is to provide the RTI bill processing data for monitoring purposes.

Columns (A) through (I) on the report are described below.

A. NUMBER OF BILLS RECEIVED

This is the total number of bills excluding adjustment bills (counted before edits were performed) received during the reporting period. This figure includes all types of bills (corrected and initially submitted bills included).

B. NUMBER OF BILLS RETURNED

This is the number of bills processed (counted after all edits have been made, i.e., released from orbit and/or investigation status) during this reporting period that rejected. If the reject is a re-reject, it is also counted in column "E."

C. PERCENT OF BILLS ACCEPTED

This is the percent of bills submitted in column "A" accepted during this reporting period.

D. NUMBER OF RTI RECEIVED

This is the total number of RTI (including voids, but not initial submittals) received during this reporting period.

E. NUMBER OF RTI REJECTED

This is the number of RTI shown in column "D" re-rejected during this reporting period.

F. PERCENT OF RTI REJECTED

This is the percent of RTI shown in column "E" that re-rejected during this period.

G. RTI PENDING

This is the number of rejected bills which have not been resubmitted as of the date of the report.

H. NUMBER OF RTI PENDING 150 DAYS OR LESS

This is the number of RTI shown in column "G" that are 150 or less days old. The RTI aging factor is calculated by subtracting the RTI date from the date of the report.

I. PERCENT OF RTI PENDING 150 DAYS OR LESS

This is the percent of RTI shown in column "G" that are 150 or less days old.

Two versions of the report are prepared. One shows data for the "current" month (non-accumulative and without regard to fiscal or calendar year); the other shows data for the "last 12 months" (accumulative and without regard to fiscal or calendar year). The data under columns "G," "H," and "I" are always accumulative "TO DATE" figures for both versions.

3805. TIMELINESS OF BILLING DATA SUBMITTED TO HCFA.

Send billing data submitted via magnetic tape at least once per week. In order to avoid using numerous tapes that are partially filled, send the data using the minimum number of tapes feasible. Use the full capacity of each tape to the extent practicable before starting another tape except as necessary to meet the once per week schedule.

Submitting the minimum number of tapes feasible does not mean that bills must be batched infrequently. If necessary, bills can be batched daily and then combined for the weekly submittal. Also, batching bills on the last work day of each month allows you to include all bills available for batching on the monthly workload report. Report the status of each batch of bills via the batch clearance tape file. (See § 3830.1).

3808. PACKING AND MAILING OF MAGNETIC TAPE REELS

Package magnetic tape reels securely enough to preclude damage and loss of contents. Ship magnetic tape reels (both test and operation) containing Part A billing data to Baltimore by priority mail. Ship the operational tape reels to:

Social Security Administration
Outside Agency Desk
271 NCC
Attn:UNIBILL Tape
6201 Security Blvd.
Baltimore, MD. 21235

Ship the test tape reels to the address in § 3866.

Do not use the following postal services: return receipt requested, insurance, or special handling. If a means of shipment other than priority mail is advisable, make arrangements on an individual basis. Tape reels accepted by HCFA will not be returned. Do not return batch clearance tape reels to HCFA.

3808.1 Notification of Intermediary Address and/or Corporate Name Changes.—To help ensure that all Medicare related materials (i.e., Pending Returned Bill Notice, SSACLEAR tape, and special batch notices) are forwarded to the correct address, promptly forward written notification of address changes to HCFA whenever any of the following changes occurs: corporate name, street address, post office box number, city and ZIP code. Forward address changes to:

Health Care Financing Administration
Part A Communications Branch
1-H-1 Meadows East Bldg.
Baltimore, MD. 21207

3816.2 Form HCFA-L1001, Notification of Internal Adjustment Action(s) Taken by HCFA.--HCFA identifies and internally adjusts specific provider bills that were accepted reflecting incorrect utilization of available benefits. You are notified of these adjustments via the form HCFA-L1001 or the batch clearance tape. The batch clearance tape is the usual medium. If the form HCFA-L1001 is used, the beneficiary and the adjusted bills for the benefit period are referred to on the reverse of the form. If the batch clearance tape is the medium, the adjusted bill data is shown only on the HI Bill Retrieval (bill history). (See 3840.1.) The Bill Retrieval is included in "The RTI Utilization Reject and HI Bill Retrieval File" (file "J") on the tape. (See 3830.1.)

If we post a Kron bill to a beneficiary's master record so that the thru date of the Kron bill is within 60 days of the next subsequent bill on the record, you may need to adjust the next bill if you submitted it as a nonpayment bill due to benefits exhausted. We alert you to this by sending you the appropriate bill history listing for the subsequent bills. We send this information in the "RTI Utilization Reject and H I Bill Retrieval File" (File "J") on the HCSSACL file (Batch Clearance Tape). This record is identified with a code of 7701.

Ensure that your in-house records comply with the adjustment action. Also notify your provider of such actions. Beyond that, no further action is necessary.

NOTE: When scrambled utilization is detected and HCFA can identify the appropriate beneficiary, HCFA initiates the necessary internal adjustment actions to remove utilization from the incorrect record. If a bill has not been posted for the correct record, submit one. HCFA cannot create the initial bill for the beneficiary's record.

DEPARTMENT OF HEALTH & HUMAN SERVICES

Health Care Financing
Administration

Intermediary
No.

Gentlemen:

The reverse side of this letter identifies provider bills that were adjusted by HCFA because available benefits for the person specified were either overutilized or underutilized. A brief explanation of the internal action taken by HCFA is shown under the column heading, "Explanation." Please take the appropriate steps to insure that your in-house records comply with HCFA's internal adjustment(s).

If you have any questions about the adjustment(s) made by HCFA, please contact the address checked below:

6. ☐ Item(s) ________ should NOT be in the same Period as item(s) ________

EXPLANATION

HCFA Bill Processing

3820. SUBMITTAL OF BILLS

All bills must be submitted on magnetic tape as described in SS3867ff.

3824. CONSISTENCY EDITING

Each claim is first edited for consistency by an electronic edit program which identifies all invalid data and inconsistencies based on the data's face value. Invalid data are such things as a month indicated by a number greater than 12, more than 60 lifetime reserve days used, etc.

The consistency edits do not compare billing data to information in SSA records.

3825. EXPLANATION OF CONSISTENCY ERROR CODES

Except for a special group of codes used only on adjustment bills (those resulting from failure to properly apply the MCE, and a few others), all consistency error codes are in the following format:

- The first two positions identify the item number on the HCFA-1450. For example, "Date of this admission" on the keyed HCFA-1450 is 15, "Patient status" is 21.
- The third position is relevant if a specific item occurs more than once in UNIBILL (e.g., condition codes, value codes, occurrence codes, occurrence span codes, and revenue codes). In such cases, the third position identifies the occurrence of the code that caused the error.
- Item 94 of the UNIBILL is subdivider A thru G. For this item the third position of the code is the letter of the item or error.
- The fourth position is a simple numeric identification number. These range from 1 to 9 for a specific item.

3826. MONITORING THE USE OF MEDICARE CODE EDITOR (MCE)

Beginning with bills received December 19, 1986, HCFA monitors your performance in the use of MCE. This is done in the bill consistency edit system. You are notified of the errors, but the bill is accepted. The error is counted in the bill error report, and identified by one of the codes in the 7601-7608 range.

The following lists MCE exceptions and the corresponding error codes:

Exception Type	Code
Invalid diagnosis or procedure code	7601
Invalid fourth or fifth digit	7602
E-code as principal diagnosis	7603
Duplicate diagnosis of principal diagnosis	7604
Age conflict with diagnosis or procedure	7605
Sex conflict with diagnosis	7606
Manifestation code as principal diagnosis	7607
Unacceptable principal diagnosis	7608

Occurrence of such errors indicates that your MCE process is not working correctly. You are expected to identify and correct the errors in your system.

Since you already have corresponding Grouper edits for the following, they are excluded from HCFA's MCE monitoring process.

- o Invalid age;
- o Invalid sex; and
- o Invalid discharge status.

Also, the following are not included because development may not result in changes in hospital coding.

- o Nonspecific principal diagnosis;
- o Questionable admission;
- o Nonspecific operating room procedures;
- o Noncovered operating room procedures;
- o Bilateral procedures;
- o Open biopsy; and
- o MSP alerts.

3827. UTILIZATION EDITING

Once the consistency edits have been applied, the bills go through the utilization program. In this program, the bill data on the tape is compared to the data in HCFA's Master Health Insurance Record.

3827.1 Bills Which Failed the Consistency Edits.—The bills in the batch which failed the consistency edits are screened in the utilization program for only three items:

1. Name and claim number which match the master record,

2. Eligibility to Part A or Part B benefits during the billing period, and

3. A matching open item in the master record when the bill is a HCFA-1453 or HCFA-1486.

3827.2 Bills Which Have Passed the Consistency Edits.—Billing data which have passed the consistency edits are processed completely through the utilization program and is either posted or rejected.

3828. EXPLANATION OF THE UTILIZATION EDITS.

A. Patient's Name and Health Insurance Number.—These items are matched against the master record of the patient's name and correct health insurance number. Up to six positions of the patient's surname and the initial of his given name are matched electronically. If the bill record cannot be matched, it is rejected. HCFA then attempts to determine the correct name or health insurance number so that the bill can be reintroduced into the system. Once the bill record is matched with the master record, a check is made against the master record to see whether the patient is entitled to benefits for the period shown on the bill.

B. Date of Admission for Inpatient Hospital and SNF.—Once it is determined that the patient is entitled to benefits, HCFA attempts to match the date of admission to the open item on the record. In order to match, these admission dates must be within 1 day of each other and the provider number must match. Part A and Part B home health queries do not establish open items. Therefore, take extra precautions to make certain such queries are made to the appropriate record.

C. In Sequence Check.—After the open item has been matched to the bill, HCFA checks the master record to be sure that the bill is the next one in sequence. (See S 3835 for a complete discussion of in-sequence processing of provider bills.)

D. Spell of Illness.—After the bill has been determined to be in sequence, HCFA makes a spell of illness determination by checking its master records against the information shown on the billing form. If it is determined that a new spell of illness has begun, HCFA adjusts the beneficiary's utilization record accordingly.

E. Deductibles and Coinsurance.—The bills are now compared to the master record for the beneficiary's previous utilization history. If the data on the bills are consistent with HCFA's records the patient's utilization record is updated.

Certain types of erroneous data appearing on bills are automatically corrected by HCFA to conform with its records so that the bills can be posted. (See S 3830.1E, field 19 and S 3833.) HCFA also automatically overlays the through and discharge dates on home health and outpatient bills with the date of death on its master file when the bill meets specific criteria. (See S 3843.) In addition, when certain money amounts are less than $50 on the incoming bill or less than $50 of a deductible needs to be met, HCFA accepts the billing in some instances although errors may be present. (See S 3930.1E, field 18 and 19 and S 3843.)

3828.1 Utilization Edit Error Codes.—The error codes for the various types of bills are shown below.

Error Code	Explanation
5052	The name and/or claim number shown on the bill is incorrect. (This corresponds to query disposition code 52.) No master record data will be included on the printout in this situation.
5200	There is no record of the beneficiary's entitlement to the type of services shown on the bill.
5201	The name, social security number, and personal characteristics furnished in the bill match SSA's non-HI records, and HCFA determined that the individual is not eligible for HI benefits. This applies also to individuals receiving SSI benefits who are under age 65 and are not eligible for HI benefits. No master records data is included on the printout in this situation. Since most of the cases in this category are disallowed for failure to establish proof of age or residence requirements, the individual may become eligible at a later date. Ordinarily the intermediary would have been alerted to this situation when it queried and received a disposition code 51. (See S 3512.7.) However, if you previously received an approval of the query instead of a rejection, this code is an indication that subsequent to the query, HCFA discovered that the individual had been erroneously entitled and a retroactive disallowance was necessary. If the claim involves a disabled beneficiary, a type 7 code (automatic notification) was sent by SSA. For all other types of beneficiaries, no automatic notice is transmitted. Therefore, if the intermediary has not already taken the necessary disallowance action (See S 3719ff), it should do so upon receipt of this RTI.

Error Code	Explanation
5202	No record of hospice election.
5203	Hospice billing dates do not fall within the applicable hospice election and/or recertification period.
5210	Services are shown after benefits terminated.
5211	Services are shown after the patient died. Determine if the name and HICN for the beneficiary are correct. Follow the instructions for disposition code 38 and/or 43, §3512.7 to resolve error condition. Also see §3831.1,Item 1 and 2 for description of "DUMMY IDENT" record (RTI UTILIZATION REJECT) and format if a purged inactive HI master record is involved.
5220	Services are prior to the date of entitlement.
5232	Services on this bill overlap a period of HMO entitlement.
5233	HI master record shows HMO pays for services. Option code "C" is shown for inpatient hospital/SNF or an "A", "B", or "C" for home health/outpatient services. Bill shows you paid for services within the HMO enrollment and no hospice election is shown on HI master record, or the HMO paid for services and hospice election is shown on HI master record.
5310	No pre-entitlement reduction on psychiatric bills was shown.
5320	Both a Christian Science SNF and regular SNF utilization were reported for the same benefit period.
5340	A "benefits exhausted" bill is received, but benefits are not exhausted on HCFA's records.
5360	Age and/or sex is a factor in DRG determination and either age on HI master record is not within DRG code range or sex identified on HI master record is not compatible with type of DRG code.
	Deductible Discrepancies
5400	The Part A blood deductible was overapplied. (Automatically adjusted by HCFA to agree with its records if this is the only utilization error involved. See §3828.3, code 7400, and §3830.1E, Item 19.)
5401	The Part A blood deductible was underapplied. (Automatically adjusted by HCFA to agree with its records if this is the only utilization error involved. See §3830.1E, Item 19, and 3828.3, code 7401.)
5410	The Part A cash deductible was overapplied. (Automatically adjusted by HCFA to agree with its records if this is the only utilization error involved. See §3830.1E, Item 19, and 3828.3, code 7410.)

Error Code	Explanation
5411	The Part A cash deductible was underapplied. (See §3828.3, Code 7411.)
5420	A Part B deductible error is involved. The deductible for the year of services is not met or the deductible applied has not been queried.

Discrepancies in Days

Error Code	Explanation
5500	Full inpatient reimbursement days (applied to stays in hospitals or SNFs) have been overutilized . (Automatically adjusted by HCFA to agree with its records if this is the only utilization error involved. See §3828.3, code 7500, and 3830.1E, Item 19.
5501	An error in full coverage days (underutilization) is involved.
5510	An error in coinsurance days (overutilization) is involved.
5511	Inpatient coinsurance days (applied only to stays in hospitals) have been underutilized. (Automatically adjusted by HCFA to agree with its records if this is the only utilization error involved. See §3828.3, code 7511, and 3830.1E, Item 19.
5520	An error in lifetime reserve days (overutilization) is involved.
5530	An error in lifetime psychiatric days (overutilization) is involved.

Date Discrepancies

Error Code	Explanation
5600	A duplicate bill is involved.
5601	The bill overlaps a previously accounted bill.
5610	An unexplained gap in the bill dates.

If an incorrect entry in Item 15 and/or Item 20 of the HCFA-1450 caused the error, the unexplained billing gap can be eliminated by correcting the deleted bill and resubmitting it to HCFA.

If the gap is not due to an error on the bill, make certain that the bill for the missing period has been accepted by HCFA before resubmitting the deleted bill. Refer to the batch records for the batch in which the missing bill was submitted to determine status of the bill. If another intermediary is responsible for the missing bill, ask it to process the bill and verify that the bill has been submitted to HCFA.

5612 Bill through/discharge date overlaps a subsequent billing date(s). The overlapped bill(s) are also being returned, but as a Code 5613. The batch number of the orbiting bill(s) to be returned as a code 5613, can be determined by ascertaining which open item on the RTI Utilization Exception Listing is overlapped by the through/discharge date of the RTI'd bill. The batch record date of the subsequent bill(s) rejected by HCFA should be within 7 calendar days of the batch record date for this bill. Ordinarily two respective batch records will be sent in sequential date order.

Error Code	Explanation
	Other Discrepancies
5700	This bill is overlapping previously processed bills on the attached Bill Retrieval Listing. If the billing dates are correct, submit credit/debit or cancel only adjustment bills to change the admission and billing dates of the bills already posted so that none of the dates overlap. If another intermediary submitted the posted bill(s) which must be adjusted, ask it to make the necessary credit/debit or cancel only adjustments and send you confirmation before resubmitting your bill. If your billing dates are incorrect, make the necessary corrections and resubmit the bill.
5701	A bill for this admission date which contained a discharge date has already been posted. This bill is using dates beyond the discharge date of the posted bill; it is also overlapping posted bills on the attached Bill Retrieval Listing. If the billing dates are correct, submit adjustment bills to change the admission and billing dates of the bills already posted so that none of the billing dates overlap. If another intermediary submitted the posted bill(s) which must be adjusted, ask it to make the necessary credit/debit or cancel only adjustments and send confirmation before resubmitting this bill. If your billing dates are incorrect, make the necessary corrections and resubmit.
5702	Our records show we processed a bill for this admission date which contained a discharge date. This bill is showing dates beyond the discharge date of that processed bill. If there should be valid billing after the discharge date of the posted bill, take corrective action (correct discharge date with credit/debit or cancel only adjustments or correct the billing dates on this bill). Otherwise, resubmit this bill in a VOID batch.
5703	This bill is linking two benefit periods on the attached Bill Retrieval Listing. This bill is being deleted because if HCFA were to process it, an overmet and/or overutilization (other than over collected inpatient cash deductible) situation will occur. HCFA will not combine the two benefit periods until this bill is corrected and resubmitted, showing days utilized which are consistent with those days which would remain by combining the two benefit periods. Once the bill in question has been resubmitted, an HCFA-L389 will notify you of adjustments which should be resubmitted to HCFA for bills already posted in the two benefit periods. An HCFA-L1001 will be used to advise you of adjustments made by HCFA involving bills already posted. Uponreceipt of this letter, adjust your internal records, although no bill should be submitted to HCFA.

Error Code	Explanation
5704	The noncovered stay dates shown on this bill are causing this bill to link two benefit periods previously established on HCFA's records. These noncovered stay dates should not be used to extend the benefit period since there are more than 60 days between the noncovered stay through date and the qualifying stay from date on your bill. If your billing dates are incorrect, make the necessary correction(s) and resubmit the bill. If your billing dates are correct, resubmit the bill without showing the prior noncovered stay dates as they do not extend the benefit period or start a new one.
5705	The noncovered stay through date, the qualifying stay through date, or verified stay date shown on this bill overlaps previously processed bills on the attached bill retrieval listing. If any of these dates are incorrect, make the necessary correction(s) and resubmit this bill. If all dates are correct, submit adjustments to correct the billing dates of the overlapped bills which have been previously accepted. After the credit/debit or cancel only adjustments have been accepted by HCFA, resubmit this bill.
5800	Possible Transfer Case. Covered Day or inpatient deductible amount apparently applied to a transfer day billing. See §3620, Item 6.
5900	This orbiting bill has been deleted as a result of your request for corrections on it. Make the necessary corrections and resubmit the bill. If the bill should not have been sent to HCFA, handle it in accordance with §3833.
5901	This bill is identified as a Kron bill but does not meet the Kron bill criteria, i.e., the bill is an inpatient hospital bill not containing inpatient deductible, or the bill is a SNF bill, or the from date of the bill is within 60 days of the discharge date of a covered bill posted to HCFA records.

3828.2 Adjustment Bills—Utilization Bills.—In addition to the possible error codes shown above, the following codes may be shown on the batch record to identify why an Adjustment Bill has been deleted.

Error Code	Explanation
6000	HCFA records indicate the original/duplicate bill (1) has not been processed, (2) has been previously cancelled, or (3) the dates (admission, discharge, "From" and "To") do not correspond to the originally processed bill or to those on a previously processed debit adjustment bill.
6010	HCFA records indicate the "CREDIT ONLY," "CANCEL ONLY," or "DEBIT P" bill does not match an entry (other than the admission, discharge, "FROM" and "TO" dates) on the orginally processed bill.
6100	This indicates the adjustment is not necessary because the "DEBIT" is the same as the originally processed bill.

3828.3 Automatically Corrected Bills.—The following codes and data described are shown on the batch notice for bills automatically corrected.

Correction Code	Explanation
7400	Part A blood deductible has been revised downward to conform with HCFA's records. The first two digits represent the Part A blood deductible pints appearing on the bill; the next six digits represent the applicable blood per pint charges which were on the bill; and the next two digits represent the HCFA adjusted blood deductible pints. Where the charge per pint varies, 999999 will appear in this item.
7401	Part A blood deductible has been revised upward to conform with HCFA's records. The first two digits represent the Part A blood deductible pints appearing on the bill; the next six digits represent the applicable blood per pint charges which were on the bill; and the next two digits represent the HCFA adjusted blood deductible pints. Where the charge per pint varies, 999999 will appear in this item.
7410	Part A cash deductible has been revised downward to conform with HCFA's records. The first five digits represent the Part A cash deductible on the bill and the next five digits represent the HCFA adjusted inpatient deductible.

Correction Code	Explanation
7411	Part A cash deductible has been revised upward to conform with HCFA's records. The first five digits represent the Part A cash deductible on the bill and the next five digits represent the HCFA adjusted inpatient deductible.
7500	The Part A inpatient full reimbursement day(s) shown on the bill has been changed to regular coinsurance days to conform with HCFA's records. HCFA does not change full reimbursement days to coinsurance days where lifetime reserve days are involved. The first two digits represent the number of nonlifetime coinsurance days appearing on the bill, if any; the next five digits represent either the nonlifetime coinsurance rate shown on the bill or the applicable nonlifetime coinsurance rate calculated by HCFA for the benefit period if no nonlifetime coinsurance rate appears on the bill or the coinsurance rate is incorrect, and the next two digits represent the HCFA adjusted non lifetime coinsurance days. The last digit shows whether HCFA adjusted the coinsurance rate higher (H) or lower (L). When no rate was shown on the bill and HCFA makes an entry, and "H" indicator will be shown.
7511	The Part A inpatient nonlifetime coinsurance day(s) shown on your bill has been increased to conform with HCFA's records. The first two digits represent the number of coinsurance days appearing on the bill; the next five digits represent either the nonlifetime coinsurance rate shown on the bill or the applicable nonlifetime coinsurance rate calculated by HCFA for the benefit period if no nonlifetime coinsurance rate appears on the bill or the rate is incorrect; and the next two digits represent the HCFA adjusted nonlifetime coinsurance days. The last digit shows whether HCFA adjusted the coinsurance rate higher (H) or lower (L).
7540	Your bill is for Part A visit(s), but should be for Part B visit(s) or vice versa; therefore, HCFA changed your billing data accordingly. If "B" visits have been changed to "A" visits, the adjustment to "A" visits is shown on the Batch Clearance Tape File, Batch Clearance Detail Record, with an "A" in field 19, location 101 and if "A" visits have been changed to "B" visits, the adjustment to "B" visits is shown by a "B" in this location.

3828.4 Purged Bill Utilization Edit Error Code.—The following error code is used:

Error Code	Explanation
8600	The benefits have been updated via the bill data appearing on a previously purged RTI bill.

Rejected Bill Processing

3829. NON-PILOT INTERMEDIARY PROCESS CODE AND BILL REPLY RECORD

Effective July 1985 Phase II of a study to demonstrate the effectiveness of on-line data base processing began between Blue Cross of Arizona and HCFA. Phase I consisted of setting up the on-line system and putting query and query reply data on-line. Other contractors may become pilot sites or the system implemented nationally depending upon the outcome of the experiment. An on-line system makes it possible to send and receive data within seconds with all parties hooked up to the system.

Extensive bill processing and systems changes are necessary on the part of Blue Cross of Arizona and HCFA. Some of these changes impact non-pilot intermediaries, but only to the extent that they process bills for a beneficiary whose records are on the System to Provide Immediate Data on Eligibility for Reimbursement (SPIDER) files. Non-pilot intermediaries are affected because once a beneficiary's record is entered on the SPIDER files, it remains there indefinitely. Bills for a SPIDER record are processed on a first-in/first-out basis. This means that HCFA automatically adjusts or rejects any bill that is incompatible with its records without regard to the sequence of service dates.

A unique code is used to acknowledge automatic adjustments involving a SPIDER record because more than one condition may be adjusted by this system. Since HCFA uses a batch system to communicate with intermediaries that are not part of the on-line system, the batch clearance tape is the medium used to provide the code and the adjusted data. The unique code appears on both the first and second file of the batch clearance, but the adjusted data appears only on the RTI utilization reject. (See §3831.1, Item 106.)

The unique code and explanation follows:

Code	Explanation
7999	Automatic adjustment involves a SPIDER record. One or more conditions have been corrected. The attached document (modified RTI Utilization Reject) identifies the posted bill and the field(s) on the bill that were changed. Change your records to reflect the corrected data and recalculate the payment. Recoup or refund erroneous payments.

3830. BATCH CLEARANCE RECORD

HCFA sends a magnetic tape (HCSSACL TAPE) to the intermediary to report all bills which fail consistency and utilization edits and to inform the intermediary of the status of all bills in a batch. Intermediaries that have more than one intermediary number will receive a tape for each office with a separate number (except Aetna and Travelers). The HCSSACL TAPE will also contain RTI Consistency Reject records (see §3832) and RTI Utilization Reject records (see §3831) and related Bill History records (see §3840). See §3830.1 for format of the HCSSACL TAPE.

An interim batch record is sent where it appears that all bills in the batch cannot be given a final disposition within 60 days. An initial interim batch record lists all readable bills in the batch according to processing status, that is, accepted bills, deleted bills, and pending bills. Any subsequent interim records show all bills which have had a status change since the previous notice. The final batch record will just list the bill(s) which changed from pending to accepted or rejected in the run causing the final notice if one or more interims have been released. When no interim batch record is released, all deletions and acceptions are listed on a final batch record.

All interim and final batch records are numbered. Also, HCFA enters the number of batch records produced to date which enables the intermediary to detect missing records. See §3841.1 for instructions relating to missing batch records.

3830.1 Description of Batch Clearance and Exception Files.--

A. Batch Clearance Tape Files.--The batch clearance records transmitted on tape consist of two files. The first file is identified by the acronym HCSSACL/S___ and the second file by HCSSBCL/S___. The three blanks following the "S" (segment) are designed for each intermediary's abbreviated number. These files are recorded at 1600 BPI, 9-track, odd parity, with an IBM Standard Label. The first file (HCSSACL) consists of a Header Record; Batch Clearance Records; Batch Clearance Detail Records; and a Trailer Record. Following are the detailed descriptions of the component records comprising the file. The descriptions of the records include Field, Size, Format (Data Type, i.e., A-alphabetic, N-numeric, and X-blank or alphanumeric), Location and Remarks.

The batch clearance tape includes, as the second file (HCSSBCL), the two RTI Reject Files in print image format suitable for production of the hardcopy listings at the intermediary sites utilizing Utility software available from computer manufacturers. File structure for the total tape follows:

The print programs obtained from HCFA must be used without exception.

C. Intermediary Header Record.—

FIELD	SIZE	FMT	LOC	REMARKS
1. Blank	1		1	
2. Identification	5	X	2-6	MDA26
3. Blank	1		7	
4. Intermediary Number	5	N	8-12	Intermediary processing Bills
5. Blank	1		13	
6. Date of Notice	6	N	14-19	MMDDYY Current Processing Date
7. Blank	91		20-110	

D. Batch Clearance Control Record.--

FIELD	SIZE	FMT	LOC	REMARKS
1. Batch Number	8		1-8	See Section 3879.2
a. Sequence Number	4	X	1-4	Control Number assigned to batch by the Intermediary.
b. Julian Date	4	N	5-8	YDAY - date batched by the Intermediary.
2. Sequence Number	2	N	9-10	Constant 00

	FIELD	SIZE	FMT	LOC	REMARKS
3.	Type of Notice	1	A	11	I - Initial N - Interim batch record will reflect only bills changing status F - Final
4.	Intermediary Submission Totals	11	N	12-22	
	a. Items	2	N	12-13	No. of bills in batch.
	b. Reimbursement	9	N	14-22	Total reimbursement amount for bills in batch as reported by the intermediary (signed + or -)
5.	HCFA Receipt Totals	11		23-33	
	a. Items	2	N	23-24	No. of bills received in batch.
	b. Reimbursement Amount	9	N	25-33	Total reimbursement amount for bills in batch received by HCFA. (signed + or -)
6.	Out-of-Balance Indicator	1	X	34	HCFA receipt and the totals reported by intermediary differ. Blank-batch in balance. 1 - Reimbursement Amounts/out-of-balance. 2 - Items out of balance. 3 - Amount and Items both out of balance.
7.	Bill Type Indicator	1	X	35	L Inpatient or Skilled Nursing Fac. M Void N Christian Science P Outpatient Q Home Health "A" or "B" R Final Non-Payment (Bills submitted before 6/1/79 have been converted to one of the above 6 bill types.)

FIELD	SIZE	FMT	LOC	REMARKS
8. Blank	2	X	36-37	
9. HCFA Accepted Totals	11		38-48	For Interim batch records, bills changing to accepted status will be reflected in this field. Initial & Final batch records will reflect all accepted bills in batch.
a. Items	2	N	38-39	Number of bills in batch which have been accepted by HCFA.
b. Reimbursement Amount	9	N	40-48	Reimbursement amount for accepted bills (signed + or -)
10. HCFA Pending Totals	11		49-59	This field will be zero for an interim batch record. NOTE: All pending totals are shown on the Initial batch record.
a. Items	2	N	49-50	Number of bills in batch still pending.
b. Reimbursement Amount	9	N	51-59	Reimbursement amount for pending bills. (signed + or -)
11. HCFA RTI Totals	11		60-70	Interim batch records - reflect only bills changing to RTI status. Initial and Final batch records - reflect all bills in the batch returned to intermediary for correction.
a. Items	2	N	60-61	Numbers of RTI bills in batch.
b. Reimbursement Amount	9	N	62-70	Reimbursement amounts for RTI bills in batch. (signed + or -)

FIELD	SIZE	FMT	LOC	REMARKS
12. Master Block	8		71-78	
a. Julian Date	4	N	71-74	YDDD - date blocked by SSA
b. Bill Type	1	X	75	Letter indicating type of bills.
13. Blank	3	X	76-78	
14. Total Batch Records	2	N	79-80	Number of batch clearance records generated for this batch.
15. Blank	30	X	81-110	

E. Batch Clearance Detail Record.—

FIELD	SIZE	FMT	LOC	REMARKS
1. Batch Number	8		1-8	See Section 3879.2
a. Sequence Number	4	X	1-4	Control number assigned to batch by the intermediary.
b. Julian Date	4	N	5-8	YDAY - Date batched.
2. Sequence Number of Bill Within the Batch	2	N	9-10	Sequence number 01-95 assigned to bill.
3. HI Claim Number	12	X	11-22	Claim number from the bill submitted by the intermediary.
4. Beneficiary Surname	6	A	23-28	Surname from bill.
5. Bill From Date	6	N	29-34	MMDDYY - Starting date of billing period.
6. Reimbursement Amount	8	N	35-42	Reimbursement amount on bill. (signed + or -)
7. Corrected Claim Number	12	X	43-54	Claim number used to process the bill. Blank if no correction.
8. Corrected Claim Number Code	1	X	55	X-cross referred C-correction Blank-no correction

	FIELD	SIZE	FMT	LOC	REMARKS
9.	Corrected Name	6	X	56-61	Name used to process bill. Blank is no correction.
10.	Process Code	4	X	62-65	AAAA - Accepted HHHH - Under investigation RRRR - Orbit (——) - rejected or automatically corrected 4-position error code. Refer to §§ 3825ff. for rejected error codes and codes for automatically corrected claims. ( ) - rejected test claim number.
11.	Multiple Error	1	N	66	Number of other errors on the bill. Initialized zero.
12.	Action Code	1	N	67	0 - Credit Adjustment 1 - Interim Bill 2 - HHA Benefit Exhausted 3 - Final Bill 4 - Final Nonpayment Bill 5 - Debit Adjustment Bill 6 - Void RTI Bill
13.	Miscellaneous Entry	4	N	68-71	Code for rejected bills in order of priority with possible four error combination. Field initialized zeros. 1 - Name/Number discrepancy 2 - No open items 3 - No Part A 4 - No Part B 5 - Misbatched 6 - Pre-77 bill accepted during purge
14.	RTI Control Number	10	X	72-81	Control number assigned to bill returned to the intermediary. (signed plus)

"ALERT ONLY" in this field means RTI correction need not be sent to HCFA.

	FIELD	SIZE	FMT	LOC	REMARKS
15.	Intermediary Control Number	15	X	82-96	Reserved for control number assigned to bill by intermediary.
16.	Alert Code	1	X	97	Asterisk (*) means bill accepted, but provider number on bill did not match provider number present on Hospice Master Record (queried for admission date).
17.	Initials	2	X	98-99	Present only when surname and/or initials on bills differ from surname and/or initials on HCFA's records.
18.	Date of Death/Money Amount Tolerance Indicator	1	X	100	D--means bill has been accepted using home health or outpatient date of death tolerance. T--means bill has been accepted on basis of money tolerance. If HCFA-1453 or HCFA-1486, because total covered charges are less than $50. If HCFA-1483, because total covered charges are less than $50 or provider and patient block amounts combined are equal to less than $50 or amount of calendar year deductible to be met is less than $50. If HCFA-1487, because total covered charges are less than $50. Code 5200, 5210, 5211 or 5220 will appear in field 19, location 101-104, to show the error code which would have appeared in field 10 if the money

FIELD	SIZE	FMT	LOC	REMARKS
				tolerance had not been applied and as an alert that more than a money issue is involved. These codes can appear only in conjunction with the T code. B--means that the date of death and money amount tolerances have both been applied. Otherwise the location is blank. Effective February 1985, A-means potential under application of days or blood deductible. C-means that potential under application of days or blood deductible and money amount tolerance involved. Days remaining after acceptance of this billing appear in field 19, locations 101-106 and blood deductible pints to be met in 107. (See §3835.) The amount(s) potentially under applied is identified by an "A", "B", "C", "D", "E", or "F" in field 19, location 109-110. If no code is present, this location is blank.
19. Automatic Correction of Date of Death/ Deductible/Visits	10	X	101-110	Blank if not utilized.
	4	N	101-104	If code in field 18 is T and code 5200, 5210, 5211, or 5220 is applicable, the 4-position code is entered.
	5	N	102-106	If code in field 18 is D or B, the adjusted date of death from the HI record (YYDAY-Julian date) is entered. This applies to home health or outpatient only.

FIELD	SIZE	FMT	LOC	REMARKS
				If code in field 18 is A or C the following are shown:
	2	N	101-102	Full days available.
	2	N	103-104	Regular coinsurance days available.
	2	N	105-106	Lifetime coinsurance days available.
	1	N	107	Blood deductible pints to be met.
	1	A	108	Blank.
	1	A	109	Types of potential under applications are identified by: A - for full days, B - for regular coinsurance days, and C - for full days and regular coinsurance days.
	1	A	110	Types of potential under applications are identified by: D - for lifetime coinsurance days, E - for blood pints, and F - for lifetime coinsurance days and blood pints.
				If code in field 10 is: 7410
	5		101-105	Original inpatient deductible.
	5		106-110	Downwardly adjusted inpatient deductible.
				7411 Same as code 7410 except upwardly adjusted inpatient deductible.

FIELD	SIZE	FMT	LOC	REMARKS
				7400
	2		101-102	Original blood deductible in pints given on bill.
	6		103-108	Charges per pint.
	2		109-110	Downwardly adjusted blood deductible in pints.
				7401
				Same as code 7400 except: upwardly adjusted blood deductible in pints. NOTE: For codes 7400 and 7401, 999999 will be entered in locations 103-108 when charge per pint varies.
				7500
	2		101-102	Full days given on bill, if any.
	5		103-107	Regular coinsurance rate given on the bill, or the calculated rate if no rate appears on the bill or the rate given is incorrect.
	2		108-109	HCFA adjusted regular coinsurance days.
	1		110	Code: H-upwardly adjusted coinsurance rate, or L-downwardly adjusted coinsurance rate.
				7511
	2		101-102	Regular coinsurance days given on the bill, if any.
	5		103-107	Regular coinsurance rate given on the bill, or the calculated rate if no rate appears on the bill or if the rate given is incorrect.
	2		108-109	HCFA adjusted regular coinsurance days.
	1		110	Code: H—upwardly adjusted coinsurance rate, or L—downwardly adjusted coinsurance rate.

FIELD	SIZE	FMT	LOC	REMARKS
	1		101	7540 An "A" is entered if "B" visits on a bill are changed to "A" visits. If "A" visits on a bill are changed to "B" visits, a "B" is shown.

See § 3843 (C) for a detailed description of automatic correction codes.

F. Intermediary Trailer Record.-

	FIELD	SIZE	FMT	LOC	REMARKS
1.	Trailer Indication Code	1	A	1	Fixed "T".
2.	Blank	1		2	
3.	Batch Count	6	N	3-8	Number of batches still outstanding (Final batch record not prepared for intermediary).
4.	Blank	1		9	
5.	Control Record	6	N	10-15	Number of batch clearance control records in this file.
6.	Blank	1		16	
7.	Detail Record Count	6	N	17-22	Number of batch clearance detail records in this file.
8.	Blank	1		23	
9.	Intermediary	5	N	24-28	Intermediary processing bill.
10.	Blanks	82		29-110	

See § 3830 for an explanation of the batch clearance record and its related detail record and an example of the format produced by the print program obtainable from HCFA.

G. The RTI Consistency Reject File.—

The Header Record.—

	FIELD	SIZE	FMT	LOC	REMARKS
1.	Carriage Control	1	X	1	Fixed "1"
2.	Identification	5	X	2-6	RTICS
3.	Blank	1		7	
4.	Intermediary Number	5	X	8-12	Intermediary processing bills.
5.	Blank	1		13	
6.	Run Date	6	N	14-19	MMDDYY. Date Consistency errors established.
7.	Blanks	114		20-133	

H. The RTI Consistency Reject Record.—

For record layouts and examples refer to Part A Intermediary Manual 3832. For error explanation refer to 3825ff.

The format of the RTI Consistency Reject records are as described in the Part A Manual except for the first position of each record. This position contains the control character which is used for skipping and spacing. The possible control characters follow:

1 = NEW PAGE

b̸ = SINGLE SPACE

0 = DOUBLE SPACE

- = TRIPLE SPACE

An RTI Consistency Reject Header will precede the Consistency Reject record, and an RTI Consistency Reject Trailer will indicate the end of the RTI Consistency Reject records.

I. The RTI Consistency Reject Trailer.—

	FIELD	SIZE	FMT	LOC	REMARKS
1.	Carriage Control	1	X	1	Fixed "1"
2.	Record Identification	1	X	2	Fixed "C"

	FIELD	SIZE	FMT	LOC	REMARKS
3.	Blanks	7		3-9	
4.	Consistency Count	6	N	10-15	Number of consistency listings.
5.	Blanks	8		16-23	
6.	Intermediary Number	5	N	24-28	Intermediary processing bills.
7.	Blanks	105		29-133	

J. The RTI Utilization Reject and HI Bill Retrieval File.--

The RTI Utilization Reject and HI Bill Retrieval Header Record.—

	FIELD	SIZE	FMT	LOC	REMARKS
1.	Carriage Control	1	X	1	Fixed "1"
2.	Record Identification	5	X	2-6	RTIUT
3.	Blank	1		7	
4.	Intermediary Number	5	X	8-12	Intermediary processing bills.
5.	Blank	1		13	
6.	Date of Utilization Reject	6	N	14-19	MMDDYY - date rejects created.
7.	Blanks	114		20-133	

The RTI Utilization Reject and HI Bill Retrieval System Records.—

For record layouts and format examples refer to Part A Intermediary Manual sections 3831 and 3840. For error code explanation refer to section 3827ff.

The formats for the RTI Utilization Reject and HI Bill Retrieval records are as described in the Part A Manual except for the first position of each record. This position contains the control character which is used for skipping and spacing. The possible control characters follow:

1 = NEW PAGE

b̸ = SINGLE SPACE

0 = DOUBLE SPACE

- = TRIPLE SPACE

+ = SUPPRESS SKIPPING TO NEXT PAGE

An RTI Utilization Reject and HI Bill Retrieval Header precedes the Utilization Reject and HI Bill Retrieval records, and an RTI Utilization Reject and HI Bill Retrieval Trailer indicate the end of the records.

The RTI Utilization Reject and HI Bill Retrieval System Trailer Record.—

	FIELD	SIZE	FMT	LOC	REMARKS
1.	Carriage Control	1	X	1	Fixed "1"
2.	Record Identification	1	X	2	Fixed "U"
3.	Blanks	7		3-9	
4.	RTI Count	6	N	10-15	Number of utilization reject and bill retrieval records.
5.	Blanks	8		16-23	
6.	Intermediary Number	5	X	24-28	Intermediary processing bills.
7.	Blanks	105		29-133	

K. The Bill History Retrieval File

The Bill History Retrieval Header Record.—

	FIELD	SIZE	FMT	LOC	REMARKS
1.	Carriage Control	1	X	1	Fixed "1"
2.	Identification	5	X	2-6	BHRET
3.	Blank	1		7	
4.	Intermediary Number	5	X	8-12	Intermediary req. bill history
5.	Blank	1		13	
6.	Run Date	6	N	14-19	MMDDYY. Date of bill history
7.	Blanks	114		20-133	

The Bill History Record.—For record layouts and examples refer to §§3840 and 3840.1.

The format of the Bill History records are described in §§3840 and 3840.1 except for the first position of each record. This position contains the control character used for skipping and spacing.

The possible control characters follow:

1 = new page
b = single space
0 = double space
- = triple space

A Bill History Header precedes the Bill History records and a Bill History Trailer indicates the end of the Bill History Records. Bill histories are listed first and are followed by "No Find" and "Invalid Claim Number" reports. Records for each category are listed in claim number sequence.

The Bill History Retrieval Trailer Record -

	Field	SIZE	FMT	LOC	
1.	Carriage Control	1	X	1	Fixed "1"
2.	Record Identification	1	X	2	Fixed "H"
3.	Blanks	7		3-9	
4.	Bill History Count	6	N	10-15	Number of Bill History Listings ("No Find" and "Invalid Claim Number" reports are not included)
5.	Blanks	8		16-23	
6.	Intermediary Number	5		24-28	Intermediary requesting Bill History
7.	Blanks	105		29-133	

3831. RTI UTILIZATION REJECT

A utilization exception record is released when billing data is rejected by HCFA's utilization edit operation. Information on each bill is compared to the information on the beneficiary's master utilization record or to previously processed bills. When billing data is rejected for incorrect utilization and HCFA is unable to reinstate it into its bill processing system, the exception data is returned for correction and resubmission. Utilization exception data is also released when the beneficiary name and number shown in the billing data cannot be matched with a master record or the beneficiary name and claim number match a record on the purged inactive HI master file. (See §3828.1, code 5211 and §3512.7, disposition codes 38 and/or 43.) The utilization exception data is included on the batch clearance tape (either the interim or final).

For other than identification rejections or rejections involving a purged inactive record, the utilization exception data reflects a considerable amount of data from the beneficiary's current HI master record. However, if the billing data is for a Part A bill, only the Part A master is shown, followed by the reason the billing data has been rejected and all open items. If the billing data is from a Part B bill, only the Part B master is shown, followed by the reason for deletion.

3831.1 Explanation of Items Appearing on the RTI Utilization Reject File.--The format of the report is similar to those shown on the exhibits. Each item on the listing is identified by comparing the numbered items below with the numbers on the exhibit.

ITEM 1 & 2. RTI UTILIZATION REJECT AND DATE.
The title of the exception listing is followed by the date the bill was rejected. If a purged inactive HI master file is involved, DUMMY IDENT appears between the RTI UTILIZATION REJECT title and PROC DT. Data can appear only in items 3-35, 54, 56, 57, 59 or 66, 65, 72, and 106 when a record from the purged inactive master file has been matched to the name and claim number on incoming billing data. If "SPIDER (see 3829) has been substituted for the title and HCFA adjusts the incoming billing data, consider the billing data shown as posted. Item 106 identifies the data that has been adjusted.

ITEM 3. TYPE OF BILL.
The bill is identified as:

Inpatient	(Hospital)
TB/PSYCH	(Tuberculosis or Psychiatric)
SNF	(Skilled Nursing Facility)
HHA	Home Health (Part A)
HHB	Home Health (Part B)
Outpatient	
Christian Science	
Noncovered	
Hospice	

ITEM 4. RTI CONTROL NUMBER.
The 10-position number used to control rejected bills. (See 3804.) The RTI control number consists of the 4-position batch number you assigned, the 4-position Julian date batched, and a 2-position sequence number assigned by HCFA. Show this number on the resubmitted bill to remove the bill from HCFA's RTI control file.

ITEM 5. CLAIM NUMBER.
The claim number consisting of a 9-position numeric portion of the HCFA HI claim number shown on the bill followed by a 2 or 3 position beneficiary identification code of at least 1 alpha character. HCFA's converted version of Railroad Board claim numbers is shown on the report. The original Railroad Board number is shown on the interim or final batch record.

ITEM 6. NAME INITIAL.
Six positions of the surname and up to two initials to identify the beneficiary are shown.

ITEM 7. TRANSACTION CODE.
Indicates the type of bill printed out in Item 3. The possible transaction codes are:

0 = Christian Science
1 = Inpatient Psychiatric Hospital
2 = Inpatient TB Hospital
3 = Inpatient Hospital
4 = SNF
5 = HHA
6 = Outpatient Hospital Bill
H = Hospice Bill

ITEM 8. QUERY (CODE).
The following codes apply to the billing data returned to the intermediary:

0 = Credit Adjustment Bill
1 = Interim Bill
2 = HHA Benefits Exhausted Interim Bill
3 = Final Bill (covered or partially covered services)
4 = Discharge Bill (completely noncovered)
5 = Debit Adjustment Bill

ITEM 9. REIMBURSEMENT AMOUNT.
The amount of reimbursement claimed by the provider for the services covered by this billing data after the deductible and coinsurance amounts and after an adjustment for the actual cost of services provided.

ITEM 10. TOTAL CHARGES.
The total charges (covered and noncovered) in the billing data before reduction for the deductible and coinsurance amounts and before an adjustment for the cost of services provided.

ITEM 11. PROVIDER NUMBER.
A 6-position number that identifies the facility providing services to the beneficiary. The first 2 digits represent the State or foreign country in which the provider is located. The third and sometimes fourth digits indicate the type of institution. The last 2 or 3 digits are sequential.

ITEM 12. BILL SEQUENCE NUMBER.
A 2-position number assigned to each bill in a batch and used by HCFA for control purposes. The bill sequence number is also the last 2 digits of an RTI control number. The last digit of this entry appears as an alphabetic or special character which has a numeric counterpart. (See §3840 for a list of alphabetic characters and their numeric counterparts.)

ITEM 13. PLAN ESTABLISHED.
The date on which a physician established a plan of care under the home health provision.

ITEM 14. ADMISSION.
Applies to:

a. the admission date if the bill is for inpatient hospital or extended care services.

b. the start-of-care date if the bill is for home health services.

c. the date the first service began if the bill is for outpatient services

ITEM 15. DISCHARGE.
The date the patient left the hospital or SNF or died or did not recover (Christian Science). If the bill is for home health services, it is the date the patient is no longer receiving covered services.

The absence of a date in this field indicates the bill is an interim, not a final, bill.

If the bill is for outpatient services, the date shown is the date of last service.

ITEMS 16 & 17. FROM AND THRU.
These are billing dates. If the bill is for hospital, SNF or home health services, two dates are shown. The dates represent the period covered by the "FROM" and "THRU" dates on the bill.

ITEM 18. TOTAL DAYS.
The total number of full, coinsurance, and lifetime reserve days on the bill for which payment has been made. If the bill is for home health visits, the number of covered visits shown on the bill appears.

ITEM 19. COINSURANCE DAYS.
The total number of covered days on the bill for which the patient is responsible for a portion of the charges. This excludes lifetime reserve days, if used.

ITEM 20. LIFETIME DAYS.
The number of lifetime reserve days as used on the bill is shown. This item applies only to inpatient hospital days.

ITEM 21. INPATIENT DEDUCTIBLE.
The amount of the inpatient hospital deductible applied on the bill. Four zeros are shown if no deductible is shown on the bill.

ITEM 22. BLOOD FURNISHED.
The total number of pints of blood furnished is entered.

ITEM 23. BLOOD NOT REPLACED.
The total number of pints of blood shown on your tape as not replaced by the patient and for which the provider is charging.

ITEM 24. BLOOD APPLIED.
The number of pints on the bill creditable toward the 3-pint Part A blood deductible is shown.

ITEM 25. BLOOD CHARGES.
The amount shown on the bill or tape as charged by the provider for unreplaced blood.

ITEM 26. NONCOVERED LEAVE DAYS.
The number of days during the period covered by the bill that the patient was not present in the hospital or SNF, and the number of days during the billing period which were not covered by Medicare for reasons such as benefits exhausted, custodial care, workmen's compensation, payment by Veterans Administration, or other third party.

ITEM 27. PDA (PRE-ENTITLEMENT DAYS).
The number of days shown on the bill that the patient was confined to a psychiatric hospital in the 150-day period immediately preceding entitlement to Part A benefits.

ITEM 28. INTERMEDIARY.
A 5-position number used to identify the intermediary which submitted the bill being returned.

ITEM 29. BATCH NUMBER.
This field identifies the batch in which you forwarded the bill and the date it was batched. The first 4 digits are the batch number (an alpha in the first position indicates the batch was submitted on magnetic tape). The last 4 digits represent the date of batching. The last 3 digits show the Julian day. These digits are preceded by the last digit of the year, such as 3 for 1983, 4 for 1984. January 8, 1984, is expressed as 3004.

ITEM 30. MASTER BLOCK.
Displays the Master Block Number. It is HCFA's control number and reference to it in communications to HCFA expedites the processing of replies.

ITEM 31. GUARANTEE OF PAYMENT DATE.
An entry is made here only when the bill involves the guarantee of payment provision. The first day for which payment is claimed under that provision is shown when the patient has no available coverage. It does not apply to SNF stays.

ITEM 32. UTILIZATION REVIEW DATE.
The date a utilization review committee advised the provider that a further hospital or SNF stay is no longer medically necessary is entered if the date appeared in Item 22 of the HCFA-1453.

ITEM 33. BENEFITS EXHAUSTED.
If the entire bill is for noncovered services and the nonpayment code is "B," the "B" is shown in this field.

ITEM 34. NONCOVERED STAY DATES.
This field shows 2 dates representing a noncovered stay (if any) which preceded the stay on the rejected bill. The dates are taken from Item 32 on the HCFA-1453. If the bill is a home health bill, disregard any dates entered.

ITEM 35. QUALIFYING STAY DATES.
This field may contain the dates of the hospital stay of at least 3 days which qualifies the individual for SNF benefits. The dates are entered on the first SNF bill immediately following the qualifying hospital stay. Nothing is entered for hospital bills.

ITEM 36. ADJUSTMENT TRAILER.
Items 36 through 53 represent data which is displayed if the rejected bill is an adjustment bill. The utilization data shown represents the net difference of the utilization changes caused by the adjustment. If the adjustment is only for a money change, the utilization fields are blank.

ITEM 37. ACTION.
This field contains a coded item that explains the type of adjustment bill. The codes are:

2 = Credit action of a combination adjustment
3 = Debit action of a combination adjustment
4 = "Cancel Only" adjustment
5 = "Debit Only" adjustment

ITEM 38. CANCEL.
Indicates the reason for the "Cancel Only" adjustment. The possible codes are:

S = Scramble
P = Plan Transfer
D = Duplicate Bill Processed
C = Coverage Transfer
H = Other

ITEM 39. PROCESS CODE.
Useful only in HCFA's internal operation.

ITEM 40. ADMISSION.
This field shows the admission date on the debit, if different from the credit. If the dates are the same, this item is blank.

ITEM 41. FROM.
This field indicates the "from" date on the debit, if different from the credit. If the dates are the same, this item is blank.

ITEM 42. THRU.
This field indicates the "thru" date from the debit, if different from the credit. If the dates are the same, this item is blank.

ITEM 43. CHANCE.
This field indicates any changes in the patient's status between the credit and the debit. These codes are:

J = Credit - discharge, debit - deceased
K = Credit - discharge, debit - still patient
L = Credit - deceased, debit - still patient
M = Credit - deceased, debit - discharge
N = Credit - still patient, debit - discharge
O = Credit - still patient, debit - deceased

ITEM 44. DISCHARGE.
This field shows the discharge date on the debit, if different from the credit. If there is a change and the debit is "still patient," asterisks are shown. If the credit and debit are the same, this item is blank.

ITEM 45. PRIOR STAY.
If there is a difference between the credit and debit in the verified prior stay dates, a "C" is shown. If the dates are the same, this item is blank.

ITEM 46. BLOOD FURNISHED.
This item shows the difference in the total pints of blood shown as furnished on the credit and debit bills (if a minus, a minus figure is shown). If there is no change, this item shows zero.

ITEM 47. INPATIENT DEDUCTIBLE.
The difference in the amount of deductible shown on the credit and debit bills (if a minus, a minus figure is shown). If there is no change, this item shows zero.

ITEM 48. BLOOD AMOUNT.
This item shows the difference in the amount of unreplaced blood charges on the credit and debit bills (if a minus, a minus figure is shown). If there is no change, this item shows zero.

ITEM 49. COINSURNACE AMOUNT.
This item shows the difference in the amount of coinsurance on the credit and debit bills (if a minus, a minus figure is shown). If there is no change, this item shows zero.

ITEM 50. LIFETIME RESERVE DAYS.
This item shows the difference in the lifetime reserve days on the credit and debit bills (if a minus, a minus figure is shown). If there is no change, this item shows zero.

ITEM 51. TOTAL DAYS.
This item shows the difference in the total covered days on the credit and debit bills (if a minus, a minus figure is shown). The difference in the number of home health visits appear if the bill is for home health services. If there is no change, this item shows zero.

ITEM 52. FULL DAYS.
This item shows the difference in the number of full covered days on the credit and debit bills (if a minus, a minus figure is shown). The difference in the number of home health visits appear if the bill is for home health services. If there is no change, this item shows zero.

ITEM 53. COINSURANCE DAYS.
This item shows the difference in the number of covered regular coinsurance days on the credit and debit bills (if a minus, a minus figure is shown). If there is no change, this item shows zero.

ITEM 54. MASTER IDENTIFICATION RECORD.
The title for that part of the record which contains beneficiary identification data and entitlement information for the beneficiary. Following the title is the beneficiary's claim number.

ITEM 55. PREVIOUS IDENTIFICATION CODE.
A beneficiary's status may change requiring a change in the identification code. One of the most frequent changes, for example, occurs when a woman's

status changes from wife to widow. A claim being processed matches the master record if the beneficiary identification code agrees with either the current beneficiary identification code or the previous one. The previous identification code is shown.

ITEM 56. NAME.
This 25-position field shows the beneficiary's last name, first name and middle initial.

ITEM 57. SEX.
"M" is shown for male, "F" for female, and "U" for unknown.

ITEM 58. CROSS REFER FROM.
A prior cross-referenced claim number is shown if applicable.

ITEM 59. PART A CURRENT ENTITLEMENT.
The first month the individual was entitled to hospital insurance benefits is shown. The day of entitlement is always the first day of the month. (July 1966 is the first possible date of entitlement.) If the record is from the purged inactive HI master file, the date of death is shown instead of the entitlement date.

ITEM 60. TERMINATION (CURRENT).
If benefits have been terminated, the month and year are shown. Benefits are terminated on the last day of the month or on the day of death. (The date of death is not shown here; it is shown in Item 72.) "9s" in this field indicate the individual should never have been entitled to Part A benefits.

ITEM 61. OPTION.
This is a 1-position code reflecting the individual's option for Part A coverage. The valid codes and their explanations are:

C = No; due to cessation of disability
D = No; Part A coverage denied
E = Yes; automatic entitlement
G = Yes; enrollment was through good cause provision
S = No; terminated - no longer entitled under Chronic Renal Disease provision
T = No; termination for nonpayment of premiums
W = No; beneficiary withdrew
Y = Yes; premium is payable.

ITEM 62. PREVIOUS ENTITLEMENT.
The entitlement date of any previous period of Part A coverage.

ITEM 63. TERMINATION (PREVIOUS).
The termination date for any previous period of Part A coverage.

ITEM 64. OPTION (PREVIOUS).
A 1 position code reflecting the individual's previous option for Part A coverage, if any. The valid codes are the same as indicated for Item 61.

ITEM 65. DATE OF BIRTH.
This 6 position field contains the beneficiary's date of birth.

ITEM 66. CURRENT PART B ENTITLEMENT.
The date of current entitlement to Part B coverage. Only the month and year are shown but entitlement exists from the first day of the month. If there is no entry in this item, no Part B entitlement exists. If the record is from the purged inactive HI master file, the date of death is shown instead of the entitlement date.

ITEM 67. CURRENT PART B TERMINATION.
The month and year Part B benefits were terminated for reasons other than death. Termination of coverage is effective the last day of the month. "9s" indicate a retroactive denial of entitlement.

ITEM 68. CURRENT ENROLLMENT OPTION.
A 1 position code reflecting the individual's option for Part B coverage. The codes and their explanations are:

C = No; due to cessation of disability
D = No; Part B coverage was denied
G = Yes; enrollment was through good cause provisions
N = No; no response was received to enrollment requests
P = The Railroad Retirement Board has jurisdiction over medical insurance (insured and prouty beneficiary only)
R = No; the beneficiary refused Part B coverage
S = No; no longer under renal disease
T = No; Part B coverage was terminated for nonpayment of premiums
W = No; the beneficiary withdrew from coverage
Y = Yes; the beneficiary has Part B coverage.

ITEM 69. PREVIOUS PART B ENTITLEMENT.
The entitlement date for any prior period of Part B coverage. (Item 66 shows the entitlement date for the current period of coverage.)

ITEM 70. PREVIOUS PART B TERMINATION.
The termination date for any previous period of Part B coverage. (Item 67 shows the termination date for the current period of coverage.)

ITEM 71. PREVIOUS ENROLLMENT OPTION.
A 1 position code reflecting the individual's previous option for Part B coverage. (Item 68 shows the code for the current enrollment option.)

ITEM 72. DATE OF DEATH.
The date of death may be entered on HCFA Health Insurance Records by a bill or by a SSA Program Center or RRB notification.

ITEM 73. HMO CURRENT.
The number following is the plan number of the current Health Maintenance Organization.

ITEM 74. EFFECTIVE.
The 4 position date is the effective starting date of the HMO period.

ITEM 75. TERMINATION.
The 4 position date is the termination date of the HMO period.

ITEM 76. OPTION.
The 1 position code is the HMO option code. One of the following appears:

1 - HCFA processes all provider bills for non-lock-in beneficiaries.
2 - HMO processes only in-plan Part A and in-area Part B bills for lock-in beneficiaries.
A - HCFA processes all provider bills for lock-in beneficiaries.
B - HMO processes only in-plan Part A and in-area Part B bills for lock-in beneficiaries.
C - HMO processes all Part A and Part B bills for lock-in beneficiaries.

ITEM 77. PRIOR.
The information described in 73 through 76 above is displayed following the legend "PRIOR" if more than one HMO period is involved.

ITEM 78. EFFECTIVE.
The 4 position date is the effective starting date of the prior HMO period.

ITEM 79. TERMINATION.
The 4 position date is the termination date of the prior HMO period.

ITEM 80. OPTION.
The 1 position code is the prior HMO option code. See item 76 for codes and description.

ITEM 81. PERIOD.
The number following represents the number of HMO periods in which the beneficiary has participated.

MASTER A DATA

ITEM 82. LIFETIME RESERVE DAYS.
Each beneficiary has a lifetime reserve of 60 days of inpatient hospital coverage. These reserve days may not be used until full and coinsurance days have been exhausted for the benefit period. Each of the reserve days is subject to a coinsurance rate. This item shows the number of lifetime reserve days available.

ITEM 83. LIFETIME PSYCHIATRIC DAYS.
A beneficiary may not receive more than 190 days of inpatient psychiatric hospital care benefits during his lifetime. The field shows the number of remaining lifetime psychiatric days.

ITEM 84. SPELL.
The information in line 1 relates to the current benefit period. Subsequent lines (maximum of 4) relate to previous benefit periods.

ITEM 85. HOSPITAL FULL DAYS.
In each benefit period, an individual is entitled to 60 full coverage days of inpatient hospital services. Full days must be exhausted before coinsurance days can be used. The number of remaining days of full coverage is shown.

ITEM 86. HOSPITAL COINSURANCE DAYS.
Payment may be made for up to 30 coinsurance days of inpatient hospital services for each benefit period. Coinsurance days must be exhausted before lifetime reserve days can be used. This field shows the number of coinsurance days remaining.

ITEM 87. SKILLED NURSING FACILITY FULL DAYS.
In each benefit period, payment can be made for up to 20 full coverage days of service in an SNF. Full days must be exhausted before coinsurance days are used. This field shows the number of full days remaining. (See §3023 for a description of coverage for services received in a Christian Science Sanatorium.)

ITEM 88. SKILLED NURSING FACILITY COINSURANCE DAYS.
In each benefit period, payment can be made for up to 80 coinsurance days of services received in an SNF. This field shows the number of coinsurance days remaining. (In a Christian Science Sanatorium, payment may be made for up to 30 coinsurance days in a benefit period.)

ITEM 89. INPATIENT DEDUCTIBLE.
This field shows how much of the inpatient hospital deductible has to be met. (See §3211.)

ITEM 90. PART A BLOOD DEDUCTIBLE.
The part A blood deductible is three pints for each benefit period. This field shows the number of pints to be met.

ITEM 91. FIRST BILL DATE.
This field usually reflects the admission date of an earlier processed bill which started the benefit period. Only admission dates from earlier inpatient hospital and SNF bills are entered, as home health agency bills do not start a benefit period. An admission date for the qualifying stay or a stay in a nonparticipating provider shown on the bill being processed is recorded as the beginning date for the benefit period where that date has not been recorded from an earlier bill.

ITEM 92. LAST BILL DATE.
This date reflects the discharge date or through date, if an interim bill is involved, of the last processed inpatient hospital bill or SNF bill in the same benefit period. Home health agency bill dates are not entered as they do not affect a benefit period. However, in some instances, the discharge date for a qualifying stay shown on a processed Part A home health bill may be shown in this field.

ITEMS 93 & 94. DATA INDICATORS.
These indicators are used by HCFA's internal operations.

MASTER B DATA

ITEM 95. INTERMEDIARIES.
The 5-position numbers identifying up to three intermediaries or carriers which submitted Part B queries are shown. If more than three intermediaries or carriers have submitted queries, the identification numbers shown are for those which have queried services for the most recent years.

ITEM 96. YEAR.
This 2 position field contains 2 year indicator codes. The first is under the letter "Y"; the second is under the letter "R." The possible codes are:

"Y" CODES

O = There has been no query activity for 1981 and 1982.
1 = There is query activity for 1981.
2 = There is query activity for 1982.
3 = There is query activity for both 1981 and 1982.

"R" CODES

0 = There has been no query activity for 1979 and 1980.
1 = There is query activity for 1979.
2 = There is query activity for 1980.
3 = There is query activity for both 1979 and 1980.

ITEM 97. PART B DEDUCTIBLE MET.

The first three positions of the field cover 5 years of Part B deductible data. Each position indicator, with the exception of the last indicator, represents 2 years as follows:

Position (Left to Right)	1	2	3
Years Covered	1979-1980	1981-1982	1978

The last two positions of the 5 positions field are not used. The codes for indicators 1 through 3 are illustrated on the chart:

		Definitions
0	(Position 1)	Deductible not met for 1979 or 1980
1	(Position 1)	Deductible met for 1979
2	(Position 1)	Deductible met for 1980
3	(Position 1)	Deductible met for both 1979 and 1980
0	(Position 2)	Deductible not met for 1981 or 1982
1	(Position 2)	Deductible met for 1981
2	(Position 2)	Deductible met for 1978
3	(Position 2)	Deductible met for both 1981 and 1982
0	(Position 3)	Deductible not met for 1978
1	(Position 3)	Deductible met for 1978
2	(Position 3)	Not used
3	(Position 3)	Deductible met for 1978

ITEM 98. PART B UTILIZATION.
The date to the right covers a 5-year period (1978 thru 1982). The data relate to Part B utilization and deductibles and are broken down under each calendar year.

ITEM 99. PART B HOME HEALTH AGENCY VISITS.
The cumulative number of Part A and B home health visits (combined) for each calendar year appearing on the record.

ITEM 100. PART B BLOOD DEDUCTIBLE APPLIED.
There is a blood deductible under Part B coverage of 3 pints per calendar year. Unlike Part A blood deductible (Item 88), this field is updated by the query. A zero in this field indicates no blood has been queried; therefore, 3 pints are needed to meet the deductible.

ITEM 101. MEDICAL EXPENSES.
This field represents the amount of Part B medical expenses incurred during each of the calendar years shown under the heading. The field is updated by a query and not by a processed bill. From January 1, 1973 through December 31, 1981, the Part B deductible was $60 for each calendar year. Beginning January 1, 1982 it is $75 for each calendar year. All expenses shown in the medical expense field are credited against the deductible. Both medical expenses and psychiatric expenses must be examined to determine whether the deductible has been met.

ITEM 102. PSYCHIATRIC EXPENSES.
This field represents the amount of outpatient psychiatric expenses queried for each calendar year shown. Only 62 1/2 percent of the amount shown can be credited toward the Part B deductible.

ITEM-103. PSYCHIATRIC MAXIMUM.
This psychiatric maximum money field is initially shown as zeroes. It is incremented by Part B payment records. The maximum psychiatric expenses shown is $500.00.

ITEM 104. PHYSICAL THERAPY EXPENSE.
This field represents the amount of outpatient physical therapy expenses queried for the calendar year.

ITEM 105. PHYSICAL THERAPY PAYMENT.
This physical therapy payment field is initially shown as zeroes. It is incremented by Part B payment records and the maximum is $100.00.

ITEM 106. REASON FOR DELETION.
This field contains a 4-position deletion code which indicates the reason the bill is being returned. Immediately following this deletion code is a narrative description of the error condition. (See §§3832.9 and 3832.10 for a description of delete codes.) If a "SPIDER" record is involved, and two or more automatic adjustments were made to the bill, code 7999 is entered with its narrative description showing the data submitted and adjusted as follows: (See §3829.)

IDED	FL	CO	LIF	N/UTIL	UTIL
		SUBMITTED BILL DATA			
XXXX.XX	XX	XX(lst YR) XX(2nd YR)	XX	XXXX XXX	XXX XXX
		HCFA APPLIED BILL DATA			
XXXX.XX	XX	XX(lst YR) XX(2nd YR)	XX	XXXX	XXX

ITEM 107. ADMISSION CONTROL.
If the rejected bill is a part A bill, Items 107 through 119 of this listing contains HCFA's admission control information. (No open items appear for automatic adjustments applied on a SPIDER record.)

ITEM 108. TYPE OF TRAILER.
This 1-position code indicates the type of trailer. The types are:

C = Closed (All bills have been posted for the admission.)
D = Open (Admission query received, no bill processed.)
O = Orbit (Bill is in orbit.)
R = RTI (Bill has been returned to the intermediary for correction or deletion.)
U = Utilization (Bill is under clerical investigation for a possible utilization error.)
G = Open (If HCFA has received a bill but does not have a corresponding admission query, HCFA will generate an admission from the bill data. Also, if HCFA has a query and a matching bill that is interim, HCFA generates the next "from" date.)
X = Closed (The bill(s) has been posted, but all interim bills for the admission have not been posted.)

ITEM 109. TRANSACTION CODE.
This code indicates the type of bill. These transaction codes are:

0 = Christian Science Sanatorium
1 = Psychiatric Hospital
2 = Tuberculosis Hospital
3 = Inpatient Hospital
4 = SNF
H = Hospice

ITEM 110. QUERY CODE.
This code indicates the type of action. If HCFA has no bill, the query code is blank. The possible query codes are:

best copy available

1 = Interim Bill
3 = Final Bill
4 = Discharge Notice

ITEM 111. DISPOSITION CODE.
This 2 position code indicates the type of reply you received in response to your query. The numeric dispositon codes are in §3512.7.

ITEM 112. INTERMEDIARY CODE.
The number that identifies the intermediary which submitted the query.

ITEM 113. PROVIDER NUMBER.
(Same as Item 11.)

ITEM 114. ADMISSION DATE.
The date the beneficiary was admitted to the hospital or SNF.

ITEM 115. FROM DATE.
The first day of services covered by the bill.

ITEM 116. THRU DATE.
The last day of the billing period on the bill. It is the thru date for interim and the discharge date for final bills.

ITEM 117. DISCHARGE DATE.
The date that the patient left the provider, died or did not recover (Christian Science).

ITEM 118. BATCH # SEQUENCE.
This 10 position field identifies the batch in which you forwarded the bill, the date it was batched and the sequence number of the bill in the batch. The first 4 positions are the batch number. (An alpha in the first position denotes a magnetic tape submittal.) The next 4 positions are the Julian date. The last 2 are the sequence number of the particular bill within the batch.

ITEM 119. DATE OF ACCRETION.
The date the trailer was created. (The date does not change once it is established.)

ITEM 120. DATE OF LATEST ACTION.
The date of the latest modification to the trailer data.

3832. RTI CONSISTENCY REJECT

A. General.—When HCFA rejects a bill for a consistency edit error, i.e., a discrepancy in the information shown in the bill, an exception record is produced and returned.

All types of consistency reject records have a fixed position which includes the title - "RTI Consistency Reject," HCFA's processing date, the type of bill (inpatient, SNF, Christian Science, outpatient, home health - A, home health - B, noncovered) and the RTI Control Number. The first 32 positions on the first line of any consistency reject record are fixed. The information displayed is: Intermediary Number, Batch Number and Julian Date Batched, HCFA Master Block Number, the Sequence Number assigned by SSA to each bill in the batch, and nine batch indicators used by HCFA in its internal operation.

Each field following the fixed portion is preceded by a three-position alpha-numeric code. The first two positions in the code identify the item number on the bill. For example, "Date of this admission" in the HCFA-1453 would be 070. The third position in the code gives the alphabetical breakdown of the item. For example, the item titled "Pints replaced" on the HCFA-1483 is 17B. When there is a breakdown of items other than alphabetical breakdown, a third position numeric identifies the specific item. For example, in the "Statement covers period," on form HCFA-1453, 201 identifies the "From" date and 202 identifies the "Thru" date. The number "1" is always used for the first numerical breakdown, "2" for the second numerical breakdown, etc. If there are no breakdowns for an item on the bill, a zero is shown in the third position. All date fields on the record (other than Batch Date) are shown as six positions — a two-position month, a two-position day and a two-position year. For example, May 1, 1973, appears on the record as 05/01/73. All money fields are right justified. For example, the "totals" in Item 19U of the HCFA-1453 appears as 0038180 or $381.80.

Each item on the listing has two lines. The upper line displays the information taken from the corresponding item on the bill. The lower line shows the item number and a series of dots if the entry is consistent. If there is an error, a numeric entry follows the item number on the lower line. The item number plus the numeric entry yields the error code. For example,

```
    070 11/26/72 no error
        ........

    070 11/26/72 error 0701 (impossible admission date).
        11111111
```

If an error appears on the bill, the word "error" is indicated at the right of that line on the record. Up to three codes are also displayed at the bottom of the record followed by a brief explanation of the error.

All error codes and explanations are included in §§ 3824-3828ff. The number of additional errors (up to a total of 9) is displayed following the narrative.

An exhibit and explanation for each format follows:

3833. ACTION ON RETURNED BILLS AND/OR BILLS AUTOMATICALLY CORRECTED AND REINSTATED BY HCFA.

A. Rejected Bills.—When a bill is deleted by HCFA due to failing a consistency or utilization/identification edit, HCFA identifies the rejected bill and shows the reason for its deletion on the interim or final batch record. When notified of an error condition, refer to the file copy of the bill and correct the error(s). Resubmit corrected billing data to HCFA unless:

1. A duplicate billing is identified by the error condition; or
2. An automatic correction has been performed by HCFA for the error condition.

An exception record, RTI Consistency Reject or RTI Utilization Reject listing, furnished in conjunction with all error conditions, except those conditions automatically corrected contain data to help correct the error condition. The exception record also contains the RTI control number which must accompany the resubmitted billing data. Refer to §§ 3804ff., for complete instructions for processing rejected bills.

1. Void Bills—Void any rejected bill which should not have been submitted. The void bill will delete the open admission queried (admission date appears on the void bill) and decontrol the rejected bill from the RTI control file.

Voiding rejected bills should not be confused with "Cancel Only" adjustment bills discussed in §3816C2. A "Cancel Only" adjustment bill is used to delete a bill which has been posted to the beneficiary's record. A VOID bill is used to delete a rejected and returned bill.

2. Correction Bills--When the admission date on a corrected bill differs from the admission date on the original bill, delete query the erroneous admission date. The HI system uses the admission date as one of the matching criteria. If the corrected bill carries a different admission date, the system cannot identify and remove the rejected item from the beneficiary's record. If the delete query does not change the erroneous date, the corrected bill may be blocked from posting. If the admission date must be changed on more than one bill for the same beneficiary for the same stay, transmit one delete query for each bill affected or refer to the procedures in § 3838.

Refer to § 3804ff., for additional instructions for processing controlled rejected bills.

B. Bills Automatically Corrected by HCFA—HCFA automatically corrects bills failing certain edits instead of returning them for correction.

The types of situations adjusted by HCFA are:

1. Overapplied Part A blood deductible.

2. Underapplied Part A Blood deductible.
3. Overapplied Part A cash deductible.
4. Overutilization of full days.
5. Underutilization of nonlifetime coinsurance days.

The above adjustments are identified on batch records via a specific correction code. (See §3828.3.) If a bill fails additional edits, the bill data is returned to you for correction. When you are notified that billing data has been adjusted by HCFA, refer to the file copy of the bill, if available, and/or history file, and make the changes indicated by the process code.

All necessary refunds for overcollected Part A cash and blood deductibles and overcollected coinsurance (§§ 3715-3715.7) or recoupments of undercollected Part A blood deductibles and undercollected coinsurance (§§3707-3714.4) must be made. If you possess supporting documentation which disagrees with the HCFA correction, prepare adjustment bills. (See §3816.) Make certain that the "credit" portion of an adjustment action shows the data which HCFA recorded after it made an automatic correction; i.e., if HCFA removes the cash deductible, any "credit" or "cancel only" actions must not show a cash deductible. Only the "debit" portion should show the cash deductible as applied.

Direct all automatic correction problems which you are unable to resolve to:

Health Care Financing Administration
Division of Provider Procedures, BPO
1-H-3 Meadows East Bldg.
Baltimore, MD 21207

NOTE: You are expected to correct your internal records when an automatic correction code is received on a submitted bill whether or not the bill represents the start of a benefit period. (Make the appropriate refund if an overcollection is involved.) The only exception is if a bill should have started the benefit period and a smaller deductible would have been applicable. In this case, adjust the bill for subsequent services, which has already been updated, and resubmit the bill which was automatically corrected. Send a letter of explanation with a copy of the automatically corrected bill and related batch record to the above address.

C. Other Returned Bills.--In addition to bills removed from the processing system prior to the updating of the utilization records, certain bills may be returned to you after the completion of processing. They are not RTI bills and could involve requests for development or investigation of some aspect of the bill or verification of certain data. HCFA clearly identifies and distinguishes each of these from bills which must be reentered into the processing system for updating purposes.

D. MCE Errors.--Bills failing MCE edits in HCFA are identified as errors. You do not need to correct individual bills. However, you must determine the cause of the error and correct the problem. Bills failing MCE edits are accepted and processed by HCFA if there are no other errors.

Bill Processing Criteria

3835. INPATIENT BILL PROCESSING CRITERIA

Phase I "as is" Bill Processing

Effective February 1983, inpatient hospital bills containing a deductible amount greater than zero have been processed on the following basis:

1. If there is no blocking open item (earlier admission which has not been closed by a billing), all consistency and utilization edits are applied. If the billing does not fail any of these edits, it is posted.

2. If there is only 1 blocking open item, it is bypassed if:

a. There is no Part A record present (no Part A bills have been processed);

b. There is a Part A record present and the blocking open item is not linked to a benefit period (the difference between the date of last billing action and blocking open item admission date is more than 60 days); or

c. There is a Part A record and the blocking open item is linked to a benefit period and the blocking open item admission/from date or billing "thru" date, if present; e.g., bill in orbit, is 75 days or more from the earliest billing date on the incoming bill.

3. If there are 2 or more blocking open items, the incoming bill is put on the orbit file.

4. If the incoming bill passes the under met deductible edit, it is used to begin a new benefit period under both conditions 1 or 2. If the bill fails this edit, the bill rejects under condition 1*, but the bill is put on the orbit file under condition 2.

*EXCEPTION: The incoming bill is accepted (posted) whether or not any hospital inpatient deductible amount has been applied on the bill and whether or not any deductible remains to be met, provided the deductible on the bill is not greater than that to be met and it matches an open admission queried which received a disposition code 37 (see §3512.7), and:

a. There is an open admission for a later date which received a disposition code 25 or 01 (see §3512.7) and it is for an inpatient hospital provider number; and

b. The interim billing through/discharge date is within the same benefit period as the 25/01 admission date.

If all of the *EXCEPTION criteria are not met, the bill goes through the usual deductible edits.

Phase II "as is" Bill Processing (Replaces Phase I)

Effective February 1985, bills are processed "as is" using out-of-sequence routines to post as many bills as possible. Bills are posted in order of receipt, provided the applicable "Benefit period" (spell of illness) can be determined and sufficient benefits of the type shown on the incoming bill are available.

Benefit periods are activated or continued by comparing prior stay dates (see §3620), ITEM 32) and/or current stay billing dates on an incoming bill with open admissions and benefit period information contained on the master records as follows:

1. An incoming bill (SNF or inpatient hospital) is processed and activates a new benefit period if:

a. Less than a full inpatient deductible (none or partial) applied to the incoming bill.
Fewer than 60 days elapse between an earlier admission-from-discharge date of record and the admission and/or from date on the incoming bill.
No date of last billing action (DOLBA);

b. Less than a full inpatient (none or partial) applied to the incoming bill.
Fewer than 60 days elapse between an earlier admission-from-discharge date of record and the admission and/or from date(s) on the incoming bill.
60 or more days elapse between the admission-from date of record and each DOLBA;

c. The admission and/or from date(s) on the incoming bill are each 60 or m[illegible] days later than each DOLBA of record.
There is no earlier open admission-from date-of-record (presence or absence of an inpatient deductible amount on the incoming bill is not material to activating a benefit period, but if a covered bill is involved, it may result in a rejection for an underapplied inpatient deductible);

d. A full inpatient deductible is present on the incoming bill.
75 or more days elapse, between the admission and/or from date(s) on the incoming bill.
Each DOLBA of record (presence or absence of an earlier open admission or the number of days elapsing between an earlier admission of record and an admission-from date on the incoming bill is not material to activating a benefit period in this instance).

2. A benefit period of record is continued with the processing (posting or deleting) of an incoming bill if the admission-from dates on the bill are fewer than 60 days later than at least one DOLBA of record, or an open admission of record which is less than 60 days of a DOLBA of record.

3. To post bills beginning or continuing benefit periods, the benefits shown as used on the bill must conform to benefits available for the benefit period and the inpatient deductible and/or coinsurance amounts must be applied on the bill as required.

An incoming bill is placed on the orbit file only if it cannot continue or begin a benefit period under the criteria set forth above. Thus, an inpatient hospital bill is placed on the orbit file only if it does not contain an inpatient deductible, and if:

A. All earlier open admissions of record are 60 or more days later than all DOLBA's of record and the admission-from dates on the incoming bill are 60 or more days later than the earlier open admission-from date of record;

B. An earlier open admission-from date exists which is less than 60 days later than DOLBA of record, but the admission-from date(s) on the incoming bill are 60 or more days later than the admission-from date of record; or

C. The admission-from date(s) is subsequent to the billing through date of a bill placed on the orbit file under the conditions in A or B, and the admission-from date is less than 60 days later than the earlier orbiting bill through date.

An inpatient SNF bill is placed on the orbit file if one of the conditions in A through C is applicable.

Whenever a bill is posted in a spell of illness where full or coinsurance days have not been used to the extent possible, HCFA places indicator "A" on the BATCH CLEARANCE DETAIL RECORD of the BATCH CLEARANCE TAPE along with the days remaining after subtracting the benefits used on the incoming bill from the record. (See §3830.1.)

If a bill is posted in a spell of illness which shows 1 or more pints of blood furnished and a like number of blood pints have not been applied toward the blood deductible and HCFA's master record shows that the 3 pint blood deductible remains to be met, an indicator code A with the amount of blood deductible to be met appears on the BATCH CLEARANCE DETAIL RECORD of the BATCH CLEARANCE TAPE.

Examples Using "As Is Bill Processing Criteria (phase II):

DOEBA = Date of Earliest Billing Action for a benefit period.

DOLBA = Date of Latest Billing Action for a benefit period.

Trailer Codes:

C = Closed (Bill Posted)

D = Open (Admission)

G = Open (Generated)

O = Orbit (Benefit period cannot be established and billing is out of sequence)

R = RTI (Rejected)

U = Utilization (Utilization investigation)

Criteria 1a.

Master Part A record - Before Posting Bill

Hospital	SNF	Inpat. Deduct to be Met	DOEBA	DOLBA
Full Co.	Full Co.			

Admission Control Record - Before Posting Bill

Trailer	Provdr. No.	Admission	From	Discharge
D	XXOXXX	04/03/80		
D	XXOXXX	05/29/80		

Bill for May 29, 1980 admission shows:

- Inpatient deductible of $160.00 (discounted charges or covered charges equal to applied deductible),
- Current billing dates of May 29, 1980 through May 31, 1980, and
- Two full inpatient hospital days.

The current billing would be posted since less than 60 days have elapsed between the current stay admission date and the admission-from date on the master record. The presumption is that the earlier open item must be for a noncovered stay or a covered stay with a partially applied deductible that would have started the benefit period if posted. Therefore, the current stay billing is permitted to activate the benefit period by posting and continuing it. The same would be true even if 60 or more days had elapsed between the billing current stay admission and the admission of record if the current stay billing contained a prior stay "from" date which was within 60 days of the admission-from date of record.

Admission Control Record - Before Posting Bill

Trailer	Provdr. No.	Admission	From	Discharge
D	XXOXXX	01/20/82		
D	XXOXXX	01/25/82		

Bill for January 25, 1982, admission shows:

- o Inpatient deductible of $100.00 (discounted charges or covered charges equal to applied deductible),
- o Current billing dates of January 25, 1982, through January 26, 1982, and
- o One full inpatient hospital day

The current stay billing would be posted since less than 60 days have elapsed between the current stay admission date and the admission-from date for the open item on the master record. The presumption is that the earlier open item must be for a noncovered stay or a covered stay with a partially applied deductible that would have started the benefit period if posted. Therefore, the current stay billing is permitted to post and activate the benefit period and continue it. If the current stay billing had shown a discharge date of March 31, 1982 (discharge date within 60 days of April 20, 1982 DOEBA), the bill would have been linked to the benefit period of April 20, 1982 through May 10, 1982 and be automatically corrected for overapplied inpatient deductible.

Master Part A Record - After Posting Bill

Hospital		SNF		Inpat. Deduct. to be Met	DOEBA	DOLBA

Admission Control Record - Before Posting Bill

Trailer	Provdr. No.	Admission	From	Discharge
D	XX0XXX	09/02/82		
D	XX0XXX	09/15/82		

Bill for September 2, 1982, admission shows:

- Inpatient deductible of $260.00,
- Current billing dates of September 2, 1982 though September 10, 1982, and
- Eight full inpatient hospital days.

The current stay billing would be posted since it contains an inpatient hospital deductible and is consistent with activating and starting a benefit period once it is posted. If the bill did not show any deductible applied, the bill would reject for an underapplied deductible condition. If the bill for the September 15, 1982 admission had been posted showing the $260.00 deductible applied first, the billing for the September 2, 1982 admission would have been automatically corrected because of an overapplied deductible.

Admission Control Record - Before Posting Bill

Trailer	Provdr. No.	Admission	From	Discharge
D	XX5XXX	09/07/82		
D	XX0XXX	09/30/82		

Bill for September 30, 1982 admission shows:

- Inpatient deductible of $260.00,
- Current billing dates of September 30, 1982, through October 4, 1982, and
- Five full inpatient hospital days.

The current stay billing would be posted since it contains a full inpatient deductible. A presumption is made that the stay for the September 7, 1982, admission is noncovered. The admission of September 7, 1982 is a SNF (5 in third position of provider number) which makes this presumption valid because of the qualifying stay requirement. However, the noncovered presumption would be made even if the September 7, 1982, admission had been for an inpatient hospital (0 in third position of provider number).

Trailer	Provdr. No.	Admission	From	Discharge
D	XX0XXX	08/01/82		
D	XX0XXX	09/01/82		

Bill for September 1, 1982, shows:

- o Ten coinsurance days, and
- o Current billing dates of September 1, 1982, through September 11, 1982 (discharge).

The bill would be posted as continuing the benefit period since its billing dates are within 60 days of the July 30, 1982, DOLBA. The presumption is that the admission of August 1, 1982, exhausted the 14 full days shown as available. If the August 1, 1982 admission were not present, the bill for the September 1, 1982, admission would reject for underapplied full days. If the bill for the September 1, 1982 admission showed all full or a combination of full and coinsurance days, the presumption would be that the bill for the August 1, 1982, admission did NOT use all of the full days available and the current stay bill would be posted.

Bill for September 7, 1982, shows:

- Ten full days, and
- Current billing dates of September 7, 1982, through September 17, 1982 (discharge).

The bill is placed on the orbit file since:

- No inpatient deductible is present,
- More than 60 days elapse between the September 7, 1982, admission on the billing, the open admission, and DOLBA of record.

If the bill had contained an inpatient hospital deductible, it would be posted (provided the proper deductible was shown on the bill) because it would be consistent with starting a new benefit period.

O	XX0XXX	09/07/82	09/07/82	09/17/82
D	XX0XXX	09/25/82		

If a bill is received for the 9/25/82 admission, it is placed on the orbit file since its admission date is within 60 days of the 9/17/82 discharge date (billing through) of the bill in orbit.

The same routines (comparisons of billing dates) take place for SNF stays under the "Orbit Criteria for A-C Criteria," but the absence of an inpatient hospital deductible would not be a factor in placing such stays on the orbit file.

3838 REQUESTS FOR DELETION OF SELECTED ORBITING BILLS AND OPEN ITEMS (G AND ERRONEOUS R TRAILERS)

When you investigate the cause for the receipt of a rejected bill, you may determine that a bill is in orbit which contains erroneous information and that it should be returned to you for correction. For example, a bill may have been returned for error code 5611 (bill dates overlap the next open item). In this case, once you determine that the related orbiting bill(s) is in error, have the related orbiting bill(s) deleted from HCFA's system (error code 5900) prior to resubmitting the related rejected bill. When the incorrect orbiting bill(s) are received, the pending rejected bill(s) may then be resubmitted. The bill(s) returned from orbit should also be corrected and resubmitted to HCFA. If the incorrect orbiting bill(s) is the responsibility of another intermediary, that other intermediary should be contacted and requested to delete the erroneous orbiting bill(s). Confirmation that the other intermediary has in fact had the erroneous orbiting bill(s) deleted should also be requested (and received prior to resubmitting the original rejected bill back to HCFA.)

Since HCFA does not create an open item for bills deleted as error code 5900, it may be advisable to submit an admission query for the correct date in order to prevent the processing of subsequent (correct) orbiting bills that may be released when the requested oribiting bill is deleted.

To facilitate intermediary access to the orbit file, a standardized letter has been developed (you should make copies as needed from the sample provided).

The following information pertains to its use:

1. The day, the month, and the year the letter is submitted to HCFA should be entered in the "date" area in the upper right hand corner of the letter.

2. The full name and telephone number and extension of the person requesting the orbiting bills should be provided in case HCFA needs clarification of the information provided. This information will also assist you in directing the acknowledgment to the appropriate person.

3. As many of the letters of the surname, that space permits, should be given, as well as the first and middle initials.

4. The Admission (Adm.) and From dates should consist of six numeric characters. This information is very important, and care should be taken to enter the information accurately.

5. Always enter the complete batch number and Julian date of the orbiting bill(s) to be deleted.

6. The HCFA employee receiving the request will enter the date the request is received by him and sign the letter in the space provided, and also give his telephone number.

A xerox of the letter will be made and returned to the intermediary. This will serve as the only interim correspondence. The final disposition will be with the RTI utilization reject data (error code 5900) showing the requested bill. If you do not receive the respective RTI utilization reject data in approximately 60 days following the receipt date entered by HCFA, Submit a status query of the beneficiary's record, if the open item is still showing, contact should be made with the appropriate HCFA employee. If the open item is not listed, proceed with correcting the beneficiary's record.

7. If the requested orbit bill had generated a "G" open item, HCFA will also delete that open item (G). See § 3831.1, item 110 for an explanation of "G" open items.

8. This letter should also be used to request HCFA to remove open items that the intermediary cannot delete query. The same information required to return orbitting bills is also needed for this procedure.

EXAMPLE: The intermediary has multiple "R" open items with the same admission date for the same beneficiary and determines that some or all of these bills should be voided or that the admission date must be corrected. "R" open items are created by bills being returned to the intermediary with errors. See § 3833 for instructions on correcting and voiding bills.

You should wait 30 days from the day entered by HCFA as the day the request was received.

After the 30 days have elapsed, query (status query code 5) the beneficiary's record to confirm the deletion of the erroneous "R" open item (HCFA does not generate a notice indicating the removal of the erroneous open item).

9. At the bottom of the letter, a rectangular space is provided for your address. The return address should include the requester's name. Also, your identification number should be entered to the right of the rectangular space. No part of the address should be entered outside of the lines of this figure.

If more than 10 beneficiaries are involved, enter the pertinent information for each beneficiary (in the same order as provided in the sample) on a blank sheet(s) of paper and staple it to the standardized letter.

If more than one bill on a particular record is being requested from "orbit," you need only enter the Admission Date, From Date, and Batch Number and Julian Date for the additional bills under the first bill requested.

3838.7 Elimination of Blocking Open Items From Saturated Records.--As transactions are posted at HCFA the beneficiary record will sometimes become saturated, i.e., the file will contain the maximum number of 30 open items. When this occurs it becomes necessary to eliminate the oldest blocking item in order to process subsequent transactions.

In these instances HCFA will automatically forward a health insurance insurance printout (HIPO) (see § 3838.8) designating the oldest blocking item. You should resolve the blocking item within 30 days by:

A. Submitting or resubmitting a corrected bill through the approved bill submission process. When this it done, forward a xerox copy of the bill submitted accompanied by the appropriate batch number in which the bill was submitted to:

Health Care Financing Administration
Claims Processing Branch
Bureau of Support Services
3-H-21 Operations Building
Baltimore, Maryland 21235

B. Generating a delete query if appropriate, or

C. Informing the Medicare Bureau that you are not able to process the claim within 30 days of the date of the HIPO. When this occurs telephone the Part A Systems Branch at (301) 594-8732.

3838.8 Health Insurance Printout-Purpose and Scope.--The HIPO provides up-to-date reference to the HI master tape record. All pertinent fields on the tape, many of which are coded, are converted to straight alphabetical/nemerical data, captioned for ease of reference, and displayed in a logical sequence.

The data displayed on a HIPO represents the data contained on the HI master tape records as of the date the finder card was processed in the HI daily system. If a series of nines (i.e., 999999) is displayed in any date field on a HIPO, this means that the date on the HI master tape record is invalid. A complete explanation of the HIPO data display is contained in the following pages.

A. Master Identification Record Layout and Description.--The data displayed reflects the information contained in the master identification record. This record will appear if the HIPO is for a claim number which belongs to an individual who is alive or, if dead, whose accoont has had recent activity.

MASTER
The claim number following the legend "MASTER" belongs to the beneficiary identified in the master identification record.

CLAIM NUMBER
The claim number must include a nine position account number. If a suffix is not included a HIPO will be generated for each family membe: in file for the requested account number. If a suffix is included a HIPO will be generated for that beneficiary only. Railroad Board numbers will show the HCFA converted claims number.

PRV
The code following the legend "PRV" is the beneficiary's previous beneficiary identification code (BIC). If this field is blank, the beneficiary did not have a previous BIC.

NAME
The name field is twenty-five positions long with twelve positions for surname, ten positions for given name, and one position for middle initial. The surname, given name, and middle initial will be separated by a period.

SEX
The code following the legend "SEX" indicates the beneficiary's sex: F (female), M (male), U (unknown).

XR FROM
The claim number following the legend "XR FROM" is an inactive number associated with the beneficairy. If this field is blank, a cross-reference is not involved.

DATA INDICATORS
This field consists of thirty-five data indicators.

ADDRESS
This field begins beneath the first position of the claim number. The address field can contain up to 122 positions. The zip code is contained in the last five positions of the address line.

PART A CUR ENT (MM/YY)
The four position date following the legend "PART A CUR ENT" is the beginning date of the current period of entitlement to hospital insurance coverage. If this field is blank, the beneficiary is not currently entitled to hospital insurance.

TER (MM/YY)
The four position date following the Legend "TER" is the date of termination of the current period of entitlement to hospital insurance coverage. XXXX in this field indicates that the current period of entitlement to hospital insurance coverage is erroneous.

OPT
The one position code following the legend "OPT" represents the current status of the beneficiary's entitlement to hospital insurance coverage.

PRV ENT (MM/YY)
The four position date following the legend "PRV ENT" is the beginning date a previous period of entitlement to hospital insurance coverage. If this field is blank, the beneficiary was not previously entitled to hospital insurance coverage.

TER (MM/YY)
The four position date following the legend "TER" is the date of termination of a previous period of entitlement to hospital insurance coverage.

OPT
The one position code following the legend "OPT" represents the previous status of the beneficiary's entitlement to hospital insurance coverage.

DOB (MM/DD/YY)
The six position date following the legend "DOB" is the beneficiary's date of birth.

DOA (MM/DD/YY)
The six position date following the legend "DOA" is the date the master record was accreted to the HI system.

DLA (MM/DD/YY)
The six position date following the legend "DLA" is the date of the latest Part A or Part B activity.

TPC A
The code following the legend "TPC A" is the Part A Third Party Code. One of the following codes will appear:

0 - No Third Party Involvement
1 - State Buy-In
3 - Oklahoma Buy-In
5 - Civil Service
7 - Third Party

PART B CUR ENT (MM/YY)
The four position date following the legend "PART B CUR ENT" is the beginning date of the current period of entitlement to medical insurance coverage. If this field is blank, the beneficiary is not currently entitled to medical insurance.

TER (MM/YY)
The four position date following the legend "TER" is the date of termination of the current period of entitlement to medical insurance coverage. XXXX in this field indicates that the current period of entitlement to medical insurance coverage is erroneous.

OPT
The one position code following the legend "OPT" represents the current status of the beneficiary's entitlement to medical insurance coverage. An explanation of Part B option codes is contained in the glossary.

PRV ENT (MM/YY)
The four position date following the legend "PRV ENT" is the beginning date of a previous period of entitlement to medical insurance coverage. If this field is blank, the beneficiary was not previously entitled to medical insurance coverage.

TER (MM/YY)
The four position date following the legend "TER" is the date of termination of a previous period of entitlement to medical insurance coverage.

OPT
The one position code following the legend "OPT" represents the previous status of the beneficiary's entitlement to Medical insurance coverage.

DOD (MM/DD/YY)
The six position date following the legend "DOD" is the beneficiary's date of death. If this field is blank, the beneficiary is presumed to be alive.

RPD (MM/DD/YY)
The six position date following the legend "RPD" is the run processing date. This is the date the MBR generated the Universal RIC.

LAF
The code following the legend "LAF" is the Ledger Account File Code.

SC
The code following the legend "SC" indicates the source of the master record. One of the following codes will appear:

A - Accretion/Attainment
B - Cross-reference
C - Clerical
D - Verified Cross-reference
E - Verified Clerical

PC
The code following the legend "PC" is the Program Center Code.

TPC B
The code following the legend "TPC B" is the Part B Third Party Code. One of the following codes will appear:

0 - No Third Party Involvement
1 - State Buy-In
3 - Oklahoma Buy-In
5 - Civil Service
7 - Third Party

HMO CURRENT
The number following the legend "HMO CURRENT" is the plan number of the current Health Maintence Organization.

EFF (MM/YY)
The four position date following the legend "EFF" is the effective start date of the HMO period.

TER (MM/YY)
The four position date following the legend "TER" is the termination date of the HMO period.

OPT
The one position code following the legend "OPT" is the HMO option code. One of the following codes will appear:

1 - will process all provider bills for non-lock-in beneficiaries.

2 - HMO will process only in-plan Part A and in-area Part B bills for non-lock-in beneficiaries.

A - will process all provider bills for lock-in beneficiaries,

B - HMO will process only in-plan Part A and in-area Part B bills for lock-in beneficiaries.

C - HMO will process all Part A and Part B bills for lock-in beneficiaries.

The information described (in 30 through 33) above will be displayed following the legend "PRIOR" if more than one HMO period is participated in.

PERIODS
The number following the legend "PERIODS" represents the number of HMO periods in which the beneficiary has participated.

B. Master Part A Record Layout and Description.--The data displayed reflects the information contained in the master Part A record. This record will appear if there is any HI utilization for the beneficiary.

LIFETIME RES
The number displayed under the legend "LIFETIME RES" represents the number of lifetime reserve days remaining.

LIFETIME PSY
The number displayed under the legend "LIFETIME PSY" represents the number of lifetime psychiatric days remaining.

SPELL
The number displayed under the legend "SPELL" indicates a spell of illness represented by the data displayed to the right of the number. Up to five spells will be displayed. The latest spell will appear as spell number one.

HOSP FL
The number displayed under the legend "HOSP FL" represents the number of full coverage days of inpatient hospital services remaining for a spell of illness.

HOSP CO
The number displayed under the legend "HOSP CO" represents the number of coinsurance days of inpatient hospital services remaining for a spell of illness.

SNF FL
The number displayed under the legend "SNF FL" represents the number of full coverage days of skilled nursing facility services remaining for a spell of illness.

SNF CO
The number displayed under the legend "SNF CO" represents the number of coinsurance coverage days of skilled nursing facility services remaining for a spell of illness.

HHA
The number displayed under the legend "HHA" represents the number of covered home health visits remaining for a spell of illness.

DEDUCTIBLE IMP
The money amount displayed under the legend "DEDUCTIBLE IMP" represents the amount of inpatient hospital deductible remaining to be met for a spell of illness.

DEDUCTIBLE BLD
The number displayed under the legend "DEDUCTIBLE BLD" represents the remaining number of pints of blood to be met for a spell of illness.

DOEBA (MM/DD/YY)
The six position date displayed under the legend "DOEBA" is the date of earliest billing action for a spell of illness.

DOLBA (MM/DD/YY)
The six position date displayed under the legend "DOLBA" is the date of latest billing action for a spell of illness.

IND 1 AND 2
The number displayed under the legends IND 1 and IND 2 are spell of illness indicators. The possible indicator codes are as follows:

IND #1

0 - There has been no clerical involvement and no Christian Science SNF usage.
1 - There has been clerical involvement.
2 - There has been Christian Science SNF usuage.
3 - Both conditions 1 and 2 above are present.

IND #2

0 - The DOLBA is not interim and the blood has been initialized in the redesigned system.
1 - The DOLBA is interim.
2 - The blood has not been initialized in the redesigned system.
3 - Both conditions 1 and 2 above are present.

C. Admission Control Record Layout and Description.--The data displayed reflects the information contained in the admission control record. This record will appear when any of the items listed below have been processed. A maximum of 30 items may be displayed.

TYPE
The one position code displayed under the legend "TYPE" identifies the type of trailer displayed. One of the following codes will appear:

C - Closed
D - Open (Admission)
G - Open (Generated)
O - Orbit
R - RTI
U - Utilization

T
The one position code displayed under the legend "T" is the transaction code. One of the following codes will appear:

0 - Christian Science SNF
1 - Psychiatric Hospital
2 - Tuberculosis Hospital
3 - Inpatient Hospital
4 - Regular SNF

Q
The one position code displayed under the legend "Q" is the query code. One of the following codes will appear:

1 - Interim
3 - Final Bill
4 - Discharge Notice

DISP
The two position code displayed under the legend "DISP" is the disposition code transmitted with the original reply.

INTER
The five position code displayed under the legend "INTER" is the identification number of the intermediary submitting the query.

PROVDR
The six position code displayed under the legend "PROVDR" identifies the facility providing the services.

ADM DATE (MM/DD/YY)
The six position date displayed under the legend "ADM DATE" is the date the beneficiary was admitted to the hospital or skilled nursing facility.

FROM DTE (MM/DD/YY)
The six position date displayed under the legend "FROM DTE" is the date of the first day of services covered by the bill.

THRU DTE (MM/DD/YY)
The six position date displayed under the legend "THRU DTE" is the date of the last day of services covered by the bill.

DSCHG DT (MM/DD/YY)
The six position date displayed under the legend "DSCHG DT" is the date the beneficiary left the hospital or skilled nursing facility or died.

BATCH-#-SQ
The ten position field displayed under the legend "BATCH-#-SQ" identifies the batch in which the intermediary forwarded the bill, the date it was batched and the sequence number of the bill assigned by HCFA. The first four positions are the batch number, the next four positions are the Julian date and the last two positions are the sequence number of the bill within the batch.

DOA (MM/DD/YY)
The six position date displayed under the legend "DOA" is the date the trailer was accreted.

DLA (MM/DD/YY)
The six position date displayed under the legend "DLA" is the date of the latest modification to the trailer data.

OC
The number displayed under the legend "OC" represents the number of times that the bill has orbited.

Bill History

3840. HI BILL RETRIEVAL RECORD (BILL HISTORY)—GENERAL

This record is provided when:

1. An error code listed below is assigned by HCFA:

6000	5600	*5620	5701	5703	5705
6010	5601	5700	5702	5704	

*History is provided only if FROM date on bill is earlier than the FIRST BL DT on HCFA's HI Master Record.

2. A request is received for this record.

All history records are released via the HCSSCL/SXXX tape file. A related exception record is intermixed with each bill history record if it is released due to a bill error. If the bill is requested, it appears as the last record on the tape file. (See §3830.1K.)

Compare rejected bills and their related bill history with the provider's or your records. Correct any overlapping billing dates and resubmit the billing data. Do not resubmit billing data for duplicate billings. Delete any open admissions established for a duplicate billing.

Selected data is shown for accepted inpatient hospital (including psychiatric hospitals), SNFs, Part A and Part B home health billings, HOSPICE and Christian Science billings. Adjustments to these billings are also shown. No outpatient bills are displayed.

The accepted billings for each HICN are grouped according to:

A. Bills affecting benefit periods; these bills are:

- Christian Science
- Inpatient Hospital
- SNF
- All home health Part A bills with a FROM date prior to January 1, 1982. (Only Part A home health bills may affect the benefit period.)

B. A summary line of utilization data for the benefit period and the exception data (if any) are shown. No exception data is shown when a history is prepared based upon a request instead of a bill reject.

C. HOSPICE bills.

D. Home health bills with a "FROM" date later than December 31, 1981. Part B home health bills are identified with a "B" on the right margin.

Whenever bills are purged from the history record, utilization involving the 190 psychiatric lifetime days and 60 hospital reserve days are consolidated and shown as the first billing (dummy bill) on the history record. This consolidation ensures that the same number of lifetime days are shown as utilized on both the bill history record and the HI Master.

Some of the entries end in an alphabetic or special character which has a numeric counter part. They are:

& = 0 B = 2 D = 4 F = 6 H = 8
A = 1 C = 3 E = 5 G = 7 I = 9

Five position date fields consist of the year in the first 2-positions followed by a 1 position month and a 2 position day. For example, January 1, 1984, is coded 84A01. The alphabetic characters for the months are:

A = January
B = February
C = March
D = April
E = May
F = June
G = July
H = August
I = September
- = October
J = November
K = December

3840.1 Item Descriptions.—

A. HI Bill Retrieval—Identify each item of data by comparing the numbered items with those on the exhibit. Items 1 through 3 relate to the identification of the document, Items 4 through 27 first line of billing data, Items 28 through 41 to the second line of billing data, and Items 42 through 53 to the third line of billing data. Items 54 through 64 relate to the benefit period, Items 65 through 68 to billing data that does not impact the benefit period, and Items 69 through 70 to bill reject data.

Item 1. HEADER.

The title of the record is "BILL RETRIEVAL."

Item 2. DATE.

A 6-position numerical date for the history run date.

ITEM 3. PAGE NO.

The page number is 2-positions and printed on the first line of each page. If the total printed data for an Health Insurance Claim Number requires more than one page, the subsequent page is numbered 02, 03, etc.

ITEM 4. CLAIM NO. (HI Claim Number)

Either the 9-position numeric portion of the SSA claim number or the first 9 positions of a converted Railroad Retirement Board (RRB) claim number and followed by 2-position beneficiary identification code (BIC). The SSA BIC consists of at least one alpha character and may also consist of additional numeric digits. An RRB symbol, when converted by SSA, consists of 2 numeric positions. SSA converts RRB numbers for processing through its EDP system and RRB numbers are shown in their converted format. The original (unconverted) RRB number is shown on the interim or final batch clearance record.

ITEM 5. NAME.

The first 6-letters of the beneficiary's surname.

ITEM 6. IN (initials).

These 2-positions show the beneficiary's first and second initials (if available).

ITEM 7. TQ (transaction and query codes).

This is a 2-position field. The transaction code represents the type of bill and the query code shows whether a bill is an adjustment action, interim bill, or final bill.

TRANSACTION CODES

0 = Christian Science
1 = Inpatient Psychiatric Hospital
2 = Inpatient TB Hospital
3 = Inpatient Hospital
4 = Skilled Nursing Facility
5 = Home Health Agency
H = HOSPICE Bill

QUERY CODES

0 and 5 = Adjustment codes
1 and 2 = Interim bill codes
3 and 4 = Final bill codes

ITEM 8. TOTL-CHG (total charges).

An 8-position money amount showing the total charges (covered and noncovered) before deductions for actual cost of services.

ITEM 9. REIM AMT (reimbursement).

An 8-position money amount paid to the provider for services covered by the bill after subtracting deductibles and/or coinsurance amounts.

ITEM 10. ADM (admission date).

This 5-position date is the date the beneficiary was admitted to the hospital, HOSPICE, or SNF. It is the start of care date if the bill is for home health services.

ITEM 11. DSCHG (discharge date).

This 5-position date is the date the beneficiary was discharged from the hospital/SNF/HOSPICE or died. For home health services, it represents the date services were no longer received.

ITEM 12. FROM (from date).

This 5-position date is the date of the first day of services covered by the bill.

ITEM 13. THRU (through date).

This 5-position date is the date of the last day of services covered by the bill.

ITEM 14. HTO (hospital totals).

These 3-positions are the total number of covered full, coinsurance, and lifetime reserve days on the billing. To determine the number of hospital full days, subtract the number of coinsurance days and/or lifetime reserve days, if any. Coinsurance and lifetime reserve days are shown in the next 2 fields (ITEMS 15 and 16).

ITEM 15. HCO (hospital covered days).

These 3-positions are the total number of coinsurance days on the billing exclusive of lifetime reserve days. Up to 30 coinsurance days are allowed in a benefit period for inpatient hospital services.

ITEM 16. LRD (lifetime reserve days).

These 3-positions are the total number of lifetime reserve days used, if any. This field is only applicable to inpatient hospital stays.

ITEM 17. IDED (inpatient deductible).

These 5-positions show the amount of inpatient cash deductible applied to the billing. The beneficiary is responsible for a cash deductible in each benefit period. The chart in 3211 shows the maximum rates for which a beneficiary can be liable in each benefit period.

ITEM 18. BD (blood deductible).

These 2-positions are the number of blood pints applied toward the blood pint deductible on the billing. The first position is for whole pints and the second for half-pints. If only whole pints are involved, the second position is always zero (0). If half-pints are involved, the second position is always five (5). For example, 030 = 3 pints and 025 = 2 1/2 pints.

ITEM 19. BFN (blood furnished).

These 4-positions are the total number of pints or half-pints of blood shown on the billing. The last position shows any half-pints involved as shown in ITEM 18 above.

ITEM 20. BNR (blood not replaced).

These 4-positions are the total number of pints or half-pints not replaced by the beneficiary, as shown on the billing.

ITEM 21. BCPT (blood charge).

These 5-positions are the charge per pint for blood furnished.

ITEM 22. N/C (noncovered/leave days).

These 4-positions are the number of noncovered days and/or leave days on the billing. Noncovered days during the billing period are days which are denied for such reasons as benefits exhausted, custodial care, workmen's compensation, payment by the VA, etc. Leave days during the billing period are days for which the patient was not present in the hospital or SNF.

ITEM 23. PDA (prior days).

These 3-positions are the number of days the patient was confined to a psychiatric hospital in the 150-day period immediately preceding the date of entitlement to Part A benefits.

ITEM 24. NP (nonpayment).

This 1-position code identifies the reason for no payment. The codes are:

W = Workers' compensation
B = Benefits exhausted
C = Noncovered care
N = Other reasons

ITEM 25. STO (SNF total days used).

These 3-positions are the total number of SNF and/or Christian Science Sanatorium full and coinsurance days used in the billing period. See §3023 for Christian Science coverage. Determine the number of SNF full days by subtracting total coinsurance days from total covered days. SNF coinsurance days, if any, appear in ITEM 26.

ITEM 26. SCO (SNF coinsurance days used).

These 3-positions are the total number of SNF and/or Christian Science Sanatorium coinsurance days used in the billing period. See §3023 for Christian Science coverage.

ITEM 27. HHA (home health visits).

These 3-positions are either the number of covered Part A or Part B home health visits used in the billing period. Part B data is identified by a "B" to the right of the visits.

ITEM 28. PROVDR. (provider number).

These 6-positions are the identification number of the facility which provided the services.

ITEM 29. INTRM (intermediary number).

These 5-positions are the identification number of the intermediary that submitted the billing.

ITEM 30. BATCH (batch number).

These 8-positions are the batch number and the date of batching assigned by the intermediary that submitted the billing. The first 4-positions are the batch number and the next 4 are the Julian date (1-position year digit followed by 3-position day). An alphabetic character in the first position of the batch number denotes a batch submitted by an intermediary and a numeric means an internal adjustment by HCFA. An internal bill is prepared whenever HCFA's active history records are purged and psychiatric or lifetime reserve days have been reduced.

ITEM 31. BS (bill sequence).

These 2-positions are the sequence number assigned to the bill by HCFA.

ITEM 32. MSBLK (master block number).

These 5-positions are the block number assigned to the batch of bills by HCFA for internal purposes. The first 4-positions are the Julian date and the code in the last position identifies the type of billing batch. The codes are:

Inpatient Hospital and SNF = L
Christian Science = N
Home Health "A" and "B" = Q
Noncovered Bills = R

ITEM 33. PROC (processed date).

These 5-positions are the date the billing data was accepted by HCFA.

ITEM 34. PRF-CMP (professional component)

These 7-positions show the total amount of professional charges (if any).

ITEM 35. ASIS OI-DTS

This field, if completed, shows either of two dates.

The first 5-positions show the date of the earliest open admission preceding the billing FROM date of an accepted billing. The last 5-positions show the date of the latest billing THRU/DISCHARGE date recorded for an open admission that is subsequent to an accepted billing. These dates are used by HCFA to determine the proper benefit period for a billing.

ITEM 36. PRI STY DTS (prior stay dates).

Two separate 5-position dates show the beginning and ending date of a noncovered stay that preceded the admission date on the billing.

ITEM 37. 2 CO (second year coinsurance days).

These 3 positions show the total number of coinsurance days used in the second year, if coinsurance days are utilized on the billing and they overlap two years (e.g., 12/10/84 through 01/20/85).

ITEM 38. UTL (utilization days).

Reserved for future use.

ITEM 39. "H" (identifier).

A 1-position code that identifies an HMO paid bill.

0 = No HMO payment.
1 = HMO paid

ITEM 40. "K" (identifier).

A 1-position code that shows whether or not a bill is received and processed with a benefit period override code. (See §3880.2.) Possible codes are:

K = Received and processed bill using override code.
L = Received bill with override code, but code was unnecessary and not used.
M = Received bill with override code, but the bill is linked to a benefit period that shows only bills without "Verified non-covered stays".

ITEM 41. DATA INDICATORS.

The codes in this 40-position field are for HCFA's internal use.

ITEM 42. LEFT ASTERISK (*) OR "A" (identifier).

An asterisk entered along the left margin identifies the bill that is overlapped by the exception bill displayed at the bottom of the page. An "A" identifies provider bills internally adjusted by HCFA when available benefits have been either overutilized or underutilized. (See ITEM 69.)

ITEM 43. PRIM PAY DYS.

This field consists of 11-positions. The first eight are separated from the last 3 by space. The first position shows the primary payer code. The next seven positions show the amount that the primary payer paid. The three positions after the space show the total number of days covered by the primary payer. The primary payer codes are:

A = Working Aged Beneficiary/Spouse with EGHP.
B = ESRD Beneficiary in the 12 Month Coordination Period with an EGHP.
C = Conditional Payment by Medicare; Future Reimbursement Expected.
D = Automobile No-Fault or any Liability Insurance

E = WC Including BL
F = VA, PHS or Other Federal Agency
Z = Medicare is Primary Payer

ITEM 44. DRG (diagnosis related group).

These 3-positions identify the diagnosis related group used for payment.

ITEM 45. DS (discharge destination).

These 2-positions show the patient's status as of the last service date on the billing. See §3638 for the list of codes and their narrative descriptions.

ITEM 46. OUTLR—AMT (outlier code and amount).

These 9-positions show the outlier code and outlier amount. The first position is the outlier code followed by the 8-position amount. Outlier codes are:

0 = No outlier
1 = Day outlier
6 = Valid outlier (exempted States only)
7 = HCFA developed DRG
8 = HCFA developed DRG using patient status code
9 = Not groupable

ITEM 47. DIAGNOSTIC - CODES/NARRATIVE.

This field contains up to five 5-position codes or narratives from the submitted billing data. If codes are shown, the first code describes the principal diagnosis and the remaining codes correspond to additional conditions that co-existed at the time of admission, or developed subsequently, and have an effect on the treatment received or the length of stay.

ITEM 48. SURG-CDS/NARR (surgical procedure codes).

This field contains up to three 4-position codes or narratives from the submitted billing data. If codes are shown, the first code identifies the principal procedure performed during the period covered by this bill. The remaining codes, if any, identify the procedures, other than the principal procedure, performed during the billing period.

ITEM 49. GPDT (guarantee of payment date).

These 5-positions show the guarantee of payment date entered on the billing (first day for hospital payment claimed under the guarantee of payment provision when the beneficiary has no available coverage).

ITEM 50. URDT (utilization review date).

These 5-positions show the date that the utilization review committee advised the provider that a further hospital or SNF was no longer necessary.

ITEM 51. ACDT (active treatment date).

These 5-positions are the date covered level of care ended.

ITEM 52. BEDT (benefits exhausted date).

These 5-positions are the benefits exhausted date on the billing.

ITEM 53. * (right asterisk).

An asterisk along the right margin of the page identifies the bill(s), if any, that is netted out due to adjustment actions of various types (CREDIT/DEBIT or CANCEL ONLY). This symbol also identifies duplicate billings. If a duplicate covered and noncovered billing is processed, the noncovered billing is netted out. If the duplicate billings are both covered or both noncovered, the billing with the earlier process date is netted out. Only bill data lines without an asterisk to the right are included in the summary of benefit period utilization data.

ITEM 54. SPELL.

These 2-positions represent the sequence of the benefit period. The items following the sequence number contain related utilization data for the benefit period. All billing data above this line (except home health billings) are used to calculate remaining benefits and deductibles to be met.

NOTE: Since some billing days are accepted out-of-sequence, it may be that:

a. A reduction is reflected for coinsurance days while full days still remain;

b. A reduction is reflected for lifetime reserve days while coinsurance is still available in the benefit period; or

c. A negative amount is shown on a bill exceeding allowable days and is forced accepted.

ITEM 55. HFL (full hospital).

These 2-positions show the number of full inpatient hospital days remaining for the benefit period. Up to 60 full days are available. Exhaust full days before applying coinsurance days.

ITEM 56. HCO (hospital coinsurance).

These 2-positions show the number of coinsurance inpatient hospital days remaining for the benefit period. Up to 30 coinsurance days are available. Exhaust coinsurance days before applying lifetime reserve days.

ITEM 57. SFL (full SNF).

These 2-positions show the number of full SNF days remaining unless a Christian Science bill was accepted in the benefit period. Up to 20 full SNF days (none for Christian Science) are allowable in a benefit period. Exhaust full days before applying coinsurance days, except in Christian Science billings. Full days are not applicable to Christian Science facilities—only coinsurance days. If a Christian Science bill has been accepted, full days remaining are shown as zero.

ITEM 58. SCO (coinsurance SNF).

These 2-positions show the number of coinsurance SNF days remaining (80 or less) unless a Christian Science bill was accepted in the benefit period. Up to 80 coinsurance (30 for a Christian Science stay) days are allowed. Therefore, remaining coinsurance days can never be more than 80 after acceptance of a non-Christian Science billing or more than 30 after acceptance of a Christian Science billing. If the last 4 digits of the provider number for an accepted billing are 1990-1999, a Christian Science billing is involved.

ITEM 59. IDED (inpatient deductible).

These 5-positions show the amount of inpatient hospital cash deductible remaining to be met in the benefit period. If zeros are shown, the deductible is met. See chart in §3211 for the amount of the deductible to be met in each benefit period.

ITEM 60. BDED (blood deductible).

These 3-positions show the number of blood pints remaining to be met in the benefit period.

ITEM 61. 1st BL DT (admission date).

These 5-positions show the admission date of the accepted bill that started the benefit period.

ITEM 62. LST BL DT (discharge/billing through date).

These 5-positions show the discharge/billing through date of the last processed inpatient hospital or SNF bill in the benefit period.

ITEM 63. LRD (lifetime reserve days).

These 2-positions show the number of hospital lifetime reserve days remaining.

ITEM 64. LPD (lifetime psychiatric days).

These 3-positions show the number of psychiatric lifetime days remaining.

ITEM 65. HOSPICE BILLS.

Each HOSPICE billing accepted is listed. See ITEMS 1 through 64 above for a description of possible entries.

ITEM 66. TOTAL HOSPICE DAYS.

The 2-positions to the right of this title show the number of HOSPICE days billed and accepted as of the history preparation date.

ITEM 67. HOME HEALTH BILLS AFTER 1981.

Both Part B and Part A home health billings with a FROM date after December 31, 1981 are listed since they do not affect benefit periods. Part B billings are distinguished from Part A by a "B" in the right margin. See ITEMS 1 through 64 above for a description of possible entries.

ITEM 68. TOTAL HHA VISITS FOR (year) PART A (XX) PART B (XX).

The 3-positions to the right of PART A show the number of Part A home health visits used during the year shown. The 3-positions to the right of PART B are the PART B visits used.

ITEM 69. EXCEPTION BILL ERROR CODE, OR L1001.

If a 1-position code, it identifies the potential type of error. This data is for HCFA use only. An L1001 is followed by one of the following messages:

FULL DAYS CHANGED-(INCREASED OR DECREASED).
FULL DAYS CHANGED AND THE INPATIENT DEDUCTIBLE AMOUNT REMOVED.
COVERED DAYS CHANGED TO NON COVERED DAYS.
INPATIENT DEDUCTIBLE AMOUNT CHANGED - INCREASED OR DECREASED
MULTIPLE ADJUSTMENTS.

The message is followed by:

> THIS BILL RETRIEVAL RECORD IDENTIFIES PROVIDER BILLS THAT WERE ADJUSTED BY HCFA BECAUSE AVAILABLE BENEFITS FOR THIS BENEFICIARY WERE EITHER OVERUTILIZED OR UNDERUTILIZED. THE ADJUSTED BILL(S) HAVE AN "A" IN THE LEFT HAND MARGIN. PLEASE TAKE THE APPROPRIATE STEPS TO INSURE THAT YOUR IN-HOUSE RECORDS COMPLY WITH THE INTERNAL ADJUSTMENT(S) MADE BY HCFA. IF YOU HAVE ANY QUESTIONS ABOUT THE ADJUSTMENT(S) MADE BY HCFA, PLEASE CONTACT: HCFA, OMB, OAS, DMOS, TRANSACTION BRANCH, ADJUSTMENT MODULE, P.O. BOX 17078, BALTIMORE, MD 21203.

ITEM 70. FINAL DELETE CODE.

The words FINAL DELETE CODE appear with the delete code. See §§3825.1-3828.3 for a list of codes and their narratives.

B. No Find and Invalid Claim Number Reports.--Released whenever billing data cannot be provided from the bill retrieval file. The format is the same for both reports--only the name of the report varies. Identify each item of data by comparing the numbered items below with the titles on the exhibits.

ITEM 1. NO FIND REPORT/INVALID CLAIM NUMBER REPORT.

If this item shows "NO FIND REPORT," it means the bill retrieval request contained a valid HICN, but no bill data is shown as accepted on the bill retrieval records. If "INVALID CLAIM NUMBER REPORT" appears, it means the bill retrieval request contained an invalid HICN.

ITEM 2. BILL RETRIEVAL.

This item reflects the name of the file and the 6-position date of the run.

ITEM 3. PAGE NO.

The page number is printed on the first line of each page. If the total printed data for a HICN requires more than one sheet, the subsequent sheets are 002, 003, etc.

ITEM 4. CLAIM NO. (number).

This reflects the HICN as shown on the bill retrieval (query) request. Up to four HICNs across, in HICN sequence, appear. Either a 9-position numeric portion of the HICN or the first 9-positions of a converted RRB HICN is followed by a 2-position BIC. The HI BIC consists of at least one alpha character and may also consist of additional numeric digits. An RRB symbol, when converted, consists of two numeric positions. RRB numbers are shown in the converted format on the history file. The original (unconverted) RRB number is shown on the batch clearance records.

ITEM 5. REQSTR (requestor) ID (identification).

Your number is reflected as shown on your bill retrieval (query) request. Up to five positions are entered.

```
                       1.     2.                                                                                                 3.
                 BILL RETRIEVAL  XX/XX/XX                                                                                 PAGE NO XX

3840.2 Intermediary Requests for HI Bill Retrieval Record (Bill History).--When you are unable to determine a beneficiary's prior or current health insurance (HI) utilization status, an HI Bill Retrieval record should be requested from us via your wire system. (See 3507.3.) For example, you receive a disposition code 27 (see 3512.7) indicating that the date of admission on your current query precedes the last discharge date (or last interim bill date) recorded on our records and the discharge date on your current claim is more than 60 days before our last discharge date, the days shown as available in our reply may not be for the same benefit period as your current claim. An HI Bill Retrieval in this instance would help you determine the benefit period which relates to your billing data.

HI Bill Retrieval records are not furnished if one of the following is applicable:

1. An intermediary number is not provided with the query.

2. An invalid health insurance claim number is queried. (Set 3840.1B)

3. At the time of receipt of the query no bills have been recorded on our bill retrieval record. (See 3840.1B)

If you have not received an HI Bill Retrieval record within 30 days of the date of your query, determine whether condition "2" or "3" above is applicable. These situations, when present, are sequenced after the bill retrieval records, if any, at the end of the HCSSACL/SXXX tape file (see 3830.1K). If conditions "2" or "3" are present, determine the proper HI claim number (see 3512.7, disposition code "00" or "52") and query the correct number. If condition "1" is applicable (presume this is the case if you have no indications "2" or "3" exist and 30 days have elapsed since you transmitted your query), requery the original HI claim number, but be certain your intermediary number is correct and present in your query. If the intermediary number you provide happens to belong to some other intermediary, the bill retrieval data will be sent to the other intermediary. Impossible intermediary numbers are treated as if no intermediary number was queried.

```

Batch Status Report

3842. MONTHLY BATCH STATUS REPORT

A. HCFA furnishes all Part A intermediaries with a batch status report.—The report is electronically produced in the form of a listing the first week of each month. The report includes information about batch processing for the previous month through the last Tuesday of the month in which the report is prepared. Batch numbers which do not appear on the listing have been cleared by HCFA in a month prior to the report month.

The cut-off date for the Batch Status Report is the same as for the Provider Statistical and Reimbursement Report and the modifications in the format of the Batch Status reports.

Batches are listed in order of the date batched by the intermediary for the current and one previous year in numerical sequence by batch number. This means all 1980 batches are shown in numerical sequence followed by all 1981 batches, and so on. If an intermediary repeats batch numbers within the same year, the earlier dated batches appear before the later ones. For example, two batches numbered A234 submitted in 1981 would appear on the listing in the following manner:

A234 1005
A234 1265

B. Description of Items on the New Batch Status Report.—For each batch there are 18 columns representing the possible status of the batch. The column headings are as follows:

BATCH NO (Batch Number)
This is the batch number shown on the intermediary's transmittal.

DATE
This is the date of batching expressed as a Julian date batched appearing on the intermediary's incoming tape.

DATE RECD (Date Received)
This is the month and year the batch entered SSA's EDP system. No entry appears in this column if the batch is missing.

RECD THIS MO (Received This Month)
If the batch was received during the period covered by the batch status report, an "X" will appear in this item. If the batch was received during a prior report period, the item is blank.

CLEARED
If the batch was cleared during the report period, an "X" appears in this item. Following the "X" is the total number of batch records produced by HCFA for that batch.

VOID
If the intermediary voids the batch during the report period, an "X" appears in this column. If HCFA temporarily deletes a batch number during internal processing, a "D" appears in this column until the batch number is reinstated. No action is required by the intermediary when a batch number is listed as a "D" VOID. However, if the "D" appears for 3 consecutive months, the intermediary should notify:

Health Care Financing Administration
Systems Requirements Branch, BPO
6325 Security Boulevard
Baltimore, Maryland 21207

MISS
This item shows an "X" if at the end of the report month, HCFA has not received this batch and has received one or more batches from the intermediary with a higher number. If the batch number was not used, either submit bills assigned to the batch number or notify HCFA to void the batch number as explained in 3887. Where the batch has been sent to HCFA, the intermediary need not take any action unless the missing batch is again listed the next month. When a batch has been listed as missing for 2 consecutive months, the intermediary should resubmit the batch to HCFA. Annotate the Summary Total Sheet, "BATCH (number) RESUBMITTED. MISSING ON TWO CONSECUTIVE BATCH STATUS REPORTS." See section 3867.2.

HCFA will not list separately 11 or more consecutive missing batches. To highlight 11 or more consecutive missing batches, a summary line will be used and the number of missing batches will appear in parenthesis. A blank line will precede and follow each missing batch summary line to separate it from other batches.

PEND
This column contains an "X" if the batch has not been completely processed during the report period. The number of interim batch records prepared by HCFA as of the end of the report which appears to the right of the "X." "X00" appears if no interim batch record has been prepared for the batch. "X01," "X02," etc., appear when HCFA has produced interim batch notices.

TOTAL BILLS
This column shows the total number of bills in a batch received by HCFA.

ACCEPT
This is the total number of bills from the batch which have been accepted by HCFA as of the last day of the report period.

CON ED INVES (Consistency Edit Investigation)
This is the total number of bills in the batch which are being reviewed for consistency errors as of the end of the report month.

UTL ED INVEST (Utilization Edit Investigation)
This is the total number of bills in the batch which are being investigated by HCFA for utilization errors. During the investigation, HCFA attempts to reinstate the bills into the bill processing system. The total is shown as of the last day of the report period.

ORBIT
This the total number of bills in the batch which are blocked from processing (in orbit) as of the last day of the report period.

REPLY PENDG (Reply Pending)
Bills which are sent to be matched against HCFA's master utilization record near the end of the report month will be reflected in this column whenever the final disposition is unknown because sufficient processing time has not elapsed. The actual disposition will appear on the report for the next month; that is, the bills will be shown under the columns headed "ACCEPT," "UTL ED INVEST," "ORBIT," or "REJECT." A pound sign (#) appears to the right of the number of bills reflected in this column if the bills in the batch are not included in the PS&R for the month.

REJECT
This is the total number of bills in the batch which were rejected for either consistency or utilization error, as of the end of the report month.

HCFA BLOCK (HCFA Master Block Number)
This column shows the 5-position master block number (HCFA's control number) for every batch listed except missing batches and batch numbers that have been voided. The first four positions of the master block number are the current Julian date. The fifth position identifies the type of bill according to the following: "L" for inpatient or skilled nursing facility, "M" for void bills, "N" for Christian Science, "Q" for home health, "P" for outpatient, and "R" for final nonpayment bills. For batch numbers that have been voided, a 1-position year and a 3-position Julian date appear in this column representing the date HCFA electronically processed the voiding action. For a missing batch, no entry appears in this column.

SUBTOTALS
Subtotals for batches submitted are broken down by each year. Also, accumulative subtotals for all years are listed.

GRAND TOTAL
At the end of the report for each intermediary, a grand total is shown.

MISSING BATCHES
A separate line will show the total and percentage for the following categories:

1. Batches missing 1 - 3 months,
2. Batches missing 4 months or more,
3. Total number of missing batches,
4. Percentage of the total missing less than 4 months.

These figures are provided monthly so that you can determine, on a current basis, if you are in compliance with established performance criteria.

3842.1 Intermediary Action Upon Receipt of Monthly Batch Status Report.—If your records show that one or more batch records (see § 3830) have not been received, flag the missing notice for followup 60 days after receipt of the first batch status report showing that HCFA has released a given number of interim batch records or a final batch record for that batch. It is important that a thorough internal check be made for the batch notice before requesting another one from HCFA. The HCFA search is time consuming and unnecessary requests may result in further delays.

If the batch notice is not located, complete Form Letter "A" to request batch clearance information (see the exhibits of form letter "A" which follow this section for the method of completion and for reproduction purposes). In completing form letter "A," batches should be listed in order by the year that they were sent to HCFA. Also show the master block number (if available), batch number, and date of batching. (The date of batching is indicated as the 3-digit Julian date preceded by the last digit of the year, e.g., January 10, 1981, is listed 1010.) All of this identifying data is normally available from the batch status report.

Upon receipt of Form Letter "A," HCFA will furnish, on hardcopy for pending batches, a special interim batch record which displays the current disposition of all bills in the batch. If the batch has cleared and no more than 18 calendar months have elapsed since the date of the clearance, HCFA furnishes a special final batch record. Make certain that requests for special batch records are submitted to HCFA within the time limitation of 18 calendar months to insure receipt of the notices. However, if HCFA's records show that the batch was cleared 18 calendar months or more prior to the request for the special batch record, you will receive a batch record which lists summary totals but not itemized individual bills within the batch. Under the "remarks" column of the special batch notice, two electronical messages will be displayed: "Batch Cert." MM/DD/YY and "Cert. Over 18 Months." Both special interim and final batch records are produced once a month for those Letter "A's received prior to the scheduled run date.

In some instances, you will receive batch records which contain no bill processing data. However, under the "remarks" column will appear one of the following messages:

Batch Out of Balance
Over 90 bills
Misbatched

These messages represent internal situations that have displayed processing of the batch(es) in question. These situations must be clerically resolved within HCFA before a batch record(s) can be furnished. No intermediary action need be taken upon receipt of batch records bearing there messages.

In addition, there are other specific messages that may appear under the "remarks" column of the batch record. They are:

NIF (No record of receipt of this batch)
VOID (Batch number has been previously voided)
Batch Cert. MM/DD/YY (If HCFA's records show that the batch was cleared 18 calendar months or more prior to the request for the special batch record, the intermediary will receive a batch record which lists summary totals for the batch but does not itemize individual bills within the batch)

If HCFA has not replied within 60 days, resubmit the request showing "second request" and the date of the prior request in red on the right hand corner of the request.

NOTE: Once the batch status report specifies that a particular batch has cleared, the batch is not listed on subsequent batch status reports.

Master Block Number	Batch Number	Date Batched

3843. DESCRIPTION OF DATA APPEARING ON HARDCOPY BATCH CLEARANCE RECORD OBTAINED VIA "LETTER A."

A. Identification Data.--

1. Intermediary.--The intermediary identification is obtained from the original magnetic tape record submitted by the intermediary.

2. Batch Number.--The intermediary batch number assigned and the date batched by the intermediary.

3. Type of Notice.--HCFA enters "INTERIM" or "FINAL" and the number of notices produced to date.

4. Date of Notice.--This is the date the interim or final batch record is prepared by HCFA.

5. Type of Bill.--The following entries are possible:

INP/SNF	-bills for inpatient hospital or skilled nursing facility care
OUTPAT	-bills for outpatient care reimbursed under either Part A or B
CH SCI	-bills for Christian Science Sanatorium care
HH	-bills for home health agency care reimbursed under either Part A or B
NON COV	-bills (from all providers) for noncovered care
VOID	-previously submitted and rejected bills (from all providers) which are being voided

6. HCFA Master Block Number.-- The master block number assigned by HCFA will be shown. It is HCFA's control number and its reference in communications with HCFA will speed the processing of replies.

B. Batch Summary Data.--

7. Submission Totals.--The total number of bills (items) submitted by the intermediary and the total reimbursement amount for those bills are shown. This information is taken from your magnetic tape record.

8. HCFA Receipt Totals.--The number of bills (items) and the reimbursement amount actually received by HCFA are shown. The amounts shown should always equal the totals of the items titled "HCFA Accepted Totals, HCFA deleted Totals and HCFA Pending Totals."

9. Out-of Balance Amount.--The difference between the total number of bills and reimbursement amount reported (Intermediary Submission Totals) and the total number of bills received (counted by HCFA) and their total reimbursement amount (HCFA receipt Totals) will be provided.

If the number of bills received by HCFA does not agree with the number of bills shown on the intermediary's batch summary record, locate the missing or extra bill(s). If HCFA received fewer bills than shown on the intermediary batch summary record, resubmit the missing bill(s) in a new batch. If HCFA received more bills than shown on the intermediary batch summary records only.

10. HCFA Accepted Totals.--This is the total number of bills and the total amount of reimbursement of the bills in the batch posted by HCFA to its records as of the date the batch clearance record was prepared.

11. HCFA Deleted Totals.--This is the total number of bills and reimbursement amounts for bills returned to the intermediary by HCFA for corrections as of the date the batch clearance record was prepared.

12. HCFA Pending Totals.--This is the total number of bills (items) and the total reimbursement amount for bills still pending a final decision by HCFA.

The difference that remains after subtracting "HCFA ACCEPTED TOTALS" plus "HCFA DELETED TOTALS" from "HCFA RECEIPT TOTALS" should equal this total. If the clearance is final, that is, no bills remain to be processed (all bills either accepted or deleted) zeroes will be shown for this total. Pending bills are those bills that cannot be processed either because a bill which is needed to close an earlier open item has not been processed ("in orbit") or it requires extensive investigation ("under investigation").

13. Remarks.--One or more of the following legends can appear under remarks:

a. POSS PREV CERT.--This remark appears on a batch record when the batch may have been erroneously certified in the past. In April 1970, HCFA validated its batch control system and found that some batches which had been certified still had items pending (in orbit or under investigation). If the batch has been reopened for this reason, POSS PREV CERT is shown.

b. *RETURNED PREVIOUSLY.--This remark appears on a final batch record. Each bill which was previously returned or shown as automatically corrected on an earlier batch record has an asterisk (*) next to the sequence number.

c. REC'D OUT OF BALANCE.--This remark appears on a batch record when the intermediary totals (items, money, or both) disagree with HCFA's computed totals.

d. SPECIAL INTERIM/SPECIAL FINAL.—This remark appears to identify the record as a special interim or final batch record requested under the "Letter A" procedure outlined in § 3842.1 - hardcopy interim or final batch records are produced only on the basis of "Letter A" requests.

C. INDIVIDUAL BILLING DATA.—If the special batch record is an interim notice, all bills submitted in the batch are listed in the following order: all bills accepted by HCFA, all bills deleted by HCFA, and all bills which are pending. If the notice is a special final batch record, it lists all bills in the batch accepted by HCFA followed by bills in the batch deleted by HCFA.

14. Sequence Number.—This is a 2-digit number assigned by HCFA for control of each bill in the batch.

15. HI Claim Number.—The HI claim number is entered as shown in the billing data.

16. Surname.—The beneficiary's surname appears as shown in the billing data (six positions only).

17. Billing From Date.—The from date or first date of the billing period is shown as it is shown in the billing data.

18. Reimbursement Amount.—This is the amount of reimbursement reported in the billing data even if the billing data is automatically corrected and reinstated by HCFA. The reimbursement for HCFA corrected bills can be determined as follows:

a. Overapplied Part A cash deductible.—Subtract the adjusted deductible from the original deductible and add the difference to the reimbursement amount originally reflected for this item. The total represents what should have been reimbursed to the provider. Both the original and adjusted Part A cash deductibles are shown with the miscellaneous data. Any overapplied deductible amount must be refunded to the beneficiary or other party that paid the deductible. Make the refund in accordance with §§ 3401ff.

b. Overapplied Part A blood deductible.—Subtract the adjusted blood deductible pints from the original blood deductible pints and multiply the difference by the charge per pint. Add the product to the reimbursement amount originally shown to compute what should have been reimbursed to the provider. Both the original blood deductible pints applied, the adjusted blood deductible pints applied, and the applicable charge per pint are shown with the miscellaneous data. Any overapplied deductible charges must be refunded to the beneficiary or other party that paid the deductible. Make the refund in accordance with SS 3401ff.

c. Underapplied Part A blood deductible.—Subtract the original blood deductible pints from the adjusted blood deductible pints and multiply the difference by the charge per pint. Subtract the product from the reimbursement amount originally shown to compute what should have been reimbursed to the provider. Both the original blood deductible pints applied, the adjusted blood deductible pints applied, and the applicable charge per pint are shown with the miscellaneous data. Recoupment of the difference in blood pint charges should be processed in accordance with SS 3707-3714.4.

d. Overutilization of full reimbursement days.—Subtract the original nonlifetime coinsurance days from the HCFA adjusted nonlifetime coinsurance days and multiply the difference by the coinsurance rate shown with the miscellaneous data when the rate calculated by HCFA is the same as that shown on the bill. Subtract the result from the reimbursement amount originally reflected here to compute what should have been reimbursed to the provider. Both the original coinsurance days, if any, and the adjusted nonlifetime coinsurance days are shown with the miscellaneous data. Recoupment of the undercollected coinsurance amount should be processed in accordance with SS 3707-3714.4. When HCFA shows a rate that is different than that shown on the bill, recalculate the nonlifetime coinsurance amount by using the new rate established by HCFA and then recompute the new reimbursement amount. The refund or recoupment, whichever is applicable, should be made in accordance with SS 3707-3714.4 and S 3401ff.

e. Underutilization of nonlifetime coinsurance days.—Subtract the original nonlifetime coinsurance days from the HCFA adjusted nonlifetime coinsurance days and multiply the difference by the coinsurance rate shown with the miscellaneous data when the coinsurance rate calculated by HCFA agrees with the original rate shown on the bill.

Add the result to the reimbursement amount originally reflected to compute what should have been reimbursed to the provider. Both the original nonlifetime coinsurance days, if any, and the adjusted nonlifetime coinsurance days are shown with the miscellaneous data. Refund any coinsurance amounts overcollected from the beneficiary or other party that paid the deductibles in accordance with SS 3401ff. When HCFA shows a rate that is different than that shown on the bill, recalculate the nonlifetime coinsurance amount by using the new rate established by HCFA, recalculate the new lifetime coinsurance amount for the benefit period, and then recompute the new reimbursement.

f. Not entitled to type (Part A or Part B) of home health visits on billing.—The automatic correction does not affect the amount of reimbursement since the total number of visits are not subject to correction only the type of visits ("A" or "B") applied are subject to change.

19. Process Code.—These codes indicated the status of each bill as follows:

Code	Explanation
AAAA	Accepted
RRRR	Bill is in orbit
HHHH	Bill is under investigation
Blank	REJECTED - TEST CLAIM
7000 SERIES	Bill has been automatically corrected

A list and explanation of error codes for bills deleted and returned to the intermediary and automatic correction codes are shown in §§ 3824-3828ff.

20. Corrected HI Claim Number.—If HCFA processed the bill under a different (corrected) claim number than the number shown by the intermediary, the corrected number appears in this item, preceded by a code which indicates the reason it was changed. The codes are "X" for cross-referred and "C" for correction.

This situation occurs when an intermediary did not correct the claim number on a bill based on the query reply, or when HCFA records a number change after an intermediary has queried an admission. Usually, a number change results from a divorce or remarriage of a beneficiary. Upon receipt of a corrected number, be sure to correct your record.

21. Miscellaneous Billing Data.—The following are possible entries which may appear in this item. The entry applies only to the bill on that line. This field is used in conjunction with the Process Code (Field 10 on the Batch Clearance detail record) to give the intermediary additional information on the disposition of the bill. On the Batch Clearance tape record this data is indicated by codes located in positions 68 through 71. A maximum of four codes can be contained in the tape record for each bill.

NAME/# DIS	When received in conjunction with a consistency edit error code, it alerts the intermediary to the fact that the name and HIC number transmitted do not match any on the Health Insurance Master Record. In addition to correcting the consistency error, the intermediary must also resolve this problem before resubmitting. Otherwise, a utilization error will result. (Code 1 on the tape record.)

NO OPEN ITEM	Given in conjunction with a process code indicating the bill is being rejected for a consistency or utilization error. It signifies no query has been received for the admission date shown on the bill, and no open item is being placed on the Admission Control record as a result of this bill. Therefore, for these bills only, no delete query is required if the intermediary corrects the admission date. However, this rejected bill is placed on the RTI Control file, and a correction or void bill is required. The intermediary should verify that the admission date transmitted to Medicare was correct, query if necessary, and otherwise take appropriate action to transmit correct data to Medicare. This code will not apply to Home Health bills. (Code 2 on the tape record.)
NO PART A	Medicare records show no entitlement to Part A benefits. (Code 3 on the tape record.)
NO PART B	Medicare records show no entitlement to Part B benefits, (Code 4 on the tape record.)
MISBATCHED	An initial bill was submitted in a correction batch or a correction bill was submitted in an initial batch (see entry in "TYPE OF BILL"). This code will not apply for batches submitted after September 1, 1979, inasmuch as correction and initial bills will be in the same batch after that time. (Code 5 on the tape record.)
PURGED	Used in conjunction with process code AAAA. The previously rejected bill has been purged due to age. Beneficiary Utilization record has been updated (see § 3837). (Code 6 on the tape record.)

GEN OPEN ITEM	Used with process codes AAAA, HHHH, or RRRR whenever the hospital of SNF bill received contains an admission date which has not been queried. It is intended to alert the intermediary to a possible error. When this code accompanies a bill which is not the initial bill for a stay (i.e., admission and from dates are not equal), it will indicate that not only was the admission date not queried, but HCFA has not received any earlier bills for this stay. Intermediary should status query to determine whether the admission date transmitted is correct and take appropriate corrective action if required. (See also § 3831.1, Item 110. C and G trailers.) (Code 7 on the tape record.)
TOLERANCE (Money Amount)	- (a) Total covered charges of less than $50 are shown on HCFA-1453, HCFA-1486, HCFA-1483, HCFA-1487, or equivalent tape format and HCFA's records indicate that the deductible has not been met. - (b) Total charges on the bill exceed the deductible applied on the bill, HCFA records show that less than $50 of the inpatient or calendar year deductible, whichever is applicable to the particular billing, remains to be met, and in the case of a HCFA-1453, a code "A" does not appear in location 81 of the tape format (19V of the HCFA-1453) indicating physician charges not includable with the deductible. (See § 3620, Item 19V, example 3.) - (c) The sum of payment distributions (item 25, provider and patient block amounts combined) on a HCFA-1483 are equal to less than $50. The exact amount of the deductible to be met for a bill accepted under (a), (b), or (c) should be obtained from the most recent HCFA response to a query for the involved bill.
(Date of Death Death, Home Health Part A or B or Outpatient)	-(a) The through and discharge dates of a Part A or Part B home health or outpatient bill will be overlaid with the HI date of death, if the home health bill through date is the last day of the month, and the HI date of death is prior to the bill through date, but is equal on month and year, or the outpatient bill through date is equal on month and year.

best copy available

-(b) If the bill fails any subsequent edits, the bill will be returned to the intermediary for the appropriate reason. No automatic adjustment routines will be applied to these bills. The bill through and discharge dates will contain the HI date of death that overlaid the original through and discharge dates submitted by the intermediary.

See § 3930.1E, Batch Clearance Detail Record, fields 18 and 19 for additional details regarding both tolerances.

Missing Batch Report

3844. QUARTERLY MISSING BATCH REPORT

A. HCFA provides intermediaries quarterly, a Missing Batch Report. The report is prepared upon completion of the Batch Status operations in the last month of each quarter.

The report is prepared in conjunction with Part A Statistical Standards. The established performance criteria requires that no more than 2 percent of all missing batches be missing more than 3 months; i.e., the percentage shown on item 4 must be at least 98 in order to be in compliance.

Statistics are provided monthly on the last page of your Batch Status Report in order that you may determine on a current basis whether or not you are in compliance with the performance criteria. See § 3842 for actions you should take when you have missing batches.

B. Description of Items on Missing Batch Report.—The Missing Batch Report is broken down into the following categories:

1. Number of batches missing 1-3 months.
2. Number of batches missing 4 months or more.
3. Total number of missing batches.
4. Percentage of the total missing batches that are missing less than 4 months.

The above four categories will be shown for:

1. Individual intermediary numbers.
2. Regional totals - totals for all intermediary numbers within your Medicare region.
3. National totals - totals for all intermediary numbers.

3845. BILL ERROR REPORT

This report is furnished to all intermediaries on a quarterly basis. Three reports are provided. One for INPATIENT HOSPITAL and SKILLED NURSING FACILITY billings, one for HOME HEALTH and OUTPATIENT billings, and for HOSPICE billings. The report is divided into three distinct parts and the bill processing data is shown for the last four quarters (includes the most recent quarter). Examples of these parts follow:

PART I (TYPE OF BILLING)

	QUARTER	PERCENT	LAST 4 QUARTERS	PERCENT
NATIONAL (9)				
BILLS REVIEWED	2,761,846	100.0	10,750,917	100.0
BILL ERRORS	62,816	2.3	226,577	.2
**CONSISTENCY	3,692	.1	16,230	.2
*UTILIZATION	59,124	2.1	210,347	2.0
INTERMEDIARY (10)				
BILLS REVIEWED	50,263 (1)	100.0 (5)	185,096	100.0
BILL ERRORS	797 (2)	1.6 (6)	2,860	1.5
**CONSISTENCY	4 (3)	.0 (7)	14	.0
*UTILIZATION	793 (4)	1.6 (8)	2,846	1.5

EXPLANATION

(1) - This figure represents the number of bills reviewed (processed by HCFA).
(2) - This figure represents the number of bills returned (deleted).
(3) - Of the bills returned, this represents consistency errors.
(4) - Of the bills returned, this represents utilization errors.
(5) - This is the percentage of bills reviewed.
(6) - This is the percentage (rounded) of returned bills.
(7) - Percentage (rounded) of bills returned for consistency errors.
(8) - Percentage (rounded) of bills returned for utilization errors.
(9) - The figures are the totals for all intermediaries in the United States.
(10)- The figures are the totals for the intermediary for which the report is prepared.

*Includes bills automatically corrected by HCFA.
**Consistency edits performed on the face of the bill only.

PART II CONSISTENCY CODES (SEE §3825.1***)

CODE	QUARTER	PERCENT	LAST 4 QUARTERS	PERCENT
19X2	1 (1)	.0 (2)	4 (3)	.0 (4)
2802	2	.0	5	.0
3211	0	.0	5	.0
MULT	1 (5)	.0	1	.0

EXPLANATION

(1) - This figure represents the number of bills that failed the 19X2 edit.
(2) - Percentage (rounded) of bills returned for this error during the quarter.
(3) - Number of bills that failed the edit during the last 4 quarters.
(4) - Percentage (rounded) of bills that failed the edit during the last 4 quarters.
(5) - If more than 1 error, "MULT" (multiple) appears instead of code.

PART III UTILIZATION CODES (SEE §3828FF***)

CODE	QUARTER	PERCENT	LAST 4 QUARTERS	PERCENT
5052	9	.0	26	.0
5200	2	.0	2	.0
5211	53 (1)	.1 (2)	247 (3)	.1 (4)

EXPLANATION

(1) - This figure represents the number of bills that failed the 5211 edit.
(2) - Percentage (rounded) of bills returned for this error during the quarter.
(3) - Number of bills that failed the edit during the last 4 quarters.
(4) - Percentage (rounded) of bills that failed the edit during the last 4 quarters.

***Section of Medicare Intermediary Manual containing narrative for code.

PART II and III data pertains to the intermediary for which the report is prepared.

3850. PROVIDER SPECIFIC PAYMENT DATA

Submit a file of Provider Specific Payment Data to CO on a quarterly basis within 15 calendar days after the end of the quarter being reported. Submit this file for PPS and non-PPS hospitals, including hospitals in waiver States. Create a new record any time a change occurs for a provider.

A. PPS Hospitals.—Quarterly, submit all records (past and current) for all PPS providers. Duplicate the provider file used in the "Pricer" module of your claims processing system.

B. Non-PPS Hospitals and Exempt Units.—Create a provider specific history file using the listed data elements for each non-PPS hospital and exempt hospital unit. Quarterly, submit only the current and the preceding fiscal years. If you want to maintain the record for non-PPS hospitals and units in your Pricer PROV file, code Y in position 13.

Use magnetic tape to submit the files.

Send a paper listing copy to your RO.

If you service providers outside of your area, submit a hardcopy of the file to the RO in which the facility is located. (For example, Mutual submits hardcopy of the file to Denver, San Francisco, Atlanta, and Dallas ROs.)

Exception: The intermediary servicing Indian Health Facilities need submit a hardcopy of the file only to the Dallas RO.

Send file to:

Health Care Financing Administration
Provider-Specific Data for Quarter Ending xx/xx/xx
Job OCPSF
Data Quality and Documentation Branch, BDMS
G-D-2 Meadows East Bldg.
6325 Security Blvd.
Baltimore, MD 21207

3850.1 Physical File Specifications - Magnetic Tape.—Tape Characteristics -9 Track, 8 1/2" to 10 1/2" reels with silver mylar reflector with write ring removed.

Parity - Odd

Recording Density - 1600 bytes per inch.

Recording Mode - EBCDIC

File Label - None. The first data record on the file contains the acronym PROSPEC in the first seven positions of the record, blanks in the remaining 153 positions, and serves as a file label. The tape must have an end of file mark.

Logical Record Length - 160 characters.
Block Size: 1600 characters, i.e., a blocking factor of 10.
Unfilled Final Block - Fill with nines.

The external label on the reel must appear as follows:

From (Intermediary Number) To HCFA--BSS,OCO,Job#OCPSF
Provider Specific Payment Data Recording Density 1600 BPI
Date Tape Created (MMDDYY)

3850.2 Provider Specific Data Record Layout and Description.--Complete all fields for PPS hospitals by duplicating the PROV file in Pricer. The data requirements are identified. Complete all fields for non-PPS hospitals and distinct part exempt units as below. This instruction does not apply to SNFs and HHAs.

Field	Format	Location	Coding and Edits
1. Provider No.	X(6)	1-6	Alpha/Numeric - Cross check to item 4 provider type. Positions 3 and 4 of:

Provider Number	Type (see field 4.
00-08	Blanks, 00, 01, or 07-11
12	12
20-22	02
30	04
33	05
40-44	03

Codes for special units S, T, U, or V are in the third position of the provider number and should be type 06 (hospital distinct parts).

Field	Format	Location	Coding and Edits
2. Effective Date	9(6)	7-12	Date of latest change(s) YYMMDD (numeric) year greater than 82, but not greater than current year. Month 01-12, Day 01-31. (See §3656.3 for definition.)
3. Waiver Code	X	13	Provider waived from PPS? Must be Y (yes) or N (no).

Field	Format	Location	Coding and Edits
			Y = Hospital is not under PPS N = Hospital is under PPS
4. Provider Type	XX	14-15	Must be blank or 00-12 blanks or 00 = short term facility 01 = Sole Community 02 = Long Term 03 = Psychiatric 04 = Rehabilitation Facility 05 = Pediatric 06 = Hospital Distinct Parts 07 = Referral Center 08 = Indian Health Center 09 = Redesignated rural - year 1 10 = Redesignated rural - year 2 11 = Sole Community/referral center 12 = Alcohol facility
5. Census Division	9	16	Must be numeric (1-9) The census division to which the facility belongs for payment purposes. Use to select the payment rates. See §3656.3 for valid codes.
6. PPS Blend Period	9	17	For PPS hospitals, report the data in position 17 of your Pricer PROV file. For non-PPS hospitals, enter zero. Must be blank or 0-6.
7. Metropolitan Statistical Area	9(4)	18-21	Must be numeric 9999 if rural or MSA # 0040 - 9340.
8. Fiscal Year End	9(6)	22-27	Must be month, day, and year (MMDDYY) (numeric) Month: 01-12 Day: 01-31 Year: Greater than 82, but not more than 1 year greater than the current year.
9. Case Mix Adjusted Cost Per Discharge	9(5)V99	28-34	For PPS hospitals and waiver State nonexcluded hospitals, enter the PPS base year cost per discharge divided by the case mix index. For excluded hospitals enter the cost per

Field	Format	Location	Coding and Edits
			discharge for the preceding cost reporting period shown in item 8. Verify if figure is less than $400 or greater than $10,000.
10. Cost of Living Adjustment	9V999	35-38	For PPS hospitals report the adjustment in these positions of your PROV file. See §3656.3 for non-PPS hospitals. See §3656.3, file positions 35-38 for acceptable values.
11. Intern-bed ratio	9V9(4)	39-43	For PPS hospitals, include the ratio from your Pricer PROV file. For non-PPS hospitals, calculate as you would for PPS hospitals. See §3656.3D for the calculation.
12. Special Provider Update Factor	9V9(5)	44-49	For PPS hospitals, include the factor, if any, from your PROV file. For non-PPS hospitals, enter zero. (See §3656.3)
13. Hospital Beds	9(5)	50-54	Enter the number of hospital beds available. See §3656.3D for definition. Must be greater than zero.
14. Disproportionate Share Percentage	V9(4)	55-58	For PPS hospitals, include the disproportionate share adjustment percentage in position 55-58 in your PROV file. Acceptable range is .0000-.9999. (See §3656.3)
15. Cost to Charge Ratio	9V999	59-62	Derived from latest settled cost report and corresponding charge data from the billing file. Compute this amount by dividing the Medicare Operating Cost (from the cost report) by the Medicare Covered Charge (from the billing file, i.e., the PS&R record). For hospitals

Field	Format	Location	Coding and Edits
			which you are unable to compute a reasonable cost-to-charge ratio, use the appropriate urban or rural statewide average cost-to-charge ratio calculated annually by HCFA. Use these average ratios to calculate cost outlier payments for hospitals where you compute cost-to-charge ratios lower than 0.35 or greater than 1.25. (See §3656.3)
16. Case Mix Index	9V9(4)	63-67	For PPS hospitals, enter the case mix index used to compute field 9. Enter zero for all others.
17. Filler	X	68	Blank
18. Report Date	9(6)	69-74	Must be MMDDYY Date file created.
19. Filler	X	75	Blank
20. Intermediary number	X(5)	76-80	Assigned intermediary number
21. Fiscal Year Beginning Date	9(6)	81-86	Must be numeric (MMDDYY) Month: 01-12 Day: 01-31 Year: Greater than 81 but not greater than the current year.
22. Pass Thru Amount for Capital	9(4)V99	87-92	Per diem amount based on the interim payments to the hospital.
23. Pass Thru Amount For Direct Medical Education	9(4)V99	93-98	Per diem amount based on the interim payments to the hospital.
24. Pass Thru Amount for Organ Acquistion	9(4)V99	99-104	Per diem amount based on the interim payments to the hospital.
25. Total Pass Thru Amount, Including Miscellaneous	9(4)V99	105-110	Per diem amount based on the interim payments to the hospital.

Field	Format	Location	Coding and Edits
26. Supplemental Security Income Ratio	V9(4)	111-114	SSI ratio used to to determine if the hospital qualifies for the disproportionate share adjustment.
27. Medicaid Ratio	V9(4)	115-118	Medicaid ratio used to to determine if the hospital qualifies for the disproportionate share adjustment.
28. Filler	9(42)	119-160	Blank

3850.3 Intermediary Responsibilities.—Create a new record when a change occurs for a provider. You may have multiple records for a single provider within a quarter.

Prior to submitting the file to HCFA, print and review the data. Edit all items for accuracy and correct any errors before submitting the file. Some edit examples:

- Effective date other than YYMMDD.
- Facility has two or more records with different provider numbers for the same month.
- Non-PPS facility with incorrect provider type.
- Incorrect census division for a redesignated facility.
- MSA field with other than 9999 for a rural provider.
- No FYE indicated.
- Questionable pattern of coding, e.g., all provider types in field 4 are identical, all case mix indexes in field 16 are identical.

Provider specific payment data must be received in CO within 15 calendar days of the end of the reporting period. The data will be evaluated based on the following criteria:

- Files conform to tape specifications;
- Files reflect data from all required providers; and
- Files are submitted in the correct record format.

CO will forward an error listing to you for corrections. Submit corrected data files to HCFA within 10 calendar days of notification.

evaluation do not submit another test tape until you are notified of the results of the prior test tape and any reported error situation(s) corrected. Notice that you should continue or discontinue testing is given by telephone, followed by written confirmation from BPO.

HCFA usually processes test tapes within 5 working days of receipt. HCFA will notify you of the results within 3 days after completion of the test. Address testing materials and related correspondence to:

Health Care Financing Administration
Division of Provider Procedures, BPO
Mail Stop 1-H-1
Meadows East Bldg.
Baltimore, MD 21207

3866.1 Number of Test Bills.-- A sufficient test consists of no fewer bills than:

100 Inpatient Hospital,
100 Inpatient SNF,
100 Outpatient Hospital,
100 Hospice,
100 Home Health,
100 CORF,
60 adjustment bills - for each bill type at least 5 of each of the following:
    CANCEL ONLY (all codes)
    DEBIT/CREDIT adjustments
30 RTI VOID claim records with a minimum of five of the bill types listed above,
30 RTI Correction Claim records, five for each bill type listed above,
25 Christian Science bills for intermediaries processing Christian Science claims.

You may submit additional claims of each type, but the length of time required to analyze the test results is directly proportional to the number of test claims submitted. Do not submit parallel production runs for this test.

3866.2 Recording Characteristics.-- 9 track, 1600 or 6250 BPI.

3867. OPERATIONAL PROCEDURES.

Operational billing tapes must comply with this specification. Label them with the prescribed external label (see § 3867.1) and send them to HCFA with a Summary Totals Report (see § 3867.2) for each operational tape reel you submit.

Address inquiries concerning systems operations, procedures, and/or performance of the operational system to HCFA. (See § 3866 for address.)

3867.1 Magnetic Tape Reel External Identification Label.-- Identify each reel of magnetic tape submitted for processing with an external label (form SSA-2589) prepared as follows:

File Code - Enter UNIBILL (Operational Tape)

Enter UNIBILT as appropriate (Test Tape)

Sub Code - Enter Your Identification Number

Oper. Code - Enter Date Created (MMDDYY)

Reel No. - Enter 1 of 1, 1 of 2, 2 of 2, . . . as appropriate (Multi-reel file). Leave blank or enter 1 of 1 (Single-reel file).

Control Identification:

FIRST	Enter first four characters of the batch number. (See § 3879.2.) If it is a multi-batch tape, enter the first four characters of the batch number of the first batch on the reel.
LAST	If it is a multi-batch tape, enter the first four characters of the batch number of the last batch on the reel. Otherwise blank.
MISC. DATA	Enter the reel control number. For test tapes, number the reels in sequential order, i.e., T-1, T-2, etc., for first, second, etc. tests. Number the operational reels produced during any given calendar year in sequential order, i.e., 1,2,....
RECORDING CHARACTERISTICS	Circle applicable recording characteristics (see § 3866.2)- density and number of tracks only. Mode need not be identified. The label does not provide for a density of 6250 BPI. Therefore, if your file is 6250 BPI, indicate that fact by entering "6250" directly above the portion of the label provided for indicating density.

3867.2 The Summary Totals Report.-- You are free to design a Summary Totals Report in a format suited to your equipment and method of operation.

Summary Totals Report must accompany each operational reel of tape submitted to SSA, and contain the following information;

SSA address;

Production date;

Your name, number and address;

Reel Number;

Batch Numbers;

Types of Batches;

Total number of batches;

Total number of bills in each batch;

Total number of bills in all batches;

Reimbursement amount for each batch; and

Total reimbursement amount (for all batches on the tape reel).

3867.3 File Retention.—Retain a copy of the UNIBILL file until receipt of the HCSSACL tape which indicates that the subject UNIBILL file has been received and processed by HCFA. If you have not received the related HCSSACL file within 20 days from the date HCFA received the UNIBILL file, contact the Division of Provider Procedures at the address shown in §3866.

Consistency Edits-Magnetic Tape File

3868. CONSISTENCY EDITS - ALL BILL TYPES.

Records must be in the correct order within the file.

Each record must contain a valid record identification code.

Each bill record must contain a valid action code.

Each bill record must be in the proper batch with batch number entered in the appropriate data block.

Each date must be a valid date in the valid format.

Each money field in file must be numeric and unsigned unless otherwise specified.

A valid Return to Intermediary (RTI) Control Number must be entered on each resubmitted RTI bill. For bills that are not RTIs this field is blank.

3869. CONSISTENCY EDITS - ADJUSTMENT BILLS.

Code each adjustment bill as follows:

It must contain an association code, "Xn" for Debit and Credit, where X equals A thru Z, and n equals 1 thru 9.

Both bills in a Debit-Credit adjustment action must be together in the same batch, and the patient's name, HICN, and association code the same on both bills.

NOTE: Both bills will be deleted if either is not present in the batch or is returned for correction.

A "Cancel Only" adjustment bill must contain a reason code of "C", "P", "S", "D", or "H".

The positions allocated for the adjustment bill codes must be blank for nonadjustment bill.

3870 ALPHABETIC GLOSSARY OF DATA ELEMENTS.

Data Element	Definition
Action Code	Indicates the type of action to take: 1 - Original Debit Action (Includes nonadjustment RTI correction items) 2 - Cancel by Credit Adjustment 3 - Secondary Debit Adjustment 4 - Cancel Only Adjustment 8 - Benefits Refused (For inpatient bills, an "R" nonpayment code must also be present.) 9 - Payment Requested (Used on bills that replace previously submitted benefits refused bills, Action Code 8. In such cases a debit/credit pair is not required. For inpatient bills, enter a "P" in the nonpayment code.)
Adjustment Code	
a. Cancel Only	Reason for cancelling previously submitted bill.
b. Filler	
c. Association Code	Code to associate debit/credit adjustments. A1=Credit, A1=Debit
Admission Date	The date the patient was admitted for inpatient care, outpatient service, or start of care. For an admission notice for hospice care, enter the effective date of election of hospice benefits.
Admitting Diagnosis Code	Code indicating patient's diagnosis at admission.
Attending Physician Number	Number of the licensed physician who would normally be expected to certify and recertify the medical necessity of the services rendered and/or who has primary responsibility for the patient's medical care and treatment.
Batch Number	Number of the batch in which this bill was submitted.
Batch Date	Date you batched this bill.
Birth Date	The patient's date of birth.
Blood Deductible Charge Per Pint	Average charge per pint for the blood pints used to satisfy the Medicare blood deductible.
Blood-Deductible Pints	The number of unreplaced pints of whole blood or units of packed red cells furnished for which the patient is responsible.
Blood-Furnished Pints	Total number of pints of whole blood or units of packed red cells furnished to the patient.

Data Element	Definition.
Blood-Replaced Pints	The total number of pints of whole blood or units of packed red cells furnished to the patient that have been replaced by, or on behalf of, the patient.
Blood-Unreplaced Pints	The number of pints of whole blood or units of packed red cells furnished to the patient that have not been replaced by, or on behalf of, the patient.
Charges	Charges pertaining to the related revenue code.
Condition Codes	Code(s) used to identify conditions relating to this bill that may affect payer processing. (Addendum C.)
Cost Report Days	Days credited to provider's PS&R Report as Medicare Days.
Date Approved	Date you adjudicated an initial bill or, for adjustment bills, date you processed the adjustment.
Date Care Started	For Home Health Claim, the first date the beneficiary used benefits for the current approved period of Home Health services.
Date of Service (Ancillaries Only)	The date the associated ancillary service as identified by the UB-82 revenue center code was delivered.
Date Received	Date you received the bill or the bill passed your edits if received via an interactive terminal for initial bills. For PRO adjustments, this is the later of the date you received the adjustment or the date you received a batch clearance notice on the original bill.
Diagnosis Code	The first of these codes is the ICD-9-CM diagnosis code describing the principal diagnosis (i.e., the condition established after study to be chiefly responsible for causing this hospitalization.) The remaining codes are the ICD-9-CM diagnosis codes corresponding to additional conditions that co-existed at the time of admission, or developed subsequently, and which had an effect on the treatment received or the length of stay.
Diagnosis Related Grouping	Code assigned to indicate the DRG to which this claim belongs for payment purposes. Applicable to hospital bills.
ESRD Method of Reimbursement	Code indicating whether ESRD covered services are reimbursed under Method 1 or Method 2. 1=Method 1, 2=Method 2, 0=Not ESRD

Data Element	Definition
First Year Coinsurance Days	The inpatient Medicare days occurring after the 60th day and before the 91st day in a single spell of illness. If bill spans two calendar years, this field contains the coinsurance days that occur in the first calendar year, otherwise it contains the total coinsurance days for the stay.
HCPCS Code	HCPCS stands for HCFA Common Procedure Coding System. It is an extention of the CPT-4 procedure coding system maintained by the AMA and used by Carriers to pay SMI claims and by Intermediaries to indicate diagnostic clinical laboratory tests. The diagnostic clinical laboratory codes that must be billed by hospitals are contained within the CPT-4 subset of HCPCS. Not required for inpatient bills.
HICN	Beneficiary's unique identification number assigned by Medicare. Enter the patient's Medicare number as on the Health Insurance Card, Certificate of Award, Utilization Notice, Temporary Eligibility Notice, Hospital Transfer Form, or as reported by the Social Security Office.
HMO Identification	A five position number identifying the HMO.
HMO Option Code	Code identifying the HMO option selected by the HMO. See §3555.1. If the "R" trailer is a "1" or a "2", the HMO is a cost basis HMO. If the "R" trailer is an "A", "B", or "C", the HMO is a risk basis HMO.
HMO Election Date	The effective date of the beneficiary's membership in the HMO.
HMO Termination Date	The effective date of the beneficiary's termination of membership in the HMO.
HMO Paid Code	A "1" in this position indicates an HMO paid this bill. Only required on inpatient bills.
Intermediary Number	Your Medicare identifying number.
Kron Indicator	Presence of a "1" in this field indicates that this bill starts a new spell of illness regardless of the contents of HCFA's utilization record.
Medicaid Provider Number	The number assigned to the provider by Medicaid.
Medical Record Number	Number assigned by the provider to the patient's records to assist in retrieval.

Data Element	Definition
Medicare Provider Number	The number assigned to the provider by Medicare.
Medicare Reimbursement Amount	Amount paid to the provider by Medicare for this claim. For non-DRG bills e.g., outpatient, SNF, HHA, and exempt hospitals, this is the amount determined from the bill regardless whether PIP is used for interim payment. For DRG bills, this is the amount paid (DRG and any blended rate). Do not include pass through per diem amounts related to DRG bills, such as capital expenditures or medical education that are paid separately.
NOTE:	The reimbursement amount is the amount after any deductions because Medicare is not the primary payer, or made to satisfy deductible or coinsurance. Set minus amounts to zero.
Noncovered Charges	Charges pertaining to the related UB-82 revenue code that are not covered by Medicare.
Nonpayment Code	Code indicating reason that no Medicare payment is made.
Non-Utilization Days	Days of care not chargeable to Medicare utilization.
NOU Code	1=Do Not Send NOU; 0=Send NOU
Number of Grace Days	Following the date of the PRO/UR denial determination, this is the number of days determined by the PRO/UR to be necessary to arrange for the patient's post discharge care.
Occurrence Code	A code defining a significant event relating to this bill that may affect processing.
Occurrence Date	Date associated with the Occurrence Code in the preceding field.
Occurrence Span Code	A code that identifies an event that relates to the payment of the claim.
Occurrence Span Date	The date related to the Occurrence Span Code shown in the preceding field.
Operating Physician Number	Number used by the provider to identify the operating physician in it's records.

Data Element	Definition
Over-ride Code	Code indicating special handling for a specific revenue center code.
Pass Thru Per Diem Rate	The pass thru per diem rate consists of the established reimbursable costs for the current year divided by the estimated Medicare days for the current year (all PPS bills). See Provider Reimbursement Manual §2405.2 for types of costs to include.
Patient Control Number	Patient's unique alphanumeric number assigned by the provider to facilitate retrieval of individual case records and posting of payment.
Patient Paid Excluding Blood	Amount provider reports that patient has paid toward the bill excluding payment for blood.
Patient Paid Toward Blood Deductible	Amount provider reports that patient has paid toward the blood deductible.
Patient Name	Patient's last name, first name, and middle initial.
Patient Status (At Thru Date)	A code indicating the patient's status as of the statement covers thru date.
Patient ZIP Code	ZIP code of patient's residence.
Payment Distribution	A breakout of the amount of reimbursement you paid to a. Provider, and b. Patient.
Prior Psych Days Used	The number of days the beneficiary used in a psychiatric facility in the 150 days immediately prior to Medicare entitlement and beyond.
Procedure Code	The first procedure code identifies the principal procedure performed during the period covered by this bill. The remaining codes, if any, identify the other procedures performed during the billing period.
Procedure Date	Date that each procedure indicated by the related code (preceding field) was performed.
PRO Processing Date	The processing date the PRO enters in field 18 of the PRO-Report (Pro Adjustment Record). (See §3674.5 D.)
PRO Control Number	The control number the PRO enters in field 19 of the PRO-Report (PRO Adjustment Record). (See §3674.5 D.)

Data Element	Definition
PRO Approval Indicator	An indicator describing the PRO determination.
PRO Approved Stay Dates	The first and last days approved where part of the stay had not been approved.
Rate	Rate for related inpatient accommodation. For clinical diagnostic laboratory services rendered to outpatients or non-patients, show the amount paid from the fee schedule.
ReAdmit Code	Indicates whether a hospital inpatient was admitted to this stay within seven days of discharge from an inpatient hospital. Y=Yes N=No
Record Identification Code (RIC)	Code you use to identify bill type e.g., inpatient hospital, outpatient hospital, SNF. See §3875.1 for a definition of valid codes.
Revenue Center Code	UB-82 revenue center code for the accommodation or service provided.
RTI Control Number	Number reported to you on bills returned by HCFA because an error on the bill record caused it to be not useable by the HCFA system. This number is used by HCFA to monitor your RTI bill processing.
Scheduled Payment Date	Date the check you issued is mailed, deposited by you in the provider's account or transferred electronically. For PIP claims and no payment bills, enter the scheduled payment date for payment bills in the same adjudication batch. For adjustments (action code 3 in position 2 of the record) enter the date you forward UNIBILL to HCFA.
Second Year Coinsurance Days	The inpatient Medicare days occurring after the 60th day and before the 91st day in a single spell of illness. If the bill spans two calendar years, this field contains the coinsurance days that occurred in the second calendar year, otherwise it contains zeroes.
Second Year Lifetime Reserve Days	Each beneficiary has a lifetime reserve of 60 additional days of inpatient hospital services after using 90 days of services during a spell of illness. If the bill spans two calendar years, this field contains the Lifetime Reserve Days that fall in the second year.

Data Element	Definition
Sex	The sex of the patient as recorded at date of admission, outpatient service, or start of care.
Source of Admission	A code indicating the source of this admission.
Statement Covers	The beginning and ending service dates of the period covered by this bill.
Total Lifetime Reserve Days	Each beneficiary has a lifetime reserve of 60 additional days of inpatient hospital services after using 90 days during a spell of illness. This item refers to the number of lifetime reserve days used by the beneficiary.
Treatment Authorization Code	A number or other indicator that designates that the treatment covered by this bill had been authorized by the payer.
Type of Admission	A code indicating the priority of this admission.
Type of Bill	A code reported by the provider indicating the specific type of bill (inpatient, outpatient, adjustments, voids, etc.)
Units (Days for Accommodations)	A quantitative measure of services rendered by revenue center category to, or for, the patient to include such items as accommodation days for accommodation revenue center codes and pints of blood, number of renal dialysis treatments, etc. for ancillary revenue center codes.
UB Code	Code indicating the means by which this bill was reported to you.
Utilization Days	Days of care chargeable to Medicare utilization.
Value Amount	Amount of money related to the associated value code.
Value Code	A code that identifies data of a monetary nature that is necessary for processing this claim as qualified by the payer organization.
Verified Patient Liability	Amount of money for which you determined the patient is liable involving Blood Deductible, Cash Deductible, Part B Coinsurance.

3871. CODING STRUCTURES

Data Element: Condition Codes

Data Definition: A code(s) used to identify conditions relating to this bill that may affect payer processing.

Code Structure:

Code	Code Title	Definition
02	Employment Related	Patient alleged that the medical condition causing this episode of care was due to environment/events resulting from employment.
04	HMO Enrollee	Medicare beneficiary is enrolled in an HMO.
07	Treatment of Non-terminal Condition for Hospice Patient.	The patient is a hospice enrollee, but the provider is not treating a terminal condition and is therefore requesting Medicare reimbursement.
08	Beneficiary Would Not Provide Information Concerning Other Insurance Coverage	Indicates that the beneficiary would not provide information concerning other insurance coverage.
09	Neither Patient nor Spouse is Employed	Indicates that in response to provider development questions, the patient and spouse have denied employment.
10	Patient and/or Spouse is Employed but no EGHP Coverage Exists	Indicates that in response to provider development questions, the patient and spouse have indicated that they are employed but hold no group coverage from an EGHP.
11	Disabled Beneficiary but no LGHP	Indicates that in response to provider development questions, the disabled beneficiary and/or family member has no group coverage from a LGHP.
17	Patient is Over 100 Years Old	Indicates that the patient is over 100 years old at date of admission or date of first service for outpatient services. Not used for electronic billing.
20	Beneficiary Requested Billing	The provider realizes the services on this bill are for a noncovered level of care or otherwise excluded from coverage, but the beneficiary has requested a formal determination of coverage by Medicare (or other primary payer).

21	Billing for Denial Notice	Code indicates that services are at a noncovered level of care or excluded, but the SNF or HHA is requesting a denial notice from Medicare in order to bill Medicaid or other insurances.
36	General Care Patient in a Special Unit	Patient temporarily placed in special care unit bed because no general care beds were available.
37	Ward Accommodation-Patient's Request	Patient assigned to ward accommodations at patient's request.
38	Semi-Private Room Not Available	Indicates that either private or ward accommodations assigned because semi-private accommodations were not available.
39	Private Room Medically Necessary	Patient needed a private room for medical reasons.
40	Same Day Transfer	Patient transferred to another facility before midnight of the day of admission.
55	SNF Bed Not Available	The patient's SNF admission was delayed more than 30 days after hospital discharge because an SNF bed was not available.
56	Medical Appropriateness	Patient's SNF admission was delayed more than 30 days after hospital discharge because the physical condition made it inappropriate to begin active care within that period.
57	SNF Readmission	Patient previously received Medicare covered SNF care within 30 days of the current SNF admission.

Codes 60-65 are not reported by providers. You must enter the code where applicable.

60	Day Outlier	This bill meets the Pricer criteria for day outlier.
61	Cost Outlier	This bill meets the Pricer criteria for cost outlier.
62	PIP Bill	This bill is a PIP bill.
63	PRO Denial Received Before Batch Clearance Report	The "Date Received" on a PRO adjustment bill is the date the HCSSACL file was received that reports acceptance of the original bill by HCFA. The HCSSACL receipt date is used if the PRO's notification is earlier than the acceptance report of the original bill.
64	Other Than Clean Claim	The claim is not a "clean claim."
65	Non-PPS Code	This bill is not a PPS bill.

66	Outlier Not Claimed	Bill may meet the criteria for cost outlier, but the hospital did not claim the cost outlier.
67-70		Reserved.

RENAL DIALYSIS SETTING

71	Full Care In Unit	Billing is for a patient who received staff assisted dialysis services in a hospital or renal dialysis facility.
72	Self Care in Unit	Billing is for a patient who managed his own dialysis services without staff assistance in a hospital or renal dialysis facility.
73	Self Care Training	Billing is for special dialysis services where the patient and helper (if necessary) were learning to perform dialysis.
74	Home	Billing is for a patient who received dialysis services at home but where code 75 below does not apply.
75	Home - 100-Percent Reimbursement	Billing is for a patient who received dialysis services at home using a dialysis machine payed for by Medicare under the 100 percent program.
76	Back-up Facility	Billing is for a patient who received dialysis services in a back-up facility.
77	Provider Accepts or is Obligated/ Required due to Contractual Agreement or Law to Accept Payment by a Primary Payer as Payment in Full	Indicates the provider has accepted or is obligated/required due to a contractual agreement or law to accept payment as payment in full.
79	CORF Services Provided Off Site	Indicates that physical therapy, occupational therapy, or speech pathology services were provided off site.

Data Element: Nonpayment Codes

Definition: Code indicating the reason for nonpayment.

B	Benefits exhausted.
E	HMO out-of-plan services not emergency or urgently needed.
C	Noncovered Care (includes all "bene at fault" waiver cases).
N	All other reasons for nonpayment.
R	Benefits Refused, or evidence not submitted.
P	Payment Requested.

Data Element: Occurrence codes

Definition: A code defining a significant event relating to this bill that may affect payer processing.

ACCIDENT RELATED CODES

01	Auto Accident	The date of an auto accident.
02	Auto Accident/ No Fault Insurance Involved	The date of an accident where the State has applicable no fault liability laws, (i.e., legal basis for settlement without admission or proof of guilt).
03	Accident/Tort Liability	The date of an accident resulting from a third party's action that may involve a civil court process in an attempt to require payment by the third party, other than no fault liability.
04	Accident/Employment Related	The date of an accident relating to the patient's employment.
05	Other Accident	The date of an accident not described by the above codes.
11	Onset of Symptoms/Illness	The date the patient first became aware of symptoms/illness.

INSURANCE RELATED CODES

18	Date of Retirement Patient/Beneficiary	The date of retirement for the patient/beneficiary.
19	Date of Retirement Spouse	The date of retirement for the patient's spouse.
20	Guarantee of Payment Began	The date on which the provider began claiming Medicare payment under the guarantee of payment provision.
21	PRO Notice Received	The date of receipt by the hospital or SNF of the PRO's finding that an admission or further stay was not medically necessary.
22	Active Care Ended	The date on which a covered level of care ended in a SNF or general hospital, or date active care ended in a psychiatric or tuberculosis hospital.

		Code not required where PRO approval indicator (Field 62 of the Inpatient UNIBILL record) contains a code.
23	Benefits Exhausted	The last date for which benefits can be paid.
24	Date Insurance Denied	The date the insurer's denial of coverage was received by the provider.
26	Date SNF Bed Available	The date on which a SNF bed became available to a hospital inpatient who required only SNF level of care.
27	Date HHA Plan established or last reviewed	The date a home health plan of treatment was established or last reviewed for home health care.
28	Date CORF Plan established or last reviewed	The date a CORF plan of treatment was established or last reviewed.
29	Date OPT Plan established or last reviewed	The date a plan of treatment was established or last reviewed for OPT.
30	Date Speech Pathology Plan established or last reviewed	The date a Speech Pathology Plan plan of treatment was established or last reviewed.
31	Date Beneficiary Notified of intent to bill (Accommodations)	The date of the notice provided to the patient by the hospital stating that he no longer required a covered level of inpatient care.

32	Date Beneficiary Notified of intent to bill (procedures or treatment)	The date of the notice provided to the patient by the hospital stating that requested care (diagnostic procedures or treatments) is not considered reasonable or necessary by Medicare.

SERVICE RELATED CODES

33	First Month of the 12 Month Coordination Period for ESRD Beneficiaries Covered by EGHP	Code indicates the first day of the first month of the 12 month period, as defined in S3490.2D, during which Medicare benefits are secondary to benefits payable under an EGHP. Required only for ESRD beneficiaries.
34	Date of Election of Extended Care Services	The date the guest elected to receive extended care services (used by Christian Science Sanatoria only).
35	Date Treatment Started	Code indicates the date treatment began for the therapies.
36	Date of Inpatient Hospital Discharge for Transplant Procedure	Code indicates the date of discharge for the inpatient hospital stay in which the patient received a transplant procedure when the hospital is billing for immunosuppressive drugs.
42	Date of Discharge	For the final bill for hospice care, enter the date the Medicare beneficiary terminated his election of hospice care.

Data Element:	Occurrence Span Codes
Data Definition:	A code that identifies an event that relates to the payment of the claim.

Code Structure

70	Qualifying Stay Dates (Medicare)	The from/thru date of at least a 3-day hospital stay that qualifies the patient for Medicare payment of SNF services billed. Code can be used only by SNF for billing.
71	Hospital Prior Stay Dates	The from/thru dates of any hospital stay that ended within 60 days of this hospital or SNF admission.
72	First/Last Visit	The dates of the first and last visits occurring in this billing period if the dates are different from those in the Statement Covers Period.

74	Noncovered Level of Care	The from/through dates of a period at a noncovered level of care in an otherwise covered stay, excluding any period reported with Occurrence Span Code 76 or 77.
75	SNF Level of Care	The from/through dates of a period of SNF level of care during an inpatient hospital stay. Used to show PRO approval of patient's remaining in hospital because SNF bed not available. Code is not applicable to swing bed cases. Hospitals under PPS use this code in day outlier cases only.
76	Patient Liability	The from/through dates of a period of noncovered care for which the hospital is permitted to charge the Medicare beneficiary. Used only where you, or the PRO, have approved such charges in advance, and the patient has been notified in writing 3 days prior to the "from" date of the noncovered period.
77	Provider Liability	The from/through dates of a period of noncovered care for which the provider is liable.
78	SNF Prior Stay Dates	The from/through dates of any SNF stay that ended within 60 days of this hospital or SNF admission.

Data Element: Override Codes

Definition: Code indicating special action regarding deductible/coinsurance at a revenue center code level.

Codes:	
0	Both deductible and coinsurance apply.
1	Deductible does not apply.
2	Coinsurance does not apply.
3	Neither deductible nor coinsurance applies.
4	This revenue center code contains no associated charge.

Data Element: Patient Status

Definition: A code indicating the patient's status as of statement covers thru date:

Codes:

01	Discharged to home or self care (routine discharge).
02	Discharged/transferred to another short-term general hospital.
03	Discharged/transferred to SNF.
04	Discharged/transferred to an ICF.
05	Discharged/transferred to another type of institution.
06	Discharged/transferred to home under care of organized home health service organization.
07	Left against medical advice.

20	Expired - (or did not recover - Christian Science Patient).
30	Still patient.
40	Expired at home-Hospice beneficiary.
41	Expired in a hospital, SNF, or ICF-Hospice beneficiary.
42	Expired - place unknown-Hospice beneficiary.

Data Element: PRO Approval Indicator

Definition: An indicator describing the PRO's determination.

Code:	1	Approved by the PRO	Code indicates claim has been reviewed by the PRO and has been fully approved including any day or cost outlier.
	2	Automatic Approval (Focused Review)	Code does not apply to Medicare claims.
	3	Partial Approval	Code indicates the bill has been reviewed by the PRO, and some portion (days or services) has been denied. The from/thru dates of the approved portion of the stay, excluding grace days and any period at a noncovered level of care (code "77" in item 33), are shown in items 88 and 89.
	4	Admission Denied	Code indicates patient's need for inpatient services was reviewed upon admission and the PRO found that none of the stay was medically necessary.
	5	Post-payment Review Applicable	Code indicates that any medical review will be completed after the claim is paid. The bill may be a day outlier; part of the sample review; reviewed for other reasons; or may not be reviewed.
	6	Pre-admission Authorization	Pre-admission authorization obtained, but services not reviewed by the PRO.
	7-9		Reserved.

Data Element: Revenue Code

Definition: A Code which identifies a specific accommodation, ancillary service or billing calculation.

Code: See Addendum C

Data Element: Source of Admission

Definition: A code indicating the source of this admission.

Code:

1 - Physician Referral	The patient was admitted upon the recommendation of a personal physician.
2 - Clinic Referral	The patient was admitted upon the recommendation of this facility's clinic physician.
3 - HMO Referral	The patient was admitted upon the recommendation of an HMO physician.
4 - Transfer from a Hospital	The patient was admitted as an inpatient transfer from an acute care facility.
5 - Transfer from a Skilled Nursing Facility	The patient was admitted as an inpatient transfer from a SNF.
6 - Transfer from Another Health Care Facility	The patient was admitted as a transfer from a health care facility other than an acute care facility or SNF.
7 - Emergency Room	The patient was admitted upon the recommendation of this facility's emergency room physician.
8 - Court/Law Enforcement	The patient was admitted upon the direction of a court of law or upon the request of a law enforcement agency's representative.
9 - Information Not Available	The means by which the patient was admitted to this facility is not known.

Code Structure (Newborn):

1 - Normal Delivery	A baby delivered without complications.
2 - Premature Delivery	A baby delivered with time and/or weight factors qualifying it for premature status.
3 - Sick Baby	A baby delivered with medical complications other than those relating to premature status.
4 - Extra Mural Birth	A newborn born in a non-sterile environment.
5 -8	Reserved
9	Information not available.

Data Element: Type of Admission

Definition: A Code indicating the priority of this admission.

1 = Emergency	The patient required immediate medical intervention as a result of severe, life threatening, or potentially disabling conditions. Generally, the patient was admitted through the emergency room.
2 = Urgent	The patient required immediate attention for the care and treatment of a physical or mental disorder. Generally the patient was admitted to the first available and suitable accommodation.
3 = Elective	The patient's condition permitted adequate time to schedule the availability of suitable accommodations.
4 = Newborn	Necessitates the use of special source of admission codes.
5-8	Reserved.
9	Information not available

Data Element: Type of Bill

Definition: A code indicating the specific type of bill (inpatient, outpatient, adjustments, voids, etc.)

Code Structure

Type of Facility - 1st Digit

Hospital	1
SNF	2
HHA	3
Christian Science (Hospital)	4
Christian Science (Extended Care)	5
Clinic	7
Special Facility	8
Reserved	9

Bill Classification (Except Clinics and Special Facilities) - 2nd Digit

Bill Classification (Clinics) 2nd digit		Bill Classification - Special Facilities - 2nd digit
Rural Health	1	Hospice (non-hospital based)
Free Standing Renal Dialysis Center	2	Hospice (hospital based)
	3	Ambulatory Surgical Center
CORF	4	

Frequency - 3rd Digit

Non-Payment/Zero claim	0
Admit thru Discharge Claim	1
Interim - First claim	2
Interim - Continuing claim	3
Interim - Last claim	4
Late Charge(s) Only Claim	5
Adjustment of prior claim	6 - not used by Medicare in UNIBILL
Replacement of prior claim	7
Void/cancel prior claim	8
Reserved	9
Adjustment Required by PRO	P
Adjustment Required by Intermediary	I

Data Element: UB Codes

Data Definition: Code indicating the means by which the bill was reported to you.

Code Structure

0	Unknown
1	EMC Tape/UB-82/HCFA Format
2	EMC Tape/UB-82/Other Format
3	EMC Tape/Other
4	EMC Telecom/UB-82
5	EMC Telecom/Not UB-82
6	Other EMC/UB-82
7	Other EMC/Not UB-82
8	UB-82 hard copy
9	Other hard copy

Data Element: Value Codes

Data Definition: A code that identifies data of a monetary nature that is necessary for processing this claim as qualified by the payer organization.

Code Structure

05	Professional Component included in Charges and also billed separately to Carrier	For use on Medicare and Medicaid bills if the State requests this information.
06	Medicare Blood Deductible	Total cash blood deductible.
07	Medicare Cash Deductible	Medicare cash deductible.
08	Medicare Lifetime Reserve Amount in the First Calendar Year.	Medicare lifetime reserve amount charged in the year of admission.
09	Medicare Coinsurance Amount in the First Calendar Year.	Medicare coinsurance amount charged in the year of admission.
10	Medicare Lifetime Reserve Amount in the Second Calendar Year.	Medicare lifetime reserve amount charged in the year of discharge where the bill spans two calendar years.
11	Medicare Coinsurance Amount in the Second Calendar Year	Medicare coinsurance amount charged in the year of discharge where the bill spans two calendar years.

12	Working Aged Beneficiary/ Spouse with EGHP	Amount shown is that portion of a payment from a higher priority EGHP insurance made on behalf of an aged beneficiary that the provider is applying to Medicare covered services on this bill. If six zeroes were entered, the provider claimed conditional Medicare payment.
13	ESRD Beneficiary in the 12 Month Coordination Period with EGHP	Amount shown is that portion of a payment from a higher priority EGHP insurance made on behalf of an ESRD beneficiary that the provider applied to Medicare covered services on this bill. If six zeroes were entered, the provider claimed conditional Medicare payment.
14	Automobile, No Fault or any Liability Insurance	Amount shown is that portion of a payment from a higher priority automobile, no fault or liability insurance made on behalf of a Medicare beneficiary that the provider applied to Medicare covered services on this bill. If six zeroes were entered, the provider claimed conditional Medicare payment.
15	WC	Amount shown is that portion of a payment from a higher priority WC plan made on behalf of a Medicare beneficiary that the provider applied to Medicare covered services on this bill. If six zeroes were entered, the provider claimed conditional Medicare payment.
16	PHS, Other Federal Agency	Amount shown is that portion of a payment from a higher priority PHS or other Federal Agency made on behalf of a Medicare beneficiary that the provider applied to Medicare covered services on this bill. If six zeroes were entered, the provider claimed conditional Medicare payment.
17	Outlier Amount	PROVIDERS DO NOT REPORT THIS. FOR PAYER INTERNAL USE ONLY. Indicates the amount of day or cost outlier payment to be made.
18	Disproportionate Share Amount	PROVIDERS DO NOT REPORT THIS. FOR PAYER INTERNAL USE ONLY. Indicates the disproportionate share amount applicable to the bill.
19	Indirect Medical Education Amount	PROVIDERS DO NOT REPORT THIS. FOR PAYER INTERNAL USE ONLY. Indicates the medical education amount applicable to the bill.

31	Patient Liability Amount	Amount shown is that which you or the PRO approved to charge the beneficiary for noncovered accommodations, diagnostic procedures or treatments.
41	BL	Amount shown is that portion of a payment from a higher priority BL program made on behalf of a Medicare beneficiary that the provider applied to Medicare covered services on this bill. If six zeroes were entered, the provider claimed conditional Medicare payment.
42	VA	Amount shown is that portion of a payment from a higher priority VA made on behalf of a Medicare beneficiary that the provider applied to Medicare covered services on this bill. If six zeroes were entered, the provider claimed conditional Medicare payment.
43	Disabled Beneficiary Under Age 65 With LGHP	Amount shown is that portion of a payment from a higher priority LGHP made on behalf of a disabled Medicare beneficiary that the provider applied to Medicare covered services on this bill.
50	Physical Therapy Visit	Number of physical therapy visits from onset (at the billing provider) through billing period.
70	Interest Amount	PROVIDERS DO NOT REPORT THIS. FOR PAYER INTERNAL USE ONLY. Indicates the amount of interest to be applied.
71	Funding ESRD Networks	PROVIDERS DO NOT REPORT THIS. FOR PAYER INTERNAL USE ONLY. Report the amount by which the Medicare payment was reduced to help fund the ESRD networks.
72-79	Payer Codes	Codes reserved for internal use only by third party payers. HCFA will assign as needed.

3872. UNIBILL SERVICE CODES

Roll up for UNIBILL in the same manner as for PS&R. If you have more than 27 revenue line items, make the following additional roll-ups before preparing UNIBILL. On outpatient surgery do not roll up to code 270 revenue codes 271 or 273-279. See Addendum C §3600 for revenue codes and definitions.

The Bills Tape Data File

3874. THE BILLS TAPE INTERNAL LABEL.

The label identifies the process, the responsible intermediary, and the sequence number of the specific reel in the file. If a multi-reel file see § 3874.1.

3874.1 The Reel Number.--The reel number is a required internal and external data entry for multi-reel files only. For the multi-reel file, enter the reel number in locations 10 through 12 of the Bills Tape Internal Label (see § 3874.2), and as indicated on the External Label. (See § 3867.1.) The reel number is a numeric field beginning with 001 for the first reel of a given file, increasing by one in sequence for each additional reel. For single reel files, leave blank, or enter 001 in the above locations.

3874.2 The Internal Label Record Description-- Operational

1.	Identification	7	X	1-7	UNIBILL
2.	Blank	2	X	8-9	
3.	Reel Number	3	X	10-12	See §3874.1
4.	Blank	7	X	13-19	
5.	Intermediary	5	N	20-24	Intermediary Submitting File

3875. THE BILL TAPE BATCH CONTROL RECORD.

A Bill Tape Batch Control Record precedes the detail bill-type data records comprising each batch of bills in the file. Identify it by the entry of the letter "B" in position 1 of the batch control record and identify each batch by the entry of a batch number and a batch-type code. Descriptions of each of the above data items as well as the batch control record follow.

3875.1 Record Identification Code.-- Location 1 of all control and data records must contain a valid record identification code as follows:

A - Home Health Plan P Record Identification;
B - The Bills Tape Batch Control Record Identification;
C - Inpatient Hospital Record Identification;
D - Outpatient Record Identification;
E - Christian Science Record Identification (Form HCFA-1486);
F - Home Health Plan M Record Identification;
H - RTI Void Record Identification;
I - Inpatient SNF Record Identification;
J - HOSPICE;
M - Comprehensive Outpatient Rehabilitation Facility (CORF);
Pure "-" - The Bills Tape Batch Summary Record Identification.

3875.2 The Batch Number.-- Enter the batch number in positions 7-14 of the Batch Control and Batch Summary Records, and positions 1993-2000 of all detailed bill records in each batch. The batch number consists of a four-position number assigned sequentially in the order of batch creation running from A000 to Z999 and repeating if required . . . immediately followed by the four-position Julian date (YDAY) of batch creation (i.e., numeric "0" to 9 for the year in the given decade, followed by the Julian number of the appropriate DAY).

3875.3 The Batch-Type Code.-- Enter the Batch-Type Code in position 19 of the Batch Control Record. The valid batch-type codes are:

L - Inpatient hospital/SNF;
P - Outpatient, CORF, and Hospice;
(Hospice, CORF, and Outpatient claims may not be mixed in the same batch.)
Q - HHA;
N - Christian Science (Form HCFA-1486);
M - RTI (VOID Action).

3875.4 The Batch Control Record Layout and Description.--

21.	Filler (Intermediary Use)	15	X(15)		1973	1987
22.	Intermediary Number	5	X(5)		1988	1992
23.	Batch Number	4	XXXX		1993	1996
24.	Batch Date (YDDD)	4	9(4)		1997	2000

3880. THE BATCH SUMMARY RECORD DESCRIPTION.

The Bills Tape Batch Summary Record closes a given batch record by summarizing the preceding batch totals (i.e., Items in Batch, Total Reimbursement Amount, and Reimbursement Subtotal for all adjustment bills in the batch) and passing control to the next batch on the tape, or to the end of file (Trailer Record - § 3881). The Batch Summary Record is:

FIELD	SIZE	FMT	LOC	REMARKS
1. Identification (Batch Summary)	1	X	1	Pure "-"
2. Intermediary Number	5	N	2-6	Intermediary submitting file.
3. Batch Number	8		7-14	See § 3875.2
a. Sequence Number	4	N	7-10	
b. Julian Date	4	N	11-14	YDAY
4. Batch Totals	29		15-43	See Note Below.
a. Number of Items in Batch	2	X	15-16	
b. Reimbursement Amount (total)	9	N	17-25	All bills in batch
c. Reimbursement Sub-total	9	N	26-34	All adjustment bills in batch
d. Blank	9	N	35-43	
5. Batch Deletion	4	X	44-47	Enter VOID for a deleted batch.
6. Blank	1953	X	48-2000	

NOTE: Both reimbursement entries are net amounts that may be unsigned, signed "minus," or signed "plus" in the units positions of their respective fields. The appropriate signs ensue from the cumulative algebraic effect of the individual bill action codes on both the total reimbursement amount and the reimbursement sub-total amount for adjustment bills only. When the batch contains adjustment bills only, the entries in the reimbursement total and sub-total fields must be the same.

3881. THE TRAILER RECORD LAYOUT AND DESCRIPTION.

The Bills Tape Trailer Record closes the reel or file. A Tape Mark preceding the Trailer Record is optional. However, the Trailer Record must always be followed by two Tape Marks. Trailer identification consists of a numeric 1 immediately followed by the letters END in locations 1 through 4. An R or F in location 6 indicates end of reel or file, as the case may be. The Trailer Record includes the total number of items in the reel and file (including the PIP bill count), the total reimbursement for both the reel and file, and the "total number of batches" in the reel and file. The file and reel totals must be the same for a single reel file. For a multi-reel file, the file totals are the cumulative totals following in sequence from first to last reel comprising the file. The end of reel and file totals (i.e., items and batches) are signed "plus" in the units position. Do not split a batch between reels for a multi-reel file. The trailer record follows:

FIELD	SIZE	FMT	LOC	REMARKS
1. Identification (Trailer Record)	4	X	1-4	1END
2. Blank	1	X	5	
3. End of Reel/File Indicator	1	N	6	R or F
4. File Totals	21		7-27	
a. Number of Items in File	6	N	7-12	
b. Reimbursement Amount	12	N	13-24	
c. Number of Batches in File	3	N	25-27	
5. Reel Totals	21		28-48	
a. Number of Items in Reel	6	X	28-33	
b. Reimbursement Amount	12	X	34-45	
c. Number of Batches	3	X	46-48	
6. Blank	1952	X	49-2000	

3882. UNIBILL CONSISTENCY RETURN CODES

Codes (Derived from Record Identification Code - see §3875.1):

H=Hospital
S=Skilled Nursing Facility
CH=Christian Science Hospital
CS=Christian Science SNF
HOSP=Hospice
O/P=Outpatient
CORF=Comprehensive Outpatient Rehabilitation Facility
HHA=Home Health Agency

Error Code	Applicable to	Explanation
		Item 4—Type of Bill
0401	General	The Type of Bill, item 4, is impossible, incomplete, or missing, or is inconsistent with the provider number shown in Item 7. (See §3873.2).
		Item 7—Medicare Provider Number
0701	General	Provider number does not match the provider number in HCFA's Intermediary/Provider file.
0702	General	The entry is not consistent with the type of bill.
		Item 15—Admission Date (Start of Care Date for Home Health) Date of Qualifying Stay for Christian Science SNF
1501	H, S, CH, CS & HHA	Date of Admission is impossible or incomplete.
1502	H, S, CH, CS & HHA	Date of Admission is later than "From Date".
1503	S	The date of admission is more than 30 days after the "Thru" date of the qualifying hospital stay and there is no Condition Code 55, 56, or 57. One of these must be present.
		Item 21—Patient Status
2101	H, S CH, CS & HOSP	Patient Status omitted or code impossible.
2102	H, S, CH, CS & HOSP	Patient Status Code is not correct. Code is 40, 41, or 42 and bill is not a Hospice bill, or code is 20, and bill is a Hospice bill.

Item 22--Statement covers period.

Error Code	Applicable To	Explanation
2201	General	This entry is an impossible or incomplete "From" date.
2202	General	The "From" date is later than the "Thru" date.
2203	General	The "Thru" date is an impossible or incomplete entry.
2204	General	The "From" date on this bill is prior to the effective date of this aspect of the Medicare program: 1. EGHP a. Working Aged: 1/1/83 b. ESRD Beneficiary in 12 month coordination period 10/1/81 2. CORF 7/1/81 3. Hospice 11/1/83 4. PPS 10/1/83
2205	O/P CORF	Date of Last Service is not in the same year as Date of First Service.

Item 23 - Utilization Days

Error Code	Applicable To	Explanation
2301	H, S CH & CS	A hospital bill contains an entry other than a number or a number that exceeds 150. A SNF bill contains an entry other than a number between 0 and 101 (between 0 and 31 for SNF Christian Science).
2302	H, S CH & CS	The sum of utilization days (Field 22), plus nonutilization days (Field 23), must equal the difference between the Thru Date minus the From Date in the Statement Covers Period (Field 21). Exception: If the Patient Status code (Field 20), is 30, or if the From Date is equal to the Thru Date, the sum of utilization days plus nonutilization days must equal the difference between the Thru Date minus the From Date in the Statement Covers Period, plus 1.
2303	H, S CH & CS	The number of "Utilization Days" exceeds the number of "Accommodation Days," but the dates of admission and discharge are not the same.
2304	H	No Utilization Days are shown on patient filed bill.
2306	H & S	Utilization Days are shown as "0," the "Statement Covers Period From Date" is not the same as the "Thru date", a nonpayment code is present, and some reimbursement is being made. (Does not apply to a credit or cancel only adjustment bill.)

Item 24—Nonutilization Days

Error Code	Applicable To	Explanation
2401	H, S CH & CS	This entry contains an entry other than a number.

Error Code	Applicable To	Explanation
		Item 25—Coinsurance Days
2501	H, S CH & CS	The Coinsurance Days entry is incomplete or is other than a number. If a hospital bill, "Coinsurance days" exceed 30. If a SNF bill, "Coinsurance days" exceed 80.
2502	H, S CH & CS	"Coinsurance days" exceed the number of "Utilization Days".
2503	H & S	If hospital, "Utilization Days" (Field 23) less the sum of "First Year Coinsurance Days" (Field 25), "Second Year Coinsurance Days" (Field 26), and 'Total Lifetime Reserve Days" (Field 27) exceed 60. If SNF, "Utilization Days" (Field 23) less the sum of "First Year Coinsurance Days" (Field 25), and "Second Year Coinsurance Days" (Field 26) exceed 20.
2504	H, S CH & CS	The coinsurance rate (coinsurance amount divided by coinsurance days) exceeds the rate that applies to the calendar year in which the coinsurance days occur.
2505	H, S CH & CS	In a hospital bill the nonlifetime and/or lifetime coinsurance rate applicable to the calendar year in which the coinsurance days and lifetime reserve days occurred exceed the average daily rate for this bill. In a SNF bill, the coinsurance rate applicable to the calendar year in which the coinsurance days occurred exceeds the average daily rate for this bill. This edit will be overridden on bills containing occurrence span code 77 (provider liable).
2506	H, S CH & CS	Coinsurance days are shown, but no amount is shown for either Value Code 09, or Value Code 11.
2507	H & CH	The sum of coinsurance days plus lifetime reserve days in either the year of admission or the year of discharge in a bill that spans calendar year end is greater than the number of days in the statement covers period for that portion of the bill. That is, the difference between December 31 of the year of admission (plus 1) and the From Date (Field 21a) is less than the number of first year coinsurance days (Field 25) plus the difference between total lifetime reserve days (Field 27) minus second year lifetime reserve days (Field 28), or the difference between the thru date (Field 21b.) of the bill and January 1 of the year of the thru date is less than the sum of second year coinsurance days (Field 26) plus Second Year Lifetime Reserve Days. If the patient status code is 30, add one to the difference between the statement covers thru date and January 1 of the year of discharge before making the comparison.

Error Code	Applicable To	Explanation
		Item 26—Lifetime Reserve Days
2601	H, S CH & CS	In a hospital bill this item contains an entry other than a number or a number that exceeds 60. An entry for a SNF bill is inappropriate as lifetime reserve days apply only to hospital stays.
2602	H & CH	Lifetime Reserve days are shown, but no amount is shown for either Value Code 08, or Value Code 10.
2603	H & CH	The lifetime reserve rate (lifetime reserve amount divided by lifetime reserve days) exceeds the rate that applies to the calendar year in which the lifetime reserve days occurred.
2604	H	PPS Bills only - This bill contains both Lifetime Reserve Days (Field 27) and Covered Days other than Lifetime Reserve Days (Field 22 is greater than Field 27), but does not involve a day outlier. PPS bills may not include Lifetime Reserve Days unless all days used are Lifetime Reserve Days or the bill contains a Day Outlier (Value Code 17, and Condition Code 60).
		Item 28--Occurrence
		The third digit of the following return codes reflects the sequence in which the code occurred. The sequence is 1 through 0, with 0 representing the 10th code.
28X1	General	The date associated with the indicated occurrence code is impossible, incomplete, or missing.
28X2	S & CS	Date Guarantee of Payment Began—Entry is inappropriate as this item applies only to hospital bills.
28X3	H & CH	Date Guarantee of Payment Began—Hospital bill: date is earlier than the Admission date or later than the "Statement Covers Thru" date.
28X4	H & CH	Date Guarantee of Payment Began—Utilization Days cannot exceed 12 days beyond the admission date, if admission date and the Statement covers Period "From" date are the same, unless the billing dates cover the period 12/24 through 1/2, in which case 13 days cannot be exceeded.
28X5	H & CH	If the guarantee of payment date is shown and the admission date and from date are not equal, Utilization Days cannot exceed 12 days unless the billing dates cover the period 12/24 thru 1/2 in which case 13 days cannot be exceeded.

Error Code	Applicable To	Explanation
28X6	H & CH	The "Date Guarantee of Payment Began" is earlier than the "Date Benefits Exhausted " (Occurrence Code 23).
28X7	H & CH	The "Date Guarantee of Payment Began" plus "Utilization Days (less "Coinsurance and Nonutilization days") cannot exceed the "Statement Covers Period Thru" date unless the Patient Status Code is 30 (Still Patient) in which case the "Thru" date cannot be exceeded by more than 1 day.
28X8	H, S CH & CS	Date Active Care Ended—This date is outside the "Statement covers period" dates.
28X9	H, S CH & CS	"Utilization Days" exceed the number of days from the "From" date through the "Date active care ended", Occurrence Code 22, minus the days for any Noncovered Level of Care (Occurrence Span Code 76) reported on this bill.
28X0	H, S CH & CS	Benefits Exhausted—This date is outside the "Statement Covers Period" dates.
28XA	H, S CH & CS	"Utilization Days" are greater than the number of days from the "From Date" through the "Date Benefits Exhausted" and in a hospital bill, "Date Guarantee of Payment Began" is not present.
28XB	O/P	Date Benefits Exhausted—This date is later than the "Date of First Service" on the bill.
28XC	O/P	Date Benefits Exhausted—A date is shown for a bill other than a Part B Inpatient bill.

Item 33—Occurence Span Codes and Dates Required

The third digit of the following error codes represents the location of the Occurrence Span code that failed a HCFA edit.

Error Code	Applicable To	Explanation
33X1	S	Qualifying Stay Dates—The "From" or "Thru" date is an impossible or incomplete entry.
33X2	S	Qualifying Stay Dates—The "Thru" date is the same as, or prior to, the "From" date.
33X3	S	Qualifying Stay Dates—The 3-day stay requirement is not met. (The "Thru" date is not 3 or more days later than the "From" date.)
33X4	S	Qualifying Stay Dates—The "Thru" date is later than the "Date of Current Admission".

Items 35-39—Condition Codes

The second and third digit of the following error codes represent the condition code reported on the bill.

Error Code	Applicable To	Explanation
35X1	H	Condition Code 60 cannot be present with Condition Code 61 or Condition Code 65. Condition Code 61 cannot be present with Condition Code 60 or Condition Code 65. Condition Code 65 cannot be present with any one of the following Condition Codes: 60, 61, 62, or 66.
35X2	H	Either Condition Code 60 (Length of Stay Outlier) or 61 (Cost Outlier) is present but Value Code 17 is not present in Item 46-49.

Item 40—Blood Record (Pints) Furnished

Error Code	Applicable To	Explanation
4001	H, S, & O/P	Blood Pints Furnished—The entry is other than a number.
4002	H, S, & O/P	"Blood Pints Furnished" is not equal to "Pints Replaced" plus "Pints Not Replaced".
4003	H, S & O/P	"Blood Pints Furnished" is zero with charges shown for Value Code 06. For outpatient, "Blood - Unreplaced Pints" is zero with charges shown in field 56a., "Verified Patient Liability, Blood Deductible."

Item 42—Blood Record (Pints) Not Replaced

Error Code	Applicable To	Explanation
4201	H, S, & O/P	"Not Replaced" is invalid or is an entry other than a number.
4202	H, S & O/P	"Not Replaced" is zero with charges shown in Value Code 06; that is all pints have been replaced and no charges should be shown. For outpatient, "Blood - Unreplaced Pints" is zero, with charges shown in field 56a., "Verified Patient Liability, Blood Deductible."

Item 43--Blood Record (Pints) Deductible

Error Code	Applicable To	Explanation
4301	H, S, & O/P	Blood Deductible—This entry is other than a number, or the number of pints is greater than 3.
4302	H, S, & O/P	Blood Deductible—A number of pints is entered but no blood usage is shown in Blood Pints Furnished.

Error Code	Applicable To	Explanation
4303	H, S, & O/P	Blood Deductible—The number of pints exceeds the number of pints not replaced.
4304	H, S, & O/P	Blood Deductible—The number of pints is more than the number left after subtracting the number of pints replaced from the number 3.
		Item 46--Value Code
		The third digit of the following error codes represents the location of the rejected Value Code.
46X1	General	Valid Value Code Contains an impossible amount.
46X2	H & S	Value Code 06—Medicare Blood Deductible is shown in value code; but no entry in Blood Record (Pints) deductible (item 43).
46X3	H & S	Value Code 06—Medicare Blood Deductible is completed in Value Code; but the total charges for revenue center code 001 (Totals) equals noncovered charges for revenue center code 001, indicating that blood cannot be applied toward the deductible.
46X4	H & CH	Value Code 07—Inpatient deductible amount shown exceeds inpatient deductible for the year.
46X5	S & CS	Value Code 07—Inpatient Deductible is present on a SNF bill.
46X6	H	Value Code 17, outlier amount, is present, but neither a day outlier (Condition Code 60), nor a cost outlier (Condition Code 61) is reported in the condition codes.
46X7	H	Value Code 17—outlier amount is greater than the reimbursement amount plus the sum of Value Amounts for Value Codes 06 through 16. This edit is not applicable if the Admission Date is earlier than the From Date.

Error Code	Applicable To	Explanation
		Item 51—Revenue Code
		For error codes involving the Revenue code and associated items (items 51-54), X=1-R; where 1 is the 1st revenue code, 2 is the 2nd revenue code, ..., 0 is the 10th revenue code, A is the 11th revenue code, Q is the 27th revenue code and R is the 28th revenue code.
51X1	General	Impossible or incomplete Revenue Code.
51X2	General	The revenue code cannot be present for this bill type:

Bill Type	Revenue Center Codes Not Allowed
11X	52X, 55X, 57X, 58X, 59X, 65X, 82X, 83X, 84X, 85X
12X	10X-17X, 20X-23X, 28X, 36X-39X, 45X, 47X-59X, 61X, 65X, 72X, 75X, 80X-85X, 88X-92X, 94X
13X	10X-18X, 20X-21X, 23X, 50X, 52X, 55X, 57X-59X, 65X, 72X, 80X, 81X, 99X
18X	56X-59X, 80X, 82X-85X, 88X, 89X
21X	17X, 20X-21X, 36X-37X, 45X, 50X-52X, 56X-59X, 65X, 71X, 72X, 80X-85X, 88X, 89X
22X	10X-23X, 28X, 36X-39X, 45X, 47X-59X, 61X, 65X, 72X, 75X, 80X-85X, 88X-92X, 94X
23X	10X-24X, 28X-29X, 32X, 38X, 39X, 41X, 45X, 53X, 55X-74X, 85X-99X
32X	10X-24X, 28X, 30X, 41X, 44X-53X, 60X, 87X
33X	10X-24X, 28X, 30X, 41X, 44X-53X, 60X, 87X
34X	10X-24X, 28X, 41X, 44X-53X, 60X, 87X
41X	002-109, 111-139, 141-223, 225-229, 231-269, 271-989, 991-999
51X	002-109, 111-139, 141-223, 225-229, 231-269, 271-989, 991-999

72X	10X-24X, 26X, 28X, 29X, 33X-37X, 40X-72X, 74X-81X
74X	10X-24X

Bill Type	Revenue Center Codes Not Allowed
81X	002-650, 653-654, 658-999
82X	002-650, 653-654, 658-999
83X	10X-18X, 20X, 21X, 23X, 50X, 52X, 55X, 57X-59X, 65X, 72X, 80X-89X, 99X

51X3 General Units entry is missing or invalid; units required for this revenue code. HCFA bypasses this edit for accommodation revenue center codes (100-169, 200-219) if the inpatient bill contains zero utilization days or involves a payer primary to Medicare.

Bill Type	Revenue Center Codes Requiring Units
11X	100-169, 200-219, 381, 382, 801-804
12X	None
13X	300-319, 381, 382, 450, 459, 510-519, 821
18X	100-169, 381, 382
21X	100-169, 381, 382
22X	None
23X	300-319, 381, 382
32X	10X-24X, 28X, 30X, 41X, 44X-53X, 60X, 87X
33X	42X-44X, 472, 55X-57X
34X	42X-44X, 472, 55X-57X
41X	100-1169, 200-219
51X	100-1169, 200-219
71X	300-319, 381, 382, 42X-44X, 472, 51X, 55X-57X
72X	300-319, 381, 382, 821, 831, 841, 851, 881
74X	410-449, 472, 550-569
81X	650-659
82X	650-659
83X	300-319, 381, 382, 450, 459, 510-519, 821

L

Error Code	Applicable	Explanation
51X4	General	Total Charges or Noncovered Charges is invalid
51X5	General	Noncovered Charges exceed Total Charges.
51X6	General	A revenue center code is shown, but total charges for the revenue center is zero. For a nonpayment SNF bill, a revenue center of 001 may be shown with zero shown for both total charges and noncovered charges.
6101	General	Total Charges for revenue code 001 are not equal to the sum of the Total charges for all other revenue codes.
6102	H & S CH & CS	Noncovered Charges for revenue code 001 are not equal to the sum of the noncovered charges for all other revenue center codes.
6201	H & S CH & CS	Total Deductions (the sum of Value Codes 06 through 11) is greater than the difference between "charges" for revenue code 001 and "noncovered charges" for revenue code 001. This edit will be overridden when occurrence span code 77 (provider liable) is present on the bill.
6901	H	This bill is identified as a Kron bill, but contains no covered days.
6902	H	This bill is identified as a Kron bill, but contains a non-payment code of "N" or "B".

RETURN CODES BETWEEN 9401 AND 9409 RESULT FROM THE HCFA GROUPER PROGRAM

9401	H	Invalid principal diagnosis (item 77).
9402	H	Bill does not meet the criteria for any DRG in a Major Diagnostic Category (MDC) based on Principal Diagnosis Code.
9403	H	Invalid Beneficiary Age (not between 0 and 124).
9404	H	Sex (item 13) is not male or female.
9405	H	Invalid patient status.

Error Code	Applicable To	Explanation
9408	H	DRG is not between 001 and 468.
9409	H	DRG calculated by HCFA does not match DRG.
		Verified Noncovered Stays - UNIBILL Field 77
94A1	H & S CH & CS	Verified Noncovered Stays—The "FROM" date is impossible or incomplete.
94A2	H & S CH & CS	Verified Noncovered Stays—The "FROM" date is later than the "THRU" date.
94A3	H & S CH & CS	Verified noncovered Stays—The "THRU" date is an impossible or incomplete entry.
94A4	H & S CH & CS	The "THRU" date is later than the admission date (item 15).
94A5	H & S CH & CS	The "THRU" date shown is more than 60 days prior to the admission date (item 15).
		Prior Psychiatric Days - UNIBILL Field 70
94C1	H	This item contains an entry other than a number.
94C3	H	"Utilization Days" plus "Days used" exceed 150.
		Amount Reimbursed
94F1	General	Amount Reimbursed—This amount contains an entry other than a number.
94F2	H	Amount Reimbursed—The HMO Paid Code indicates that an HMO paid on behalf of Medicare, but a reimbursement amount greater than zero is shown.
		Nonpayment Code
94G1	H & S CH & CS	Nonpayment Code—The code entered is other than "N," "C," "B," "R," "P," or "E".
94G2	H & S CH & CS	Nonpayment Code—No code is entered in this item but the totals of Noncovered Charges are equal to the total charges.
94G3	H & S CH & CS	Nonpayment Code—Code "N," "C," "E," or "B" is shown in this item with total deductions or reimbursement present. A nonpayment

Error Code	Applicable To	Explanation
		bill may not contain Value Codes 06 through 17 (Deductibles, coinsurances, MSP amounts, and Outlier amounts) and may not contain a reimbursement amount.
94G4	H & S CH & CS	Nonpayment Code—Code "R" is shown in this item with reimbursement present.
		Missing Values
9901	General	No detail revenue code shown on this bill.
9902	H & S CH & CS	The inpatient bill contains no accommodation charge, that is, the bill does not contain a revenue code between 100 and 219 (between 100 and 169 for SNF bill) and FROM and THRU dates are not equal.
9903	O/P	No clinic visits shown for independent RHC.
9904	S	Occurrence Span Code 70, Qualifying Stay Dates, is not present on an initial SNF bill.
	O/P	Verified Patient Liability - UNIBILL Field 56
		Blood Deductible
9910	O/P	This item contains an entry other than a number.
9911	O/P	A deductible amount is shown in this item, with no pints furnished shown in item 40.
		Cash Deductible
9920	O/P	This item contains an entry other than a number or the number exceeds $75.
		Coinsurance
9930	O/P	This item contains an entry other than a number.
9931	O/P	This amount, positions 1880-1886, is not equal to 20 percent of the total of field 38, Covered Charges for each revenue center code with an override code of 0 or 1, minus the amount shown in Value Code 5, physician component reported separately to the carrier.

HCFA does not perform this edit if either of the following conditions is present:

1. The ESRD Method of Reimbursement Code, Field 49, is "1", or
2. At least one revenue center code has an Override Code other than "0" or "1" and one of the following Value Codes is present: 14, 15, 16, 41, or 42.

Payment Distribution - UNIBILL Field 57

9940	O/P	The Provider portion contains an entry other than a number.
9942	O/P	The Patient portion contains an entry other than a number.
9944	O/P	The Patient portion is not equal to the sum of patient payments minus the sum of the verified deductibles for cash and blood and the verified coinsurance.

3882.1 Identifying and Editing Final Nonpayment Bills.— Final Nonpayment Bills are identified by the presence of a valid nonpayment code of "N", "C", "B", or "E" in field 73 (Inpatient Hospital and SNF, including Christian Science). Editing of final nonpayment bills is limited to the edits described by return codes 0401, 0701, 0702, 1501, 1502, 2101, 2102, 2201, 2202, 2203, 2401, 33X1, 33X2, 33X3, 33X4, 51X4, 51X5, 6902, 94G1, 94G2, 94G3, and 9904.

3882.2 Adjustment Bill Return Codes

Error Code	Explanation
0010	This code is used on a "CREDIT" or "DEBIT" bill which passes the consistency edits but which must be deleted because the related "CREDIT" or "DEBIT" contains a consistency error. Does not apply to SPIDER.
0011	Invalid action code.
0020	The "CANCEL ONLY" adjustment bill does not contain the reason code or contains a code other than C, P, S, D, or H.
0040	This code is used to delete bills if the "DEBIT" is submitted without a corresponding "CREDIT" or vice versa. Does not apply to SPIDER.
0041	A "DEBIT" and/or "CREDIT" is submitted without a matching Association Code. Does not apply to SPIDER.
0300	A "DEBIT" and "CREDIT" has been submitted with the same matching code but the bills do not agree on the name and/or claim number. Does not apply to SPIDER.

3882.3 MCE Error Codes.—These codes are returned to you to locate and correct the source of the error.

Error Code		Explanation
7601	H	Invalid diagnosis or procedure code.
7602	H	Invalid fourth or fifth digit.
7603	H	E-code as principal diagnosis.
7604	H	Duplicate of principal diagnosis.
7605	H	Age conflict with diagnosis.
7606	H	Sex conflict with diagnosis.
7607	H	Manifestation code as principal diagnosis.
7608	H	Unacceptable principal diagnosis.

Special Billing Procedures

3883. SAMPLE BILLS.

Sample bill data is required for all final and interim bills on the tape record with the exception of adjustment (i.e., Cancel Only and Debit/Credit) bills, and RTI (i.e., Correction and VOID) bills. Narrative or coded diagnostic and surgical procedures data, when applicable, must be entered on the data record for all sample bills. The narrative data entries will consist of the first 41 characters of the surgical procedures appearing in the appropriate block on each of the billing forms and/or the first 45 characters of the diagnoses appearing in the appropriate block on each of the billing records. The coded data must be the full ICD-9-CM diagnosis or surgical procedure codes as reported by the provider. (See §§ 3880.2-3880.6 for specifics.) Sample size and selection criteria for each of the bill types follow:

INPATIENT HOSPITAL CLAIMS (HCFA-1453)--100 percent of all claims. For renal claims the number and type of dialysis sessions rendered must be shown in item 19T of the HCFA-1453 or in the appropriate blocks in the PATBILL format. To insure proper routing of these claims a special effort should be made to insure that the renal indicator is correctly set in the tape record. (See location 823 of § 3880.2 for detailed information on the format of this data.)

SKILLED NURSING FACILITY CLAIMS (HCFA-1453)-- 100 percent of all claims.

OUTPATIENT CLAIMS (HCFA-1483)--5 percent sample-- all claims with HI claim numbers ending in 05, 20, 45, 70, or 95.

HOME HEALTH AGENCY CLAIMS (HCFA-1487)-- 40 percent sample--all claims ending in 0, 4, 5, or 8.

3883.1 Inpatient Hospital Bills Involving End Stage Renal Disease Services.—A renal indicator is needed on all inpatient hospital bills (HCFA-1453) regardless of diagnosis where the beneficiary is identified as an ESRD patient (by the appropriate S-trailer in the query response or any other means available). For purposes of entitlement tracking, data for all kidney transplants and transplant nephrectomies are required. The transplant or transplant nephrectomy must be specifically identified as such using the full ICD-9-CM diagnosis and procedure codes. The type of kidney transplant, living or cadaveric donor, must also be shown.

This information is required from initial, interim, and final bills. See location 823 of §3880.2 for detailed information on the format of this data.

3884. THE BATCHING OF BILLS.

A batch control and batch summary record must be present for each batch of bills recorded on magnetic tape. No batch should exceed 90 bills in number. Different batch types (see S 3879.3) may be recorded on the same tape reel and may be sequenced in any order.

There are six batch types identified by the entry of the Batch-Type Code (see § 3879.3) in location 19 of the Batch Control Record (see § 3979.6). All inpatient hospital/SNF bills, outpatient bills, Christian Science bills, and Home Health Agency bills, with the exception of Final Nonpayment and RTI VOID bills are to be batched according to billing form of origin, i.e., HCFA-1453, HCFA-1483, HCFA-1486, HCFA-1487. All Final Nonpayment bills (Forms HCFA-1453 and HCFA-1486) are to be batched in a Final Nonpayment bill batch with detail records in abbreviated format as delineated in § 3880.6. All RTI VOID bills are to be batched in a VOID batch independent of billing form of origin and with detail record in abbreviated format as delineated in § 3880.7. When applicable, special bill types must be designated on the individual bill data records by entry of a special bill type code (E - Patient Filed bill or N - PIP bills) in location 937 on the Inpatient hospital/SNF and Christian Science bill data records, and (N - PIP bills) in location 371 on the Home Health Agency bill data record. See § 3885 and § 3886 for coding of Adjustment and RTI bills.

3885. ADJUSTMENT BILLS

Adjustment bills must conform to all the edit specifications contained herein and are identified by the action codes (see & 3880.1), i.e., 2 - cancel by credit adjustment; 3 - secondary debit adjustment; 4 - cancel only adjustment; 9 - payment requested adjustment (Code P). See § 3884 for batching instructions.

3885.1 The Association Adjustment Code.--All adjustment bills must have an association code you assigned. The association code is to be entered for adjustment bills only in locations 5-6 of the data records. The code is to consist of an alpha (A through J) in location 5 of the data record followed by a numeric (1 through 9) in location 6. For example, the first adjustment bill or bill pair (if "Debit/Credit" adjustment) in any given batch would be identified by an "A" followed by a numeric "1", i.e., "A1." Subsequent bills or bill pairs (if "Debit/Credit" adjustment) in the same batch would be identified by A2, A3, . . . , A9, B1, . . . , J9.

3885.2 The Cancel Only Adjustment Code (Action Code 4).--A Cancel Only Adjustment bill is used to delete a bill which has been accepted by SSA. This code is described in § 3816. The code is to be given in location 3 of the bill data detail record. The valid codes follow:

C - Coverage Only Code
P - Plan Transfer
S - Scramble
D - Duplicate Billing
H - Other

3885.3 The Credit/Debit Adjustment Action (Action Codes 2 and 3).--In a credit cancel, debit adjustment action, both bills must be in the same batch and must be identified as companion bills by the same association adjustment code (see § 3885.1). All adjustment bills may be batched together in the same batch, however, according to bill type (see § 3879.3).

3885.4 Code R and Code P Adjustment Bills.--For a Cancel Only or Credit/Debit Adjustment of a Code R or Code P adjustment, action codes 8 and 9 can no longer be used to identify the action as well as the bill type. Consequently, the required adjustment of a Code R or Code P type bill is to be effécted by (1) the proper entry of the required action code (Code 2, 3, or 4) on the applicable bill record; (2) the entry of R or P in the R/P bill-type adjustment bill code location on the applicable record (viz., position 600 on the Hospital/ SNF or 339 on the HHA data record). Code R and Code P adjustment bills are to be batched on adjustment batches.

3885.5 RTI Adjustment Bills.--Adjustment bills are not currently under RTI control at SSA. Consequently, for the present, RTI adjustment bills returned to SSA need not contain an RTI control number. However, when an adjustment bill is returned to you for corrective action, an RTI number is assigned for your use only, e.g., in the case of a "Credit/Debit" adjustment requiring RTI action both bills are returned, each with its own RTI control number. Currently you should not submit an RTI VOID bill for an RTI adjustment bill not returned to SSA.

3885.6 Adjustment Batch Balancing.--Adjustment bills are identified by the action code in location 2 of the Bills Tape Bill-Type Records. Although all "reimbursement amounts" are unsigned, credit actions are considered negative, the units position of the "total reimbursement amount" of the Bills Tape Batch Summary Record must be zoned "minus." Otherwise, the units position of the "total reimbursement amount" must be zoned "plus."

3886. THE BILLS TAPE RTI ACTION

RTI (Returned to Intermediary) bills may require either a correction or a VOID action.

3886.1 The RTI Control Number.--The RTI control number is the primary means for the identification of the RTI action and the ensuing purge from SSA's pending RTI control file. The 10 character RTI control number assigned by SSA shall consist of the following two items in tandem in the order given:

1. Batch number (see § 3879.2).
2. A two digit SSA-assigned sequence number.

3886.2 RTI Correction Action Bills.--Correction action requires (1) the correction of the error; (2) the return to SSA of all data originally submitted with correction; and (3) the addition of SSA's RTI control number to the bill data detail record. RTI correction items must be batched (maximum 90 items per batch) by batch-type designated for bills with the required billing form of origin. RTI control is achieved by the entry of the RTI control number (§ 3886.1) on the appropriate data records.

3886.3 RTI VOID Action Bills.--See § 3880.7 for description of the VOID action data record, explanation of usage, and batching requirements.

3887. TAPE DELETIONS--BATCHES, ITEMS, BATCH NUMBERS

To delete bill detail records from a prepared tape prior to submission to SSA, delete the desired bill and adjust the item and reimbursement amounts in the batch summary record.

To delete an entire batch from a prepared tape prior to submission to SSA, you may delete all the bill items from the batch in question and forward to SSA the batch control and batch summary records for the deleted batch. The batch summary record should be adjusted to show zero items and zero reimbursement with the constant VOID entered in positions 44-47 of the batch summary record.

To delete one or more batch numbers from the system, you should forward to SSA the batch control and batch summary records for the deleted batch(es). The batch summary record for each batch number deleted from the system should be adjusted to show zero items and zero reimbursement with constant VOID entered in locations 44-47 of the batch summary record.

When one or more of the above deletions have been made, the tape trailer and summary totals for the tape must be adjusted.

Each batch of bills you submit is assigned a batch number for control purposes (see § 3879.2). The four position batch control portion of the batch number should be countably sequenced in order of batch creation to ensure coverage of all permissable numbers.

(Ultimately all batch numbers within the coverage must be accounted for by each intermediary). Should you inadvertently skip one or several batch numbers on a given tape, the skipped numbers should be accounted for on a subsequent tape submission. If more than one intermediary reports via the same tape, each must ultimately account for all batch numbers falling within his range of coverage.

Monthly Statistical Report on Status of Intermediary Workloads

3892. MONTHLY INTERMEDIARY WORKLOAD REPORT (FORM HCFA-1566)—GENERAL

Prepare and submit to HCFA each month a Intermediary Workload Report--Form HCFA-1566—showing your workload under the health insurance program. A separate report is required for each office assigned a separate intermediary number. When your service area covers more than one State, a separate report for each State is not required.

3892.1 Purpose and Scope.—The monthly Intermediary Workload Report is the source of current information on the status of your workloads. The data derived from the report, together with information from other sources, are used by HCFA for such purposes as:

- Estimating workloads,
- Analyzing manpower and material requirements,
- Establishing operating norms and pars,
- Comparing the performance of individual intermediaries. and
- Identifying problem areas for resolution by the intermediary and/or HCFA.

The workload report is designed to serve as a basic management tool for individual intermediaries. The workload report provides some of the data needed for budgeting, financing, work-planning, progress evaluation, and identification of operating problems.

Submit HCFA-1566, Intermediary Workload Report, in accordance with the following instructions.

3892.2 Due Date.—Transmit Form HCFA-1566 to HCFA CO via PC or terminal as soon as possible after the end of the month being reported but no later than the 10th of the following month using instructions contained in the Medicare Contractor Workload System User's Guide. Transmission of the data to the CO will be measured under the CPEP program.

3893. COMPLETING PAGE ONE OF THE MONTHLY INTERMEDIARY WORKLOAD REPORT

3893.1 Heading.—Enter your name and assigned number in the indicated spaces. In the space labeled "Reporting Period," enter the calendar month and year (e.g., 11/85) being reported. In the space labeled "Number of Working Days in Period," enter the number of working days scheduled for the reporting period, less any days where no claims were processed as a result of a strike, snow storm, etc.

3893.2 Checking Reports.—Before sending page one of the report to HCFA, check its completeness and arithmetical correctness. This check not only ensures accuracy but also uncovers other errors and inconsistencies. Use the following checklist:

For each column:

- Line 1 + 2 = 3.
- Line 7 + 8 = 6.
- Line 6 + 9 = 10.
- Line 3 + 4 - 10 = 12.
- Line 5 must be equal to or less than line 4.
- Line 13 must be equal to or less than line 12.
- Line 14 must be equal to or less than line 13.
- Line 17 + 18 + 19 + 20 = 16.
- Line 22 + 23 + 24 + 25 = 21.
- Line 27 must be equal to or less than line 26.
- Line 29 + 30 + 31 = 28.
- Columns ii + iii + iv + v + vi = i for lines 1-27.
- Columns ii + iii = i for lines 28-31.

Base all data reported on the HCFA-1566 on actual counts and not on any types of estimates or samples.

3893.3 Type of Bill.—Provider bills fall into the following columns of the report:

column (i) Total—All provider bills.

column (ii) Inpatient Hospital—HCFA-1450s submitted by hospitals for inpatient services, with the following two-digit classification codes in item 4: 1-1 (inpatient hospital); and 4-1 (Christian Science Hospital-inpatient).

column (iii) Outpatient—HCFA-1450s submitted by hospitals or SNFs for outpatient services, with the following two-digit classification codes in item 4: 1-3 (Hospital-outpatient); 2-3 (SNF-outpatient); 4-3 (Christian Science Hospital-outpatient); and 5-3 (Christian Science-SNF-outpatient); and 8-3 (hospital-outpatient-surgical procedures-ASC).

column (iv) SNF—HCFA-1450s with the following two-digit classification codes in item 4; 1-8 (hospital swing-bed); 2-1 (SNF-inpatient);2-8 (SNF-swing bed); and 5-1 (Christian Science-SNF-inpatient).

column (v) HHA—HCFA-1450s submitted by HHAs, with the following two-digit classification codes in item 4: 3-2 (HHA-Part B visits and use of DME); 3-3 (HHA-Part A visits and DME); 3-4 (HHA-Other-Part B benefits).

column (vi) Other—HCFA-1450s with the following two-digit classification codes in item 4:

1-2 (hospital inpatient-Part B benefits),
1-4 (hospital-Other-Part B benefits),
2-2 (SNF-inpatient-Part B benefits),
2-4 (SNF-Other-Part B benefits),
4-2 (Christian Science-inpatient-Part B benefits),
4-4 (Christian Science-inpatient-other),
5-2 (Christian Science-SNF inpatient-Part B benefits),
5-4 (Christian Science-SNF inpatient-other),
7-1, 7-2, 7-3, 7-4 (Clinics-provider rural health clinics-ESRD, CORFs, etc.), and
8-1 and 8-2 (Hospices).

NOTE: Do not count "independent" rural health clinic bills. Report them separately on the Monthly Intermediary Report on Independent Rural Health Clinic Bill Workloads. (See § 3895.)

best copy available

3893.4 Body of Report.

SECTION A: INITIAL BILL PROCESSING OPERATION

Complete every type of bill column (i through vi) for each reporting item as described below. Include data on all bills received for initial processing from providers (including provider rural health clinics) directly or indirectly through a RO, another Part A intermediary, etc. Do not include:

- Bills received from institutional providers if those bills are incomplete, incorrect, or inconsistent and consequently returned for clarification. Individual controls are no longer required for these bills,
- Adjustment bills,
- Bills previously submitted to central office but returned for correction—RTIs,
- Bills submitted by independent rural health clinics,
- Misdirected bills transferred to a Part B carrier or another Part A intermediary, and
- HHA bills where no utilization is chargeable and no payment has been made, but which intermediaries have requested only in order to facilitate recordkeeping processes.

Opening Pending

Line 1—Pending End of Last Month.—Enter in this line the number of bills reported as pending on line "12" on the previous month's report.

Line 2—Adjustments.—If it is necessary to revise the pending figure for the close of the previous month because of inventories, reporting errors, etc., enter the adjustment on this line. Report bills received near the end of the reporting month and placed under computer control sometime after the reporting month as bills received in the reporting month and not as bills received in the following month. In the event that some bills may have not been counted in the proper month's receipts, count them as adjustments to the opening pending in the subsequent month.

If line "3" differs from the entry in line "12" of the report for the previous month, there must be an entry in this line. The entry is preceded by a plus or minus sign, as appropriate. Explain the reason for any adjustment in the Remarks section.

Line 3—Adjusted Opening Pending.—Enter the result of line "1" + line "2."

Receipts

Line 4—Received During Month.—Enter the total number of bills received for initial processing during the month.

Count all bills immediately upon receipt regardless of whether or not they are put into the processing operation with the exception of those discussed below.

NOTE: Count bills submitted by providers electronically after they have passed intermediary consistency edits. Prior to that time these bills or entire tape reel (where magnetic tape is the medium of submission) may be returned by you without being counted as "received."

Do not count as new receipts the following:

- o Bills received which are to be returned to providers for additional development or information,
- o Adjustment bills,
- o Bills returned by central office for correction (RTIs),
- o Bills submitted by independent rural health clinics,
- o Misdirected bills which will be transferred to a Part B carrier or another Part A intermediary, and
- o HHA bills where no utilization is chargeable and where no payment is made, but which intermediaries have requested for recordkeeping purposes.

If any bill belonging to one of these exclusion categories is inadvertently counted as an initial bill received (e.g., certain adjustment bills unidentifiable at the time of receipt), subtract it from the receipt count at the time the bill is correctly identified.

Line 5—Electronic Media Bills.—Report the number of bills included in line "4" which were received via electronic media.

Clearances

Line 6--Total Batched (7 + 8).--Report the number of initial bills (described in lines 7 and 8 below) processed and batched. Make the counts for these items at the time processing activity is completed.

Line 7--Payment Made.-- Enter the number of initial bills approved for payment and batched for submittal to central office during the month. Count all batched bills for which you approved some payment. Include bills for which you made reimbursement in full or in part as a result of a determination that both the beneficiary and the provider were without fault (liability waiver). (See § 3445.)

Line 8--No Reimbursement Made.--Enter the number of initial bills processed and batched for submittal to central office during the month for which you made no reimbursement.

Line 9--Total Not Batched.--Report the number of initial bills processed during the month for which batching is not required and therefore will not be batched for submittal to central office. Report these items during the month in which you made the determination as to their final disposition. Include interim (nondischarge) bills not required to be submitted in those cases where the provider submits an interim payment bill but you determine it is a no-payment bill. (See § 3610)

Include Part B bills for which no payment was made because: (1) all services rendered were noncovered, (2) the individual was either not eligible for hospital insurance or not entitled to supplementary medical insurance, or (3) the bill duplicated a previously-received bill.

Do not include home health bills where no utilization is chargeable and no payment has been made, but you have requested only to facilitate recordkeeping processes.

Line 10—Total Processed.—Report the sum of lines 6 and 9.

Line 11—HMO Bills.—Enter the number of bills included in line 10 which represent bills paid by HMOs and batched by you during the reporting month.

NOTE: Count HMO bills paid by you on line 10, but not on line 11.

Closing Pending

Line 12—Pending End of Month.—Enter the number of bills received in the reporting month or prior that have not been processed by the end of the reporting month.

Line 13--Pending Longer Than 1 Month.— Report the number of bills included in line "12" pending longer than 1 month, i.e., those received prior to the reporting month but not processed to completion by the end of the reporting month. For example, for the reporting month of January 1986, report the number of bills pending at the end of January 1986 which had been received prior to January 1, 1986. Exclude bills received in the reporting month.

Line 14—Pending Longer Than 2 Months.—Report the number of bills included in line 12 pending longer than 2 months, i.e., those received prior to the month preceding the reporting month but not processed to completion by the end of the reporting month. For example, for the reporting month of January 1986, report the number of bills pending at the end of January 1986 which had been received prior to December 1, 1985. Exclude bills received in the reporting month and one month prior to the reporting month.

Bill Investigations

Line 15--Bill Investigations Initiated.--Enter the number of initial bills that, for purposes of processing the claim to completion, required outside contact (via telephone, correspondence, or on-site visit) with providers, social security offices, beneficiaries, etc., during the month. This includes contacting outside parties to resolve problems with covered level of care determinations, insufficient medical information or missing, inconsistent, or incorrect items on the bill. Do not count routine submissions by providers of additional medical evidence with bills as investigations in themselves. Count only the number of bills requiring investigation, not the number of contacts made. Bills reported as investigated in a prior month should be excluded from this count even if the investigation continued into the reporting month. Do not count as bills investigated those returned to providers because they were incomplete, incorrect or inconsistent and consequently were not counted as "receipts."

SECTION B: ADJUSTMENT BILLS

This section of the report includes data on the number of adjustment bills processed and pending for the reporting month, including those generated by providers, PROs, or as a result of MSP or other activity. In the reporting of adjustment bills, count only the number of original bills requiring adjustment, not both the debit and credit.

The final action taken on an adjustment bill depends on the situation.

- If a provider submits an adjustment bill which is received by the intermediary at a time when the original bill is still in its possession, the final adjustment action is taken on the original bill before it is submitted to HCFA.
- If an adjustment bill involves only money adjustments (no utilization changes) and will not be submitted to HCFA, count it as cleared after review and adjustment in payment.
- If an adjustment bill involves utilization changes and the original bill was rejected by HCFA, count it when it is resubmitted to HCFA in the form of a correction bill (RTI). (However, if the sole purpose of the adjustment bill is to correct an RTI, do not count it on the HCFA-1566.)
- If an adjustment bill involves utilization changes and the original bill was accepted by HCFA, count it when it is batched for submittal to HCFA. (Since § 3816 precludes the processing of a utilization adjustment bill until the bill upon which the adjustment action is based is accepted by HCFA, no utilization adjustment billing action may be processed until a batch clearance or query reply indicates that HCFA has accepted the original bill.)

Clearances

Line 16—Total Processed.— Report the number of adjustment bills processed during the month. Count adjustment bills as processed in final only when no further action is required.

Line 17—PRO Generated.—Report the number of adjustment bills included in line 16 which were generated by PROs.

Line 18—Provider Generated.—Report the number of adjustment bills included in line 16 which were generated by providers.

Line 19—MSP— Report the number of adjustment bills included in line 16 which were generated as a result of Medicare Secondary Payor (MSP) activity.

Line 20—Other—Report the number of adjustment bills included in line 16 which were generated by other than PROs, providers, or MSP activity. Include HMO adjustments where the HMO acted as an intermediary and made payment on the initial bill.

Pending

Line 21—Total Pending.—Report the number of adjustment bills which were not processed to completion by the end of the reporting month.

Line 22—PRO Generated—Report the number of adjustment bills included in line 21 which were not processed to completion by the end of the reporting month and which were generated by PROs.

Line 23—Provider Generated.—Report the number of adjustment bills included in line 21 which were not processed to completion by the end of the reporting month and which were generated by providers.

Line 24—MSP.—Report the number of adjustment bills included in line 21 which were not processed to completion by the end of the reporting month and which were generated by MSP activity.

Line 25—Other.—Report the number of adjustment bills included in line 21 which were not processed to completion by the end of the reporting month and which were generated by other than PROs, providers or MSP activity. Include HMO adjustments not processed to completion where the HMO acted as an intermediary and made payment on the initial bill.

SECTION C: MEDICAID CROSSOVER BILLS

This section of the report presents data on the volume of Medicaid crossover bills sent to Medicaid State agencies or their fiscal agents.

Clearances

Line 26—Transmitted to State Agencies.—Enter the total number of Medicaid crossover bills transmitted to State agencies or their fiscal agents in the reporting month.

Line 27—Electronic Media Bills.—Enter the number of bills included in line 26 which were transmitted via electronic media to State agencies or their fiscal agents.

SECTION D: INQUIRIES

This portion of the report presents data on the volume of provider or beneficiary inquiries which were processed during the reporting month. Include only processed inquiries dealing with Medicare bill processing issues. These issues would correspond to the workload budgeted under line 1 of the HCFA-1523 budget form.

Count inquiries as follows:

Beneficiary-Count one per contact (telephone, walk-in, or written), regardless of the number of bills being questioned. For example, if a letter from a beneficiary requests information on the status of one or more bills, count the response (interim or final) as one written beneficiary inquiry. Count each completed reply, terminated telephone conversation, or in-person discussion as processed, regardless of the need for subsequent contact on the same issue. Responses resulting from additional intermediary followup or analysis, or from recontacts by the beneficiary, are considered separate inquiries. Beneficiary inquiries include those made by anyone on behalf of the beneficiary, except by a provider.

Provider-Count one per contact (telephone, walk-in, or written). For example, if a provider calls or writes to obtain the status of 3, 6, or 10 separate bills, count the response as 1 provider telephone or written inquiry.

Include or exclude beneficiary and provider inquiries as follows:

- Count as inquiries those requests for Medicare bill information from beneficiaries or providers or their representatives which are directed to you for response.

- Do not count processed inquiries which are concerned solely with the intermediary's private line of business.

- Do not count inquiries concerned with professional relations activities.

- Do not count inquiries related solely to reimbursement issues, medical review or utilization review, MSP, audits, etc.. These are areas for which intermediaries receive distinctively separate Medicare funding. This exclusion achieves comparability with the HCFA-1523 budget form.

- Count electronic inquiries only if the response is provided by telephone or in writing and requires intermediary involvement. Do not count electronic inquiries if the provider can directly access the contractor's system to determine bill status.

- Count congressional inquiries according to whether they were made on behalf of a beneficiary or provider.

- Count inquiries made by HCFA ROs or SSA district offices only if concerning a Medicare bill and made on behalf of a beneficiary or provider.

- Count misdirected telephone inquiries which are referred to another source for a final response. Do not count misdirected written inquiries.

- Do not count inquiries which are, in fact, explicit or implicit requests for reconsiderations or hearing. Consult Part 3, §§ 3780ff. for specifics on what is a request for reconsideration or review.

Report the number of inquiries, from beneficiaries (column ii) and providers (column iii) processed during the reporting month, as follows:

Line 28—Total.—Report in the appropriate column the total number of inquiries processed.

Line 29—Telephone Inquiries.—Report in the appropriate column the total number of telephone inquiries processed.

Line 30—Walk-in Inquiries.—Report in the appropriate column the total number of walk-in contacts processed.

Line 31—Written Inquiries.—Report in the appropriate column the total number of written inquiries responded to.

REMARKS.--Enter an explanation of adjustments shown in line 2 as well as any comments relevant to the interpretation and analysis of the report.

SIGNATURE.--Space for signature of official responsible for report.

TITLE.--Space for title of official responsible for report.

DATE.--Date report is completed.

3894. COMPLETING PAGES TWO THROUGH ELEVEN OF THE INTERMEDIARY WORKLOAD REPORT

3894.1 Heading.--Enter your name and assigned number in the indicated space. In the space labeled "Report Month," enter the calendar month and year (e.g., 0187) being reported.

3894.2 Checking Reports.--Before transmitting pages two-eleven of the report to HCFA, check for completeness and arithmetical accuracy. Use the following checklist:

- For each column, line 20 must equal the sum of lines 1-19.
- For each column, line 39 must equal the sum of lines 21-38.
- For lines 1-39, column 1 must equal the sum of columns 2-7.
- For each of lines 1-39, column 8 must be less than or equal to column 1.
- The "All Claims" page (page 11) must equal the sum of all the bill types (total of nine) for each data element on the page, except line 40.

3894.3 Body of Report

SECTION E: CLAIMS PROCESSING TIMELINESS

Pages two-eleven of the HCFA-1566 include data on your activity in processing bills to completion during the reporting period. Count the bill as processed to completion on the "scheduled payment date." The "schedule payment date" is the date the check you issued is mailed, deposited by you in the provider's account, or transferred electronically. For PIP bills and no payment bills, the "scheduled payment date" is the date for payment bills in the same adjudication batch. Base data shown on reliable counts of all bill processing activity. Do not estimate bill counts. Report data on initial bills only. Do not include:

- Bills received from institutional providers if they are incomplete, incorrect, or inconsistent and consequently returned for clarification. Individual controls are not required for these bills;

- Adjustment bills;

- Bills previously submitted to CO but returned for correction—RTIs;

- Bills submitted by independent RHCs (separate reporting instructions will be issued for these);

- Misdirected bills transferred to a carrier or another intermediary; and

- HHA bills where no utilization is chargeable and no payment has been made, but which you have requested only in order to facilitate recordkeeping processes. (There is no HCFA requirement for HHAs to submit no payment non-utilization chargeable bills.)

Apart from these exceptions, include in the report all bills (including PIP and EMC) processed to completion (e.g., paid bills, complete denials, no payment bills) in the reporting month. Report bills in the month the scheduled date of payment falls. See §3600.1 for the definition of scheduled payment date for all bills, including PIP and no payment bills. "Clean" bills are those bills which do not require investigation or development external to your operation on a prepayment basis. Bills which do not meet the definition of "clean" are "other" bills. See § 3600.1 for examples of "clean" and "other." Bills paid are those for which some payment was made (i.e., reimbursement greater than zero). Bills not paid are those for which no payment was made (i.e., bill charges applied completely toward deductible or fully denied).

On each page two-eleven (there is a separate page for each type of bill category listed below), report:

- In column 1, the total number of bills processed to completion;

- In column 2, the number of "non-PIP clean" bills paid;

- In column 3, the number of "non-PIP other" bills paid;

- In column 4, the number of "PIP clean" bills paid;

- In column 5, the number of "PIP other" bills paid;

- In column 6, the number of "clean" bills not paid;

- In column 7, the number of "other" bills not paid; and

- In column 8, the number of bills processed to completion which were received via electronic media, whether "clean" or "other."

For each category, show the number processed to completion on the line corresponding to the number of days from receipt by you to the scheduled date of payment or other final action, if a no-pay bill. See §3600.1C for definition of receipt date.

To calculate the processing time for a claim, subtract the Julian receipt date from the processed to completion Julian date. When the processed to completion date falls in the year following the year of receipt, add to the Julian date of completion 365 (or 366 if the year of receipt is a leap year). If a claim is processed to completion on the same day it is received, the processing time is one day. This definition applies to all lines of the report, including line 40.

On line 40 report the mean processing time (PT) to one decimal place for each column. To calculate the mean PT, add the processing times for all the bills shown in lines 20 and 39 of that column and divide by the sum of lines 20 and 39. You cannot use the categories on the report to calculate the mean PT. Because of the aggregation of claims in lines 35-39 you must use the processing times for the individual claims as explained below to make this calculation.

Mean Processing Time Calculation for All Claims

- Subtract the Julian date of receipt from the Julian date of payment (or equivalent action for those not paid) for each claim.
- Accumulate the result to cell counter for number of days for all claims.
- Divide this result by the total number of claims.
- Round to one decimal place.

EXAMPLE:

Claim	Julian Date		Counter by Days	Counter by Claims
	Receipt	Paid		
A	87103	87133	30	1
B	87105	87206	101	2
C	87115	87177	62	3
D	87120	87213	93	4
E	87122	87215	93	5
F	87130	87223	93	6

Total Days = 30 + 101 + 62 + 93 + 93 + 93 = 472

Mean = 472/6 = 78.6666 = 78.7

Complete the report for each bill type:

- Inpatient Hospital—Of the bills reported on the "All Claims" page, show on page 2 data on the number of HCFA-1450s submitted by hospitals for inpatient services with the following two-digit classification codes in item 4: 1-1 (inpatient hospital); and 4-1 (Christian Science Hospital-inpatient),

- Outpatient—Of the bills reported on the "All Claims" page, show on page 3 data on the number of HCFA-1450s submitted by hospitals and SNFs for outpatient services with the following two-digit classification codes in item 4: 1-3 (hospital-outpatient); 2-3 (SNF-outpatient); 4-3 (Christian Science Hospital-outpatient); 5-3 (Christian Science SNF-outpatient); and 8-3 (hospital-outpatient surgical procedures - ASC),

- SNF—Of the bills reported on the "All Claims" page, show on page 4 data on the number of HCFA-1450s with the following two-digit classification codes in item 4: 1-8 (hospital swing-bed); 2-1 (SNF-inpatient); 2-8 (SNF-swing-bed); and 5-1 (Christian Science SNF-inpatient),

- HHA—Of the bills reported on the "All Claims" page, show on page 5 data on the number of HCFA-1450s with the following two-digit classification codes in item 4: 3-2 (HHA-Part B visits and use of DME); 3-3 (HHA-Part A visits and DME); and 3-4 (HHA-other-Part B benefits),

- Hospice—Of the bills reported on the "All Claims" page, show on page 6 data on the number of HCFA-1450s with the following two-digit classification codes in item 4: 8-1 and 8-2 (Hospice),

- CORF—Of the bills reported on the "All Claims" page, show on page 7 data on the number of HCFA-1450s with the following two-digit classification codes in item 4: 7-4 (Comprehensive Outpatient Rehabilitation Facility or Other Rehabilitation Facility),

- ESRD—Of the bills reported on the "All Claims" page, show on page 8 data on the number of HCFA-1450s with the following two-digit classification codes in item 4: 7-2 (Free Standing Renal Dialysis Center),

- Lab—Of the bills reported on the "All Claims" page, show on page 9 data on the number of HCFA-1450s with the following two-digit classification codes in item 4: 1-4 (Hospital-Other-Part B benefits); and 2-4 (SNF-Other-Part B benefits),

- Other—Of the bills reported on the "All Claims" page, show on page 10 data on the number of HCFA-1450s not included in the previous eight bill categories, and

- All Claims—On page 11 include all bills processed to completion during the reporting month.

3894.4 COMPLETING PAGE TWELVE OF THE INTERMEDIARY WORKLOAD REPORT

3894.5 Heading.—Enter your name and assigned number in the indicated space. In the space labeled "Report Month," enter the calendar month and year (e.g., 0587) being reported.

3894.6 Checking Reports.—Before transmitting page twelve to HCFA, check its completeness and arithmetical accuracy. Use the following checklist:

- For each column, line 1 must equal the sum of lines 2-10.
- For each column, line 11 must equal the sum of lines 12-20.
- For each line, column 1 must equal the sum of columns 2-6.

3894.7 Body of Report

SECTION F: INTEREST PAYMENT DATA

Page twelve of the HCFA-1566 includes data on your payment of interest on bills because of your failure to meet the required payment date of Section 9311 of the Omnibus Budget Reconciliation Act of 1986. Counts of bills processed reflect their status as of the last workday of the reporting calendar month. Base data shown on reliable counts of all bill processing activity and not on estimates. Report data on initial bills only. Include all bills requiring interest payments in the month. Report bills in the month the scheduled date of payment falls. See § 3600.1 for a discussion of interest payments and the definition of scheduled payment date.

Complete the report for each column as follows:

- Column 1 - Total—Include data for all bills for which interest payments were made in the reporting month.

- Column 2 - Hospital—Of the bills reported in column 1, show in column 2 data for HCFA-1450s submitted by hospitals for inpatient or outpatient services with the following two-digit classification codes in item 4:

1-1 (inpatient hospital)
1-2 (inpatient hospital - Part B benefits)
1-3 (outpatient hospital)
1-4 (hospital - other Part B benefits)
4-1 (Christian Science Hospital - inpatient)
4-2 (Christian Science Hospital - inpatient Part B benefits)
4-3 (Christian Science Hospital - outpatient)
4-4 (Christian Science Hospital - inpatient other)
8-3 (Outpatient hospital surgical procedures - ASC)

- Column 3 - SNF—Of the bills reported in column 1, show in column 3 data for HCFA-1450s submitted with the following two-digit classification codes in item 4:

1-8 (hospital swing-bed)
2-1 (SNF - inpatient)
2-2 (SNF - inpatient Part B benefits)
2-3 (SNF - outpatient)
2-4 (SNF - other Part B benefits)
2-8 (SNF-swing-bed)
5-1 (Christian Science SNF - inpatient)
5-2 (Christian Science SNF - inpatient Part B benefits)
5-3 (Christian Science SNF - outpatient)
5-4 (Christian Science SNF - inpatient other)

- Column 4 - HHA—Of the bills reported in column 1, show in column 4 data for HCFA-1450s with the following two-digit classification codes in item 4: 3-2, 3-3 and 3-4.

- Column 5 - Hospice—Of the bills reported in column 1, show in column 5 data for HCFA-1450s with the following two-digit classification codes in item 4: 8-1 and 8-2,

- Column 6 - Remainder—Of the bills reported in column 1 show in column 6 data for all HCFA-1450s not included in columns 2-5.

On line 1, show the number of claims on which you paid interest in the reporting month. Report on line 2 the number of claims included in line 1 for which you made payment one day after the required payment date (e.g., the required payment date is 30 days in FY 1987). Data for lines 3-10 are similar to those for line 2. Calculate the number of days late by subtracting the Julian date of receipt of the bill from the Julian scheduled payment date and then subtracting the required payment date (i.e., 30 in FY 1987). If the bill is paid in the year following the year of receipt, add 365 or 366 (if the year of receipt is a leap year) to the result, as appropriate.

On line 11, show the amount paid in interest on those bills reported in line 1. See § 3600.1 on how to calculate interest payments. On lines 12-20 show the amounts paid in interest for bills reported in lines 2-10, respectively. Show payment amounts on lines 11-20 to the nearest penny, including the decimal point.

Monthly Statistical Report on Status of Independent Rural Health Clinic Bill Workloads

3895. MONTHLY INTERMEDIARY REPORT ON INDEPENDENT RURAL HEALTH CLINIC BILL WORKLOADS--GENERAL.

Prepare and transmit to HCFA each month a report showing your independent rural health clinic (RHC) billing workloads. A separate report is required for each intermediary office assigned a separate intermediary number which services independent RHCs.

Do not include workload counts for bills submitted by provider RHCs in this report. Bills of this type are reflected and reported on your Monthly Intermediary Workload Report. (See §§ 3892ff.)

3895.1 Purpose and Scope.-- The monthly Intermediary Report on Independent Rural Health Clinic Bill Workloads is the source of current information on the status of your independent RHC bill workloads. The data derived from the report, together with information from other sources, are used by HCFA for:

- Estimating workloads,
- Analyzing manpower and material requirements,
- Providing base information for use in making determinations on possible realignment or expansion of service areas,
- Establishing operating norms and pars,
- Comparing the performance of individual intermediaries, and
- Identifying problem areas for resolution by you and/or HCFA.

This report is also designed to serve as a basic management tool for individual intermediaries. It provides some of the basic data needed for budgeting, financing, workplanning, progress evaluation, and identification of problems in handling independent RHC bills.

3895.2 Due Date.--Transmit the report on independent RHC workloads to HCFA CO via PC or terminal as soon as possible after the end of the month being reported but no later than the 10th of the succeeding month. Use instructions contained in the Medicare Contractor Workload System User's Guide. Nonreceipt of the report by the 10th of the succeeding month will result in contact with you to obtain the required information by telephone.

3895.3 Reporting Definitions.--For Section A of the report, use the same definitions of the terms "received, processed, and pending" as in § 3893.4 under lines 4, 10 and 12, respectively, of the monthly Intermediary Workload Report (HCFA-1566). Bills denied are those bills for which no reimbursement was made for reasons other than deductible was not met. For Section B of the report use the same definitions for processing and payment time given in § 3894.3—monthly Intermediary Workload Report (HCFA-1566 -Pages 2-11). For Section C of the report, use the same definitions as in § 3894.7 (Interest Payment Data).

3895.4 Reporting Instructions.—Report each month, using the format shown in § 3895.6, data on independent rural health clinic (RHC) bills. Do not report data on provider-based RHC bills here. Such bills are reported on the HCFA-1566. Report in Section A the number of independent RHC bills received, adjudicated (processed) and denied during the month, as well as the number of independent RHC bills pending at the end of the month. In addition, report on lines 2A-2M for each State in which you service an independent RHC, the number of such bills processed during the month. Show the two-digit Medicare numeric State code under the column marked "State Code." Show "00" for line 2 under "State Code" to represent the total of all States. If you process bills for only one State show that State code on line 2 with no further breakouts in lines 2A-2M. The counts for lines 2A-2M summed must equal the total number of independent RHC bills reported on line 2.

Report in Section B the claims processing time data for those independent RHC bills for which payment was mailed during the reporting month or equivalent action taken for those not paid. Note that the definition for when a bill is processed in Section B is different from Section A. See § 3894.3 for definitions on "paid" and "clean" bills. "Remainder" in this section refers to all bills (paid and not paid) with the exception of the "clean non-PIP bills" in column 2. Please note that when calculating the "mean" processing time, bills paid on the same day as received are counted as processed in 1.0 days (the same as bills processed the day after receipt).

Report in Section C the number of independent RHC bills for which interest payments were made as well as the amount of interest paid in the reporting month. See § 3600.1 on how to calculate interest.

3895.5 Checking Reports.—Before transmitting the report, check for completeness and accuracy. Use the following checklist:

o The sum of lines 2A + 2M = line 2.
o Line 2 State code must be "00" if lines 2A-2M are used.
o Line 2 State code cannot be "00" if only one State is shown in Section A, line 2.
o The sum of lines 6 - 12 = line 5 for all columns.
o Columns 2 + 3 = column 1 for lines 5 - 12.
o Line 13 must be greater than 0.0 and must contain a decimal point.

Use the following form in reporting independent RHC information:

3895.6 Reporting Form.—

Quarterly Statistical Report on Selected Intermediary Workload Activities

3896. QUARTERLY SUPPLEMENT TO INTERMEDIARY WORKLOAD REPORT — GENERAL

In addition to the monthly workload report, prepare and transmit to HCFA a Quarterly Supplement to the Intermediary Workload Report showing the status and disposition of selected workloads. Complete a separate report for each office assigned a separate intermediary number.

3896.1 Purpose and Scope.—The Quarterly Supplement to Intermediary Workload Report - Pages 1 and 2, supplies HCFA with current data on the number of bills processed for each State for which you service one or more providers. The Quarterly Supplement to the Intermediary Workload Report - Page 3, provides data on denials, HHA visits and waivers of liability.

3896.2 Due Date.—Transmit the Quarterly Supplement to HCFA CO via PC or terminal as soon as possible after the reporting quarter but no later than the 15th of the following month. Use instructions contained in the Medicare Contractor Workload System User's Guide. Transmission of the data to CO will be measured under CPEP.

3898. COMPLETING QUARTERLY SUPPLEMENT TO THE INTERMEDIARY WORKLOAD REPORT, PAGES 1 AND 2

3898.1 Heading.—Enter your name and assigned intermediary number. In the space labeled "Reporting Period," enter the fiscal quarter and year for which the report is prepared; e.g., show your 0188 for the quarter October 1987 through December 1987; show 0288 for the January-March 1988 quarter.

3892.2 Checking Reports.--Before transmitting reports to Baltimore, check their completeness and arithmetical accuracy. Use the following checklist:

- Line 1 equals the sum of the number of bills processed reported on line 10 for each corresponding type of bill on the intermediary's monthly workload report (HCFA-1566) - Page 1, for the 3 months of the reporting period.
- Line 1 equals the sum of lines for each column (i.e., items A-LL).
- For all lines of the report, column 1 (Total) equals the sum of the items in columns 2 + 3 + 4 + 5 + 6.
- The State code must be a two-digit numeric Medicare State code.
- The State code on line 1 must be "00" if you service providers in more than one State.
- The State code on line 1 cannot be "00" if you service providers in only one State. (It must be the code for that State.)

3898.3 Type of Bill.--Report counts in total and by type of bill as shown below:

column (1) Total—All provider bills.

column (2) Inpatient Hospital—HCFA-1450s submitted by hospitals for inpatient services, with the following two-digit classification codes in item 4: 1-1 (inpatient hospital); and 4-1 (Christian Science Hospital-inpatient).

column (3) Outpatient—HCFA-1450s submitted by hospitals or SNFs for outpatient services with the following two-digit classification codes in item 4: 1-3 (hospital-outpatient); 2-3 (SNF-outpatient); 4-3 (Christian Science Hospital-outpatient); 5-3 (Christian Science SNF-outpatient); and 8-3 (hospital-outpatient surgical procedures - ASC).

column (4) SNF—HCFA-1450s with the following two-digit classification codes in item 4: 1-8 (hospital-swing-bed); 2-1 (SNF-inpatient); 2-8 (SNF swing-bed); and 5-1 (Christian Science-SNF-inpatient).

column (5) HHA—HCFA-1450s submitted by HHAs with the following two-digit classification codes in item 4: 3-2 (HHA-Part B visits and use of DME); 3-3 (HHA-Part A visits and DME); 3-4 (HHA-other-Part B-benefits).

column (6) Other—HCFA-1450s with the following two-digit classification codes in item 4:

1-2 (hospital inpatient-Part B benefits);
1-4 (hospital-other-Part B benefits)
2-2 (SNF-inpatient-Part B benefits);
2-4 (SNF-other-Part B benefits);
4-2 (Christian Science- inpatient-Part B benefits);
4-4 (Christian Science-inpatient- other);
5-2 (Christian Science-SNF inpatient-Part B benefits);
5-4 (Christian Science-SNF inpatient-other);
7-1, 7-2, 7-3, 7-4 (Clinics-provider rural health clinics-ESRD, CORFs, etc.); and
8-1 and 8-2 (Hospices)

NOTE: Do not count "independent" rural health clinic bills here. Report them separately on the Monthly Intermediary Report on Independent Rural Health Clinic Bill Workloads. (See § 3895.)

3898.4 Body of Report.—

Section A: Bills Processed by State of Provider.-- This section is concerned with the reporting of the claims workload for each State for which you service one or more providers. Record the number of initial bills processed and reported on the monthly Intermediary Workload Report (HCFA-1566) - Page 1 on line 10, Total Processed, (see § 3893.4) over the 3 months of the reporting quarter and broken down by State.

If you service providers located in more than one State, show the total for all States (00) on line 1 of page 1 of the Quarterly Supplement as well as a breakout for each State on lines A-R (Page 1) and continue S-LL (Page 2).

NOTE: The information reported in Section A is to reflect the State of the provider, not the home office, if it is part of a chain organization.

Line 1--Total for All States.-- Report the total number of initial bills processed during the reporting quarter. For each respective column (1 through 6) the number shown equals the sum of the numbers reported on line 10 of the Intermediary Workload Report (HCFA-1566) - page 1, for the 3 months of the reporting quarter.

Lines 1A through 1LL--State.-- In the column just left of column (1), enter the two-digit Medicare State code of each State which includes at least one provider you service. Enter "00" on line 2 for the total of all States. If you service providers located in only one State, do not complete line 1A. Show the State code on line 1—total for all States.

Enter opposite each listed State the number of initial bills processed during the reporting quarter for providers located in the State. Report the data in total in column (1), and by type of bill in columns (2) through (6).

3898.5 COMPLETING QUARTERLY SUPPLEMENT TO THE INTERMEDIARY WORKLOAD REPORT, PAGE 3

3898.6 Heading.—Enter your assigned intermediary number. Under "Report Period"; enter the fiscal quarter and year for which the report is being prepared; e.g., show 0188 for October-December 1987; 0288 for January-March 1988; etc.

3898.7 Checking Reports.—Before transmitting report to CO check for completeness and arithmetical accuracy. Use the following checklist:

- o For all columns, line 2a + 2b must equal line 2.
- o For all columns, line 3a must be equal to or less than line 3.
- o Column 1 must equal the sum of columns 2 + 3 + 4 + 5 + 7 for lines 2-4. (Note: Column 6 is excluded.)
- o Column 6 must be equal to or greater than column 5 for lines 2-3.

- Column 6, line 1, must be equal to or greater than column 5, line 1 of Page 1 for the same reporting quarter.
- Line 4 must be rounded to whole dollars. (NOTE: This may cause you to force column 1 to equal the sum of columns 2+3+4+5+7.)
- For columns 1 through 5 and 7, line 4 must be equal to or greater than line 3 unless line 3 is zero in which case line 4 must also be zero.

3898.8 Type of Bill.—Report counts in total end by type of bill as outlined in § 3898.3 for page 1.

3898.9 Body of Report.—

Section B: Visit Data.—Report under column 6, line 1, the number of billed visits for HHA bills shown as processed in column 5, line 1, of the Quarterly Supplement, page 1, for the same reporting period.

Section C: Denial Determinations.-- This section includes data on full and partial denial determinations you made. Report information on only those denial determinations resulting in your preparing and sending a notice to the beneficiary. Include denials for no-pay bills where you send a denial notice to the beneficiary. Some examples of these various types of beneficiary notices are HCFA-1954, HCFA-1955, and EOMB. (See §§ 3719ff. for further discussion of the types of notices and their content.)

Do not count denial notices sent for the sole purpose of informing the beneficiary that future services will be denied.

Do not include denial notices sent by PROs . Do not include in this section counts of those situations where services were considered not reasonable and necessary or custodial care, but because both the beneficiary and provider were found to be without fault under § 213 of P.L. 92-603, liability was waived in full, excluding deductibles and coinsurance. (See §§ 3430ff.) However, include counts of those situations involving waiver of beneficiary liability only, i.e., provider found to be at fault.

Report the total number of denials according to whether they were medical or nonmedical. "Medical" denials include those where:

- Services were determined to be not reasonable or necessary, i.e., denials based on § 1862(a)(1) of the Act (see § 3151), such as noncovered medical social worker services,
- Services were determined to be custodial in nature i.e., denials based on § 1862(a)(9) of the Act (see § 3159), such as maintenance care,
- Denials based on medical statutory exclusions, e.g., noncovered foot care and cosmetic surgery performed in an outpatient setting, or dental services,
- No skilled services were rendered, e.g., home health aide services,

- Level of care was not skilled,
- Patient was not homebound for HHA services,
- Daily visits were denied (HHA services must be intermittent),
- Condition was not one for which Vitamin B12 is allowed,
- No documentation was available to substantiate patient under care of physician, or
- Services rendered were not consistent with certification.

Some examples of "nonmedical" denials are those where:

- Beneficiary was not entitled to benefits,
- Beneficiary's benefits were exhausted,
- Beneficiary had not met the 3-day inpatient hospital stay requirement for SNF services,
- Beneficiary had not met the 30-day transfer from hospital requirement (statutory provisions not applicable),
- There was a workers' compensation offset,
- Physician refused to certify,
- Services were furnished prior to entitlement or after termination of entitlement,
- Provider refused to submit evidence,
- Supervisory visits should have been included as administrative cost (see NOTE below),
- Duplicate services were rendered (see NOTE below),
- Noncovered supplies were provided (see NOTE below), or
- Undocumented services were billed (see NOTE below).

NOTE: Examine "noncovered" services individually to determine whether they are medical or nonmedical denials. If a service is routinely denied without medical review, count it as a nonmedical denial. However, if a medical review determination must be made, count it as a medical denial, even if it is listed as a nonmedical denial.

In selecting a reason for denial where both medical and nonmedical denials are involved, select the one which denied payment for the largest amount of total charges.

Line 2--Total Denial Determinations.--For columns 1-5 and 7 report the total number of denial notices sent to beneficiaries during the quarter. Count all denial notices, whether the patient stay, HHA plan of treatment, or Part B services were denied in full or in part. Report in column 6 the number of HHA visits denied for those HHA denials reported in column 5.

Line 2A--Medical.--Report the number of beneficiary notices (visits for column 6) included in line 2 above where payment was denied either in full or in part for medical reasons.

Line 2B--Non-medical.--Report the number of beneficiary notices (visits for column 6) included in line 2 above where payment was denied either in full or in part for non-medical reasons.

Section D: Waiver of Liability Activities.-- This section focuses on your activity with respect to the "waiver of liability" provision (§ 213 of P.L. 92-603). Beneficiaries and providers are protected from liability for services that are considered (1) not reasonable and necessary, or (2) custodial care, if you determine that the beneficiary and provider did not know or have reason to know that the services were not covered. (See §§3430-3446ff.)

Lines "3" and "4" refer to your determinations to waive the liability of both the beneficiary and the provider and make payment in full or in part or apply charges toward the deductible for services determined to be noncovered because they are not reasonable or necessary or constitute custodial care. These determinations are made on one of the following levels: (1) Initial bill processing, (2) appeals process, or (3) at any other time, such as when an you decides to reopen your determination. Do not count waiver determinations made by PROs.

Line 3--Total Number of Determinations.--For columns 1-5 and 7 report the total number of cases where you made a determination to waive the liability of both the beneficiary and provider during the current reporting quarter. Report in column 6 the number of HHA visits for which liability was waived for those cases reported in column 5.

Line 3A--Initial.--For columns 1-5 and 7 report the number of determinations included in line 3 which were made during adjudication of the initial bill. Report in column 6 the number of HHA visits for which liability was waived during adjudication of the initial bill.

Line 4--Total Amount Reimbursed.--Enter the amounts paid (to the nearest dollar) under the waiver provision for the cases enumerated in line "3". The amount of reimbursement does not include coinsurance amounts, charges applied toward the deductible, or reimbursements for services not under consideration with respect to the waiver provision. Where services on a bill are totally paid (excluding applicable deductible and coinsurance) as a combination of covered services and noncovered services paid under waiver and the exact dollar amount of waiver payment is not available without contacting the provider, report an approximation of the waiver payment. In calculating this approximation, apply to total charges the proportion of waiver days to total days represented in the claim and then subtract any applicable deductible or coinsurance for the waiver period.

Monthly Statistical Report on Medicare Secondary Payer Savings

3899. MONTHLY INTERMEDIARY REPORT ON MEDICARE SECONDARY PAYER SAVINGS (FORM HCFA-1563)

3899.1 General.—Each month electronicaly transmit to CO a Monthly Intermediary Report on Medicare Secondary Payer Savings (HCFA-1563) via the IBM PC. Continue to use existing dialup instructions and the RLINK software sent to you. (See §3899.9.) Hardcopy reports are not required. Transmit a separate report for each office assigned a separate intermediary number and also, for each State for which you have been designated the servicing intermediary for one or more providers. You are not required to complete an individual State report for those States in which you have had no MSP activity during the month (reports that would show zeros in every category, including pending).

3899.2 Purpose and Scope.—The Monthly Intermediary Report on Medicare Secondary Payer Savings supplies HCFA with current data on MSP savings and MSP pending workloads.

3899.3 Due Date.—Form HCFA-1563 is due in CO as soon as possible after the end of the month being reported, but not later than the 15th of the following month. Nonreceipt of the report by the 15th will result in a telephone contact with you to obtain required information.

3899.4 Form Heading.—Enter your name, assigned number and the State in which the provider is located. In the space labeled "Reporting Period" enter the numeric designation for month and year for which the report is being prepared, e.g., show 01/87 for January 1987.

3899.5 Savings Calculations.—

A. Reporting Dollar Values.—Round all values to the nearest whole dollar. This includes all amounts shown on lines 2, 4, 6, 8 and 10.

B. Checking Reports.—Before mailing the reports, check their completeness and arithmetical accuracy as follows:

- Lines 1 + 3 + 5 = line 7 for all columns.
- Lines 2 + 4 + 6 = line 8 for all columns.
- Line 10 should be equal to, or greater than, line 9 for all columns, unless line 9 is equal to "0" in any column; in that case, line 10 should also be equal to "0" for the same column.
- For each line of the report column "i" (TOTAL), must equal the sum of the items in columns "ii" + "iii" + "iv" + "v" + "vi."

3899.6 Recording Savings.--Control all claims from which you extract MSP savings and be able to verify all amounts recorded on the HCFA-1563.

A. MSP Savings File.--Retain claims specific key identifying information on each claim counted as savings on the HCFA-1563. At a minimum, record the beneficiary's name, HICN, type/dates of service, claim control number, billed charges and savings amounts reported.

B. Savings Data From Non-Medicare Sources.--If you record savings from data which you have obtained from your "private side" records or any other "outside" source, you must be able to extract the same claims specific information noted above, i.e., you must verify that Medicare covered services are involved and be able to calculate "what Medicare would have paid." In addition, you must compare this data with the data contained in your MSP savings file to ensure that savings have not previously been recorded for the same claims. If savings have not previously been taken for the claim, count them as savings on the HCFA-1563 and enter them into your MSP savings file.

3899.7 Source of Savings.--Report data by total and by source as shown below:

Column (i)	Total--All MSP savings regardless of source.
Column (ii)	Workers' Compensation, Black Lung, and VA.--Include data related to all MSP savings resulting from medical benefits provided by the WC Plans of the 50 States, the District of Columbia, Guam and Puerto Rico. Also include Federal WC provided under the Federal Employee's Compensation Act, the U. S. Longshoremens' and Harborworkers' Compensation Act and its extensions, the Federal Coal Mine Health and Safety Act of 1969 as amended (the Federal BL Program), and any fee-for-service medical care paid for by the VA. Keep separate records for each distinct category (WC, BL or VA) as this may become a reporting requirement in the future.
Column (iii)	Working Aged--Include data related to all MSP savings resulting from benefits payable under an EGHP for beneficiaries aged 65 and older who are covered by reason of their own employment or the employment of a spouse of any age. Section 3491 further defines the working aged provisions.
Column (iv)	ESRD--Include data related to all MSP savings resulting from benefits payable under an EGHP for individuals who are entitled to Medicare benefits solely on the basis of ESRD during a period of up to 12 months. The period during which Medicare pays secondary benefits is defined in §§3490.5 and 3490.6.

Column (v) Auto Medical, No Fault and Liability Insurance--Include data related to all MSP savings resulting from:

o Automobile Medical or No Fault Insurance--Insurance coverage (including a self-insured plan) that pays for all, or part, of the medical expenses for injuries sustained in the use of, or occupancy of, an automobile, regardless of who may have been responsible for the accident. (This insurance is sometimes called "personal injury protection," "medical payments coverage" or "medical expense coverage.")

o Liability Insurance--Insurance (including a self-insured plan) that provides payment based on legal liability for injury, illness or damage to property. It includes, but is not limited to, automobile liability insurance, uninsured motorist insurance, homeowners' liability insurance, malpractice insurance, product liability insurance, and general casualty insurance. It does not include situations where a beneficiary receives medical payment under his or her own homeowners' insurance.

Column (vi) Disabled--Include data related to all MSP savings resulting from situations where Medicare is the secondary payer for disabled beneficiaries under age 65 (except ESRD beneficiaries) who elect to be covered by a large group health plan (LGHP) as a current employee or family member of such employee. A LGHP is any health plan that covers employees of at least one employer who normally employs 100 or more employees. The disabled provisions apply to items and services furnished on or after January 1, 1987 and before January 1, 1992.

3899.8 Type of Savings.--Report data by type of savings as shown below.

Unpaid (Cost Avoided) MSP Claims

Unpaid (cost avoided) claims are those that you have returned without payment because you have strong evidence that another insurer is the primary payer and there is no indication that payment has been requested from that payer. The information indicating MSP involvement may be contained in your files, on the query reply, or on the claim itself. In addition, any information which you obtain from a non-Medicare source and use as the basis for claiming cost avoidance savings must meet the criteria in §3899.6B.

Information considered adequate for claiming cost avoidance savings includes statements on the claim noting "automobile accident," "collision", or the name of the automobile insurer. Another example would be previous information that you have obtained which shows that EGHP coverage exits. Do not count claims which you develop as "possible" MSP situations based on routine edits as cost avoidance savings unless you have previous information that another payer has primary responsibility. For example, "trauma code" edits are not, by themselves, considered strong evidence that Medicare is the secondary payer.

Line 1—Number.—Report the total number of cost avoided claims from which you are recording savings on the report.

Line 2—Dollar Value.—Report the total dollar value of the potential Medicare payments calculated for the claims on Line 1 that will be saved if the primary payer makes a payment which relieves Medicare of all payment liability.

Show as the amount cost avoided what Medicare would have paid. Do not count total charges as cost avoided savings. The cost avoided amount is the "Medicare payment rate" or the "current Medicare interim reimbursement amount" less any co-insurance amount applicable. Reduce Part B services subject to coinsurance for the coinsurance amount or you may use a "coinsurance reduction factor" of 19 percent to calculate coinsurance charges for all Part B services. You do not have to query for deductible status, but may assume that the deductible has been met.

Tracking/Adjusting Cost Avoidance Savings

Cost avoidance savings may not duplicate savings reported as full or partial recoveries and may not be shown where Medicare ultimately makes primary payment. To prevent duplicate counting, suspend all claims which you return unpaid. Set up a control on the claim when it is returned for development. Maintain this control for 75 days, unless you receive further information before that time which allows you to process the claim. If no further information on the claim is received, you may deny the claim after 75 days. You are not required to continue tracking the claim, but retain the key identifying information on the claim, as described in §3899.6A.

HCFA prefers you to show cost avoidance savings only after 75 days have elapsed. You do, however, have the option of counting the savings when the claim is initially suspended or at any time during the suspension period. If you choose the latter alternative, you must adjust your cost avoidance savings if the claim is resubmitted during the suspension period with information showing it is not a legitimate cost avoidance.

The following situations require special consideration if cost avoidance savings are counted before the 75 day suspense period has ended:

- A claim returned (and counted as cost avoided) is paid in part by another payer and the provider resubmits it for secondary payment.
- A claim returned (and counted as cost avoided) is denied by the other payer and the provider resubmits it for primary payment.
- A claim returned (and counted as cost avoided) is paid in full by the other payer and the provider submits a no-payment bill. Show "full recovery" savings and not cost avoidance.

In these situations, adjust your cost avoidance savings figures by deducting or "backing out" the applicable amounts. Make the adjustments in the reporting month in which a final determination is rendered. The following chart outlines the correct reporting of savings in each situation.

ADJUSTMENTS TO REPORTED MSP COST AVOIDANCE SAVINGS

CLAIMS PROCESSING ACTIONS	MSP SAVINGS REPORTED		
	Cost Avoidance	Partial Recoveries	Full Recoveries
I. Partial Recovery Adjustment			
o MSP situation indicated. Medicare payment calculated to be $1200 if Medicare was primary payer. Claim is returned to provider.	$ 1,200		
o Provider resubmits the claim showing $900 paid by the other insurer. Medicare secondary payment of $300 is made.	$ (1,200) *	$ 900	
II. "Other Payer Denial" Adjustment			
o MSP situation indicated - Medicare "primary" payment, $2,000. Claim is returned to provider.	$ 2,000		
o Other payer denies claim. Medicare found to be primary and Medicare payment of $2,000 is made.	$(2,000) *		
III. Full Recovery Adjustment			
o MSP situation indicated - Medicare "primary" payment, $900. Claim is returned to provider.	$ 900		
o Provider submits a "no-payment" bill showing full payment by the other payer.	$(900) *		$900

*Amounts "backed out" of cost avoidance savings figures.

Full Recoveries

Line 3--Number.--Report the number of full recoveries made during the month.

Line 4--Dollar Value.--Report the dollar value of full recoveries made during the month.

Full Recoveries are claims where the primary payer made a payment which relieved Medicare of all payment liability. Full recoveries can be either prepayment or postpayment. Count full recoveries in the month in which you recover the full payment or receive a no-payment bill for prepayment full recovery cases. Where the "full recovery" is paid in installments, count the claim as pending until all monies have been received. Instructions for processing full recovery claims are in §§3680, 3681, 3682, 3685B, and 3685C1.

A. Prepayment Full Recovery.--A prepayment full recovery occurs when a primary payer makes full payment on a charge before Medicare makes any payment.

EXAMPLE: A hospital identifies an EGHP as the primary payer, submits its charge to that insurer, and the EGHP pays the hospital's full cost. You subsequently receive a "no pay" bill in accordance with §3682. Determine what you would have paid if the EGHP had not made payment and record that total as a full recovery savings.

B. Postpayment Full Recovery.--A postpayment full recovery occurs when a primary payer makes full payment on a charge after Medicare has paid.

EXAMPLE: Medicare paid a hospital bill for charges incurred as a result of an automobile accident. Subsequently, an auto liability insurer reimburses the Medicare beneficiary for the full amount of the medical expenses and the beneficiary refunds that amount to the program. Count the amount of Medicare's initial payment as a postpayment full recovery.

Record as savings, that portion of a full recovery paid to an attorney or other agent as Medicare's share of the recovery cost. Consequently, there may be instances where you have made a full recovery but do not get back the full amount paid. When you refer a case to the RO for recovery action, however, do not record any savings at that point. Savings from a compromise or "subrogation" case may be recorded only after a final determination. Do not count these cases for CPEP credit prior to final settlement.

EXAMPLE: A beneficiary incurs a $1,000 physician's bill and a $5,000 hospital bill as a result of injuries sustained in an automobile accident. Assuming that all deductibles are satisfied, Part B pays $800 toward the physician's charges, and Part A covers the hospital bill in full. After litigation, a liability insurer agrees to pay $6,000 for the beneficiary's medical expenses from which the attorney takes a fee. (If the attorney's fee were 33 percent, the dollar recovery would be $4,000.) The Part B contractor can record $800 in

Full Recovery savings. You are also allowed to count your payment as a Full Recovery savings even though the amount recovered, due to attorney's fees, does not equal what was paid.

Partial Recoveries

Line 5--Number.--Report the number of partial recoveries made during the month.

Line 6--Dollar Value.--Report the dollar value of partial recoveries made during the month.

Partial recoveries are those savings realized when a primary payer makes a payment which covers only a part of the Medicare allowable charge, leaving Medicare with a balance to pay. Use the following formula in computing the savings from a partial recovery:

o The dollar amount of Medicare benefits available for the services or supplies (calculated as if Medicare were the primary payer) less the Medicare benefits paid for the services or supplies, equals the partial recovery savings. (Primary Payment -Actual Payment = Partial Recovery Savings)

Count partial recoveries in the month when you take final action on the claim (either making a payment supplemental to that of the primary payer or making a partial recovery from a payment by the primary payer). Instructions for processing partial recovery claims are in §§3679, 3680, 3681, 3682 and 3685.

Record as savings, that portion of a partial recovery paid to an attorney or other agent as Medicare's share of the recovery cost. When you refer a case to the RO for recovery action, however, do not record any savings at that point. Savings from a compromise or "subrogation" case may be recorded only after a final determination. These cases may not be counted for CPEP credit prior to final settlement.

Totals

In this part of the report (lines 7 and 8), report data on the totals of unpaid claims plus full and partial recoveries.

Line 7--Claims.--Report the total number of MSP claims handled during the month.

Line 8--Dollar Value.--Report the total dollar value associated with MSP claims during the month.

Pending Claims/Cases

Line 9--Number.--Report the number of pending claims/cases as of the close of the reporting month. Include claims/cases for which "Full Recovery" is expected but all money due has not been received.

Line 10—Estimated Value.—Report the gross charges for all claims/cases reported as pending on line 9. Where "Full Recovery or Partial Recovery" has been determined, but all monies have not been received, report the gross charges until you receive the full amount due or it is reasonable not to expect further payments.

A case is defined as one or more claims filed on behalf of an individual and related to one specific occurrence which necessitated medical care. When recording data for column 1 concerning WC and Auto Liability, and No Fault Insurance, count only cases. For Working Aged (column iii), ESRD (column iv), and Disabled (column vi), count each individual claim.

A case/claim is pending only after it has been developed to the point where it is determined to be an MSP claim and no final resolution has been made. A partial or interim payment is not sufficient to remove a case/claim from the pending rolls. Final resolution occurs when there is no longer a practical expectation of further reimbursement.

Remarks.—Enter any comments relevant to the interpretation and analysis of the report.

Signature.—The report is signed by the individual responsible for its compilation.

Date.—Enter the Date that the report is completed and signed.

3899.9 Electronic Submission.—

A. Keying HCFA-1563.—

- Use existing RLINK dialup instructions.
- Key letter "L" to bring up blank HCFA-1563.
- Enter valid 5 digit intermediary number. Use tab key to move from column to column.
- Enter reporting period using numeric designation month and year, e.g., 0187 for January 1987.
- Enter two-position alpha State code.
- Complete each column of data. Fields with zero do not have to be keyed. System will presume all blank fields to be zero.
- Do not key dollar signs or commas. Key only whole dollar amounts.
- After completing the form key F1. System will edit and print any error messages on the line above "contractor number." Tab to incorrect field and rekey correct entry. When form passes all edits, line will read "record has been written." Key F4 to return to menu.

- To abort at any time without writing a record, key F3 and refer to CICS instructions.

- To verify that a report has been written, return to the main menu (F4) and key "L" to bring up a blank form. Key in contractor number, reporting period and State code. Key F7. Completed report should appear on the screen.

B. Edits for HCFA-1563.—

- A valid 5-digit intermediary number is required.
- The default value for areas not keyed is zero.
- Appropriate reporting period (MMYY) is required.
- Enter the two-position alpha State code.
- Lines 1 + 3 + 5 must equal line 7 for all columns.
- Lines 2 + 4 + 6 must equal line 8 for all columns.
- Line 10 must be equal to or greater than line 9 for all columns unless line 9 is zero. In that case line 10 must also be zero.
- For each line of the report column i must equal the sum of columns ii + iii + iv + v + vi.

3900. MEDICAL REVIEW (MR) FOR COVERAGE OF SKILLED NURSING FACILITY SERVICES

A. General.—Review SNF claims with supporting medical record documentation to ensure that payment is made only for services that are medically reasonable and necessary, require a skilled level of care on a daily basis, and, as a practical matter, can only be provided on an inpatient basis in a SNF. Review each service for which payment is requested.

Identify admissions where it appears that the beneficiary has been prematurely discharged from an acute care hospital. Identify cases where other quality of care issues appear. Refer quality issues other than those in subsection B to the RO for referral to the State agency.

B. Premature Discharge From PPS Setting.—Refer to the RO any cases where you believe a patient was prematurely discharged from the PPS acute care setting, admitted to a swing bed or hospital-based SNF and the patient continued to require and receive acute care services.

Based upon your review of the medical record, determine whether:

- The patient received any SNF services during the stay;
- If so, at what point the patient began receiving them;
- The total number of SNF days, if any, where the patient received SNF services; and
- If applicable, the dates the SNF services were rendered.

Attach all information (e.g., medical record) you used in your determination.

The RO forwards the material to the PRO for its review of the alleged premature discharge and the acute care services. The PRO determines if, in fact, the patient was prematurely discharged and the number of acute care days that were billed as SNF days. It informs you of the number of days and dates of service to deny. The PRO issues a denial notice to the provider and informs the beneficiary of the number of days counted as hospital days for utilization purposes. Treat the SNF payment as an overpayment in accordance with §3710.1.

3900.1 MR of Hospital-Based and Nonhospital Based SNF Claims.—

A. Covered Services.—Claims submitted for payment of SNF services.

Identify a 30 percent sample of claims for review using three different terminal digits of the HICN chosen and rotated at least every quarter (e.g., 1, 3, 5, or 2, 4, 6). You may use an alternative plan (e.g., LOS screens, sampling technique), to identify the 30 percent as long as the process does not exclude the possibility of the URC or SNF continued stay denials from falling into the sample.

NOTE: If you use LOS screens or other parameters to identify bills, furnish a copy with your report of MR activity. Furnish a new copy whenever you make changes in your selection process.

- Request appropriate medical records (i.e., medical information forms or copies of medical records) covering the period or up to discharge, as appropriate, a copy of the beneficiary notice and the basis for the determination when a URC or SNF continued stay denial falls in the sample.

- Review and determine the medical necessity of the admission and appropriateness of the continued stay. If you reverse the URC or SNF noncoverage, send a notice to the beneficiary and to the provider. Request a bill for the period reversed or adjust the bill submitted. (See §3723.) If you affirm the URC or SNF noncoverage decision, send a denial notice with appropriate waiver and appeals language.

- Increase the review for the next quarter to 100 percent if you identify, in more than 10 percent of the bills, improper covered or noncovered decisions. See §3439.2 for the effect of improper noncovered decisions on presumptive waiver status.

- Train the SNF if inaccurate decisions are being made.

B. Demand Bills.—The patient or his/her representative requests a claim be submitted for a coverage determination. The demand bill is identified by condition code 20.

Demand bills are submitted in the next billing cycle after the beneficiary's request and are accompanied by the medical information you require.

- Identify and review a 30 percent sample of "demand bills," the medical information and reasons for noncoverage to assure that the provider is making correct determinations. Review the noncoverage letter for timeliness and content. (See §3439.2.)

- If you concur that the care is not covered, send the appropriate denial letter. Include the appeal rights statement. If you reverse the determination, in whole or in part, notify the beneficiary and the provider in writing. (See §3723.)

- Train the SNFs if inaccurate decisions are made. (See §3439.3 for effect of improper noncoverage decisions on presumption waiver status.)

- Increase the level of review to 100 percent of demand bills for a SNF which you identify as making inaccurate decisions on more than 10 percent of the demand bills. Retain the 100 percent review for one quarter or until such time as accurate decisions are being made.

NOTE: You must also generate a HCFA denial letter with appeal rights on all demand bills which are not medically reviewed.

C. Bills Submitted for Medicare Denial Notices.—Medicaid or another insurer requires a medical denial letter.

These bills are identified by condition code 21. The bill must be accompanied by a copy of the beneficiary notice of noncoverage which includes the specific reasons the services were determined to be noncovered. Determine the level of review required based upon the SNF's description of the reason for denial in notice, your knowledge of the SNFs performance in making appropriate coverage/noncoverage decisions and other pertinent factors.

- Request and review medical documentation where there is a question that the SNF has inappropriately denied Medicare covered services. Advise the beneficiary and SNF if the denial is reversed.

- Send a denial letter with appeal rights to the beneficiary and a copy to the SNF in every case where the denial is affirmed.

D. Report of SNF MR Activity.—Complete the report for each calendar quarter. Within 30 days of end of the reporting quarters submit it to:

Health Care Financing Administration
Division of Provider Procedures, BPO
1-H-3 Meadows East Bldg.
6325 Security Blvd.
Baltimore, MD 21207

SNF QUARTERLY REPORT OF MEDICAL REVIEW ACTIVITY - Exhibit 1

Intermediary Number . Quarter Ending - Date: (M-D-Y)

Intermediary Name

Medical Review of SNF Bills

Percent of claims reviewed (include covered and demand bills).

A. Covered Services.—

Describe method of sample selection (e.g., HICN, LOS) ________

Number of payment claims subjected to review. ________

Number of payment claims denied. ________

Number of URC or SNF continued stay denials reviewed. ________

Number of URC or SNF continued stay denials partially or fully reversed. ________

B. Demand Bills.—

Number of demand bills submitted. ________

Number of demand bills reviewed. ________

Number fully or partially reversed. ________

C. Provider Waiver Status.—

Number/percentage of SNFs off waiver for exceeding 5 percent denial rate.

- Number ________
- Percent ________

Number/percent of SNFs off waiver for exceeding 10 percent denial rate.

- Number ________
- Percent ________

D. RO Referrals.—

Number of claims referred for PRO review of quality issues. ________

Number of SNFs referred for failure to timely submit beneficiary demand bills. ________

E. Beneficiary Complaints.—

Number of complaints from beneficiaries (or representatives) on failure of SNF to submit demand bills, give timely notice of noncoverage, or related issues. ________

Describe actions taken which are not included in subsection D.

3902. MEDICAL REVIEW OF HOME HEALTH SERVICES

Standardized data collection forms have been developed to promote more consistent coverage decisions and minimize payment for noncovered services. The home health data elements are contained on the following HCFA forms:

- o HCFA-485 - Home Health Certification and Plan of Treatment - contains data necessary to meet regulatory and national survey requirements for the physician's plan of treatment and certification. This form is completed by the physician/HHA.

- o HCFA-486 - Medical Update and Patient Information - contains data you need to make coverage determinations. This form is completed by the HHA.

- o HCFA-487 - Addendum to Plan of Treatment/Medical Update - may be used by HHAs to provide additional documentation of any elements on the HCFA-485/486. This form is completed by the physician/HHA.

- o HCFA-488 - Intermediary Medical Information Request - contains supplemental data elements which may be required on a case by case basis where the HCFA-485, 486, and/or 487 do not provide sufficient information for a decision. You generate this form.

You may use only the HCFA-485/486/487/488 as medical information forms. They must be completed in their entirety. No item can be left blank. However, there are items where "Not Applicable" (N/A) is an acceptable entry. These items are specified in the instructions.

HCFA requires HHAs to submit the HCFA-485/486 with the initial claim and with the claim closest to the recertification date thereafter. Providers submitting claims via electronic media are required to maintain the hardcopy version of the HCFA-485/486 on file. Request the hardcopy as needed. Specifications for electronic transmission of HCFA-485/486/487 are in Addenda A and D.

At your discretion you may require routine submission of the HCFA-486 more frequently than every 60 days, i.e., when a modification occurs. However, ask the agency to complete only Items 1 through 3, 5 through 10, 12 through 16, and 22 of the HCFA-486 and submit it with the interim claim. Require routine submission of medical records only when necessary (e.g., the agency has been identified as a poor performer based upon denial statistics or postpayment audits).

Where the information on the HCFA-485/486/487 is not sufficient to make a coverage decision, use the HCFA-488 to request additional information and/or the medical record. Use the HCFA-488 to request medical information on interim claims requiring development prior to payment because the HCFA-485/486 was not required.

In reviewing claims for home health services, review the HCFA-485/486 for the claims that require an initial certification or recertification. Make a determination on the entire certification period. If you determine that medical records for the interim claim are required or that services are noncovered from SOC or at some point during the billing period, flag your system so that the interim claim(s) is suspended for appropriate action.Establish an audit trail on each HCFA-485/486 reviewed. Include patient identifier(s), start of care date, period of review (claims and forms period), reviewer's initials and date of review. The review must be done on a prepayment basis.

You may deny visits/services based upon information provided on the forms and need not request medical records first. However, do not deny claims because a field on the HCFA-485/486 has not been completed. If the missing information is needed to make a coverage determination, use a HCFA-488 to request the necessary information. If a coverage determination can be made despite the missing information, pay the claim if the services are clearly covered or, deny it if they are not. It is appropriate to deny the claim if the missing information needed for a coverage determination is not submitted within your published timeframes for requested documentation or if the agency indicates that the information is not available. Follow the procedures below for the items noted.

o Missing or Incomplete Physician's Orders - (HCFA-485, Item 21; HCFA-486, Item 16; HCFA-487, Addendum).

— Visits for a discipline are billed but there is no physician order or the physician order is present but there is no frequency.

+ Request a copy of the physician's order for the services. Accept a countersigned verbal order or a physician's statement that there was a verbal order before the services were rendered. Do not accept postdated orders which do not specifically indicate a prior verbal order. If the agency is furnishing services without a physician's order, deny the claim. Advise the HHA that your findings will be reported to the RO for possible referral to the State survey office.

Services documented on the HCFA-486 Item 13 will not be accepted in lieu of physician's orders in the appropriate fields on the HCFA 485/486/487.

A postdated order is defined as one that is signed or written by the physician after the services were rendered when there is no evidence of a preexisting verbal order.

— Physician order for discipline and frequency is present but there is no duration of visits.

+ Accept the duration (if present) in HCFA 486 Item 13 or elsewhere on the HCFA-485/486/487.

+ Assume the duration is the same as the certification period if there is only one frequency per discipline.

+ Request the duration from the agency if a discipline is visiting at different frequencies during the certification period.

+ Where the agency consistently omits duration, you may return the claim and HCFA 485/486 for proper completion.

o Agency provides fewer visits than the physician orders.

-- Do not deny claims because the agency provides fewer visits than ordered. The agency should be reporting the decrease in visits to the physician. Where an agency is consistently decreasing visits without reporting to the physician, notify the RO so that the State survey office can be advised.

3902.1 HCFA-485 - Home Health Certification and Plan of Treatment Data Elements.--Is designed to meet the regulatory requirements (State and Federal) for the physician's plan of treatment and certification and recertification requirements. The HHA is required to submit a completed HCFA-485 with each initial claim and each claim closest to the beneficiary's recertification date thereafter. For example, if a patient has a start of care of 06/15/87, the HHA must submit a completed HCFA-485 (and HCFA-486) with the first claim for the services rendered from 06/15 to 06/30/87. The HHA must submit a completed HCFA-485 (and HCFA-486) again with the claim for services rendered 08/01 to 08/31/87, if the patient was recertified for home health services provided on or after 08/15/87. The HCFA-485 submitted with the claim for services is the physician recertification.

The following items are contained on the HCFA-485:

1. Patient's HICN.--The HHA enters the HICN (numeric plus alpha indicator(s)) as shown on the patient's health insurance card, certificate award, utilization notice, temporary eligibility notice, or as reported by the SSO.

2. SOC Date.--The HHA enters the 6 digit month, day, year on which covered home health services began, i.e., MMDDYY (061587). The start of care date is the first Medicare billable visit. This date remains the same on subsequent plans of treatment until the patient is discharged. Home health may be suspended and later resumed under the same start of care in accordance with the HHA's internal procedures. See §3120.3 regarding period of suspension.

3. Certification Period.—The HHA enters the 6 digit month, day, year, i.e., MMDDYY (06/15/87-08/15/87), which identifies the period covered by the physician's plan of treatment. The "From" date for the initial certification must match the SOC date. The "To" date can be up to, but never exceed two calendar months and, mathematically, never exceed 62 days. The "To" date is repeated on a subsequent recertification as the next sequential "From" date. Services delivered on the "To" date are covered in the next certification period.

EXAMPLE: Initial certification "From" date 061587
Initial certification "To" date 081587

Recertification "From" date 081587
Recertification "To" date 101587

4. Medical Record No.—This is the patient's medical record number that is assigned by the HHA and is an optional item. If not applicable, the agency should enter "N/A."

5. Provider No.—This is the 6 digit number issued by Medicare to the HHA. It contains 2 digits, a hyphen, and 4 digits (e.g., 00-7000).

6. Patient's Name and Address.—The HHA enters the patient's last name, first name, and middle initial as shown on the health insurance card and the street address, city, State, and ZIP code.

7. Provider's Name and Address.—The HHA enters its name and/or branch office (if appropriate), street address (or other legal address), city, State and ZIP code.

8. Date of Birth.—The patient's date of birth (6 digit month, day, year) in numerics, i.e., MMDDYY (040120) is entered.

9. Sex.—The patient's sex is checked in the appropriate box.

10. Medications: Dose/Frequency/Route.—The physician's orders for all medications including the dosage, frequency and route of administration for each drug must be listed.

- Drugs which cannot be listed on the plan of treatment due to lack of space are listed on the addendum.
- The letter "N" is used after the medication(s) which are "new" orders.
- The letter "C" is used after the medication(s) which are "change" orders either in dose, frequency or route of administration.

"New" orders refer to medications which the patient has not taken recently, i.e., within the last 30 days, or which the patient has never taken previously. "Change" orders for medications include dosage changes, frequency changes or route of administration changes within the last 60 days.

11. Principal Diagnosis, ICD-9-CM Code and Date of Onset/Exacerbation.--The principal diagnosis is entered on all HCFA-485 forms. The principal diagnosis is the diagnosis most related to the current plan of treatment. The diagnosis may or may not be related to the patient's most recent hospital stay, but must relate to the services rendered by the HHA. If more than one diagnosis is treated concurrently, the diagnosis that represents the most acute condition and requires the most intensive services should be entered.

The HHA enters the appropriate ICD-9-CM code for the principal diagnosis in the space provided. The code is the full ICD-9-CM diagnosis code including all digits. V codes are acceptable as primary and secondary diagnosis. In many instances, the V code more accurately reflects the care provided. However, the V code should not be used when the acute diagnosis code is more specific to the exact nature of the patient's condition. A list of V codes can be found in Exhibit VI.

EXAMPLE: Patient is surgically treated for a subtrochanteric fracture (code 820.22). Admission to home care is for rehabilitation services (V57.1). The HHA uses 820.22 as the primary diagnosis since V57.1 does not specify the type or location of the fracture.

Patient is surgically treated for a malignant neoplasm of the colon (code 153.2) with exteriorization of the colon. Admission to home care is for instruction in care of colostomy (V55.3). The HHA uses V55.3 as the primary diagnosis since it is more specific to the nature of the proposed services.

The principal diagnosis may change on subsequent forms only if the patient develops an acute condition or an exacerbation of a secondary diagnosis requiring intensive services different than those on the established plan.

The medical diagnostic term is listed next to the ICD-9-CM code. The date reflects either the date of onset, if it is a new diagnosis, or the date of the most recent exacerbation of a previous diagnosis. If the exact day is not known, the HHA uses 00 for the day.

12. Surgical Procedure, Date, ICD-9-CM Code.--The surgical procedure relevant to the care being rendered is entered. For example, if the diagnosis in Item 8 is "Fractured Left Hip," the ICD-9-CM Code, the surgical procedure and date are noted (e.g., 81.62, Insertion of Austin Moore Prosthesis, 060987). If a surgical procedure was not performed or is not relevant to the plan of care, N/A is inserted. The addendum (HCFA-487) is used for additional relevant surgical procedures. At a minimum, the month and year must be present for date of surgery.

13. Other Pertinent Diagnoses: Dates of Onset/Exacerbation, ICD-9-CM Code.—All pertinent diagnoses, both narrative and ICD-9-CM Codes, relevant to the care rendered are entered. Other pertinent diagnoses are all conditions that coexisted at the time the plan of treatment was established or developed subsequently. Diagnoses that relate to an earlier episode, which have no bearing on this plan of treatment, are excluded.

If there are more than the four pertinent diagnoses, the addendum (HCFA-487) is used to list the additional conditions. The agency enters N/A if there are no pertinent secondary diagnoses.

The date reflects the date of onset, if it is a new diagnosis, or the most recent exacerbation of a previous diagnosis. If the date is unknown, the agency notes the year and place 00s in the month or day not known.

14. DME and Supplies.—The HHA enters all nonroutine supplies that it is billing Medicare. For example, dressing changes may require use of 4 x 4s, telfa pads, kling and non allergic tape. Catheter changes may require a catheter kit and irrigation kit as well as irrigating solutions. Agencies do not need to list the exact amount of usage.

The items of DME ordered by the physician that are billed by the HHA to Medicare are listed. The agency enters N/A if no supplies or DME will be billed.

15. Safety Measures.—The physician's instructions for safety measures are listed in this item.

16. Nutritional Requirementss.—The HHA enters the physician's orders for the diet. This includes specific therapeutic diets and/or any specific dietary requirements. Fluid needs or restrictions are recorded. Total parenteral nutrition (TPN) can be listed under this item, under medications, or on the HCFA-487.

17. Allergies.—Medications to which the patient is allergic are listed. In addition, other allergies the patient experiences (e.g., foods, adhesive tape, iodine) are included.

18A. Functional Limitations.—All items which describe the patient's current limitations as assessed by the physician and the agency are indicated.

18B. Activities Permitted.—The activity(ies) which the physician allows and/or for which physician orders are present are indicated.

If "Other" is checked under Item 18A or 18B, a narrative explanation is provided in Item 17 of the HCFA-486.

19. Mental Status.—The block(s) most appropriate to describe the patient's mental status is checked. If "Other" is checked, patient's condition is specified here.

20. Prognosis.—A check is placed in the box which specifies the most appropriate prognosis for the patient; poor, guarded, fair, good or excellent.

NOTE: The number or letter adjacent to the blocks in Items 18 though 20 correspond to the codes for EMC transmission only.

21. Orders for Discipline and Treatments (Specify Amt/Freq/Dura).—The physician must specify the frequency and the expected duration of the visits for each discipline. The duties/treatments to be performed by each discipline are stated. A discipline may be one or more of the following: skilled nursing (SN), physical therapy (PT), speech therapy (ST), occupational therapy (OT), medical social service (MSS), home health aide (AIDE) or others (e.g., nutritionist, male orderly, respiratory therapist).

Orders must include all disciplines and treatments even if they are not billable to Medicare.

Frequency denotes the number of visits per discipline to be rendered, stated in days, weeks, or months. Duration identifies the length of time the services are to be rendered and may be expressed in days, weeks or months.

EXAMPLE: Certification period is from 06/15/87 - 08/15/87:

OT -	Eval., ADL training, fine motor coordination	3x/wk x 6wks
ST -	Eval., increase articulation of single syllable words, all motor exercises following 2-step verbal directions	3x/wk x 4wks
SN -	Skilled observation of C/P and neuro status; instruct meds and diet/hydration, instruct wound care-wash, betadine to affected area, cover w/DSD, Foley catheter care	QD x 5 days 3x/wk x 2wks 2x/wk x 2wks 1x/wk x 4wks
MSS -	Arrange for Medicaid to pay for drugs; assessment of emotional and social factors	1x/mo x 2mos
AIDE -	Assist with personal care: complete bed bath, shave, catheter care	3x/wk x 9wks

Specific services rendered by physical, speech and occupational therapists may involve different modalities. The "AMOUNT" is necessary when a discipline is providing a specific modality for therapy. Modalities usually mentioned are heat, sound, cold, and electronic stimulation.

EXAMPLE: PT - To apply hot packs to the C5-C6 x 10 minutes3x/wk x 2wks

PRN visits may be ordered on a plan of treatment only where they are qualified in a manner that is specific to the patient's potential needs. Both the nature of the services and the number of PRN visits to be permitted for each type of service is specified in the plan of treatment. Open-ended, unqualified PRN visits do not constitute physician orders for patient care since neither the nature nor the frequency of the service is specified.

EXAMPLE: Skilled nursing visits 1xm x 2m for Foley change and PRN x 2 for emergency Foley irrigation and/or changes.

Skilled nursing visits 1xm x 2m to draw blood sugar and PRN x 2 to draw emergency blood sugar if blood sugar level is above 400.

22. Goals/Rehabilitation Potential/Discharge Plans.--This information reflects the physician's description of the achievable goals and the patient's ability to meet them as well as plans for care after discharge.

Examples of realistic goals:

- Independence in transfers and ambulation with walker.
- Healing of leg ulcer(s).
- Maintain patency of Foley catheter. Decrease risk of urinary infection.
- Achieve optimal level of cardiovascular status. Medication and diet compliance.
- Ability to demonstrate correct insulin preparation/administration.

Rehabilitation potential addresses the patient's ability to attain the goals and an estimate of the time needed to achieve them. This information should be pertinent to nature of the patient's condition and ability to respond. The words "Fair," or "Poor" alone, are not acceptable. Instead descriptors must be added:

EXAMPLE: Rehabilitation potential is good for partial return to previous level of care, but patient will probably not be able to perform ADL independently.

Where daily care has been ordered, the agency must be specific as to the goals and when the need for daily care is expected to end. Discharge plans include a statement of where or how the patient will be cared for once home health services are no longer provided.

23. Verbal Start of Care, Nurse's Signature and Date.—This area verifies for surveyors, HCFAs representatives, and you that a nurse spoke to the attending physician and has received verbal authorization to visit the patient. This date may precede the SOC date in Item 2 and may precede the "From" date in Item 3.

This item is signed by the nurse receiving the verbal orders, by the nurse responsible for completion of the form, or by a nonclerical agency representative or supervisor responsible for review. The DATE is necessary.

If the nurse who received the orders does not prepare the HCFA-485, then the orders must be transcribed to a form signed and dated by her and retained in the agency files.

The agency is responsible for documenting the initial and ongoing communications with the physician.

This item is applicable only to certifications. The HHA enters N/A if recertification, or if not applicable to the certification.

24. Physician's Name and Address.—The agency prints the physician's name and address. The attending physician is the physician who establishes the plan of treatment and who certifies and recertifies the medical necessity of the home health visits and/or services. Supplemental physicians involved in a patient's care are mentioned on the HCFA-486 only.

25. Date HHA Received Signed POT.—The date the agency received the signed POT from the attending/referring physician is entered. It is required only if the physician does not date Item 27. The agency enters N/A if Item 27, DATE, is completed.

26. Physician Certification.—The attending physician or agency checks whether this is an initial certification or a recertification.

27. Attending Physician's Signature and Date.—The attending physician signs and dates the plan of treatment/certification prior to the claim being submitted for payment; rubber signature stamps are not acceptable. The form may be signed by another physician who is authorized by the attending physician to care for his patients in his absence.

The agency should not predate the orders for the physician, nor write the date in this field. If the physician left it blank, the agency should enter the date it received the signed POT under Item 25. An unsigned copy is submitted to you with the signed copy retained in the agency's files.

3902.2 HCFA-486 - Medical Update and Patient Information.—Contains data needed by you to make coverage determinations. The HHA submits a completed HCFA-486 with each beneficiary's initial claim and with each subsequent claim closest to the beneficiary's recertification date. For example, if a patient has a start of care date of 06/15/87, the HHA must submit a completed HCFA-486 (and HCFA-485) with the first claim for services rendered from 06/15 to 06/30/87. The HHA must submit a completed HCFA-486 (and HCFA-485) with the claim for services rendered 08/01 to 08/31/87 if the patient was recertified for home health services to be provided on or after 08/15/87.

You may require the HHA to submit an updated HCFA-486 with interim claims which require development prior to adjudication. These claims are those where the HHA is not required to submit the HCFA-485 and HCFA-486. For example, the patient's start of care and initial certification date is 06/15/87. The HHA is required to submit a completed HCFA-485 and HCFA-486 with the claim for services provided from 06/15 to 06/30/87. However, if the HHA continues services during July, the HHA is not required to submit them. This claim is an interim claim.

If you are utilizing the Wisconsin module to screen claims and data sets, advise the HHAs you service to submit an updated HCFA-486 in the following situations:

- o Physician orders an increase in the frequency or duration of visits of any type.
- o Physician orders an additional discipline.
- o To justify the need for daily skilled services beyond an initial 2-3 week period.
- o To generate a Medicare denial letter for the beneficiary and/or provider.

When the HCFA-486 is submitted to reflect an increase in visits and/or additional discipline(s) or a denial, certain items are completed differently. See subsection B for completion of these items. Otherwise, the HCFA-486 is completed as indicated in subsection A.

A. Data Elements Required on the HCFA-486 for Submission with the HCFA-485 on Certifications and Recertifications.—The HHA completes all items on the HCFA-486 as follows:

1. Patient's HICN.—See §3902.1, Item 1.
2. SOC Date.—See §3902.1, Item 2.
3. Certification Period.—See §3902.1, Item 3.
4. Medical Record Number.—See §3902.1, Item 4.
5. Provider Number.—See §3902.1, Item 5.
6. Patient's Name.—See §3902.1, Item 6.
7. Provider' Name.—See §3902.1, Item 7.

8. Medicare Covered.—This is the agency's opinion as to whether the patient's care is covered or not. The box is checked "noncovered" when the agency feels the care is noncovered but the information is submitted "at the patient's request" or to establish other third party liability.

9. Date Physician Last Saw Patient.--The agency enters the date the physician last saw the patient if this information can be obtained from the patient or the family during the home visit. If the provider is unable to determine this date, the appropriate response is "Unknown."

NOTE: It is not intended that the agency contact the physician's office to account for patient's visits. Physician visits of less than one every 60 days, however, raise a question as to whether the patient requires a level of care which qualifies for home benefits. Carefully evaluate the patient's entire medical condition. Do not deny visits solely on the basis that physician visits are less than every 60 days.

10. Date Last Contacted Physician.--The agency notes the date MMDDYY (e.g., 071587) of its most recent physician contact (verbal or written) regarding the status or problems encountered with the patient during the last 60 days. The purpose of the agency's contact is stated under Item 16 (Updated Information).

11. Is Patient Receiving Care in §1861(J)(1) SNF or Equivalent?.--The agency checks the appropriate block. Since a requirement for eligibility for the home health benefit is that services are provided at the patient's residence, if the patient is residing in a nursing home which meets at least the requirements of §1861(J)(1), that facility cannot be considered the patient's residence. (See §3120.5.)

If the address indicated that a patient is in an institution, consult the Directory of Medical Facilities to determine whether the institution is one that meets the basic definition of an 1861(J)(1) facility. If unable to make a determination, seek assistance from the RO.

12. Certification Recertification Modified.--The agency checks one of the blocks to identify this plan as an initial certification, recertification or modification. Modified refers to the HCFA-486 submitted with an interim claim to report changes in the disciplines or numbers ordered or to obtain a Medicare denial letter.

13. Specific Services and Treatments.--The physician's orders for all Medicare billable visits listed on the HCFA-485, Item 21, and the HCFA-486, Items 16 and 18, are entered.

Discipline - Refers to SN, PT, ST, OT, MSS or AIDE. The agency uses a separate line for each discipline and all data elements for a discipline on the same line.

Visits (this bill) Related to Prior Certification - Bills which span two certification periods require specific information as to the number of visits rendered in the prior certification period. You need to know how many visits to charge to the prior certification. This information can be inserted by the agency's billing department.

EXAMPLE:

Start of Care	06/15/87
Recertification From Date	08/15/87
Bill	08/01 - 08/31/87
Visits Rendered This Billing Period	08/01, 08/04, 08/06, 08/08 08/11, 08/13, 08/15, 08/18 08/20, 08/22, 08/25, 08/27 and 08/29

Based upon the above example, number 6 would be inserted. The agency performs this calculation for each discipline involved and inserts the number in line with the discipline as shown in the example below:

Discipline	Visits (this bill) Rel. to Prior Recert.	Frequency & Duration	Treatment Codes	Projected Visits
SN	6	3wk4; 2wk5	A1, A2, A3, A4	22
PT	6	3wk4; 2wk5	B1, B2, B3	22
AIDE	6	3wk4; 2wk5	F2, F6, F7, F10	22

Frequency and Duration - The HHA reports frequency and duration by discipline, not by treatments. Where frequency is noted in days, weeks or months, duration must also be shown as days, weeks or months. Ranges in frequency or duration are not acceptable. They are recorded in chronological order separated by a semicolon. One of these abbreviations is used: da = days, wk = weeks, mo = months, q = once every "x" number of days, or PRN when appropriate. No other response is valid.

EXAMPLE: If orders are SN daily x 1 week; 3xwk x 3 weeks; 2xwk x 3 weeks; 1xwk x 2 weeks, it enters under frequency and duration 1da7; 3wk3; 2wk3; 1wk2.

If orders are 1 x month x 2 and PRN x 2, it enters frequency and duration 1mo2; 2PRN. Total visits projected this certification are 4.

Treatment Codes - Include specific alpha designators for each discipline: A(SN), B(PT), C(ST), D(OT), E(MSS), and F(AIDE). Appropriate codes are used to identify corresponding services across the line. For example, physical therapy (B) codes are not listed on the same line as skilled nursing (A) codes. (See §3902.3 for list of treatment codes.)

Projected Visits - are the total visits for each discipline projected over the period represented on the plan of treatment. For example, nursing visits 3 x week x 2 weeks then 2 x week x 7 weeks, total 20 nursing visits. Each discipline has one total number for that service.

14. Dates of Last Inpatient Stay.—The agency enters the admission and discharge dates (month, day and year: e.g, 060287 - 061087) of the last inpatient stay relevant to the care currently provided. N/A is entered if not applicable.

15. Type of Facility.—The agency identifies the type of facility (e.g., acute, SNF, rehabilitation). The agency enters N/A if not applicable.

16. Updated Information: New Order/Treatments/Clinical Facts Summary From Each Discipline.—The HHA records any new orders, treatments or changes and associated date(s) from the time the HCFA-485 is completed to the time the HCFA-486 is completed.

On certifications, the HHA enters the clinical findings of the initial assessment visit for all disciplines involved in the care plan. It describes the clinical facts about the patient that required home health services. It includes specific dates in the documentation.

On recertifications, the HHA records significant clinical findings for each discipline incorporating all symptoms and changes in the patient's condition during the last 60 days of service. Specific dates are included. The HHA documents progress or nonprogress for each discipline.

The HHA includes any pertinent information on patient's inpatient stay and the purpose of any agency contact with the physician, if applicable.

17. Functional Limitations (Expand from 485 and ADL) Reason Homebound/Prior Functional Status.—The agency provides a narrative description of the patient's prior functional status and current functional limitations and activities permitted, elaborating on the information in the checklist (HCFA-485, items 18A and 18B) and provides any other relevant information needed to describe the patient. The description of the patient's activities clearly reflects the restrictions imposed by the physician. This includes a description of ADL limitations and indicates the type and scope of assistance needed. The agency includes a brief statement of why the patient is homebound and a description of the home environment, if it is relevant to the homebound determination, e.g., patient lives in a third floor walk-up apartment and is recovering from congestive heart failure.

18. Supplementary Plans of Treatment on File From Physician Other Than the Referring Physician. (If Yes, Please Specify Giving Goals/Rehabilitation Potential/Discharge Plan).—The agency provides this information if more than one plan of treatment is being used to provide services. It may document the specialty, the type of service, duties, goals, rehabilitation potential, discharge plans and the reasons necessitating a supplemental plan here or attach a copy of the plan to the HCFA-486.

19. Unusual Home/Social Environment (Optional).—The agency uses this block to include information which would enhance your concept of the home situation and help justify the need for services in the home (e.g., patient lives with retarded son who is unable to provide any assistance or to comprehend instructions). This information may explain the rationale for medical social services by documenting the problems which are or will be an impediment to the effective treatment of the patient's condition or rate of recovery.

20. Indicate Any Times When the HHA Made a Visit and Patient Was Not Home and Reason if Ascertainable.—The agency indicates when and why this occurred. For example: 07/31/87 - Patient was taken to the emergency room for evaluation and treatment after a fall in her home.

21. Specify Any Known Medical and/or Nonmedical Reasons the Patient Regularly Leaves Home and Frequency of Occurrence.—The agency obtains information from the patient, family or caretaker for the patient's absences from the home and whether they were for medical or nonmedical reasons. For example, the patient goes to the barber shop 1 x a month and to the doctor's 2 x a month.

22. Signature of Nurse or Therapist Completing or Reviewing Form/Date.—The nurse or therapist responsible for the completion of the form or a nonclerical representative or supervisor responsible for the review signs and dates the form. Neither return nor deny the claim if this item is not completed.

B. Data Elements Required on HCFA-486 for Submission with an Interim Claim.—When an updated HCFA-486 is submitted with an interim claim to modify an existing HCFA-486, the HHA completes the following items:

1. HICN.—See §3902.1, Item 1.

2. SOC Date.—See §3902.1, Item 2.

3. Certification Period.—

o There has been an increase in frequency and/or duration of visits and/or addition of a new discipline since the certification/recertification, or

o There is an extension of daily visits beyond the initial 2-3 week period certified by the physician:

The HHA enters the date of increase or addition as the "From" date and the original certification/recertification "To" date.

o The HHA has determined that the patient no longer requires covered Medicare services:

It enters the date services became noncovered as the "From" and "To" dates.

5. Provider Number.—See §3902.1, Item 5.

6. Patient's Name.—See §3902.1, Item 6.

7. Provider' Name.—See §3902.1, Item 7.

8. Medicare Covered.—This is the agency's opinion as to whether the patient's care is covered or not. The box is checked "noncovered" when the agency feels the care is noncovered but the information is submitted "at the patient's request" or to establish other third party liability.

9. Date Physician Last Saw Patient.—The agency enters the date the physician last saw the patient if this information can be obtained from the patient or the family during the home visit. If the provider is unable to determine the last time the patient was seen by the physician, the response is "Unknown."

NOTE: It is not intended that the agency contact the physician's office to account for patient's visits. Physician visits of less than one every 60 days, however, raises a question as to whether the patient requires a level of care which qualifies for home benefits. Carefully evaluate the patient's entire medical condition. Do not deny visits solely on the basis that physician visits are less than every 60 days.

10. Date Last Contacted Physician.—The agency notes the date MMDDYY (e.g., 071587) of its most recent physician contact (verbal or written) regarding the status or problems encountered with the patient during the last 60 days. The purpose of the agency's contact is stated in Item 16 (Updated Information).

12. Certification Recertification Modified.—The HHA checks "Modified." May be left blank if Item 8 is checked "Noncovered."

13. Specific Services and Treatments.—This reflects the orders for additional visits and/or disciplines that is submitted with an interim claim. It is not completed if the purpose of the submittal is to document Medicare noncoverage.

Discipline - The HHA enters the approved abbreviation for the changed or added discipline(s).

Visit(s), (This Bill) Related to Prior Certification - This item is not applicable when the HCFA-486 is submitted with an interim claim to modify the existing POT.

Frequency and Duration - The HHA enters the proposed frequency and duration from the date of change to the certification/recertification "To" date.

Treatment Codes - The HHA enters the appropriate alpha and numeric code(s) for the period covered on the HCFA-486.

Total Visits Projected This Certification - The HHA enters the additional visits requested for the period covered on this HCFA-486.

EXAMPLE: Certification Period: 06/15/87 - 08/15/87
Physician's Orders: SN daily x 3 weeks, then
3 x w x 6 weeks for wound care
Orders Modified 07/06/87: Continue daily
SN x 3 weeks, then 3 w x 3 weeks

Originally, 39 visits were projected. The modified plan adds 12 visits, i.e., 4 visits per week x 3 weeks.

Discipline	Visits (this bill) Rel. to Prior Recert.	Frequency & Duration	Treatment Codes	Projected Visits
SN		1da21; 3w3	A4	12

EXAMPLE: Certification Period: 06/15/87 - 08/15/87
Physician's Order: SN 2 x w x 3 weeks, then
1 x w x 6 weeks and Aide 3 x w x 9 weeks
Order Modified 07/06/87 - PT 3 x w x 6 weeks;
SN and Aide unchanged

Discipline	Visits (this bill) Rel. to Prior Recert.	Frequency & Duration	Treatment Codes	Projected Visits
PT		3w6	B1, B2, B3, B5	18

14. Dates of Last Inpatient Stay.—See §3902.2A, Item 14.

15. Type of Facility.—See §3902.2A, Item 15.

16. Updated Information: New Orders/Treatments/Clinical Facts/ Summary from Each Discipline.—The HHA records any new orders, treatments or changes and associated dates and all significant clinical findings, including all symptoms and changes in the patient's condition since the certification/recertification was completed. Specific dates are included in the documentation. A summary from each discipline is not required.

22. Signature of Nurse or Therapist Completing or Reviewing Form/Date (MO, DAY, YR).—The nurse or therapist responsible for completion of the form or a nonclerical agency representative or supervisor responsible for the review signs and dates the form. Neither return nor deny the claim if this item is not completed.

3902.3 Treatment Codes for Home Health Services.—The agency enters the code which represents the service(s) to be rendered under the plan of treatment in Item 13 of the HCFA-486. The listing of a code for a particular service is not intended to imply coverage. The codes are to ease identification of services ordered by the physician whether or not these services are reimbursable individually by Medicare. These codes are used to identify the services in item 21 on the HCFA-485 (Physician's Orders for Services). Physician's orders reflect a narrative description of treatment and services to be rendered.

A. Skilled Nursing.—These codes represent the services to be performed by the nurse. Services performed by the patient or other person in the home without the teaching or supervision of the nurse are not coded. The following is a further explanation for each service:

o A1. Skilled Observation (Inc. V.S., Response to Med., etc.) - Includes all skilled observation of the patient where the physician determines that the patient's condition is such that a reasonable probability exists that significant changes may occur which require the skills of a licensed nurse to supplement the physician's personal contacts with the patient. (See §3117.4.A.)

o A2. Foley Insertion - Insertion and/or removal of the Foley catheter by nurse.

o A3. Bladder Instillation - Instilling medications into the bladder.

o A4. Wound Care/Dressing - Includes irrigation of open, postsurgical wounds, application of medication and/or dressing changes. Does not include decubitus care. Describe dimension of wound (size and amount and type of drainage) in Item 16 on the HCFA-486. See A28 for observation uncomplicated surgical incision.

o A5. Decubitus Care - Includes irrigation, application of medication and/or dressing changes to decubitus. The agency describes size (depth and width) and appearance in Item 16 of the HCFA-486. (See A29 for teaching and care, first or second stage.

NOTE: Decubitus, stage 3 - the skin is necrotic with exposure of fat
Decubitus, stage 4 - necrosis extends through the skin and fat to muscle
Decubitus, stage 5 - extended fat and muscle necrosis.

o A6. Venipuncture - The HHA specifies the test and frequency to be performed under physician's orders.

o A7. Restorative Nursing - Includes exercises, transfer training, carrying out of restorative program ordered by the physician. This may or may not be established by a physical therapist. This code is not used to describe nonskilled services (e.g, routine range of motion exercises).

o A8. Post Cataract Care - Includes observation, dressings, teaching, etc., of the immediate postoperative cataract patient. (See §3117.4.A.)

o A9. Bowel/Bladder Training - Includes training of patients who have neurological or muscular problems or other conditions where the need for bowel or bladder training is clearly identified. (See §3114.4.E.1.)

o A10. Chest Physio (Inc. postural drainage) - Includes breathing exercises, postural drainage, chest percussion, conservation techniques, etc.

o All. Adm. of Vitamin B/12 - Administration of vitamin B-12 preparation by injection for conditions identified in Medicare guidelines. (See §3117.4.)

o A12. Prep/Adm. Insulin - Preparation of insulin syringes for administration by the patient or other person, or the administration by the nurse.

o A13. Adm. Other IM/Subq. - Administration of any injection other than vitamin B/12 or insulin ordered by the physician.

o A14. Adm. IV's/Clysis - Administration of intravenous fluids or clysis or intravenous medications.

o A15. Teach. Ostomy or Ileo Conduit Care - Teaching the patient or other person to care for a colostomy, ileostomy or ileoconduit or nephrostomy.

- A16. Teach. Nasogastric Feeding - Teaching the patient or other person to administer nasogastric feedings. Includes teaching care of equipment and preparation of feedings.

- A17. Reinsertion Nasogastric Feeding Tube - Includes changing the tube by the nurse.

- A18. Teach. Gastrostomy Feeding - Teaching the patient or other person to care for gastrostomy and administer feedings. Includes teaching care of equipment and preparation of feedings.

- A19. Teach. Parenteral Nutrition - Teaching the patient and/or family to administer parenteral nutrition. Includes teaching aseptic technique for dressing changes to catheter site. Agency documentation must specify that this service is necessary and does not duplicate other teaching.

- A20. Teach. Care of Trach. - Teaching the patient or other person to care for a tracheostomy. This includes care of equipment.

- A21. Adm. Care of Trach. - Administration of tracheostomy care by the nurse, including changing the tracheostomy tube and care of the equipment.

- A22. Teach. Inhalation Rx - Teaching patient or other person to administer therapy and care for equipment.

- A23. Adm. Inhalation Rx - Administration of inhalation treatment and care of equipment by the nurse.

- A24. Teach. Adm. of Injection - Teaching patient or other person to administer an injection. Does not include the administration of the injection by the nurse (see A11, A13) or the teaching/administration of insulin. (See A12, A25.)

- A25.Teach. Diabetic Care - Includes all teaching of the diabetic patient (i.e., diet, skin care, administration of insulin, urine testing).

- A26. Disimpaction/Follow-up Enema - Includes nursing services associated with removal of an impaction. Enema administration in the absence of an impaction only if a complex condition exists - e.g., immediate postoperative rectal surgery.

- A27. Other (Spec. Under Orders) - Includes any SN or teaching ordered by the physician and not identified above. The agency specifies what is being taught in Item 21 (HCFA-485).

- A28. Wound Care/Dressing - Skilled observation and care of surgical incision/suture line including application of DSD. (See A4.)

- A29. Decubitus Care - Includes irrigation, application of medication and/or dressing changes to decubitus/other skin ulcer or lesion, first or second stage. The HHA describes size (depth and width) and appearance in Item 16 of the HCFA-486. (See A5.)

- A30. Teaching Care of Any Indwelling Catheter - Teaching patient or other person to care for indwelling catheter.

NOTE: Decubitus, stage 1 - skin redness that disappears on pressure.
Decubitus, stage 2 - redness, edema, and induration with epidermal blistering and desquamation.

B. Physical Therapy (PT).—These codes represent all services to be performed by the physical therapist. If services are provided by a nurse they are included under A7. The following is a further explanation of each service:

- B1. Evaluation - Visit(s) made to determine patient's condition, physical therapy plans and rehabilitation potential; to evaluate home environment to eliminate structural barriers and improve safety to increase functional independence (ramps, adaptive wheelchair, bathroom aides).

- B2. Therapeutic Exercise - Exercises designed to restore function. Specific exercise techniques (e.g., Proprioceptive Neuromuscular Facilitation (PNF), Rood, Brunstrom, Codman's, William's) are specified in the plan of treatment. The exercise treatment is listed in the medical record specific to the patient's condition, manual therapy techniques which include soft tissue and joint mobilization to reduce joint deformity and increase functional range of motion.

- B3. Transfer Training - Evaluate and instruct safe transfers (bed, bath, toilet, sofa, chair, commode) using appropriate body mechanics, and equipment (sliding board, Hoyer lift, trapeze, bath bench, wheelchair). Instruct patient, family and caregivers in appropriate transfer techniques.

- B4. Establish or Upgrade Home Program - To improve the patient's functional level by instruction to patient and other responsible individuals in exercise which may be used in adjunct to PT programs.

- B5. Gait Training - Includes gait evaluation and ambulation training of patient whose ability to walk has been impaired. Gait training is the selection and instruction in use of various assistive devices (orthotic appliances, crutches, walker, cane, etc.).

- B6. Cardiopulmonary Physical Therapy - Includes breathing exercises, cardiopulmonary conditioning, postural drainage, etc., designed for patients with acute or severe cardiopulmonary dysfunction.

- B7. Ultra Sound - Mechanism to produce heat or micro-massage in deep tissues for conditions in which relief of pain, increase in circulation and increase in local metabolic activity are desirable.

- B8. Electro Therapy - Includes treatment for neuromuscular dysfunction and pain through use of electrotherapeutic devices (electromuscular stimulation, TENS, Functional Electrical Stimulation (FES), biofeedback, high voltage galvanic stimulation (HVGS), etc.).

- B9. Prosthetic Training - Includes stump conditioning, (shrinking, shaping, etc.), range of motion, muscle strengthening and gait training with or without the prosthesis and appropriate assistive devices.

- B15. Other (Spec. Under Orders) - Includes all PT services not identified above. Specific therapy services are identified under physician's orders (HCFA-485 Item 21).

- B10 through B14 - Reserved.

C. Speech Therapy (ST).—These codes represent the services to be performed by the speech therapist. Following is a further explanation of each.

- C1. Evaluation - Visit made to determine the type, severity and prognosis of a communication disorder, whether speech therapy is reasonable and necessary and to establish the goals, treatment plan, and estimated frequency and duration of treatment.

- C2. Voice Disorders Treatments - Procedures and treatment for patients with an absence or impairment of voice caused by neurologic impairment, structural abnormality, or surgical procedures affecting the muscles of voice production.

- C3. Speech Articulation Disorders Treatments - Procedures and treatment for patients with impaired intelligibility (clarity) of speech - usually referred to as anarthria or dysarthria and/or impaired ability to initiate, inhibit, and/or sequence speech sound muscle movements - usually referred to as apraxia/dyspraxia.

- C4. Dysphagia Treatments - Includes procedures designed to facilitate and restore a functional swallow when associated with a communication disorder.

- C5. Language Disorders Treatments - Includes procedures and treatment for patients with receptive and/or expressive aphasia/dysphasia, impaired reading comprehension, written language expression, and/or arithmetical processes.

- C6. Aural Rehabilitation - Procedures and treatments designed for patients with communication problems related to impaired hearing acuity.

- C7. Reserved

- C8. Nonoral Communications - Includes any procedures designed to establish a non-oral or augmentive communication system.

- C9. Other (Spec. Under Orders) - Speech therapy services not included above. Specify service to be rendered under physician's orders (HCFA-485 Item 21).

D. Occupational Therapy.—These codes represent the services to be rendered by the occupational therapist. Following is a further explanation:

- D1. Evaluation - Visit made to determine occupational therapy needs of the patient at the home. Includes physical and psychosocial testings, establishment of plan of treatment, rehabilitation goals, and evaluating the home environment for accessibility and safety and recommending modifications.

- D2. Independent Living/Daily Living Skills (ADL training) - Refers to the skills and performance of physical and psychological/emotional self care, work, and play/leisure activities to a level of independence appropriate to age, life-space, and disability.

- D3. Muscle Re-education - Includes therapy designed to restore function lost due to disease or surgical intervention.

- D4. Reserved

- D5. Perceptual Motor Training - Refers to enhancing skills necessary to interpret sensory information so that the individual can interact normally with the environment. Training designed to enhance perceptual motor function usually involves activities which stimulate visual and kinesthetic channels to increase awareness of the body and its movement.

- D6. Fine Motor Coordination - Refers to the skills and the performance in fine motor and dexterity activities.

- D7. Neurodevelopmental Treatment - Refers to enhancing the skills and the performance of movement through eliciting and/or inhibiting stereotyped, patterned, and/or involuntary responses which are coordinated at subcortical and cortical levels.

- D8. Sensory Treatment - Refers to enhancing the skills and performance in perceiving and differentiating external and internal stimuli such as tactile awareness, stereognosis, kinesthesia, proprioceptive awareness, ocular control, vestibular awareness, auditory awareness, gustatory awareness, and olfactory awareness necessary to increase function.

- D9. Orthotics/Splinting - Refers to the provision of dynamic and static splints, braces, and slings for relieving pain, maintaining joint alignment, protecting joint integrity, improving function, and/or decreasing deformity.

- D10. Adaptive Equipment (fabrication and training) - Refers to the provision of special devices that increase independent functions.

- D11. Other - Occupational therapy services not quantified above.

E. Medical Social Services (MSS).--These codes represent the services to be rendered by the medical social service worker. Following is a further explanation:

- E1. Assessment of Social and Emotional Factors - Skilled assessment of social and emotional factors related to the patient's illness, need for care, response to treatment and adjustment to care; followed by care plan development.

- E2. Counseling for Long-Range Planning and Decisionmaking - Assessment of patient's needs for long term care including: evaluation of home and family situation; enabling patient/family to develop an inhome care system; exploring alternatives to inhome care; arrangement for placement.

- E3. Community Resource Planning - The promotion of community centered services(s) including education, advocacy, referral and linkage.

- E4. Short Term Therapy - Goal oriented intervention directed toward management of terminal illness; reaction/adjustment to illness; strengthening family/support system; conflict resolution related to chronicity of illness.

- E5. Reserved

- E6. Other (Specify Under Orders) - Includes other medical social services related to the patient's illness and need for care. Problem resolution associated with high risk indicators endangering patient's mental and physical health including: abuse/neglect, inadequate food/medical supplies; high suicide potential. The service to be performed must be written under doctor's orders (HCFA-485 Item 21).

F. Home Health Aide - These codes represent the services to be rendered by the home health aide. Specific personal care services to be provided by the home health aide must be determined by a registered professional nurse. Services are given under the supervision of the nurse, and if appropriate, a physical, speech or occupational therapist. Following is a further explanation:

- F1. Tub/Shower Bath - Assistance with tub or shower bathing.

- F2. Partial/Complete Bed Bath - Bathing or assisting the patient with bed bath.

- F3. Reserved

- F4. Personal Care - Includes shaving of patient or shampooing the hair.

- F5. Reserved

- F6. Catheter Care - Care of catheter site and/or irrigations under nursing supervision.

- F7. Reserved

- F8. Assist with Ambulation - Assisting the patient with ambulation as determined necessary by the nurse care plan.

- F9. Reserved

- F10. Exercises - Assisting the patient with exercises in accordance with the plan of treatment.

- F11. Prepare Meal - May be furnished by the aide during a visit for personal care.

- F12. Grocery Shop - May be furnished as an adjunct to a visit for personal care to meet the patient's nutritional needs in order to prevent or postpone the patient's institutionalization.

- F13. Wash Clothes - This service may be provided as it relates to the comfort and cleanliness of the patient and the immediate environment.

- F14. Housekeeping - Household services incidental to care and which do not substantially increase the time spent by the home health aide.

- F15. Other (Specify Under Orders) - Includes other home health aide services in accordance with determination made by a registered professional nurse. Specified in Item 21 HCFA-485.

3902.4 HCFA-487 - Addendum to the Plan of Treatment/Medical Update.—The HCFA-487 is used only as an addendum to the HCFA-485/486 when additional space is needed to complete fields. The data for each field is initiated on the HCFA-485 or 486. A separate addendum is used for the plan of treatment and the medical update. If the addendum is used to continue items on the plan of treatment, then the HCFA-487 is forwarded to the physician with the HCFA-485 for his signature.

To provide additional documentation of items on the plan of treatment or medical information form, the agency checks the appropriate block. It identifies the item being addressed under Item 8. For example, if the plan of treatment block is checked and Item 11 (medications) requires additional space, the HHA specifies Item (11) on the left margin of column 8. Upon completion of Item 11, it notes the next item number, e.g., Item 14, (DME) then completes that item.

1. HICN.—See §3902.1, Item 1.

2. SOC Date.—See §3902.1, Item 2.

3. Certification Period.—See §3902.1, Item 3.

4. Medical Record Number.—See §3902.1, Item 4.

5. Provider Number.—See §3902.1, Item 5.

6. Patient's Name.—See §3902.1, Item 6.

7. Provider Name.—See §3902.1, Item 7.

8. Item Number.—The HHA indicates the item number for which it is providing additional information.

9. Signature of Physician.—If the Certification/Plan of Treatment block is checked, the physician's signature or an annotation is required on the HCFA-485 which indicates that the physician is aware that he is signing for information contained on additional pages (e.g., page 1 of 2). The HHA retains the signed copy in its files.

10. Date.—The physician enters the date he signed the addendum.

11. Optional Name/Signature of Nurse/Therapist.—If the Medical Update/Patient Information block is checked, the Nurse/Therapist filling the form signs.

12. Date.—The date the Nurse/Therapist prepared the addendum appears in this space.

3902.5 HCFA-488 - Intermediary Medical Information Request.—Use only the HCFA-488 when necessary to obtain additional medical information. All requests for subsequent medical information are limited to the items listed below. Complete Items 1 through 9 for each request and check the item(s) you are requesting the agency to complete. The agency should provide the requested information as timely as possible. It may use the HCFA-488 to respond to items as space allows. It returns the HCFA-488 as a cover sheet for identification of requested information.

1. Initial Request Date.—Enter the date on which the request was initiated.

2. Final Request Date.—Enter the date that a second and final request was sent because a response was not received. This date should not exceed 30 days after the date in item 1.

3. Provider Number.—Enter the six digit provider number.

4. Document Control Number.—Enter the number used to identify individual claims. This number is an internal processing number determined by you.

5. Patient Name.—Enter the last name, first name, middle initial.

6. HICN.—Enter the patient's Medicare number including alpha designator.

7. Medical Record Number.—Enter the medical record number assigned by the provider and located in Item 4 on the HCFA-485.

8. Period of Claim.—Enter the 6 digit month, day, year from Item 22 on the HCFA-1450 claim. Include "From" and "To" dates.

9. SOC Date.—Enter the 6 digit month, day, year on which covered home health services began. This date remains the same on subsequent plans until the patient is discharged by the agency.

When pertinent to a coverage decision, request one or more of the following:

10. HCFA-485/486 - Period Covered.—Use to request a copy of the applicable POT/MIF forms (HCFA-485/486) on interim claims where the agency was not required to submit these forms with the claim. Enter the month, day, year (i.e., 60 day period) that incorporates the date of the claim. The agency forwards the applicable HCFA-485 and an updated HCFA-486 with Items 1-3, 5-10, 12-16, and 22 completed.

11. HCFA-486 - Period Covered.—Check this item to request only an updated HCFA-486 by entering the dates of the claim; month, day and year. The agency need complete only Items 1-3, 5-10, 12-16 and 22.

12. Frequency of Doctor's Visits.—Check this item if information is needed regarding the frequency that the patient is seen by the physician.

13. Status of Chronic Condition.—Check this item if a narrative statement is needed to explain the status of a chronic condition that is not adequately addressed on the HCFA-485/486.

14. List Primary Need for: SN, PT, ST, OT, MSS, HHA, Other Visits.—If one or more of the above services is in question as to their need, check the appropriate box(es). The HHA submits a narrative statement listing the reason(s) the patient requires the service.

15. List Dates of Visits for: SN, PT, ST, OT, MSS, AIDE, Other Visits.—If one or more of the above services is in question as to the dates that the services were provided, check the appropriate box(es). The agency submits a list of all dates on which the services were provided by that discipline for the period covered.

16. Laboratory Tests (frequency, types, results).—Check this box and circle one or more items as needed.

17. Other Tests (frequency, types, results).—Check this box and write in the name of the tests you are requesting.

18. Diet.—Check this item and the box(es) that represents the requested information.

19. Date(s) on Which Frequency of SN or AIDE Increased or Decreased.—Check this box and write in the service and the frequency in question.

20. Specific Progress Notes for: SN, PT, ST, OT, MSS, HHA, Other Visits.—Check this item and the box(es) specifying the type of progress notes being requested.

21. Reason for Continued Medicare Coverage.—Check this item if the HCFA-485/486 information raised a question for continued coverage of services.

22. Doctor's Orders, Signed by the Physician.—Check this item where a copy of the physician's orders or specific change of orders is requested.

23. Supplemental Plans of Treatment, if Applicable.—Use this item to request supplemental plans of treatment when necessary to make a coverage decision. It corresponds to Item 18 on the HCFA-486.

24. Signature of FI Representative.—The nurse reviewer requesting the information or the supervisor signs in this space.

3902.6 Postpayment Audit.—Perform a postpayment audit of the medical record to ascertain that the information on the HCFA-485/486 matches that in the medical record a minimum of once per year for every provider served. If a coverage compliance review is performed, do not perform a postpayment audit in that year.

Include in the audit:

[o Inhouse or onsite audit of medical records for 15 beneficiaries per provider. Count noncovered services identified during the audit in that quarter's denial statistics. Select the sample from claims processed on the basis of information on the HCFA-485/486.

o Establish an audit trail which identifies the claims selected, sample size, the beneficiaries audited, the period of audit (claims and forms periods), the records audited, and the findings of the audit.

o Review the entire medical record relevant to the HCFA-485/486 period.

o Compare information on the HCFA-485/486 with that in the medical record to:

— Determine the accuracy of the information;

— Identify any discrepancies and the reasons they occurred, e.g., if all items on the forms were completed, what reasons did the agency give for failing to include pertinent information;

— Determine whether the payment decision was appropriate; if not, identify inappropriate payments (services/visits and reasons noncovered); and

— Evaluate the form content to determine whether some type of information which led to a change in payment decision, either is not currently captured on the HCFA-485/486 and requires rewording or whether provider education in completing the forms would suffice.

o Identify and recoup inappropriate payments.

o Send the appropriate denial notices to the beneficiary and the HHA.

o Advise the HHA of the results of the audit in a letter within 6 weeks of the audit.

3903. MEDICAL REVIEW OF COMPREHENSIVE OUTPATIENT REHABILITATION FACILITY (CORF) CLAIMS

A. General.—CORF services are an expansion of the scope of benefits under Medicare Part B which enable beneficiaries to receive coordinated comprehensive outpatient rehabilitation services at one fixed location (rather than at different sources).

The purpose of your MR is to assure that reimbursement is made only for covered care as described in §§3180ff. and that it neither exceeds the medical needs of the patient nor represents a noncovered level of care (e.g., maintenance therapy).

B. Review of CORF Claims.—

1. New CORFs.—Review 100 percent of the claims submitted by newly certified CORFs for two quarters. Use this information to perform the applicable level of MR indicted below.

2. CORFs With a Denial Rate in Excess of 5 Percent.—Review 100 percent of claims.

When the denial rate decreases to 5 percent or less for two consecutive quarters, you may reduce the level of review as indicated below.

3. CORFs With a Denial Rate of Less Than 5 Percent.—Use your internal screens to identify questionable claims for review.

- o Review 30 percent of the claims submitted per quarter. If a CORFs claim volume is less than 100 per quarter, review a minimum of 30 claims.
- o Review all claims if their are fewer than 30 in the quarter.

Increase the level of review if you find an increase in the incidence of noncovered services.

C. Calculation of Denial Rates.—Calculate the denial rate as follows:

$$\frac{\text{Total Services Denied}}{\text{Total Services Reviewed}}$$

Calculate the denial rate to determine the level of MR to perform. The rate indicates the CORF's understanding of Medicare covered services. You need not report the denial rate to the CORF. However, inform it of the Medicare coverage guidelines in areas where they are billing for noncovered services.

D. Purpose of the MR.—Generally, services provided by the CORF must be furnished onsite under a written plan of treatment, except for one nonmandatory home evaluation visit. Effective December 22, 1987, physical therapy, occupational therapy, and speech pathology services may be furnished off-site. (See §3182.) Such services may be covered if furnished pursuant to the plan of treatment, and if they do not duplicate services for which payment has otherwise been made under Medicare. Assure that the CORF services provided were:

o Covered services as described in §§3181 and 3183.

o Furnished to a patient who is under the care of a physician and was referred by the physician certifying that the individual needs skilled rehabilitation services.

o Stipulated in a written plan of treatment which:

— Was established and signed by a physician; and

— Prescribes the type, amount, frequency, and duration of the services to be furnished and indicates the diagnosis and anticipated specific rehabilitation goals.

o Reasonable and necessary in relation to the patient's rehabilitation potential and progress.

NOTE: Where a signed copy of the plan of treatment is not being required for review and/or the certification/recertification statement and physician signature is not on the same document as the plan of treatment, this information must be retained in the CORF files and be available upon request.

E. Documentation Requirements.—Request as a minimum, the documentation outlined below for MR of CORF claims. You may request that the information be entered on a medical information form designed to elicit this information or that copies of information be supplied from the medical record.

1. With the Initial Bill and Every 60 Days Thereafter.—A written plan of treatment signed by the physician which includes the information specified in subsection D., or information from the plan of treatment provided transcribed on a medical information form;

2. With the Initital Bill.—The pertinent medical history including the date of onset or exacerbation of the condition for which the services are being rendered, and the results of prior rehabilitation services (if any) for the same condition.

o A description of functional limitations and rehabilitation potential; and

o The results of the initial evaluation by the CORF.

3. With Subsequent Claims.—(i.e., monthly claims that fall within the 60-day certification period) the progress report and reevaluation findings must reflect:

o A description of the treatment rendered;

o A description of the progress the patient is making toward attaining the rehabilitation goals, and the results of both subjective and objective tests and measures as compared to the initial or prior evaluation results; and o A statement by the physician of why treatment should be continued if progress is not being made.

NOTE: Daily notes are not required. A summary of progress or nonprogress must be documented with each billing.

F. Reasons for Denial of Claims.—Deny a claim when the:

o Description of the treatment is limited or absent.

o Documentation is not sufficient to adequately describe the treatment rendered, thus, it cannot be determined if the services delivered were skilled.

o Treatment delivered was not skilled physical therapy services, as defined by Medicare regulations. That is, documentation reflects evidence that the services rendered do not require the skills of a registered physical therapist (e.g., the application of hot packs to a patient without a circulatory disorder). (See §3101.8.C.)

o Patient appears to have reached a plateau in functional status. There is no evidence of the continued need for a skilled restorative program as defined by Medicare. (See §§3101.8ff.)

o Patient appears to be on a maintenance program for an extended period of time. Documentation shows the maintenance program has been established and learned, but continues to be carried on.

o Documentation indicates that the services rendered to the patient are skilled, but the patient is not making significant progress within a predictable period of time. Carefully examine persistent delivery of treatment less than once a week to determine if this pattern will produce improvement within a predictable period of time.

G. Psychiatric Services Limitation.—Section 1833(c) of the statute imposes a limitation on reimbursement for outpatient psychiatric treatment. This provision limits the amount of a beneficiary's incurred expenses that will be recognized, in any calendar year, to $312.50 or 62-1/2 percent of incurred expenses, whichever is less.

In determining when the limitation applies, separate the charges for the psychotherapeutic aspects of the treatment from the nonpsychiatric aspects. When the psychiatric and nonpsychiatric components are not readily distinguishable, allocate the charges as follows:

o Psychological services, whether furnished by psychologists or other personnel, are always subject to limitation regardless of the patient's diagnosis.

o Physical therapy, respiratory therapy, speech therapy and services furnished in connection with prosthetic and orthotic devices and the use of equipment and appliances related to these services are not subject to the limitation.

- For services not specified above, such as occupational therapy, determine the primary reason for the patient being referred to the CORF.

If the referral is primarily on the basis of a psychiatric condition, all services are subject to the limitation except as specific in §3903.C.

If the referral is primarily on the basis of a diagnosis of Alzheimer's Disease (coded 331.0 in the International Classification of Diseases, 9th Revision) or Alzheimer's or other disorders coded 290.XX in the American Psychiatric Association's Diagnosis and Statistical Manual - Mental Disorders, such services typically represent management of the patient's condition (rather than psychotherapy) and are not subjected to the benefit limitation. Where a particular service provided a patient with such a diagnosis is primarily for psychological services as specified in §3903.C., it is subject to the limitation.

If the referral is primarily on the basis of a physical condition, the services are not subject to this limitation. If the primary reason for referral is not clear, 50 percent of the customary charges is subject to limitation.

Identify and review every claim involving services provided by a CORF to beneficiaries being treated for a mental psychoneurotic or personality disorder. Request appropriate medical records, (see §3600.1), for all identified claims.

Review each claim to assure that:

- When the CORF services furnished were for the treatment of a psychiatric disorder, that the services were provided as stipulated in the plan of treatment; and
- When payment is made for such services, the expenses incurred in connection with the treatment of a mental psychoneurotic or personality disorder are limited, as specified in §§3185ff.
- If the CORF services rendered were for both a psychiatric condition and one or more nonpsychiatric conditions:
  - Determine the medical necessity and appropriateness of the services provided; and
  - Apply the limitations specified in §3903.C.

H. CORF Report of Medical Review Activity.—Complete and submit within 30 calendar days of the close of the calendar quarter the following report to:

Health Care Financing Administration
Office of Program Operations Procedures, BPO
1-H-3 Meadows East Bldg.
6325 Security Blvd.
Baltimore, MD 21207

In addition, submit a copy of the report to the RO.

Medical Review of Part B Intermediary Outpatient Physical Therapy Bills

3904. MEDICAL REVIEW (MR) OF PART B INTERMEDIARY OPT BILLS

A. General.--The following criteria identify OPT services that your MR staff must review. You may select these cases manually or by computer. You must either select OPT claims for medical review by using the diagnostic edits identified in these instructions or review OPT claims at a 100 percent level. However, if you choose to use any of the diagnostic edits listed in Exhibit I, the visits and/or duration parameters may not be changed without approval from CO. You may review claims in addition to those identified here. If you choose to select claims for review in addition to those identified in Exhibit I, or if you elect to review OPT claims at a 100 percent level, secure approval from your RO and for the criteria you use to select the additional claims. However, you must conform to the MR requirements for all outpatient claims identified in these instructions from rehabilitation agencies, SNFs, hospitals, and HHAs that provide OPT in addition to home health services (bill types, hospital-13, SNF-23, HHA-34, rehabilitation agency, public health agency or clinic-74). These criteria do not apply to inpatient PT services or to PT services provided under a home health plan of treatment or to PT services furnished by CORFs.

The criteria for MR case selection are based on ICD-9-CM diagnoses, elapsed time from start of care (at the billing provider) and number of visits. See Exhibit I for these criteria. Denial of a bill solely on the basis that it exceeds the criteria in these edits is prohibited. The edits are only for selecting bills to review or for paying bills that meet Level I criteria without MR. Also, do not provide automatic coverage, up to these criteria. They neither guarantee minimum coverage nor set maximum coverage limits.

B. Level I Review Process.--PT edits have been developed for a number of diagnoses. The diagnoses were selected on the basis that, when linked with a recent date of onset, there is a high probability that Medicare patients with those diagnoses will require skilled OPT. The edits do not specify every diagnosis which may require PT, and therefore, the fact that a given diagnosis does not appear in the edits does not create a presumption that OPT services are not necessary or are inappropriate for that diagnosis. Claims may not be approved or denied at Level I for reasons of medical necessity. Claims that pass the edits in Exhibit I and any additional edits approved by your RO may be paid without being subjected to Level II MR.

Evaluate bills at Level I based upon each of the following:

o Facility and Patient Identification - (facility name, patient name, provider number, HICN, age).

o Diagnosis - The primary diagnosis for which OPT services were rendered must be listed by ICD-9-CM code first; other Dx(s) applicable to the patient or that influence care must be listed next.

o Duration - The total length of time OPT services have been rendered (in days) from the date treatment was initiated for the diagnosis being treated at the billing provider (including the last day in the current billing period).

o Number of Visits - The total number of patient visits completed since OPT services were initiated for the diagnosis being treated by the billing provider. The total visits to date (including the last visit in the billing period) must be given rather than for each separate billing (value code 50).

o Date of Onset (Occurrence Code 11) - The date of onset of the primary physical therapy diagnosis for which OPT services were being rendered by the billing provider.

o Date Treatment Started (Occurrence Code 35) - The date OPT services were initiated by the billing provider for the primary physical therapy Dx being treated.

o Billing Period - When OPT services began and ended in the billing period (from through dates).

C. Level II Review Process.—If a bill exceeds the limit set in the edits or represents a diagnosis other than one on the edits, refer it to the Level II health professional MR staff. If possible, have physical therapists review OPT bills.

Once the bill is selected for MR, review it in conjunction with medical information submitted by the provider.

1. Reimbursable PT Services.—Reimburse OPT services only if they meet all requirements established by the Medicare guidelines and regulations. Each bill for OPT services that is subjected to Level II or III MR must be supported with adequate medical documentation for you to make a determination. The documentation must show that the requirements of §§3101.8, 3118.1 and 3148 and in these instructions are met.

2. MR and Documentation.—When a claim is subsequently referred to Level II MR, use the following pertinent data elements in addition to those used for Level I review:

o Medical History - Obtain only the medical history which is pertinent to, or influences the OPT treatment rendered, including a brief description of the functional status of the patient prior to the onset of the condition requiring OPT, and any pertinent prior PT treatment.

o Physician Referral and Date -

o PT Initial Evaluation and Date -

o Plan of Treatment and Date Established -

o Date of Last Certification - Obtain the date on which the plan of treatment was last certified by the physician.

o Progress Notes - Obtain updated patient status reports concerning the patient's current functional abilities/limitations.

Use the above information along with that in subsection B, to assess the appropriateness of the OPT plan of treatment and the patient's progress relative to diagnosis, date of onset, etc. The medical information supporting a bill must be specific. Documentation written in general terms, e.g, "strength appears to have increased" or "can now reach higher overhead" or "medical history-chronic arthritis" is insufficient. To make an informed MR decision request documentation from the provider when incomplete or inadequate documentation is present. The physician's pertinent evaluations, progress notes and opinions about the patient's need for rehabilitation services, should also be used (when these are available). Obtain this information from the provider regardless of the document type the provider keeps (i.e., it does not matter whether the baseline evaluation is part of the treatment plan, the progress notes or the medical history, obtain and use this information).

3. Medical History.—If a history of previous PT treatment is not available, the provider may provide a general summary regarding the patient's past relevent medical history recorded during the initial evaluation with the patient/family (if reliable) or through contact with the referring physician. Information regarding prior history and treatment by the referring physician must be provided when available.

The patient's medical history, as it relates to the OPT, must include the date of onset and/or exacerbation of the illness or injury. If the patient has had prior OPT for the same condition, use that history in conjunction with the patient's current assessment to establish whether additional treatment is reasonable.

The history of treatments from a previous provider is also necessary for patients who have transferred to a new provider for additional treatment. For example, if surgery has been performed, be aware of the type and date of surgery. The date of onset and type of surgical procedure should be specific for diagnoses such as fractured hip. For other diagnoses, such as arthritis, the date of onset may be general and can be established from the date the patient first required medical treatment. For other types of chronic diagnoses, the history must give the date of the change or deterioration in the patient's condition and a description of the changes that necessitate skilled OPT. For example, a patient that had an amputation several years ago might recently have been fitted with a new prosthesis.

4. Evaluation.—A PT initial evaluation, (excluding routine screening) should be approved when it is reasonable and necessary for the therapist to determine if there is an expectation that either restorative or maintenance services will be appropriate for the patient's condition. Reevaluations should be approved when the patient exhibits a demonstrable change in physical functional ability in order to reestablish appropriate treatment goals, or when required for ongoing assessment of the patient's rehabilitation needs. Initial evaluations or reevaluations that are determined reasonable and necessary based on the patient's condition, may be approved even though the expectations are not realized, or when the evaluation determines that skilled rehabilitation is not needed.

The PT evaluation establishes the baseline data necessary for assessing expected rehabilitation potential, setting realistic goals, and measuring progress. The evaluation of the patient's condition must form the basis for the physical therapy treatment goals.

The evaluation must (when possible) include objective tests and measurements which normally will include functional, strength, and range of motion (ROM) assessments. However, for patients with certain neurological conditions (such as upper motor neuron conditions) assessment of strength may not be valid. Where the above tests are not applicable, the physical therapist should document the patient's functional loss and the need for skilled OPT intervention resulting from conditions such as:

o Self-Care Dependence - The individual is dependent upon skilled assistance or supervision from another person in self-care activities. These activities include, but are not limited to, signficant functional loss or loss of previous functional gains in the ability to:

- Drink;
- Feed;
- Dress; or
- Maintain personal hygiene.

Additionally, this could include care of braces or other adaptive devices.

o Mobility Dependence - The individual is dependent upon another person for skilled OPT assistance or supervision in such areas as transfer, gait training, stair climbing, and wheelchair maneuvering activities due to, but not limited to:

- Decreased strength;
- Marked muscle spasticity;
- Moderate to severe pain;
- Contractures;
- Incoordination;
- Perceptual motor loss;
- Orthotic need; or
- Need for ambulatory or mobility device.

This could involve patients with or without impairment of the lower leg who are partially independent with wheelchair and/or who have significant architectural or environmental barriers.

o Safety Dependence/Secondary Complications - A safety problem exists when a patient without skilled assistance cannot handle him/herself in a manner that is physically safe. This may extend to the performance of activities of daily living or to acquired secondary complications which could potentially intensify medical sequelae such as fracture nonunion, or decubiti. Some examples of safety dependence may be demonstrated by high probability of falling, swallowing difficulties, severe pain, loss of skin sensation, progressive joint contracture, and infection requiring skilled PT intervention to protect the patient from further complication.

Each patient's condition calls for assessments which are unique to specific impairments. For example, documentation in the treatment of open wounds or ulcerations require other objective and subjective documentation, such as size and depth of the wound, amount and frequency of drainage, signs of granulation, or evidence of infection, etc.

If the goal for any patient is to increase functional abilities, range of motion, or strength, the initial evaluation must measure (if possible) the patient's starting functional abilities, range of motion and strength. If the assessment indicates that joint range of motion or strength is normal, there should be evidence of this assessment in the initial evaluation or progress notes, e.g., "within normal limits." If objective documentation cannot be accomplished for any reason, this should be noted in the inital evaluation or progress notes along with the reason(s).

5. Plan of Treatment.--The PT plan of treatment must include specific functional goals and a reasonable estimate of when they will be reached (e.g., 6 weeks). It is not adequate to estimate "1 to 2 months on an ongoing basis." The plan of treatment must include modalities/procedures, frequency, and duration of treatment. The modalities/procedures must be specific. Changes in the plan of treatment should be submitted with the progress notes.

The plan of treatment must contain the following information concerning the PT treatment:

o Type of Modalities/Procedures - Should describe he specific nature of the therapy to be provided. Some examples of PT modalities/procedures are deep heat (e.g., diathermy, ultrasound), superficial heat (e.g., hot packs, whirlpool), and therapeutic exercises and gait training.

o Frequency of Visits - An estimate of the frequency of treatment to be rendered (e.g., 3x week).

o Estimated Duration - Identifies the length of time over which the services are to be rendered and may be expressed in days, weeks, or months.

o Diagnoses - Should include the PT diagnosis if different from the medical diagnosis. For example, the medical diagnosis might be "rheumatoid arthritis." However, the shoulder might be the only area being treated, so the PT diagnosis might be "adhesive capsulitis." In order to establish the PT diagnosis, diagnostic tests must be used whenever possible.

o Functional Goals - Should reflect the physical therapist's and/or physician's description of what the patient is expected to achieve as a result of therapy.

o Rehabilitation Potential - The therapist's and/or physician's expectation concerning the patient's ability to meet the goals at initiation of treatment.

6. Progress Reports (Status Summary(s) Related to the Billing Period).--The physical therapist must provide treatment information regarding the current status of the patient during the course of the billing period. The PT progress notes and any needed reevaluation(s) must update the baseline information provided at the initial evaluation. If there is a change in the plan of treatment, it must be documented in accordance with §3148.3. Additionally, when a patient is continued from one billing period to another, the progress report(s) must reflect comparison between the patient's current functional status and that obtained during the previous billing and/or at the initial evaluation.

Where a valid expectation of improvement exists at the time OPT services are initiated, or thereafter, reasonable and necessary services would be covered even though the expectation may not be realized. However, in such instances, the OPT services are covered only up to the point in time that no further significant functional improvement can be reasonably expected. Progress reports or status summaries by the physician and/or physical therapist must document a continued expectation that the patient's condition will continue to improve significantly in a reasonable and generally predictable period of time. "Significant," in this context, means a generally measurable and substantial increase in the patient's present level of physical functional abilities compared to their level at the time treatment was initiated.

Do not interpret the term "significant" so stringently that you deny a claim simply because of a temporary setback in the patient's progress. For example, a patient may experience a new intervening medical complication or a brief period when lack of progress occurs. The medical reviewer should approve the claim if the services are considered reasonable and necessary and if there is still a reasonable expectation that significant improvement in the patient's overall safety or functional ability will occur. However, the physical therapist and/or physician should document such lack of progress and briefly explain the need for continued skilled PT intervention.

Medical review of rehabilitation claims must be conducted with an understanding that skilled intervention may be needed, and improvement in a patient's condition may occur, even where a patient's full or partial recovery is not possible. For example, a terminally ill patient may begin to exhibit self care, mobility and/or safety dependence requiring PT services. The fact that full or partial recovery is not possible or rehabilitation potential is not present, must not affect MR coverage decisions. The deciding factor is always based on whether the services are considered reasonable, effective, treatment for the patient's condition and they require the skills of a physical therapist, or whether they can be safely and effectively carried out by nonskilled personnel, without physical therapy supervision. The reasons for physical therapy intervention must be clear to you, as well as their goals, prior to a coverage determination. These claims often require review at Level III.

It is essential that the physical therapist document the updated status in a clear, concise, and objective manner. Objective tests and measurements are stressed when these are practical. The physical therapist selects the appropriate method to demonstrate current patient status. However, the method chosen, as well as the measures used, should be consistent during the treatment duration. If the method used to demonstrate progress is changed or comparable measures are used; the reasons for the change should be documented, including how the new method relates to the old. You must have an overview of the purpose of treatment goals in order to compare the patient's current functional status to that in previous reporting periods.

While objective documentation often necessitates range of motion, strength, and other objective measurements; documentation of the patient's current functional status compared to previous reporting period(s) is of paramount importance. The deficits in functional ability should be clear.

Physical therapists must document functional improvements (or lack thereof) as a result of their treatments. Documentation of functional progress must be stated whenever possible in objective, measurable terms. The following illustrates these principles:

o Pain - Documentation describing the presence or absence of pain and its effect on the patient's functional abilities must be considered in MR decisions. A description of its intensity, type, changing pattern, and location at specific joint ranges of motion will materially aid correct MR decisions. Documentation should describe the limitations placed upon the patient's self care, mobility and/or safety, as well as the subjective progress made in the reduction of pain through treatment.

Transcutaneous electrical nerve stimulation (TENS) uses surface electrodes and electrical current to interrupt pain pathways and sensation of pain through peripheral nerves. Generally, it is covered on a trial basis for up to 1 month. Any trial period extending beyond 1 month must be documented as to reason and medical necessity. Approve such claims only when the documentation supports the need to assess the patient's suitability for continued treatment with TENS. When it is determined that TENS should be continued as therapy and the patient has been trained to use the stimulator, it is expected that the stimulator will be employed by the patient at home. Payment may be made under the prosthetic devices benefit for the TENS stimulator. Payment may not be approved for continued OPT treatments with TENS. (See Coverage Issues Manual 35-46 and 65-8.)

o Therapeutic Exercise - The objective documentation should support the skilled nature of the exercise program, and/or the need for design and establishment of a maintenance exercise program. The goals should be to increase functional abilities in self care, mobility or patient safety. Documentation should indicate the goals and type of exercise provided and the major muscle groups treated.

Approve claims when the therapeutic exercise, because of documented medical complications, the condition of the patient, or complexity of the exercise employed, must be rendered by, or under, the supervision of a physical therapist. For example, while passive and active assistive exercise may often be performed safely and effectively by nonskilled personnel, the presence of fracture nonunion, severe joint pain, or other medical or safety complications may warrant skilled PT intervention to render the service and/or to establish a safe maintenance program. In these cases, the complications and the skilled services they require, must be documented by physician orders and/or physical therapy notes. To make correct MR decisions, the patient's losses and/or dependencies in self care, mobility and safety must also be documented. The possibility of adverse effects from the improper performance of an otherwise unskilled service does not make it a skilled service unless there is documentation to support why skilled PT is needed for the patient's medical condition and/or safety.

Approve establishment and design of a maintenance exercise program to fit the patient's level of ADL, function, and any instructions supportive personnel and/or family members need to safely and effectively carry out the program. Reevaluation may be approved when reasonable and necessary to readjust the maintenance program to meet the changing needs of the patient. There must be adequate justification for readjusting a maintenance program, e.g., loss of previous functional gain.

o Cardiac Rehabilitation Exercise - Physical therapy is not covered when furnished in connection with cardiac rehabilitation exercise program services (see Coverage Issues Manual 35-25) unless there also is a diagnosed noncardiac condition requiring it e.g., where a patient who is recuperating from an acute phase of heart disease may have had a stroke which requires PT. (While the cardiac rehabilitation exercise program may be considered by some a form of PT, it is a specialized program conducted and/or supervised by specially trained personnel whose services are performed under the direct supervision of a physician.) Restrictions on coverage of PT do not affect rules regarding coverage or noncoverage of such services when furnished in a hospital inpatient or outpatient setting.

o Gait Training - The documentation must support that the skilled gait training is designed to restore functional abilities (or to design and establish a safe maintenance program) which can reasonably be expected to improve the patient's ability to walk or walk more safely. Documentation should clarify the patient's gait deviation, current functional abilities and limitations, and/or safety dependence during gait. Documentation should identify the gait problem being treated, e.g., to correct a balance/incoordination and safety problem or a specific gait deviation, such as a Trendelenberg gait. The type of gait deviation requiring skilled intervention, the functional limitations in mobility, the patient's understanding or lack of understanding of the gait training, and the amount of assistance needed during training is needed to make correct review decisions. The documentation must differentiate skilled gait training rendered from assistive walking, when the patient is walking repetitiously and merely improving distance or endurance (assistive or nonassistive).

o Transfer Training - The documentation should describe the patient's functional limitations in transfer ability that warrant skilled PT intervention. Documentation should include, the special transfer training needed and rendered, and any training needed by supportive personnel and/or family members to safely and effectively carry it out. Transfer training should be approved when the documentation supports a skilled need for evaluation, design and effective monitoring and instruction of the special transfer technique for safety and completion of the task.

Documentation that supports only repetitious carrying out of the transfer method, once established, and monitored for safety and completion of the task is noncovered care.

o Electrical Nerve Stimulation - Approve reasonable and necessary electrical stimulation to delay or prevent disuse atrophy, but only where the documentation indicates that the nerve supply (including brain, spinal cord and peripheral nerves) to the muscle is intact, and other nonneurological reasons for disuse are causing atrophy. (See Coverage Issues Manual §35-77.)

Electrotherapy for the treatment of facial nerve paralysis, e.g., Bell's palsy is not a covered service. (See Coverage Issues Manual §35-72.)

Approve functional electrical stimulation (FES) used to test the suitability for improving the patient's functional ability when documented in the PT notes as lost. For example, to stimulate the dorsiflexors of the ankle, thereby, reducing toe drag during the swing-through phase of gait.

o Biofeedback Therapy - Approve claims when the documentation indicates that it is reasonable and necessary for the patient for muscle reeducation of specific muscle groups, or for treating pathological muscle abnormalities of spasticity, incapacitating muscle spasm, or weakness.

Deny claims where the documentation supports treatment for ordinary muscle tension states or for psychosomatic conditions. (See Coverage Issues Manual 35-27.)

o Fabrication of Temporary Prostheses, Braces, and Splints - Approve reasonable and necessary fabrication of temporary prostheses, braces and splints, and any reasonable and necessary skilled training needed in their safe and effective use. The documentation must indicate the need for the device and training.

D. Certification and Recertification.—To meet Medicare guidelines, PT services must be certified and recertified by a physician. They must be furnished while the patient is under the care of a physician. The OPT services may be furnished under a written plan of treatment established by the physician or a qualified physical therapist providing them; however, if the plan is established by a physicial therapist, it must be reviewed periodically by the physician. The plan of care must be established (reduced to writing by either professional or the provider when it makes a written record of the oral orders) before treatment is begun. When OPT services are continued under the same plan of treatment for a period of time, the physician must certify at least every 30 days that there is a continuing need for them. Obtain the recertification at the time the plan of treatment is reviewed since the same 30 day interval is required for the plan's review. Any changes to the treatment plan established by a physicial therapist must be in writing and signed by the physicial therapist or by the attending physician. Recertifications must be signed by the physician who reviewed the plan of treatment. The physician may change a plan of treatment established by the physical therapist, the physical therapist may not alter a plan of treatment established by a physician.

E. Physical Therapy Forms.—Documentation may be submitted on a specific form or may be copies of the provider's record. You may require a specific form if you find it more efficient than using provider records; however, it must capture the MR information required by these instructions. If you choose to require one, show the OMB clearance number. The information must be complete. If it is not, request the missing information and return the bill for the additional information. The information you require to review the bill is that required by a physical therapist to properly treat a patient.

F. Post-Pay Sample.—Review a random sample (percent determined by HCFA) of the bills that pass all edits (i.e., are paid without MR), using either a random number generator or terminal HICN. Each quarter, assign a new random number generator/HICN. This is unnecessary if you medically review all OPT claims.

Conduct a post-pay MR on each claim selected in accordance with subsection C. Determine a provider's denial rate by combining the prepay and postpay denials for the same quarter. Calculate the rate by dividing the provider's total charges that you have determined noncovered by the total charges submitted by the provider in that quarter. Place providers having a 5 percent or higher denial rate in any quarter on 100 percent

best copy available

prepay MR in the subsequent quarter. Providers with a denial rate of less than 5 percent for two (2) consecutive quarters may be removed from 100 percent MR. Handle new providers according to your existing procedures.

Consider investigating abnormal trends uncovered during the post-pay sample review by conducting special Level I edit studies. Alert your RO to your findings, along with recommendations, prior to taking any corrective action or procedural changes.

G. Completion of the MR Report.--

1. Report of OPT MR Activities.--Complete and submit within 15 calendar days of the close of the calendar quarter, the following report (Exhibit II).

Submit reports to:

Health Care Financing Administration
Office of Program Operations Procedures, BPO
1-H-3 Meadows East Bldg.
6325 Security Blvd.
Baltimore, MD 21207

Send a copy to the regional administrator.

2. Completing the OPT Edits Report (Exhibit II).--

NOTE: If you perform 100 percent MR, see subpart 3 below.

Item 1 - Intermediary Number - Enter your assigned identification number.

Item 2 - Intermediary Name - Enter your corporate name.

Item 3 - Intermediary Contact - Enter the name of the individual responsible for completing the report.

Item 4 - Telephone Number - Enter the phone number of the individual named in Item 3.

Item 5 - Reporting Quarter - Enter the last month of the reporting quarter and the year (i.e., December, March, June, or September).

Item 6 - Date of Completion - Enter the date the report is forwarded to HCFA.

Item 7 - Total Bills to Pass Edits - Enter the total number of OPT bills (revenue code 42x) that were paid or identified for payment without MR. (Bills passing edits.)

Item 8 - Charges for Bills Passing Edits - Enter the dollar amount (charges) for OPT bills passing edits.

Item 9 - Total Number of Bills Suspended - Enter the number of bills suspended for MR as a result of your edits.

Item 10 - Charges for Bills Suspended - Enter the dollar amount (charges) for bills suspended for MR.

Item 11 - Total Number Bills Paid - Enter the number of bills paid as billed after MR.

Item 12 - Total Number of Bills Denied - Enter the number of bills denied (including partial denials) after MR.

Item 13 - Charges Denied - Enter the dollar amount (charges) denied after MR.

Item 14 - Review - Based upon HCFA's, RO's, or your edits, or 100 percent review. Enter the applicable category.

3. Completing the OPT Edits Report (Exhibit II) With 100 Percent Medical Review.—

Item 1 through Item 6 - See subpart 2.

Item 7 - Total Number Bills to Pass Edits - Enter 0.

Item 8 - Charges for Bills Passing Edits - Enter 0.

Item 9 - Total Number Bills Suspended - Enter the number of OPT bills reviewed.

Item 10 - Charges for Bills Suspended - Enter the sum of all OPT charges for all bills reviewed.

Item 11 - Total Number Bills Paid - Enter all OPT bills which were subjected to MR and subsequently paid.

Item 12 - Total Number of Bills Denied - Enter the number of OPT bills denied (including partial denials) after MR.

Item 13 - Charges Denied - Enter the dollar amount (charges) denied after MR.

Item 14 - Review - Based upon HCFA's, RO's, or your edits, or 100 percent review. Enter the applicable category.

NOTE: If you peform 100 percent review, skip the following items.

4. Completing of Items 15-18 of the OPT Screens Report (Exhibit II).—

Item 15 - Number Sample Bills Reviewed - Enter the number of OPT bills selected for sample review from the bills passing the edits.

Item 16 - Charges for Sample Bills Reviewed - Enter the dollar amount (sum of the charges) on the OPT bills selected.

Item 17 - Number Sample Bills Denied - Enter the number of OPT bills denied after MR.

Item 18 - Charges for Sample Bills Denied - Enter the dollar amount (sum of the charges) denied following MR.

EXHIBIT I
OUTPATIENT PHYSICAL THERAPY EDITS

The following edits are not based on normative treatment. It is prohibited to deny a bill solely on the basis that it exceeds the edits. The edits are for selecting bills for Level II MR.

Edit Identification Number	Diagnosis	ICD-9-CM	Number of Visits	Duration (MO.)

3905. MEDICAL REVIEW (MR) OF PART B INTERMEDIARY OUTPATIENT SPEECH-LANGUAGE PATHOLOGY (SLP) BILLS

A. Claims Documentation.—Medically review each claim referred to Level II or III for outpatient speech-language (SLP) services, regardless of setting. All information must be readable. If possible, use speech-language pathologists to review SLP claims. Obtain the following required information from the provider:

o Facility and Patient Identification - (Facility name, provider number, patient name, HICN, age.)

o Physician Referral and Date.

o Date of Last Certification - Obtain the date on which the plan of treatment for SLP was last certified by the physician.

o Diagnosis - The primary medical diagnosis for which services are rendered must be listed first; other diagnoses applicable to the patient or that influence care follow.

o Communication Disorder Diagnosis.

o Duration - The total length of time services have been rendered (in days) from the date they were initiated for the diagnosis being treated at the billing provider (including the last day in the current billing period).

o Number of Visits - The total number of patient visits completed since services were initiated for the communication disorder diagnosis being treated by the billing provider. The total visits to date (including the last visit in the billing period) must be given rather than for each separate billing.

o Date of Onset - (Occurrence Code 11) - The date of onset or exacerbation of the communication disorder diagnosis for which services were rendered by the billing provider.

o Date Treatment Started - (Occurrence Code 35) - The date services were initiated by the billing provider for the communication disorder diagnosis.

o Billing Period - When services began and ended in the billing period (from-through dates).

o Medical History - Obtain only the medical history which is pertinent to, or influences, the treatments or tests rendered. Include a brief description of the functional status of the patient prior to the onset of the condition requiring services and any pertinent prior treatment.

o Initial Assessment and Date - (At the billing period.)

- Plan of Treatment and Date Established.

- Progress Notes - Obtain updated patient status reports concerning the patient's current functional communication abilities/limitations.

1. Medical History.—If a history of previous SLP treatment is not available, the provider may provide a general summary regarding the patient's past relevent medical history recorded during the initial assessment with the patient/family (if reliable) or through contact with the referring physician. Information regarding prior treatment for the current condition, progress made, and treatment by the referring physician must be provided when available. The level of function prior to the current exacerbation or onset should be described.

The patient's medical history includes the date of onset and/or exacerbation of the illness or injury. If the patient has had prior therapy for the same condition, use that history in conjunction with the patient's current assessment to establish whether additional treatment is reasonable.

The history of treatments from a previous provider is necessary for patients who have transferred to a new provider for additional treatment. For chronic conditions, the history gives the date of the change or deterioration in the patient's condition and a description of the changes that necessitate skilled care.

2. Assessment.—Approve initial assessment when it is reasonable and necessary for the speech-language pathologist to determine if there is an expectation that either restorative services or establishment of a maintenance program will be appropriate for the patient's condition.

Reassessments are covered if the patient exhibits a demonstrable change in motivation, clearing of confusion, or the remission of some other medical condition which previously contraindicted SLP services. Periodic routine reevaluations (e.g., monthly, bimonthly) for a patient undergoing a SLP program are part of the treatment session and are not covered as separate evaluations. An initial assessment or reassessment that is determined reasonable and necessary based on the patient's condition, may be approved even though the expectations are not realized, or when the assessment determines that skilled services are not needed.

The assessment establishes the baseline data necessary for assessing expected rehabilitation potential, setting realistic goals, and measuring communication status at periodic intervals.

The initial assessment must include objective baseline diagnostic testing (standardized or nonstandardized), interpretation of test results, and clinical findings. If baseline testing cannot be accomplished for any reason, this should be noted in the initial assessment or progress notes along with the reason(s). The assessment must include a statement of the patient's expected rehabilitation potential.

3. Plan of Treatment.--The plan of treatment must contain the following:

- Type and nature of care to be provided;
- Functional goals and estimated rehabilitation potential;
- Treatment objectives;
- Frequency of visits; and
- Estimated duration of treatment.

a. Functional Goals.—Must be written by the speech-language pathologist to reflect the level of communicative independence the patient is expected to achieve outside of the therapeutic environment. The functional goals reflect the final level the patient is expected to achieve, are realistic, and have a positive effect on the quality of the patient's everyday functions.

Assume that certain factors may change or influence the final level of achievement. If this occurs, the speech-language pathologist explains the factors which led to the change of the functional goal. Examples of functional communication goals in achieving optimum communication independence are the ability to:

- Communicate basic physical needs and emotional status.

- Communicate personal self-care needs.

- Engage in social communicative interaction with immediate family or friends.

- Carry out communicative interactions in the community.

NOTE: The term "communication" includes speech, language, as well as voice skills.

A functional goal may reflect a small, but meaningful change which enables the patient to function more independently in a reasonable amount of time. For some patients it may be the ability to give a consistent, functional "yes" and "no" response; for others it may be the ability to demonstrate a competency in naming objects using auditory/verbal cues. Others may receptively and expressively use a basic spoken vocabulary and/or short phases; and still others may regain conversational language skills.

b. Treatment Objectives--Specific steps designed to reach a functional goal. When the patient achieves these objectives, the functional goal is met.

c. Frequency of Visits—An estimate of the frequency of treatment to be rendered (e.g., 3x week).

Length of visits are typically 30, 45, or 60 minutes. Sometimes patients are seen for shorter periods several times a day (for example, three 10 minute sessions or a total of 30 minutes.) Rarely, except during an assessment, are session lengths longer than 60 minutes. If longer times are used, the provider must justify them, by noting that e.g., the patient is exceptionally alert, the number of appropriate activities needing skilled intervention is greater than average, special staff/family training is required. Intensive treatment is sometimes required post-operatively (e.g., tracheoesophageal puncture) or post-onset of disorder (due to intensive family involvement).

d. Estimated Duration of Treatment—Identifies the total estimated time over which the services are to be rendered and may be expressed in days, weeks, or months.

4. Progress Reports (Treatment Summary for Billing Period).--Obtain the following:

- The initial functional communication status of the patient at this provider setting;
- The present functional status of the patient and progress (or lack of progress) specific for this reporting period;
- The patient's expected rehabilitation potential; and
- Changes in the plan of treatment.

Where a valid expectation of improvement existed at the time services were initiated, or thereafter, the services are covered even though the expectation may not be realized. However, in such instances, approve the services only to the time that no further significant practical improvement can be expected. Progress reports must document a continued expectation that the patient's condition will improve significantly in a reasonable and generally predictable period of time.

"Significant," means a generally measurable and substantial increase in the patient's present level of communication, independence, and competence compared to their levels when treatment was initiated. Do not interpret the term "significant" so stringently that you may deny a claim because of a temporary setback in the patient's progress. For example, a patient may experience a new intervening medical complication or a brief period when lack of progress occurs. The medical reviewer may approve the claim if there is still a reasonable expectation that significant improvement in the patient's overall functional ability will occur. However, the speech-language pathologist and/or physician should document such lack of progress and explain the need for continued intervention.

Documentation includes a short narrative progress report and objective information in a clear, concise manner. This provides you the progress in meeting the plan of treatment, along with any changes in the goals or the treatment plan. Request new plans attached to the original so that you can review the entire plan. However, you must have access to an overall treatment plan with final goals and enough objective information with each claim to determine progress toward meeting the goals.

Consistent reporting is important. For example, if the provider reports that the patient can produce an "m" 25 percent of the time, then reports 40, 60, 90 percent success, you may believe that treatment might be ending. However, if you have the final goal and the objectives, you can see the progress toward that goal and the steps needed to reach it. The speech-language pathologist might state that the final goal is "the ability to converse in a limited environment." One underlying SLP goal might be to "reduce the apraxia sufficiently so the patient can initiate short intelligible phrases with a minimum of errors." Short-term goals may include the patient's ability to initiate easier phonemes before other, more difficult, phonemes. Therefore, the speech-language pathologist has a linguistically and neurologically sound basis for working on one phoneme production before initiating another.

The speech-language pathologist might work on a group of phonemes having a "feature" in common before working on another group. For example, working on all bilabials (since the patient can easily see the movement), might be desirable prior to sounds that are produced more intraorally.

The speech-language pathologist may choose how to demonstrate progress. However, the method chosen, as well as the measures used, generally remain the same for the duration of treatment. The provider must interpret reports of test scores, or comparable measures and their relationship to functional goals, in progress notes or reports. Diagnostic testing should be appropriate to the communication disorder.

While a patient is receiving SLP treatment, the speech-language pathologist reassesses the patient's condition and adjusts the treatment. However, if the method used to document progress is changed, the reasons must be documented, including how the new method relates to the previous method. If the speech-language pathologist reports a subtest score for one month, then a score of a different subtest the next month without demonstrating the subtest's interrelationship, you are not able to judge the progress. Return these claims for an explanation/interpretation. Refer to Level III MR if needed.

5. Level of Complexity of Treatment.--Base decisions on the level of complexity of the services rendered by the speech-language pathologist, not what the patient is asked to do. For example, the patient may be asked to repeat a word and the speech-language pathologist analyzes the response and gives the patient feedback that the patient uses to modify the response. The speech-language pathologist may ask staff or family to repeat the activity as a reinforcement. It is the speech-language pathologist's analysis that makes the activity skilled.

6. Reporting on New Episode or Condition.--Occasionally, a patient who is receiving or who has previously received SLP services, experiences a secondary or complicating new illness. The provider documents the signficance of any change to the communication capabilities. This may be by pre and post episodic objective documentation, through nursing notes or by physician reports. If the patient is receiving treatment, it might have to be lengthened because of his change in condition. If the patient has completed treatment, a significant change in the communication status must be documented to warrant a new treatment plan.

7. Qualified Speech-Language Pathologist.—

- A person who is licensed, if applicable, by the State in which he/she is practicing, and

- Is eligible for a certificate of clinical competence in SLP granted by the American Speech·Language·Hearing Association, or:

  — Meets the educational requirements for certification, and is in the process of accumulating the supervised experience required for certification.

- The speech-language pathologist normally indicates certification status by utilizing CCC-SLP or CFY-SLP:

  — CCC-SLP - Certificate of Clinical Competence in SLP; or
  — CFY-SLP - Clinical Fellowship Year in Speech-Language Pathology.

8. Certification and Recertification.—SLP services must be certified and recertified by a physician and furnished while under the care of a physician. They must be furnished under a written plan of treatment established by the physician or a qualified speech-language pathologist providing such services. If the plan is established by a speech-language pathologist, it must be reviewed periodically by the physician. The plan of care must be established (reduced to writing by either professional or the provider when it makes a written record of the oral orders) before treatment is begun. When outpatient SLP services are continued under the same plan of treatment for a period of time, the physician must certify at intervals of at least every 30 days that there is a continuing need for them. Obtain the recertification when reviewing the plan of treatment since the same interval of at least 30 days is required for the review of the plans. Recertification must be signed by the physician who reviewed the plan of treatment. Any changes established by the speech-language pathologist must be in writing and signed by the speech-language pathologist or by the attending physician. The physician may change a plan of treatment established by the speech-language pathologist. The speech-language pathologist may not alter a plan of treatment established by a physician.

B. Examples of Skilled and Unskilled Procedures.—

1. Skilled Procedures.—

- Diagnostic and assessment services to ascertain the type, causal factor(s) and severity of speech and language disorders. Reassessment if the patient exhibits a change in functional speech or motivation, clearing of confusion, or remission of some other medical condition which previously contraindicated SLP or audiology services.

o Design of a treatment program relevant to the patient's disorder(s). Continued assessment of progress during the implementation of the treatment program, including documentation and professional analysis of the patient's status at regular intervals.

o Establishment of compensatory skills (e.g., air-injection techniques, word finding strategies).

o Establishment of a hierarchy of speech-language tasks and cueing that directs a patient toward communication goals.

o Analysis related to actual progress toward goals.

o Patient and family training to augment restorative treatment or to establish a maintenance program.

2. Unskilled Procedures.—

o Nondiagnostic/nontherapeutic routine, repetitive and reinforced procedures (e.g., the practicing of word drills without skilled feedback).

o Procedures which are repetitive and/or that reinforce previously learned material which the patient or family is instructed to repeat.

o Procedures which may be effectively carried out with the patient by any nonprofessional (e.g., family member, restorative nursing aide) after instruction and training is completed.

o Provision of practice for use of augmentative or alternative assessment communication systems.

NOTE: It is only after the patient has established a high level of consistency of performance in a task with the speech-language pathologist, that unskilled techniques can be implemented.

C. Examples of Statements Supporting and Not Supporting Coverage.—

1. Statements Supporting Coverage.—Typically, these statements have an objective component which is compared to previous reports, and which demonstrate progress toward a stated functional goal.

EXAMPLES: "Mr. Smith achieved 75 on the Word Subtest on the Johnson Test of Aphasia compared with last month's score of 50 on the same Subtest."

"Mr. Jones achieved a combined score of 352 on the A, B, C, D, and E, subtests this month compared with an overall score of 250 for these same subtests last month."

"Mrs. Jones achieved the next steps in the treatment plan outlined last month (see attached sheet). If she continues at this rate she should complete treatment within the next 2 months."

"Mrs. Jones achieved 75% (7.5 out of 10 or 75 out of 100) on word naming which compares to last month's score of 50% (5.0 out of 10 or 50 out of 100)."

NOTE: Percent should be based on real number count. Interpretation of scores must be presented in progress notes or summary information. The narrative should also contain reference to objective scoring, comparison of previous scores, or treatment plan with present status compared to previous status. This information may be embedded in narrative or attached, however, the reviewer should have access to this information and stated functional goals.

2. Statements Not Supporting Coverage.—Typically, these statements are subjective, and do not demonstrate progress toward a stated functional goal, or a comparison to previous test scores.

EXAMPLE: "Ms. Jones is very concerned about going home. She has begun smoking again which is causing family as well as physical problems."

"Speech somewhat slurred today."

"Mr. Smith more consistent in responses."

"Mr. Jones has shown significant improvement in his ability to make himself understood."

"Patient is now able to inject air 80% of the time." (No comparison to previous report.)

"Mrs. Smith achieved 75% accuracy on word naming task. (No comparison to previous report)."

"Auditory comprehension improved from moderately impaired to mildly impaired," (by itself, the statement does not offer sufficient objective information.)

D. Resumption of Treatment.—There are conditions and circumstances that justify resuming treatment after it has been delayed. Obtain verification (when needed for coverage decisions). Examples include:

- Patient becomes more alert, attentive, cooperative;
- Patient shows rehabilitation potential;
- Medical complications cleared;
- Environmental change improves motivation or communicative capabilities;
- Progressive nature of disorder warrants further treatment; and
- Drug or other medical treatment is reduced or ended.

3905.1 MR Considerations.--

A. Disorders Typically Not Covered for the Geriatric Patient.--

- Stuttering (except neurogenic stuttering caused by brain damage)

  Fluency Disorder
  Cluttering
  Disprosody
  Disfluency

- Myofunctional Disorders

  Tongue Thrust

- Behavioral/Psychological Speech Delay

B. Maintenance.--Approve claims only when the specialized knowledge and judgment of a qualified speech-language pathologist is required to design and establish a maintenance program. By the time the patient's restorative program has been completed, the maintenance program has already been designed, with instructions to patient, supportive personnel, or family. Do not approve a separate charge for establishing the maintenance program immediately after the restorative program has been completed.

Obtain documentation that justifies a provider reestablishing a maintenance program, e.g., loss in previous functional abilities occurs, intervening medical conditions develop, difficulty in communicating with caregivers arises.

The initial assessment should be documented with standardized testing (if possible) to establish base-line data. This is critical if a claim is submitted for care at a future date. Documentation should show that the maintenance program is designed by the speech-language pathologist appropriate to the capacity and tolerance of the patient and the treatment objectives of the physician.

The maintenance program is established when documentation indicates it has been designed for the patient's level of function and instructions to the patient and supportive personnel have been completed for them to safely and effectively carry them out. The documentation must give reasonable assurances that this has occurred. After that point, the services are not reasonable and necessary.

C. Group Treatment.--Generally, group therapy treatment and attendance at social or support groups, such as stroke clubs or lost cord clubs, are not reimbursable. Ensure that the "reasonable and necessary" requirements are met.

D. Total Laryngectomy.--A total laryngectomy is the surgical removal of the larynx. Documentation may involve pre-op/post-op sessions as part of the assessment, to inform the patient, the family, and staff about alternative communication methods, and to provide an immediate means of communication. Documentation includes assessment and any treatment necessary to establish a means of communication using esophageal speech, an artifical larynx (electronic or pneumatic device), a trecheoesophageal puncture prosthesis, and/or other alternate communication methods.

E. Partial Laryngectomy.--A partial laryngectomy is the surgical removal of part of the larynx. Documentation includes the voice problems that require assessment and treatment. Documentation may involve pre-op/post-op sessions as part of the assessment, and to inform the patient, the family, and staff about voice problems. Documentation for rehabilitation also includes the assessment, type of treatment required for the voice disorders, and includes base-line objective data and progress notes.

F. Total Glossectomy.--Total glossectomy is the surgical removal of the tongue. Total glossectomy results in articulation problems that require assessment and may require treatment. Documentation may include pre-op/post-op sessions as part of the assessment, to inform the patient, the family, and staff about articulation disorders, and to provide an immediate means of communication and/or to establish an effective maintenance program. Documentation includes assessment and type of treatment for the articulation disorders. Documentation for articulation treatment involves instruction of compensatory techniques and alternate communication methods if needed.

G. Partial Glossectomy.--Partial glossectomy is the surgical removal of part of the tongue. Documentation should indicate the articulation problems that require assessment and treatment. Documentation may include pre-op/post-op sessions as part of the assessment, to inform the patient, the family, and staff about articulation disorders, and to provide an immediate means of communication following surgery. Documentation includes the assessment and type of treatment for the articulation disorders including base-line objective data and progress notes. Documentation for articulation treatment involves instruction of compensatory techniques and alternate communication methods if needed.

H. Congenital Disorders.--Documentation must always substantiate need, e.g., no previous treatment; the patient's communicative capabilities have recently deteriorated; new, special techniques or instruments have become available; or intervening medical complications have affected SLP communication. Approve claims for maintenance or short-term treatment only if objective documentation supports that need.

I. Alzheimer's Disease.--(Chronic brain syndrome, organic brain syndrome). Objective documentation must indicate the patients' condition, alertness and mental awareness. Documentation must justify that services are needed to establish a reasonable and necessary maintenance program. Review these claims carefully for medical necessity.

J. Chronic Conditions.--Claims for patients with chronic conditions such as MS, ALS, Parkinson's Disease or Myasthenia Gravis can be approved if they document a need for reasonable and necessary short-term care or a need to establish a maintenance program. However, clear documentation must be submitted concerning any prior care or maintenance program designed for the same condition. Approve claims for reasonable and necessary short-term intervention to improve oral and laryngeal strength, speech intelligibility, or vocal intensity, but only when the documentation supports the need to increase function, or to establish a maintenance program.

3905.2 Speech-Language Pathology Terms.--

Agnosia - Inability to attach meaning to sensory information although the physiologic receptor mechanism is intact.

Agrammatism - Impairment of the ability to produce words in their correct sequence; difficulty with grammar and syntax.

Agraphia - Disorder of writing. It may result from a central nervous system lesion or from lack of muscular coordination.

Anomia - Loss of the ability to identify or to recall and recognize names of persons, places or things.

Aphasia - Communication disorder caused by brain damage and characterized by complete or partial impairment of language comprehension, formulation, and use. It excludes disorders associated with primary sensory deficits, general mental deterioration, or psychiatric disorders. Partial impairment is often referred to as dysphasia.

Aphonia - Loss of voice.

Apraxia - (1) Disruption in the ability to transmit a motor response along a specific modality; involves disruption of voluntary or purposeful programming of muscular movememts while involuntary movements remain intact; characterized by difficulty in articulation of speech, formulation of letters in writing, or in movements of gesture and pantomime. (2) In speech, a nonlinguistic sensorimotor disorder of articulation characterized by impaired capacity to program the position of speech musculature and the sequencing of muscle movements (respiratory, laryngeal, and oral) for the volitional production of phonemes.

Dysarthria - Term for a collection of motor speech disorders due to impairment originating in the central or peripheral nervous system. Respiration, articulation, phonation, resonation, and/or prosody may be affected; volitional and automatic actions, such as chewing and swallowing, and movements of the jaw and tongue may also be deviant. It excludes apraxia and functional or central language disorders.

Dysphagia - Difficulty in swallowing. It may include inflammation, compression, paralysis, weakness, or hypertonicity of the esophagus.

Generalization - (1) In conditioning, the eliciting of a conditioned response by stimuli similar to a particular conditioned stimulus. (2) Transfer of learning from one environment to a similar environment; the more similar the environments or situations, the more transfer takes place.

Hard Glottal Attack - Forceful approximation of the vocal folds during the initiation of phonation.

Intonation - Linguistic system within a language which is concerned with pitch, stress, and juncture of the spoken language; a unit with specific communicative import, such as interrogation, exclamation, and assertion.

Lexicon - Total accumulation of linguistic signs, words or morphemes, or both, in a given language; the list of all the words in a language.

Morphology - Component of grammar concerned with the formation of words, the smallest meaningful unit in a language, as a bridge between phonology and syntax.

Obturator - (1) Any structure which occludes an opening. (2) Prosthetic appliance, similar to a dental plate, that forms an artificial palate to cover a cleft palate, designed so that the musculature of the palate and pharynx are able to contract around it.

Paraphasia - Any error of commission modifying a specific word (sound and morpheme substitution) or of word substitution in the spoken or written production of a speaker or writer.

Perseveration - Tendency to continue an activity, motor or mental, once started, and to be unable to modify or stop even though it is acknowledged to have become inappropriate.

Phoneme - Shortest arbitrary unit of sound in a given language that can be recognized as being distinct from other sounds in the language.

Phonological - Component of grammar determining the meaningful combination of sounds.

Pitch - Acuteness or gravity of a tone, dependent upon the frequency of the vibrations producing it and their intensity and overtone structure. The greater the number of vibrations per unit of time, the higher the pitch and the more acute the tone.

Pragmatics - Functional use of language in context. It includes such factors as intention in communication; sensorimotor actions preceding, accompanying, and following the utterance; knowledge shared in the communicative dyad; and the elements in the environment surrounding the message.

Prosody - (1) Physical attributes of speech that signal linguistic qualities such as stress and intonation. It includes the fundamental frequency intensity of the voice, and the duration of the individual speech sounds. (2) Melody of speech determined primarily by modifications of pitch, quality, strength, and duration; perceived primarily as stress and intonational patterns.

Psychoacoustics - Combined disciplines of psychology and acoustics concerned with the study of man's response to sound.

Semantic - Component of grammar concerned with word meanings and meaningful sentences.

Syntactic - Component of grammar concerned with grammatically well formed structures.

3905.3 Acronyms and Abbreviations.—

ADL - Activities of Daily Living.

ALPS - Aphasia Language Performance Scales.

ASHA - American-Speech-Language-Hearing Association.

ASL - American Sign Language.

CVC - Consonant-vowel-consonant.

CPS - Cycles per second. Former unit of measurement for the number of successive compressions and rarefactions of a sound wave within one second of time, now replaced with Hertz (Hz).

Dx - Diagnostic therapy.

MLU - Mean Length of Utterance - Average length of oral expressions as measured by a representative sampling of oral language. It is usually obtained by counting the number of morphemes per utterance and dividing by the number of utterances.

VOT - Voice Onset Time - (1) Time between the release of the stop consonant and the beginning of voicing in the vowel. (2) Time required to initiate sound at the vocal folds.

3905.4 Speech-Language Pathology Tests.—Include but are not limited to:

A. Widely Used Adult Language Tests.—

Ammons Full Range Picture Vocabulary Test
Aphasia Clinical Battery I
Aphasia Language Performance Scales (ALPS)
Appraisal of Language Disturbances (ALD)
Boston Diagnostic Aphasia Examination (BDAE)
Communicative Abilities in Daily Living (CADL)
Examining for Aphasia
Functional Communication Profile
International Test for Aphasia
Language Modalities Test for Aphasia
Language Proficiency Test (LPT)

Minnesota Test for Differential Diagnosis of Aphasia
Porch Index of Communicative Abilities (PICA)
Revised Token Test
Sklar Aphasia Scale
Token Test for Receptive Disturbances in Aphasia
Hodson Phonological Process Analysis
Clinical Evaluation of Language Functions (CELF)
Western Aphasia Battery

B. Widely Used Adult Articulation Tests.—

Apraxia Battery for Adults (ABA)
Assessment of Intelligibility of Dysarthric Speech
Compton-Hutton Phonological Assessment
Frenchay Dysarthria Test
The Fisher-Logemann Test of Articulation Competence
Iowa Pressure Articulation Test
Templin Darley Test of Articulation

C. Speech and Language Diagnostic Tests.--It is required that an initial assessment (including diagnostic testing, if clinically possible) be performed prior to the commencement of treatment. If you need assistance in understanding tests used, consult your speech-language pathologist consultant or the American·Speech·Language·Association.

3906. MEDICAL REVIEW (MR) OF PART B INTERMEDIARY OUTPATIENT OCCUPATIONAL THERAPY (OT) BILLS

These guidelines assist the reviewer in understanding the field of OT as well as facilitate the MR process. They are flexible and neither guarantee a minimum amount of coverage nor establish a maximum coverage amount. They do not cover all situations. They are intended to use in conjunction with §3100 and the knowledge of medical and occupational therapy consultants. If possible, have occupational therapists review OT bills.

Medically review all outpatient OT claims referred to Level II or III, regardless of the setting.

Claims Documentation - medically review each claim referred to Level II or III for outpatient OT services to make a coverage determination. The following provider documentation is required:

o Facility and Patient Identification - (Facility name, patient's name, provider number, HICN, age).

o Physician Referral and Date.

o Date of Last Certification - The date on which the plan of treatment was last certified by the physician.

o Diagnosis - The primary diagnosis for which OT services were rendered is listed first; other diagnoses applicable to the patient or that influence care follow.

o Duration - The length of time OT services have been rendered (in days) from the date services were initiated for the diagnosis at the billing provider (including the last day in the current billing period).

o Number of Visits - The number of patient visits completed since OT services were initiated by the billing provider for the diagnosis being treated. The total visits to date (including the last visit in the billing period) is given rather than for each separate billing.

o Date of Onset (Occurrence Code 11) - The date of onset of the primary OT diagnosis for which OT services were rendered by the billing provider.

o Date Treatment Started (Occurrence Code 35) - The date OT services were initiated by the billing provider for the primary OT diagnosis being treated.

- Billing Period - When OT services began and ended in the billing period (from-through dates).

- Medical History - The provider submits the medical history pertinent to, or which influences, the OT treatment, including a brief description of the functional status of the patient prior to the onset of the condition requiring OT and pertinent prior OT treatment.

- OT Initial Evaluation and Date. (At the billing provider.)

- Plan of Treatment and Date Established.

- OT Progress Notes - The provider supplies updated status reports concerning the patient's current functional abilities/limitations.

1. Medical History.--If a history of previous OT treatment is not available, the provider provides a general summary regarding the patient's past relevent medical history recorded during the initial evaluation with the patient/family or through contact with the referring physician. Information regarding prior OT treatment for the current condition, progress made, and treatment by the referring physician is provided when available. The level of function prior to the current exacerbation or onset is described.

The patient's medical history, as it relates to OT, includes the date of onset and/or exacerbation of the illness or injury. If the patient has had prior therapy for the same condition, use that history in conjunction with the patient's current assessment to establish whether additional treatment is reasonable.

The history of treatments from a previous provider is necessary for patients who have transferred to a new provider. For example, if surgery has been performed, obtain the type and date. The date of onset and type of surgical procedure should be specific for diagnoses such as fractures. For other diagnoses, such as arthritis, the date of onset may be general. Establish it from the date the patient first required medical treatment. For other types of chronic diagnoses, the history gives the date of the change or deterioration in the patient's condition and a description of the changes that necessitate skilled OT.

2. Evaluation.--Approve an OT initial evaluation, (excluding routine screening) when it is reasonable and necessary for the therapist to determine if there is an expectation that either restorative or maintenance services are appropriate. Approve reevaluations when the patient exhibits a demonstrable change in physical functional ability, to reestablish appropriate treatment goals, or when required for ongoing assessment of the patient's rehabilitation needs. Approve initial evaluations or reevaluations that are reasonable and necessary based on the patient's condition, even though the expectations are not realized, or when the evaluation determines that skilled rehabilitation is not needed.

The OT evaluation establishes the physical and cognitive baseline data necessary for assessing expected rehabilitation potential, setting realistic goals, and measuring progress. The evaluation of the patient's functional deficits and level of assistance needed forms the basis for the OT treatment goals. Objective tests and measurements are used (when possible) to establish base-line data.

The provider documents the patient's functional loss and the level of assistance requiring skilled OT intervention resulting from conditions such as:

o Activities of Daily Living (ADL) Dependence - The individual is dependent upon skilled intervention for performance of activities of daily living. These include, but are not limited to, signficant physical and/or cognitive functional loss, or loss of previous functional gains in the ability to:

- Feed, eat, drink;
- Bathe;
- Dress;
- Perform personal hygiene;
- Groom; or
- Perform toileting.

This could include management and care of orthoses and/or other adaptive equipment, or other customized therapeutic adaptations.

o Functional Limitation - The individual is dependent upon skilled OT intervention in functional training, observation, assessment, and environmental adaptation due to, but not limited to:

- Lack of awareness of sensory cues, or safety hazards;
- Impaired attention span;
- Impaired strength;
- Incoordination;
- Abnormal muscle tone;
- Range of motion limitations;
- Impaired body scheme;
- Perceptual deficits;
- Impaired balance/head control; and
- Environmental barriers.

o Safety Dependence/Secondary Complications - A safety problem exists when a patient, without skilled OT intervention, cannot handle him/herself in a manner that is physically and/or cognitively safe. This may extend to daily living or to acquired secondary complications which could potentially intensify medical sequelae such as fracture nonunion, or skin breakdown. Safety dependence may be demonstrated by high probability of falling, lack of environmental safety awareness, swallowing difficulties, abnormal agressive/destructive behavior, severe pain, loss of skin sensation, progressive joint contracture, and joint protection/preservation requiring skilled OT intervention to protect the patient from further medical complication.

If the goal for the patient is to increase functional abilities and decrease the level of assistance needed, the initial evaluation must measure the patient's starting functional abilities and level of assistance required.

3. Plan of Treatment.--The OT plan of treatment must include specific functional goals and a reasonable estimate of when they will be reached (e.g., 6 weeks). It is not adequate to estimate "1 to 2 months on an ongoing basis." The plan must include specific OT procedures, frequency, and duration of treatment. The provider submits changes in the plan with the progress notes.

The plan of treatment contains:

o Type of OT Procedures - Describes the specific nature of the therapy to be provided.

o Frequency of Visits - An estimate of the frequency of treatment to be rendered (e.g., 3x week).

The provider's medical documentation should justify the intensity of services rendered. This is crucial when the treatments are given more frequently than 3 times a week.

o Estimated Duration - Identifies the length of time over which the services are to be rendered. It may be expressed in days, weeks, or months.

o Diagnoses - Includes the OT diagnosis if different from the medical diagnosis. The OT diagnosis should be based on objective tests, whenever possible.

o Functional OT Goals (short or long-term) - Reflects the occupational therapist's and/or physician's description of what functional physical/cognitive abilities the patient is expected to achieve.

Assume that certain factors may change or influence the level of achievement. If this occurs, the occupational therapist explains the factors which led to the change in functional goal(s).

o Rehabilitation Potential - The occupational therapist's and/or physician's expectation concerning the patient's ability to meet the established goals.

4. Progress Reports (Treatment Summary for Billing Period).—The provider documents and reports:

o The initial functional status of the patient;

o The patient's functional status and progress (or lack of progress) specific for this reporting period; including clinical findings (amount of physical and/or cognitive assistance needed, range of motion, muscle strength, unaffected limb measurements, etc.); and

o The patient's expected rehabilitation potential.

Where a valid expectation of improvement exists at the time OT services are initiated, or thereafter, the services are covered even though the expectation may not be realized. However, in such instances, the OT services are covered only to the time that no further significant practical improvement can be expected. Progress reports or status summaries must document a continued expectation that the patient's condition will continue to improve significantly in a reasonable and generally predictable period of time.

"Significant," means a generally measurable and substantial increase in the patient's present level of functional independence and competence, compared to that when treatment was initiated. Do not interpret the term "significant" so stringently that you deny a claim simply because of a temporary setback in the patient's progress. For example, a patient may experience an intervening medical complication or a brief period when lack of progress occurs. The medical reviewer may approve the claim if there is still a reasonable expectation that significant improvement in the patient's overall safety or functional ability will occur. However, the provider should document such lack of progress and briefly explain the need for continued skilled OT intervention.

The provider must provide treatment information regarding the status of the patient during the billing period. The provider's progress notes and any needed reevaluation(s) must update the baseline information provided at the initial evaluation. If there is a change in the plan of treatment, it must be documented. Additionally, when a patient is continued from one billing period to another, the progress report(s) must reflect the comparisons between the patient's current functional status and that during the previous billing and/or initial evaluation.

Conduct MR of claims with an understanding that skilled intervention may be needed, and improvement in a patient's condition may occur, even where a patient's full or partial recovery is not possible. For example, a terminally ill patient may begin to exhibit ADL, mobility and/or safety dependence requiring OT services. The fact that full or partial recovery is not possible or rehabilitation potential is not present, does not affect MR coverage decisions. The deciding factor is whether the services are considered reasonable, effective, treatment for the patient's condition and they require the skills of an occupational therapist, or whether they can be safely and effectively carried out by nonskilled personnel, without the occupational therapist's supervision. The reasons for OT must be clear to you, as well as their goals, prior to a favorable coverage determination. They often require review at Level III.

It is essential that the provider documents the updated status in a clear, concise, and objective manner. Objective tests and measurements are stressed when these are practical. The occupational therapist selects the appropriate method to demonstrate current patient status. However, the method chosen, as well as the measures used, should be consistent during the treatment duration. If the method used to demonstrate progress is changed, the reasons for the change should be documented, including how the new method relates to the old. You must have an overview of the purpose of treatment goals in order to compare the patient's current functional status to that in previous reporting periods.

Documentation of the patient's current functional status and level of assistance required compared to previous reporting period(s) is of paramount importance. The deficits in functional ability should be clear. Occupational therapists must document functional improvements (or lack thereof) as a result of their treatments. Documentation of functional progress must be stated whenever possible in objective, measurable terms. The following illustrates these principles and demonstrates that significant changes may occur in one or more of these assistance levels:

a. Change in Level of Assistance.--Occupational therapist's document assistance levels by describing the relationship between functional activities and the need for assistance. Within the assistance levels of minimum, moderate, and maximum, there are intermediate gradations of improvement based on changes in behavior and response to assistance. Improvements at each level must be documented. Documentation should compare the current cognitive and physicial level achieved to that achieved previously. While the need for cognitive assistance often is the more severe and persistent disability, the requirement of physical assistance often is the major obstacle to successful outcomes and subsequent discharge. Interpret the levels as follows:

o Total Assistance is the need for 100 percent assistance by one or more persons to perform all physical activities and/or cognitive assistance to elicit a functional response to an external stimulation.

A patient requires total assistance if the documentation indicates the patient is only able to initiate minimal voluntary motor actions and requires the skill of an occupational therapist to develop a therapeutic program or implement a maintenance program to prevent or minimize deterioration.

A cognitively impaired patient requires total assistance when documentation shows external stimuli are required to elicit automatic actions such as swallowing or responding to auditory stimuli. Skills of an occupational therapist are needed to identify and apply strategies for eliciting appropriate, consistent automatic responses to external stimuli.

o Maximum Assistance is the need for 75 percent assistance by one person to physicially perform any part of a functional activity and/or cognitive assistance to perform gross motor actions in response to direction.

A patient requires maximum assistance if maximum OT physical support and proprioceptive stimulation is needed for performance of each step of a functional activity, every time it is performed.

A cognitively impaired patient, at this level, may need proprioceptive stimulation and/or one-to-one demonstration by the occupational therapist due to the patient's lack of cognitive awareness of other people or objects in the environment.

o Moderate Assistance is the need for 50 percent assistance by one person to perform physical activities or constant cognitive assistance to sustain/complete simple, repetitive activities safely.

A physically impaired patient requires moderate assistance if documentation indicates that moderate OT physical support and proprioceptive stimulation is needed for the patient to perform a functional activity, every time it is performed.

The records submitted should state how a cognitively impaired patient, at this level, requires intermittent one-to-one demonstration or intermittent cueing (physical or verbal) throughout performance of the activity. Moderate assistance is needed when the occupational therapist/caregiver needs to be in the immediate environment to progress the patient through a sequence to complete a functional activity. This level of assistance is required to halt continued repetition of a task and to prevent unsafe, erratic or unpredictable actions that interfere with appropriate sequencing.

o Minimum Assistance is the need for 25 percent assistance by one person for physical activities and/or periodic, cognitive assistance to perform functional activities safely.

A physically impaired patient requires minimum assistance if documentation indicates that activities can only be performed after physical set-up by the occupational therapist or caregiver, and if physical help is needed to initiate, or sustain an activity. A review of alternate procedures, sequences and methods may be required.

A cognitively impaired patient requires minimal assistance if documentation indicates help is needed in performing known activities to correct repeated mistakes, to check for compliance with established safety procedures, or to solve problems posed by unexpected hazards.

o Standby Assistance is the need for supervision by one person for the patient to perform new activity procedures which were adapted by the therapist for safe and effective performance.

A patient requires standby assistance when errors and the need for safety precautions are not always anticipated by the patient.

o Independent Status means that no physical or cognitive assistance is required to perform functional activities.

Patients at this level are able to implement the selected courses of action, consider potential errors and anticipate safety hazards in familiar and new situations.

b. Change in Response to Treatment Within Each Level of Assistance.--Significant improvement must be indicated by documenting a change in one or more of the following categories of patient responses within any level of assistance:

o Decreased Refusals. The patient may respond by refusing to attempt performance of an activity because of fear or pain. The documentation should indicate what activity and performance is refused, the reasons, and how the OT plan addresses them.

These responses are often secondary to a change in medical status or medications. If the refusals continue over several days, the therapy program should be put on "hold" until the documentation indicates the refusal response has changed and the patient is willing to attempt performance of functional activities.

For the cognitively impaired patient, refusal to perform can escalate into agressive, destructive or verbally abusive behavior if pressed by the therapist or caregiver to perform. In these cases, a reduction in these behaviors is significant and must be clearly documented, including the skilled OT provided to reduce the abnormal behavior.

For the psychiatrically impaired patient, refusals to participate in an activity frequently are symptoms of the diagnosis. This patient should not be put on a "hold" status due to refusals. If the documentation indicates the patient is receiving OT, contacted regularly, and actively encouraged to participate, medically review the claim to determine if reasonable and necessary skilled care has been rendered.

o Increased Consistency. The patient may respond by inconsistently performing functional tasks from day-to-day or within a treatment session.

Approve the claim when the documentation indicates a significant progression in consistency of performance of functional tasks within the same level of assistance.

o Increased Generalization. The patient may respond by applying previously learned concepts and performance of one activity to another, similar activity. The records submitted should document a significant increase in scope of activities that the patient can perform, the type of activities, and the skilled OT services rendered.

c. A New Skilled Functional Activity is Initiated.--Two examples of skilled care are:

o Adding teaching of lower body dressing to a current program of upper body dressing;

o Increasing the ability to perform personal hygiene activities for health and social acceptance.

d. A New Skilled Compensatory Technique is Added.--(With or without adapted equipment.) Two examples are:

o Teaching a patient techniques such as one-handed shoe tying;

o Teaching the use of a button hook for buttoning shirt buttons.

e. Length of Time in Treatment.--The acceptable length of time in treatment for various disorders is determined by the patient's functional abilities and progress as reflected in the documentation.

5. Level of Complexity of Treatment.--Base decisions on the level of complexity of the services rendered by the occupational therapist and not what the patient is asked to do. Examples of complexity of treatment are:

a. Skilled OT.--The documentation must indicate that the severity of the physical/emotional/perceptual/cognitive disability requires complex and sophisticated knowledge to identify current and potential capabilities. In addition, consider instructions required by the patient and/or the patient's caregivers. Instructions may be required for activities that most healthy people take for granted. The special knowledge of an occupational therapist is required to decrease or eliminate limitations in functional activity performance imposed by illness or disability. Occupational therapists must often address underlying factors which interfere with the performance of specific activities. Some of these factors could be cognitive, sensory, or perceptual deficits.

The occupational therapist modifies the specific activity by using adapted equipment, making changes in the environment and surrounding objects, altering procedures for accomplishing the task, and providing specialized assistance to meet the patient's current and potential abilities. Skilled services include, but are not limited to reasonable and necessary:

- Evaluations of the patient;
- Determinations of effective goals and services with the patient and patient's caregivers and other medical professsionals;
- Analyzing and modifying functional tasks;
- Determinating that the modified task obtains optimum performance through tests and measurements;
- Providing instructions of the task(s) to the patient/family/caregivers; and
- Periodically reevaluating the patient's status with corresponding readjustment of the OT program.

A period of practice may be approved for the patient and/or patient's caregivers to learn the steps of the task, to verify the task's effectivnesss in improving function, and to check for safe and consistent activity performance.

b. Nonskilled OT.--When the documentation indicates a patient has attained the therapy goals or has reached the point where no further significant improvement can be expected, the skills of an occupational therapist are not required to maintain function at the level to which it has been restored. Examples of maintenance procedures are:

- Daily feeding programs after the adapted procedures are in place;
- Routine exercise and strengthing programs;
- The practice of coordination and self-care skills on a daily basis; and
- Presenting information on energy conservation or pacing, but not having the patient perform the activity.

You may approve a claim because the patient requires the judgment and skills of the occupational therapist to design a safe and effective maintenance program and make periodic checks of its effectiveness. The services of an occupational therapist in carrying out the established maintenance program are not considered reasonable and necessary for the treatment of illness or injury and may not be approved.

6. Reporting on New Episode or Condition.--Occasionally, a patient who is receiving or who has received OT services, experiences a new illness. The provider must document the significance of any change to the patient's functional capabilities. This may be by pre and post episodic through nursing notes or physician reports. If the patient is receiving treatment, it might be lengthened. If the patient has completed treatment for the functional deficit; a significant change in the patient's functional status must be documented which warrants a new treatment plan.

3906.1 Other MR Considerations.—

A. Pain.—Documentation describing the presence or absence of pain and its effect on the patient's functional abilities must be considered in MR decisions. A description of its intensity, type, changing pattern, and location at specific joint ranges of motion materially aids correct MR decisions. Documentation should describe the limitations placed upon the patient's ADL, mobility and/or safety, as well as the subjective progress made in the reduction of pain through treatment.

B. Therapeutic Programs.--The objective documentation should support the skilled nature of the program, and/or the need for the design and establishment of a maintenance OT program. The goals should generally be to increase functional abilities in ADL, mobility or patient safety. Documentation should indicate the goals and type of program provided.

Approve claims when the therapeutic program, because of documented medical complications, the condition of the patient, or complexity of the OT employed, must be rendered by, or under, the supervision of an occupational therapist. For example, while functional ADL may often be performed safely and effectively by nonskilled personnel, the presence of fracture nonunion, severe joint pain, or other medical or safety complications may warrant skilled occupational therapist intervention to render the service and/or to establish a safe maintenance program. In these cases, the complications and the skilled services, they require, must be documented by physician orders and/or occupational therapist notes. To make correct MR decisions, the patient's losses and/or dependencies in ADL, mobility and safety must be documented. The possibility of adverse effects from the improper performance of an otherwise unskilled service does not make it a skilled service unless there is documentation to support why skilled OT is needed for the patient's medical condition and/or safety.

Approve establishment and design of a maintenance exercise program to fit the patient's level of ADL, function, and any instructions supportive personnel and/or family members need to safely and effectively carry it out. Reevaluation may be approved when reasonable and necessary to readjust the maintenance program to meet the changing needs of the patient. There must be adequate justification for readjusting a maintenance program, e.g., loss of previous functional gains.

C. Cardiac Rehabilitation Exercise.--Occupational therapy is not covered when furnished in connection with cardiac rehabilitation exercise program services (see Coverage Issues Manual 35-25) unless there is also a diagnosed noncardiac condition requiring it e.g., where a patient who is recuperating from an acute phase of heart disease may have had a stroke which requires OT. (While the cardiac rehabilitation exercise program may be considered by some a form of OT, it is a specialized program conducted and/or supervised by specially trained personnel whose services are performed under the direct supervision of a physician.)

D. Transfer Training.--The documentation should describe the patient's functional limitations in transfer ability that warrant skilled OT intervention. Documentation should include the special transfer training needed to perform functional daily living skills and any training needed by supportive personnel and/or family members to safely and effectively carry it out. Approve transfer training when the documentation supports a skilled need for evaluation, design and effective monitoring and instruction of the special transfer technique for safety and completion of the functional activities of daily living or mobility task.

Documentation that supports only repetitious carrying out of the transfer method, once established, and monitored for safety and completion is noncovered care.

E. Fabrication of and Training in Use of Orthoses Prostheses and Adaptive Equipment.--Approve reasonable and necessary fabrication of orthoses, prostheses, adaptive equipment, and any reasonable and necessary skilled training needed in their safe and effective use. The documentation must indicate the need for the device and training required.

F. OT Forms.--Documentation may be submitted on a specific form or may be copies of the provider's record. You may require a specific form if you find it more efficient than using provider records; however, it must capture the needed MR information. If you choose to require a particular form, show the OMB clearance number. The information must be complete. If it is not, return the bill for the additional information and request the missing information. The information you require to review the bill is that required by an occupational therapist to properly treat a patient.

G. Certification and Recertification.--OT services must be certified and recertified by a physician. They must be furnished while the patient is under the care of a physician. They must be furnished under a written plan of treatment established by the physician or a qualified occupational therapist providing such services. If the plan is established by a occupational therapist, it must be reviewed periodically by the physician. The plan of care must be established (reduced to writing by either professional or the provider when it makes a written record of the oral orders) before treatment is begun. When outpatient OT services are continued under the same plan of treatment for a period of time, the physician must certify at intervals of at least every 30 days that there is a continuing need for such services. Obtain the recertification when reviewing the plan of treatment since the same interval of at least 30 days is required for the review of the plans. Recertification must be signed by the physician who reviewed the plan of treatment. Any changes to the treatment plan established by the occupational therapist must be in writing and signed by the occupational therapist or by the attending physician. The physician may change a plan of treatment established by the occupational therapist, the occupational therapist may not alter a plan of treatment established by a physician.

3906.2 Occupational Therapy Availability.—There may be instances where two or more disciplines are providing therapy services to the same patient. There may also be occasions where these services are duplicative. In many instances, however, the description of the services appears duplicative, but the documentation proves that they are not. Some examples where there is not a duplication:

- Transfers - Physical therapy instructs the patient in transfers to ascertain the level of safety with the techniques. Occupational therapy instructs and utilizes transfers as they relate to the performance of daily living skills, i.e., transfer from wheelchair to bathtub to bathe.

- Pulmonary - Physical therapy teaches the patient an adapted breathing program. Occupational therapy carries the breathing retraining program into activities of daily living training.

- Hip Fractures/Arthroplasties - Physical therapy instructs the patient in hip precautions and gait training. Occupational therapy carries out and reinforces the precautions when training the patient in activities of daily living, e.g., lower extremity dressing, toileting, and bathing.

- CVA - Physical therapy utilizes upper extremity neurodevelopmental (NDT) techniques to assist the patient in positioning the upper extremities on a walker and in gait training. Occupational therapy utilizes upper extremity neurodevelopmental (NDT) techniques to increase the functional use of the upper extremity for dressing, bathing, grooming, etc.

Prepayment Medical Review of All Bills

3915. PREPAYMENT MEDICAL REVIEW

Conduct a MR of all Medicare claims (except outpatient hospital) on a prepayment basis. You have the option to perform pre-or postpayment review on hospital outpatient claims:

If you perform MR of outpatient hospital claims on a postpayment basis, complete the review, notify the provider of denials, and initiate recovery of the overpayment if applicable, within:

o Thirty days of the date the claim was processed if medical evidence was submitted with the bill or was not required; or

o Sixty days of the date the claim is processed if medical evidence had to be obtained from the provider.

Initiation of overpayment recovery means, at the minimum, withholding or offsetting provider payments, or taking refund action against the provider.

You may request the RO to approve short-term relief from prepayment review requirements if backlogs occur because of staffing or systems problems. If approved, the postpayment review requirements listed above apply.

Continue postpayment audits, do not confuse with MR of Medicare claims during the claims processing cycle, as appropriate.

3916. COVERAGE COMPLIANCE REVIEW FOR HHA CLAIMS

Each year perform coverage compliance reviews by reviewing medical records onsite for a prescribed number of HHAs. The purpose of the review is to assure that HHAs are providing services in accordance with Medicare program requirements.

3916.1 Selection of HHAs.—Conduct coverage compliance reviews on a 20 percent sample of HHAs using the following priorities:

o Review newly participating HHAs which reach their anniversary date during the review year. (An agency that has changed intermediary is not a "newly participating HHA.")

o With RO approval exclude agencies with low utilization of processed visits (less than 100 visits in a 6 month period).

o Prepare a listing by State, using the waiver of liability denial data or other equivalent denial data for medical necessity.

o Array the providers from highest to lowest denial rates. Select from each State HHAs with the highest denial rate averaged over the year. Select 2 percent of HHAs with the lowest denial rates. Exclude any agency with fewer than two quarters of statistics.

o If you have fewer than 20 HHAs, coverage compliance audits are not required unless the RO deems a review necessary.

o Complete reviews by the end of each FY (i.e., 9/30). Ranking may be done at anytime that permits timely completion of your reviews.

o The RO may approve selections for review on a basis other than denial rates, e.g., profiling, aberrant patterns.

NOTE: If your 20 percent is not reached, add HHAs which have been identified during postpayment audit or MR as having potential problems.

3916.2 Coverage Compliance Review.—

A. Sample Selection.—Select for review at least 20 beneficiaries currently or recently served by the agency. Select from patient history paid claims files or any appropriate in-house source (e.g., check registers, remittance advice).

After selecting the beneficiaries files, gather 3 months of bills processed within 6 months of the scheduled review for each. Document that 3 months sequential billings were selected.

Review, for the sample beneficiaries, at least 100 visits. If the total visits are fewer than 100, add as many beneficiaries as necessary to assure review of at least 100 visits.

B. File Compilation.—After gathering the history files and paid claims for the sample beneficiaries, collect all information available in-house with respect to the services rendered.

C. Notification of Selection for a Coverage Compliance Review.—Advise the HHA by telephone of your visit 24 hours in advance, followed by a written confirmation. Do not provide the HHA with advance knowledge of which records will be reviewed. Do not reschedule the visit unless unavoidable.

D. Onsite Review.—

1. Staff.—To perform the review, use staff who have authority to deny claims. This process intends that denials be made during the onsite review. Only where a question arises which requires physician consultation should the pertinent records be photocopied for the physician's review. In these cases, the final decision to deny the claim is made by the physician reviewer, based upon information gathered in the onsite review.

2. Points to Address.—Include the following in your review:

- Is patient homebound? (See §3120.4.);
- Is patient's residence an 1861(j)(l) facility? (See §3120.5.);
- Were services furnished under a plan of treatment? (See §3120.3.);
- Was the plan put into writing timely? (See §3120.3.);
- Is the plan complete? (See §3120.3, par. 1 & 2.);
- Were changes or extensions made in accord with policy? (See §3120.3,.);
- Did the HHA count the visits accurately? (See §3124.);
- Were length and frequency of aide visits accurate? (See §3124.2.);
- Were evaluation visits billed only when appropriate? (See §3124.3.);
- Were excluded services supplied? If yes, enumerate. (See §§3125, 3150.);

- Was the physician certification requirement met? (See §§3128, 3326-3329.);

- Were the services rendered medically necessary? (See §§3117-3119.);

- Were the visits billed consistent with Medicare coverage requirements? (See §§3116-3119.);

- Were medical appliances and/or medical supplies appropriately ordered and/or supplied? (See §3119.3.); and

- Do the records support the evidence submitted originally? (See §3902.)

3. Record Review.--Compare prepayment information to the medical record to determine the accuracy of the information. Evaluate what information, or lack thereof, influenced the prepayment coverage decision.

Review all claims from the earliest date through the date of the onsite review. Although the provider has the option to bill some of the unbilled services as noncovered, you may have to make a coverage decision on services rendered through the date of the onsite review.

Do not review services prior to the period of the selected claims unless the issue is homebound status. Where that question is raised, review all previous records to determine when the patient ceased to meet that criterion.

NOTE: Where the medical records do not contain documentation that a service was rendered, deny the service and identify an overpayment. There is no provision for a provider to submit late documentation of such visits.

4. Copying Records.--Where you deny services, photocopy the pertinent medical records. Obtain copies of records where physician consultation is needed before a decision is made, or where records may have been altered. Do not routinely photocopy medical records for review following the onsite visit.

5. Entrance and Exit Interviews.--Hold both entrance and exit interviews. Explain in the entrance interview its scope and purpose. Answer staff questions. Exhibit I is a sample checklist which could facilitate the entrance and exit interviews.

During the exit interview, discuss the tentative findings. Detail what services were denied and why. The discussion should be sufficient to enable the agency to provide comments on the cases involved.

Where physician review is required after the exit interview, complete it within 7 days of the date of the interview. Notify the agency in writing of any additional services which you determine are noncovered.

Within 2 weeks of the exit conference, or receipt of the letter regarding the physician's findings, whichever is later, the agency may submit written comments on the denied services. Consider any comments received onsite or in writing.

Finalize your findings within 6 weeks after the exit conference. Do not alert the agency to any indications of fraud or abuse which you may have found. Refer instances of possible fraud or abuse to the OIG.

E. Completion of the Individual Case Worksheet.--For each case reviewed, complete an individual worksheet. A sample is in Exhibit II. The worksheet may take any form you choose, as long as the following information is contained:

o Provider name;
o Provider number;
o Beneficiary's last name, first name, middle initial;
o Beneficiary's HICN;
o Name of the physician on the plan of treatment;
o Start of care date;
o Billing periods;
o Total visits;
o Total charges;
o Date of first visit reviewed;
*o Date of last visit reviewed;
o Type and number of visits denied on prepay review;
o Principal and other diagnoses;
o Date of the onset of illness;
o Specific issues to review according to SS3116-3128, and 3326-3329. Item 15 (homebound) includes why the patient is, or is not, considered homebound;
*o Number of visits ordered according to the plan of treatment by type, for the period of review;
o Number of visits billed as covered during the period of review, by type;
*o Number of visits rendered by type, for the period of review regardless of payer;

- *o Month and day of visits not documented in the medical record, by type;
- o Number of visits covered on prepayment review, by type;
- o Number and type of visits noncovered on prepayment review; and
- *o Number and type of visits noncovered on the onsite review.

*Includes all visits from the earliest date of the selected claims through the date of the onsite review. (See Subsection 2A.)

Include a discussion of each noncovered service.

F. Impact of Adverse Review Findings.--

1. Impact Upon Payment.--Where care is found to have been custodial or not medically necessary, deny the claim. Apply the waiver of liability provision. (See §3432.) Consider these denials in your calculation of the denial rate in determining whether the provider qualifies for a favorable waiver presumption. Do not count visits not yet billed. (See §§3707-3712 where the provider is determined to be liable.)

Where care is not covered for a reason for which waiver of liability provisions do not apply (e.g., lack of physician certification) deny the claim. In these cases, determine the amount of overpayment and recover it. (See §§3707-3712.) There may be cases where services which were previously denied are covered. Pay for them and credit the denial rate for these visits.

2. Impact on Prepayment Review.--Put on 100 percent MR, beginning with the date of final notification, HHAs in which noncovered visits exceed more than 5 percent of the visits processed. Retain the HHA on 100 percent MR for at least one calendar quarter.

3. Other Impact.--Target intensive provider education on areas identified as problems. Conduct educational activities with individual HHAs where indicated.

Refer suspected cases of fraud or abuse to the OIG.

G. Distribution of Findings.--Send a letter to the HHA with your findings. Include:

- o Specifics of denied care; and
- o Impact on prepayment review or documentation requirements.

Release the letter within 6 weeks after the exit conference.

For denied services, send the beneficiary a notice if one would have been sent in the course of prepayment review.

Advise the certifying physician in writing of the denials resulting from the onsite reviews. State:

- Period reviewed;
- Number and type of services denied;
- Reason(s) the services were denied; and
- Your personnel for the physician to contact.

3916.3 Completion of the Quarterly Report of Coverage Review Activity (Exhibit III).—Complete the Quarterly Report of Coverage Review Activity by the end of the month following the close of the calendar quarter. Send it to:

Health Care Financing Administraton
Office of Program Operations Procedures, BPO
1-H-3 Meadows East Bldg.
6325 Security Blvd.
Baltimore, MD 21207

Send a copy to the RO.

A. Instructions for Completion.—

1. Item 1.—Enter your number.

2. Item 2.—Enter the month and year of the last month of the calendar quarter in which the final result was released.

3. Item 3.—Enter the number of your RO (i.e., I-X).

4. Item 4.—Enter the provider's name.

5. Item 5.—Enter the provider's number.

6. Item 6.—Enter all code(s) appropriate to the reason(s) for the onsite review.

   - Enter "1" if the agency was reviewed because of a high denial rate;
   - Enter "2" if the agency was reviewed because it is a newly certified provider;
   - Enter "3" if the agency with a low denial rate was reviewed; and
   - Enter "4" if the agency was reviewed for other reasons, e.g., because of prior year's review findings, profiling or aberrant patterns of care.

7. Item 7.—Enter the total number of visits billed as covered during the 3 months for the sample beneficiaries.

8. Item 8.—Enter the total number of visits which were denied in prepayment bill review during the 3 months for the sample beneficiaries.

9. Item 9.—Enter the total visits reviewed onsite.

10. Item 10.—Enter total visits denied because of onsite review. Include any visits denied on prepayment review (Item 8) which continue to be denied.

11. Item 11.—Enter the number and type of visits found to be noncovered and denied because of onsite review (Item 10).

12. Item 12.—Enter the total charges for the noncovered services in Item 11 by type of visit.

13. Item 13.—Enter the number of visits paid under waiver because of onsite review by type of visit (Item 11).

14. Item 14.—Enter the total amount paid under waiver for visits (Item 13) by type of visit.

15. Item 15.—Enter the pertinent costs for performing the onsite review. Include salary, per diem, travel, clerical time, computer time prior to and after review, pulling cases, etc.

16. Item 16.—Enter the number of visits denied for services which did not meet the intermittent requirements. Include the number of visits denied where the patient was determined not to be homebound.

17. Item 17.—Enter the total charges for services denied in Item 16, i.e., not intermittent or homebound.

HOME HEALTH AGENCY COMPLIANCE REVIEW CHECKLIST

AGENCY NAME____________________ DATE OF AUDIT__________
PROVIDER NUMBER____________________ AUDITOR__________
CONTACT PERSON____________________

1. BASELINE DATA:

a) Reason for audit____________________

b) Services offered____________________

c) Average total visits per month____________________

d) Hospital based/Freestanding____________________

e) Waiver of Liability denial record____________________

f) Medicare claims requests for medical information:

Frequency____________________
Types of cases____________________

g) Date of last State agency survey____________________

h) Geographic area served____________________

2. MEDICAL RECORDS:

a) Construction of sample record____________________

b) Method of recording visits____________________

c) Note unusual inclusions, i.e.. Pharmacy Evaluation__________

d) Adequacy____________________

EXHIBIT I (Cont.)

3. PHYSICIAN INVOLVEMENT:

a) Quality of relationship with agency staff__________________

b) Timeliness of Certification__________________

Procedure for securing certification__________________

Success of procedure__________________

Suggestions__________________

4. ADMISSION PROTOCOL:

a) Mechanism for referral of patients__________________

b) Physician's order for services secured__________________

c) Source of Patients:

Hospital, SNF__________________
Physician's office__________________
Other__________________

d) Information available prior to evaluation__________________

e) Plan of Treatment:

Who prepared__________________
Timeliness__________________
Physician involvement__________________

f) Frequency of Visits:

Who decided__________________
How determined__________________
Leeway__________________
Procedures to change frequency__________________

EXHIBI. I (Cont.)

5. INTERIM PROCEDURES:

a) Procedure for addition of a service modality________________
____

b) Procedure for interim physician orders________________
____

c) Visits by physician to the patient:

Frequency________________________________
Telephone contact with agency/patient________________

d) Frequency of changes in Plan of treatment, e.g., every 60 days
____
____

e) Timeliness of physician signature on interim changes
____
____

6. PATIENT ASSESSMENTS:

a) Diagnoses clearly listed________________________

b) Pertinent Diagnosis first________________________

c) Onset of conditions noted on record________________
____

d) Services and documentation fit diagnoses________________
____

e) Baseline patient data complete:

Social history________________________________
____

Medical history________________________________
____

"Normal activity"________________________________
____

Functional assessment________________________
____

Homebound status________________________________
____

EXHIBIT I (Cont.)

Frequency of reassessment of homebound status____________

Frequency of absences from home described____________

Care giver(s) described____________

Who assists in ADL's e.g., weekdays, weekends____________

f) Justification given for aide visits when adequate care giver available

g) Daily visits justified by documentation____________

h) Care of the dying patient:

Skilled services documented____________

"Hospice" type care documented____________

Hospice Interface____________

7. COMMUNITY SERVICES:

a) Brief summary of what is available____________

b) Meals on Wheels, Private help____________

8. BILLING PROCEDURES:

a) How are visits, supplies transcribed from record to claim

EXHIBIT I

b) Who is responsible for billing______________________
____

c) Questions on billing procedures______________________
____

d) Confirm procedure for obtaining information about other Third Party coverage
____

9. DISCHARGE PROCEDURE:

a) Written order by physician______________________
____

b) Check Notice of Noncoverage to beneficiary______________________
____

c) Check discharge procedure______________________
____
